

Academic Calendar 2018-2019

Fall Semester 2018	
Classes Begin	Wednesday, August 22
Last Day to Register/Add Classes	Tuesday, August 28
Last Day to Drop without a W	Tuesday, August 28
Labor Day, No Classes	Monday, September 3
Fall Break, No Classes	Saturday-Tuesday, October 6-9
Last Day to Drop/Withdraw with W	Friday, November 9
Thanksgiving Break, No Classes	Wednesday-Sunday, November 21-25
Reading/Study Day, No Classes	Thursday, December 6
Final Exams	Friday-Thursday, December 7-13
Last Day of Term	Thursday, December 13
Spring Semester 2019	
Classes Begin	Monday, January 14
Last Day to Register/Add Classes	Friday, January 18
Last Day to Drop without a W	Friday, January 18
Martin Luther King, Jr. Day, No Classes	Monday, January 21
Spring Break, No Classes	Saturday-Sunday, March 9-17
Easter Break, No Classes	Thursday-Sunday, April 18-April 21
Last Day to Drop/Withdraw with W	Friday, April 12
Reading/Study Day, No Classes	Thursday, May 2
Final Exams	Friday-Thursday, May 3-May 9
Last Day of Term	Thursday, May 9
Commencement	Saturday, May 11
Summer 1 2019	Monday, May 20 - Friday, June 21
Summer 2 2019	Monday, June 24 - Friday, July 26

The University

History

The University of Evansville, an independent, United Methodist Church-affiliated university, holds a strong position in character and quality among institutions of higher education throughout the nation. With five colleges and schools, including the Harlaxton College in England, the University provides outstanding educational opportunities in the liberal arts and sciences as well as in selected professions. The University offers more than 80 academic areas of study and a full range of degree programs, including associate's, bachelor's, master's, and doctoral degrees, certification programs, and adult education classes. Approximately 2,700 full-time and part-time students in credit programs from 42 states and 55 countries study on its beautiful 75-acre campus.

Founded in 1854 as Moores Hill Male and Female Collegiate Institute in southeastern Indiana, the school was relocated to Evansville in 1919 and renamed Evansville College. In 1967, after continued growth and organizational restructuring, the name was changed to the University of Evansville with the approval of the Indiana General Assembly.

Metropolitan Evansville is located on the banks of the Ohio River in southwestern Indiana. The city of about 122,000 residents serves as the cultural, industrial, and retail center for the Tri-State region encompassing southern Illinois, western Kentucky, and southern Indiana. Evansville is a comfortable drive from Cincinnati, Indianapolis, Louisville, Nashville, and St. Louis.

Mission

A Mission of Learning

The University of Evansville is dedicated to active learning and scholarship. We are committed to the liberal arts and sciences as a basis for intellectual and personal growth. The University endeavors to prepare women and men for lives of personal and professional service and leadership. The University is aware of the challenges of living in an international community and therefore adopts a global view in its programs and its vision.

The University of Evansville preserves its independent nature and values its ties to The United Methodist Church. It emphasizes undergraduate education and supports an array of liberal arts and sciences and professional programs. The University selects talented and motivated students and faculty. The student-faculty ratio promotes individual attention and optimal learning. The University values learning as a means of attaining freedom from ignorance and prejudice. Because education is a lifelong process of critical inquiry, the University commits resources to continuing education programs in the greater community.

Educational Objectives

The following educational objectives reflect the mission and character of the University of Evansville as well as nationally-recognized best practices for a liberal education that equips students to compete and thrive in an increasingly complex global society. Recognizing that a well-rounded education has important curricular and co-curricular components, the University envisions integrative learning that emphasizes connections within and between general education and the major course of study and that brings together diverse experiences from campus, community, and the larger world.

Graduates of the University of Evansville will:

Acquire broad foundational knowledge of the liberal arts and sciences through the general education program, including:

- Appreciation for creativity and artistic expression
- Knowledge of historical and cultural developments
- Insight into human behavior and social relations
- Understanding of the physical and natural world
- Cultivation of an international perspective

Develop and improve intellectual and practical skills, including:

- Written and oral communication
- Critical and creative thinking
- Quantitative literacy
- Problem-solving and research
- Collaboration and leadership

Understand, develop, and demonstrate personal and social responsibility, including:

- International citizenship
- Intercultural competence and appreciation of diversity
- Ethical reasoning and behavior
- Civic engagement, local and global
- Commitment to mental, physical, and spiritual well-being
- Commitment to lifelong learning
- Gain a depth of knowledge and competency in one or more disciplines of their choice

A University of Evansville education goes well beyond these objectives, which are intended merely to establish the common core of knowledge and skills upon which our students will build as they address contemporary and enduring questions, pursue personal growth, and prepare to engage the world as informed, ethical, and productive citizens.

Accreditation

The University of Evansville is accredited by the Higher Learning Commission. Information about the University of Evansville's accreditation can be obtained through the Higher Learning Commission; 230 South LaSalle Street, Suite 7-500; Chicago, Illinois, 60604-1411; hlcommission.org; 800-621-7440.

The University of Evansville is approved by the University Senate of The United Methodist Church. Additional accrediting bodies include: Association to Advance Collegiate Schools of Business International, National Association of Schools of Music, Accreditation Commission for Education in Nursing, Council for the Accreditation of Educator Preparation, Indiana Department of Education, Commission on Accreditation of Athletic Training Education, Commission on Accreditation in Physical Therapy Education, and The Accreditation Review Commission on Education for the Physician Assistant. The civil, computer, electrical, and mechanical engineering programs are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The computer science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

Approved by the National Strength and Conditioning Association, American Chemical Society, and the American Music Therapy Association, The University of Evansville is also a member of the National Association of Independent Colleges and Universities, Association of Schools and Colleges of The United Methodist Church, and the Association for Continuing Higher Education.

Because of accreditation by or membership in these organizations, qualified graduates are regularly accepted with full credit by graduate and professional schools throughout the nation.

Admission

Freshman Applicants

The University of Evansville seeks motivated students who desire an interactive learning experience within a close-knit academic and social community. In high school, students should follow a college preparatory program minimally including four years of English, three social sciences, three lab sciences, three mathematics courses, and strongly recommend two years of foreign language. Grade point average (GPA), course selection, standardized test scores, class rank, writing sample, and counselor evaluations are used to determine a student's admissibility. Extracurricular activities are also considered.

Students should submit the following information in applying to the University of Evansville: a completed application with official high school transcript and SAT or ACT scores. An essay and a counselor recommendation form are recommended. A test optional pathway is available for students who wish to apply without submitting SAT or ACT scores. Students selecting test optional will be required to submit an essay. Early Action deadline is December 1, with notification by December 15. Applications are accepted on a rolling basis after December 1 as space is available. Accepted students deciding to enroll at the University should send a nonrefundable \$300 deposit by May 1 to reserve their place in the freshman class.

Transfer Students

Transfer students are degree-seeking students who have graduated from high school or received their GED and have been enrolled at a regionally accredited college or university at any time since graduation or earning the GED. Courses with a grade of C- or higher will be considered for transfer credit to the University of Evansville. Interested transfer students should submit a transfer application and official transcripts from all post-secondary schools attended. Students with fewer than 24 credit hours must also submit an official high school transcript and standardized test scores. Transfer students may also submit a personal statement.

Transfer students are admitted on a rolling basis. Notification of admission status will be sent after a completed application is received, reviewed, and processed. Transfer students must send a nonrefundable \$150 deposit when they decide to enroll at the University.

Re-entry Admission

Students who have formerly been enrolled at the University of Evansville as degree-seeking and who wish to re-enroll following a semester or more of absence need to complete an application for re-entry admission. If the student has been enrolled elsewhere since leaving UE, all transcripts and a Dean of Students Recommendation form from the most recently attended university are needed as well. Formerly admitted students who have earned 10 credit hours or more since their departure from UE are considered transfer students and need to reapply for admission as a transfer student.

Re-entry students are admitted on a rolling basis. Notification of admission status will be sent once the application has been fully reviewed and processed. Re-entry students must send a non-refundable \$100 deposit when they decide to re-enroll at the University.

For questions concerning graduation under a particular catalog, please refer to the section titled Academic Policies and Procedures.

Part-Time Students

Students who wish to take classes toward a degree, whether they are full-time or part-time, must meet regular admission standards as

stated by the Office of Admission.

For more information and application materials, students should contact:

Office of Admission

University of Evansville

1800 Lincoln Avenue, Evansville, Indiana 47722

812-488-2468 ■ 800-423-8633, ext. 2468

admission@evansville.edu ■ www.evansville.edu

International Students

The University of Evansville welcomes international students to our campus. International students should submit an international student application online, official transcripts of all high school and university work, official TOEFL or IELTS scores, and proof of financial support for the first year of college expenses. Undergraduate applicants must score at least 61 on the Internet-based TOEFL or 5.5 on the IELTS test unless otherwise specified by the degree program. Students not receiving the minimum TOEFL or IELTS score may choose to start at the University of Evansville's Intensive English Center. For more information, contact:

Office of International Admission

University of Evansville

1800 Lincoln Avenue, Evansville, Indiana 47722

001-812-488-1392 or 001-812-488-2146

international@evansville.edu

www.evansville.edu

All students whose native language is not English must take the Michigan Test of English Language Proficiency in addition to the University's writing skills test as a part of registration for the first term. Test results determine placement in appropriate English credit-bearing courses.

Special Students

Students not wishing to pursue a degree may take courses at the University as "special students." Special students are granted permission to earn up to 24 credit hours at UE. After earning the first 24 hours of credit, an application for admission must be submitted or a special student extension must be requested. Special students are defined as the following:

- **Visiting/Transient Students** are currently enrolled at another accredited college or university who wish to take courses at UE but plan to graduate from their home institution
- **Concurrent Students** are currently enrolled in high school or are homeschooled and wish to take courses at UE
- **College Graduate Students** have a college degree but need additional undergraduate credit to earn special licensing or to prepare for graduate school
- **Personal Enrichment/Non-Degree Seeking Students** have graduated from high school or earned their GED, regardless of age, who wish to take courses for personal enrichment

Admission criteria are different for each special student category. For more information and a special student application, contact:

Office of the Registrar

1800 Lincoln Avenue, Evansville, Indiana 47722

812-488-2600

registrar@evansville.edu

www.evansville.edu

UE Guarantee

New Students

Beginning with the incoming class of Fall 2016, new UE students will be covered by the UE Guarantee. The Guarantee will rely on each student's commitment to follow a list of practical guidelines in exchange for the University's assurance that required courses are available, personal academic plans are developed, and personal counseling is made available. To qualify for the Guarantee, students must pursue a course of study that is intended for four-year completion*, have appropriate high school and English language proficiency preparation, and follow the guidelines below:

- Be a full-time, degree-seeking freshman student who follows the outlined course of study plan for graduation published by the academic department and maintains that program's academic progression and requirements.
- Successfully complete all prerequisite and required courses and GPA requirements each year to move forward in a declared major.
- Maintain full-time, consecutive enrollment for all four years in a course of study approved by the advisor.
- Maintain satisfactory academic progress as defined by the University registrar on page 45.
- Receive no academic or judicial sanctions as defined in the Student Handbook that would delay graduation.
- Some professional programs* and some experiences (such as co-ops, ChangeLab, and certain study abroad travel) may require more than four years to complete. For such programs, if the prescribed academic plan is followed and a student fails to graduate on time, UE will provide the hour or hours needed to complete the degree not to exceed one year (room and board not included).
- Changing majors after the first semester to/from programs like nursing, engineering, or music can prevent graduating in four years as these programs curriculum begin the first semester of the first year.

**Programs requiring more than 4 years include: music therapy, music education, clinical laboratory science, and engineering. More than one major, or multiple minors may also extend required time for a degree.*

Current Students

The UE Guarantee applies to incoming freshmen who matriculate at the University of Evansville beginning in Fall 2016. However, since the Guarantee is based on the quality of our existing programs, all current enrolled students benefit directly from the institutional resources the Guarantee ensures.

- Small class sizes enable all students' one-on-one access to high quality faculty engagement and mentorship.
- Internships and experiential education opportunities are an integral part of a UE education that helps our graduates be successful. All students and alumni have full access to UE's Center for Career Development resources now and after graduation.
- All full-time degree-seeking freshmen entering since the fall of 2015, except those receiving financial support from a non-U.S. governmental entity, received institutional financial aid.
- All UE students have the opportunity to study abroad. Additionally, a student's financial aid package applies to study abroad at Harlaxton College, which makes the Harlaxton program particularly affordable.

If you are a current student and have questions about the UE Guarantee, please contact the Office of the Registrar at 812-488-2600 or registrar@evansville.edu.

Financial Aid

The University of Evansville is eager to see that students have the opportunity to obtain an education that will enable them to maximize their abilities and to be of the greatest service to society. It strives to adhere to a consistent and equitable approach in the awarding of student financial aid. Many students rely on financial aid to help with college costs, and over 90 percent of the University's full-time students receive some type of financial assistance.

The University demonstrates its commitment to making high quality education affordable by offering several types of merit scholarships and awards as well as need-based assistance in the form of grants, loans, and on-campus employment. Students often have some combination of the four types of aid. Students are free to accept or reject any part of the financial aid offered. First-time applicants to UE are considered for scholarships and merit awards when they apply for admission. These awards are made possible through the generous gifts of donors.

Although the University is eager to help students, it believes that the principal responsibility for financing an education lies with students and their families who are expected to contribute as much as is reasonably possible toward education costs. The University's financial aid program exists primarily to help students who, without such aid, would be unable to attend UE.

Needs Analysis and Deadlines

The University adheres to the principles of financial aid administration established by the National Association of Student Financial Aid Administrators. To help judge student need and distribute financial aid fairly, the University asks that students and parents complete the Free Application for Federal Student Aid (FAFSA) on an annual basis. Submitting this form to the federal processor so that it is received by April 15th is mandatory to apply for assistance from the State of Indiana and is highly recommended for all students. Applications received after this date will be processed on the basis of funds available. To be eligible for virtually all of the assistance administered by the Office of Financial Aid, students must be enrolled full-time (12 or more credit hours).

Establishing Financial Aid Eligibility

Students must first be admitted to the University of Evansville before any type of financial aid can be offered or processed. International students must apply through the UE Office of International Admission and are eligible only for UE scholarships and UE work-study.

In order to be eligible for federal and state financial aid, a student must:

- Have a high school diploma or GED
- Be a US citizen or eligible noncitizen
- Have a valid Social Security number
- Comply with Selective Service registration, if male
- Not be in default on any federal student loan or owe a refund on a federal student grant

Continuing eligibility for federal and state financial aid requires that students file the FAFSA annually, maintain satisfactory academic progress, not be convicted under federal or state law of the sale or possession of drugs while receiving federal student aid, and continue to be degree-seeking students enrolled in appropriate aid-eligible credits.

Incoming freshmen will be notified beginning in December about

action taken on their applications. Returning students will receive their award notification in June.

UE Merit-based Scholarships

Merit-based scholarships are awarded only at the time of acceptance to UE. The types of scholarships offered, standards for selection, amounts, and renewal criteria may change with each new academic year. Awards are administered throughout the student's UE career according to the policy in place at the time the award is offered. University of Evansville merit-based scholarships are available for full-time enrollment during fall or spring semesters. Details about renewing UE merit-based scholarships can be found in the UE Financial Aid Award Guide available online at evansville.edu/financial_aid/policies.cfm.

Neither University of Evansville merit-based scholarships nor UE need-based grants are available for students in programs administered by the Center for Adult Education, RN to BSN, or Transition to Teaching; however, need-based aid from federal and State of Indiana sources may be available.

Need-based Financial Aid

The University of Evansville assesses eligibility for all forms of need-based financial aid through the Free Application for Federal Student Aid (FAFSA). Need-based aid may come from federal, state, and University sources, and may include grants (gift assistance that is not repaid), student loans (repaid by the student after college), and federal work-study (a job on campus).

We encourage all UE students to file the FAFSA annually beginning October 1st each year for the next academic year. Indiana residents must file by April 15th each year to be considered for state grants. Students should file no later than May 1st to ensure maximum consideration for all forms of need-based aid for the next academic year. Each type of need-based aid has specific rules that govern its use, and details are offered in the UE Financial Aid Award.

Veterans Benefits

Information on all veteran educational benefits is available from the Department of Veterans Affairs online at www.gibill.va.gov. Campus advisement of veterans regarding VA educational benefits is conducted through the Office of Financial Aid in conjunction with the UE Office of Veterans Affairs.

Duration

Financial aid from the University and/or state resources for full-time students is normally available for eight semesters only or when requirements for the first bachelor's degree have been met, whichever comes first. However, students may apply for the continuation of University need-based aid for a fifth year if extenuating circumstances have precluded the student from obtaining a degree in four years. Federal Pell Grant and Federal Direct Loans may be available for a fifth year based on need as demonstrated on the FAFSA. UE students enrolled in programs designed to last longer than four years may be eligible for institutional aid for the standard length of their program.

Satisfactory Academic Progress Policy

The United States Department of Education (Higher Education Act of 1965, as amended) requires that students maintain satisfactory progress toward completing their degree in order to receive financial

aid. The Office of Financial Aid is required to check three standards: quantitative (pace of progression), qualitative (GPA), and maximum time frame for receiving aid.

These standards, known as Satisfactory Academic Progress (SAP), govern eligibility for students who want to establish or continue aid eligibility for all federal, state, and institutional financial aid programs including grants, scholarships, work-study, and student and parent loans. Many private loans also require SAP.

SAP applies to a student's entire degree program, including terms (fall, spring, and summer) in which financial aid was not applied for or disbursed.

The UE Office of Financial Aid reviews all three standards of Satisfactory Academic Progress at the end of each semester (fall, spring, and summer). Satisfactory Academic Progress will be measured at the end of each semester for all students. Both Summer 1 and Summer 2 terms combine to create one summer semester for financial aid purposes.

Quantitative Standards (Pace of Progression)

Students must, at a minimum, successfully complete 67 percent of all credit hours attempted. A student's total credit hours successfully completed (earned) will be divided by the credit hours attempted to determine whether the 67 percent completion rate requirement has been met.

Completed (earned) credits: Successfully completed credits include grades of A, B, C, or D (including plus or minus) and credits taken pass/fail, in which a P was earned. Unsuccessful grades consist of F, W, I, courses taken for audit, or any other grade that does not result in completed credits. Credits earned by examination will be considered completed credits.

Attempted credits: All credit hours for which a student registers at UE, those transfer credits that count toward the UE degree, and credits earned by examination are included in attempted credits. Grades of I or W will count as hours attempted, but not completed. If incompletes are later completed, they will be reflected when progress is again checked, or sooner, at the student's request.

Transfer Credits: Transfer credits that apply to a student's UE degree are included in both the credits attempted and the credits earned when calculating the completion percentage. Credits received for remedial courses or for courses that are not applicable to the student's UE degree are not included in either credits attempted or earned.

Repeated Courses: Courses that are retaken to improve a grade are counted in attempted hours each time the course is taken but only one passing grade is counted toward the credit hours earned in the completion rate. Students may retake a course for which they have previously received a grade of "F" as many times as it takes to successfully complete the class. However, students may only repeat a course one time in which they have received a passing grade. After one allowable time, the student cannot use federal assistance for future repeats. However, if the course is added to full-time enrollment of 12 or more credit hours, the student can receive federal aid based on full-time status.

Part-time Students: Cumulative GPA requirements are the same as for full-time students. The number of semesters required to complete the program will depend on the hours registered. Students must successfully complete the majority of the credit hours attempted each semester and maintain a 67 percent cumulative completion rate. However no student will receive financial aid once 150 percent of the required credit hours to complete the program have been attempted.

Second Degree Students: Officially accepted credits that apply to the degree program will count toward both credit hours attempted and credit hours earned.

Qualitative Standards (GPA)

Undergraduate students admitted to UE as freshman must have earned a minimum cumulative GPA of 2.0 by the end of their second academic year (4th regular semester) and each semester thereafter. Before the end of the 4th semester, these students must have the minimum cumulative GPA as shown below:

Credit Hours Earned GPA

Fewer than 30	1.6
30-59.99	1.9

All other students must maintain a minimum cumulative GPA of 2.0 at the end of each semester.

Maximum Time Frame for Eligibility

Federal Aid Standards: Federal regulations govern the maximum length of time a student may receive federal aid. For students pursuing a bachelor's degree, this timeframe is defined as 150 percent of the scheduled length of the program. For example, students in an academic program requiring 120 credit hours may attempt up to 180 credit hours (150 percent of 120 is 180 hours). Students pursuing an associate's degree requiring 72 credits may attempt up to 108 credit hours (150 percent of 72 is 108 hours). Other degree programs with differing credit hour requirements will have up to 150 percent of the required hours as their maximum. All UE attempted hours, including hours taken in a change from one major to another will apply toward the 150 percent total. For transfer students, the number of transfer credit hours accepted at the point of admission to UE will be used to calculate the student's remaining eligibility for the 150 percent maximum time frame calculation. Second undergraduate degree students are only eligible to receive loan funds. Students enrolled in a degree program which is equal to or lower than a degree already earned, will have the previous degree's accepted credit hours applied toward the student's current certificate or degree. The accepted credit hours will be counted toward the 150 percent maximum time frame calculation.

State of Indiana Grants: Full-time students in four-year degree programs may receive Indiana grant aid for a maximum of eight semesters or until the first bachelor's degree is earned, whichever comes first.

Financial Aid Warning: Students will be sent a warning if they fail to meet either the completion rate or minimum cumulative GPA standard as outlined. Students will be placed on warning for one semester during which they must come into compliance with the standard. Students not meeting SAP at the end of the warning semester will be placed on Financial Aid Suspension.

Financial Aid Suspension: Students who fail to meet the standards at the end of their warning semester will be ineligible for financial aid beginning with the next semester of attendance. (See appeals to regain eligibility.)

Students receiving grades of "F" in all courses attempted in any semester will be automatically ineligible for financial aid regardless of whether the student has previously been placed on financial aid warning. In evaluating satisfactory progress, a grade of "I" will be considered an "F" in calculating the pace of progression.

Students who pre-register for a subsequent semester before grades are evaluated and who use financial aid to defer tuition and fees may owe a financial aid repayment if they do not maintain satisfactory

academic progress and have been disqualified from financial aid once grades are posted and reviewed.

A student who is disqualified from financial aid more than one time for failure to meet these standards must meet with a financial aid counselor to discuss plans for re-establishing financial aid eligibility. Unless there are extenuating circumstances, a student in this category should expect to enroll for at least 12 semester credits without financial aid at UE and successfully pass all courses with a minimum of a 2.00 GPA to be reconsidered for financial aid.

Students are responsible for maintaining awareness of their SAP status for aid renewal whether or not they receive the official notifications. The Office of Financial Aid is not responsible for address changes that are not reported or for other problems with postal mail or email delivery.

Correcting Academic Deficiencies: Students who fail to meet the above standards will be ineligible for financial aid. It is important to remember that grade deficiencies can only be corrected at UE, but credits to correct a deficiency in credit hours earned can be taken elsewhere and transferred to UE through arrangement with the Office of Academic Advising. Students may request a review of their progress when a grade is changed, regardless of when that change occurs.

Appeals to regain eligibility: A student who fails to meet these standards and has lost eligibility for financial aid may appeal this decision. Appeals must be in writing and must be accompanied by appropriate supporting documents. In the appeal, the student must explain why he or she was not making progress and what has changed so that he or she will begin making progress. Appeals should be submitted to the Office of Financial Aid at least three (3) weeks before the beginning of the student's next semester of attendance to allow time for processing.

Reasons that may be acceptable for appeal are: 1) serious illness or accident affecting the student; 2) death, accident, or serious illness in the student's immediate family; 3) change in academic program; 4) or other serious extenuating circumstances. The student is limited to two appeals. If approved, the student will be placed on Financial Aid Probation for one semester and aid will be granted. If the student cannot meet SAP by the end of the probationary semester, the student must complete and submit to the Office of Financial Aid a SAP academic plan that shows when the student will be meeting SAP.

If the appeal for aid is denied, the student may choose to enroll without using financial aid in an effort to repair the SAP deficiencies. Students may request a review of their record following any term. If the SAP standards are met at the time of review, financial aid eligibility may be regained for subsequent terms of enrollment that year.

Financial Aid and On-Campus Residency Requirements

Most students are required to live in University-approved housing when they enter UE. For most students, the full renewal of UE financial aid (scholarships or grants) requires continued residency in UE-approved housing, even after satisfying their on-campus residency requirement. The residency requirements and associated aid policies differ for freshmen and transfers.

Freshmen: Freshmen* **must live in UE-approved housing for two years**, or the equivalent of four semesters. The Office of Residence Life may grant an exemption if the student meets one of the following criteria:

1. The student's local residence is with parents or legal guardians in Vanderburgh or contiguous counties;
2. The student has attained the age of 21 prior to the start of the academic year;

3. The student is married and/or lives with a dependent.

* *Residency requirement also applies to freshmen transfers (those entering UE in January after one semester at another institution). International students who have participated in the Intensive English Program may count their semester(s) in residence toward this requirement.*

Transfer Students: Transfer students who have not attained 60+ academic credit hours by the start of the academic year **must live in UE-approved housing when entering UE**. These hours can be a combination of hours earned at previous institutions and UE hours (excluding bridge, early-college, dual-credit, and advanced placement credit). Students with fewer than 60 hours may also request an exemption from the Office of Residence Life if they meet one of the following criteria:

1. The student's local residence is with parents, legal guardians, or immediate family members who are over the age of 21. Local residence must be in Vanderburgh or contiguous counties;
2. The student has attained the age of 21 prior to the start of the academic year;
3. The student is married and/or must live with a dependent.

Office of Residence Life: Information and details regarding housing and meal plans are found at www.evansville.edu/residence-life.

Financial Aid Reduction: Students who **were required to live in UE housing when entering UE**, and who choose to move off campus after satisfying the Office of Residence Life's residency requirement, will experience an annual reduction to their UE-funded financial aid of **\$4,500** (\$2,250 per semester). This reduction of aid will not apply to students who have elected to live on campus but later move off campus to live at home with parents in approved counties or to live with a spouse or dependent. Documentation may be required.

Regaining aid: Students who lost aid as a result of moving off-campus may regain the original value of their aid if they return to UE-approved housing.

Harlaxton and study abroad: Students attending Harlaxton College for a semester are considered to be living in University-approved housing and will NOT experience a reduction to their UE-funded financial aid. Students in UE-approved study abroad programs will not experience a reduction as long as the study abroad experience provides a housing opportunity similar to UE.

Ridgway Award: Recipients enrolling in 2011-12 or earlier are required to live on campus to retain the Ridgway Award. Students who wish to return to live with parents should consult with the Office of Financial Aid for an evaluation of alternative UE merit scholarship eligibility.

Students who entered UE prior to Fall 2013 may view the policy related to financial aid and housing status at [online at evansville.edu//tuitionandaid/current.cfm](http://online.at.evansville.edu//tuitionandaid/current.cfm).

Summer Aid

Work on campus, Federal Pell Grants, Federal SEOG, Federal Direct Loans, Direct PLUS loans, and private educational loans are the only forms of financial assistance available for students who wish to take summer classes. Students must take a minimum of six credit hours to be eligible for a federal loan in the summer. Summer is a "trailer," so eligibility for a federal loan in summer is based upon the year's eligibility for fall, spring, and summer. If a student borrows the maximum amount in the fall and spring, there will be no summer Direct Loan eligibility. Work on campus is not contingent upon enrollment during the summer, but only students who have not graduated and who will be returning to campus the following year will be eligible to apply. Students should contact the Office of Financial

Aid to obtain a summer application in late March before the summer term begins.

For More Information

Details and specific information about all financial aid, including that from the University of Evansville as well as the federal and state governments, are in UE's annually published Financial Aid Award Guide.

University of Evansville Financial Information Privacy and Safeguarding Guidelines

Background

Adequately securing customer information is not only the law, but it also makes good business sense. Above all, it is our ethical responsibility to safeguard this information while it is in our possession. When we show that we care about the security of personal information, we increase the level of confidence in our institution. Poorly managed customer data can lead to identity theft. Identity theft occurs when someone steals a consumer's personal identifying information to open new charge accounts, order merchandise, or borrow money.

Information Collected and Stored

As an educational institution, the University of Evansville collects, retains, and uses non-public financial information about individual students, as allowed by law, to provide services. Non-public financial information is collected from sources such as:

- Applications and/or other forms
- Financial transactions (checks, credit cards, and ACH)
- Information about transactions with us, our affiliates, or others
- Information we receive from consumer reporting agencies
- Information from governmental agencies

Information Shared

The University of Evansville may disclose non-public financial information about students with our business affiliates and other affiliated third parties under certain circumstances to provide services. Any non-public financial information sharing is conducted in strict adherence to applicable law. The University of Evansville will not disclose any non-public personal information to anyone except as permitted under law.

Who Receives Information and Why

The University of Evansville does not disclose any non-public financial information about our students, or former students, to anyone, except as permitted by law. We may exchange such information with our affiliates and certain nonaffiliated third parties (under limited circumstances) to the extent permissible under law to service accounts, report to credit bureaus, provide loan services, or provide other financial services related activities.

How Information is Protected

The University of Evansville understands that the protection of non-public financial information is of the utmost importance. Providing for administrative, technical and physical safeguarding of students' privacy is our obligation. We restrict employee access to customer information only to those who have a legitimate business reason to know such information, and we educate our employees about the importance of confidentiality and customer privacy.

Tuition and Fees for the Academic Year 2018-2019

TUITION	SEMESTER	ANNUAL
Traditional Undergraduate Programs:		
Full-time Undergraduate (12-18 credit hours)	\$17,650.00	\$35,300.00
Each Additional Hour	\$990.00 per hour	
Part-time Undergraduate (1-11 credit hours)	\$990.00 per hour	
Summer Sessions	\$540.00 per hour	
Non-Traditional Undergraduate Programs:		
RN to BSN	\$315.00 per hour	
Transition to Teaching	\$315.00 per hour	
Teaching (Associates to Bachelor's)	\$315.00 per hour	
Organizational Leadership	\$315.00 per hour	
University Studies	\$315.00 per hour	
Each Additional Hour	\$315.00 per hour	
Summer Sessions: regular program rate		
Graduate Programs:		
Doctor of Physical Therapy	\$17,650.00	\$35,300.00
Doctor of Physical Therapy - summer sessions	\$540.00 per hour	
Master of Physician Assistant Science: by cohort schedule		
Master of Science in Health Services Administration	\$920.00 per hour	
Master of Science in Public Health	\$525.00 per hour	
Master of Science in Athletic Training	\$525.00 per hour	
Master of Science in Public Service Administration	\$525.00 per hour	
Master of Science in Leadership	\$525.00 per hour	
Summer Sessions (HSA, PH, AT, PSA, ML): regular program rate	\$3,205.00	\$6,410.00
HARLAXTON-TUITION/ROOM/BOARD		
Comprehensive Fee (Tuition, Room and Board)	\$23,790.00	
Services Fee – Harlaxton (Transport, Technology, Health/Wellness)	\$1,110.00	
REGISTRATION AND/OR ACTIVITY FEES		
Registration Fee (Excludes FT students in Fall/Spring)	\$50.00 per session	
Student Activity Fee - Evansville and Harlaxton	\$163.00	\$326.00
Services Fee - Evansville	\$395.00	\$790.00
Technology Fee - (Excludes FT students in Fall/Spring)	\$98.00	\$196.00
Technology Fee - Summer Session and Winter Session	\$35.00 per session	

TUITION AND FEES FOR THE ACADEMIC YEAR 2018-2019

HOUSING	SEMESTER	ANNUAL
Residence Halls (Double Occupancy/Standard)		
Morton, Brentano, Hale, Moore, Schroeder and Powell	\$3,270.00	\$6,540.00
Jones Hall	\$4,515.00	\$9,030.00
Villages	\$3,740.00	\$7,480.00
Townhouses	\$4,615.00	\$9,230.00
MEALS		
Residence Hall Occupants:		
Anytime Dine Prime 7: unlimited meals/\$300 Ace Bucks	\$3,120.00	\$6,240.00
Anytime Dine Purple 7: unlimited meals/\$100 Ace Bucks	\$2,960.00	\$5,920.00
Anytime Dine Orange 5: unlimited weekday meals/\$175 Ace Bucks	\$2,870.00	\$5,740.00
Aces 12: 12 weekly meals + \$300 Ace Bucks	\$2,870.00	\$5,740.00
Seniors in Residence Halls, Villages, Townhouses and Commut-ers:		
Aces 7: seven weekly meals + \$200 Ace Bucks	\$1,245.00	\$2,490.00
SPECIAL FEES		
Applied Music	\$410.00 per credit	
Practice Teaching - Administrative Fee	\$60.00	
Practice Teaching	\$32.00 per week	
Prior Learning Credit	\$50.00 per hour	
Bridge/Dual Credit Program	\$125.00 per credit	
Co-op	\$390.00 perperiod	
Late Registration	\$190.00	
Parking	\$ 50.00 per year	
Credit by Exam	\$115.00 per credit	
Tuition Exchange	\$250.00 per year	
Course Audit Fee (no credits earned)	\$100.00 per credit	
Nursing Course Fee - Harlaxton	\$450.00	
Senior Scholars/Age 62 and up, non-degree seeking students	\$125.00 per credit	
Variable Section Fees: May apply with specific course registration.		
Finance Charge: 1.5% per month calculated on month-end balance.		
Special Notes: Independent Study classes for undergraduates are charged full/part-time rates.		
Rates are Subject to Change without notice.		

Institutional Charges and Financial Aid Refund Policy

All institutional financial aid will be refunded according to the institutional charges refund schedule shown below. In other words, all UE financial aid will be refunded according to the 100 percent, 80 percent, 60 percent, 40 percent, or 20 percent determination during the first four weeks. After four weeks, there are no refunds for such aid.

Institutional Charges: Tuition, on campus room and board, and the following fees: activity, registration, services, applied music, and any mandatory course related fees.

Non-Institutional Charges: All other fees and costs (special fees, books, insurance fees, off-campus living expenses, transportation expenses, and the like).

The amount of institutional charges that will be refunded is determined as follows:

- UE classes begin on Wednesday in fall and Monday in spring. Students who withdraw on or before the first day will receive a 100 percent refund.
- Students who withdraw or leave within the first week of class (Thursday through Wednesday in fall or Tuesday through Monday in spring) will receive an 80 percent refund.
- Students who withdraw or leave within the second week of class (next Thursday through Wednesday in fall or Tuesday through Monday in spring) will receive a 60 percent refund.
- Students who withdraw or leave within the third week of class (next Thursday through Wednesday in fall or Tuesday through Monday in spring) will receive a 40 percent refund.
- Students who withdraw or leave within the fourth week of class (next Thursday through Wednesday in fall or Tuesday through Monday in spring) will receive a 20 percent refund.
- After four weeks, there are no refunds for the above listed institutional charges.

Institutional Aid Refund Policy

Dropping Below Full-Time: Students who drop/withdraw from a course(s) during the first 4 weeks who remain enrolled but whose enrollment status becomes less than full-time will not be eligible for any University scholarships or grants.

Withdrawing From All Classes: Students who withdraw from all courses within the first 4 weeks will have their institutional scholarship and grants reduced according to the University's Institutional Tuition Refund Policy.

State Aid Refund Policy

The Indiana Commission of Higher Education (CHE) policy for refunds dictates that to be eligible for these awards, a student must be enrolled full-time at the end of the published add/drop period. Hence, if a student completely withdraws from the University before the end of the add/drop period, the student is not eligible for the state award, and the University must return 100 percent of the semester's award to CHE. After the add/drop period, the student's state aid would be 100 percent earned. State aid that requires full-time enrollment consists of the Higher Education Award, Freedom of Choice Award, Student Performance Incentives, Twenty-first Century Scholarship, Minority Teacher and State Nursing Scholarships, Mitch Daniels Scholarship. The Adult Student grant requires a minimum of 6 credit hours enroll-

ment and follows the same refund policy.

Veterans Benefits Refund Policy

The U.S. Department of Veterans Affairs requires all changes of enrollment to be certified within 30 days of action. For VA purposes, the effective date is the date the student withdrew or dropped the course. The U.S. Department of Veterans Affairs will process the information regarding change of enrollment and may establish a debt on the student, based on the effective date of the change. It is the responsibility of the student to satisfy any debt established on the student by the VA.

Students withdrawing from all courses in a semester will have the current, and any future certifications terminated. If the student completely withdraws on or before the first day of the term, the University of Evansville will return the tuition and fees payment received, directly to the VA, upon receipt of school debt letter. If the date of complete withdrawal is after the first day of the term, any credit balances that result from a refund of institutional charges will be issued to the student. In this case, the student will receive a debt letter from the Department of Veterans Affairs with balance due.

For students dropping a course(s), an enrollment update will be submitted to the VA. Tuition and fees are reported specific to the remaining credit hours, as if those were the only courses taken during the entire enrollment period. The VA will determine if the change in hours/charges requires some percentage of repayment from the student. If debt is established, the student will receive a debt letter from the Department of Veterans Affairs with balance due.

Federal Aid Refund Policy

Students are encouraged to meet with the Office of Financial Aid before changing enrollment by dropping a course or withdrawing from the University so they can be informed of the financial impact of their enrollment changes. Enrollment is set at the end of the add/drop period each term. Students must begin enrollment in all courses to be eligible for Federal Pell Grant funds and in at least one course to be eligible for all other aid.

I. All Programs, Except Center for Adult Education

This policy applies to all University programs, except those administered by the Center for Adult Education (CAE) and operate on a different academic calendar. Students enrolled in one of the University's CAE programs should refer to section (II) for the CAE refund policy. Refund information for summer is provided annually when summer course registration information becomes available to students.

Dropping Below Full-Time

Dropping a class starts with the Office of the Registrar. When a student drops a course(s) but continues as a part-time student (fewer than 12 semester hours), the tuition refund will be the difference between the initial billing and the revised billing multiplied by the percentage refund as outlined in the Institutional Charges Refund Policy. Students who drop below full-time during this refund period will have their eligibility for financial aid recalculated. Enrollment for federal and state financial aid will be set at the end of the add/drop period each term, and federal and state grants will not be adjusted after this date.

If a student drops below full-time after the first four weeks of the semester, there is no refund of charges or reduction of financial aid.

Students Withdrawing from All Courses

The official withdrawal process begins in the Office of the Dean of Students. The policy that determines the return of Title IV funds is defined by federal regulation and calculates earned federal financial aid on a per diem basis up to the 60 percent point in the semester. Federal financial aid that is considered “unearned” is returned to the appropriate source. The amount of earned federal aid is calculated by dividing the number of calendar days completed by the total number of calendar days in the semester. A calendar is developed each year and maintained in the Office of Financial Aid that outlines the percentage of federal aid earned during the first 60 percent of the term. There are no refunds (or return of Title IV funds) if the student attends classes after the 60 percent point as Title IV aid is considered to be 100 percent earned at that point.

There are two parts to a refund determination when the student withdraws from all classes.

1. Refund of institutional charges. The student’s withdrawal date for institutional charges is the date the student submits the completed withdrawal form to the Dean of Student’s Office. However, UE can determine a withdrawal date related to extenuating circumstances for a student who:
 - (a) left without notification because of extenuating circumstances, or
 - (b) withdrew because of extenuating circumstances but another party gave notification on the student’s behalf. Extenuating circumstances include illness, accident, grievous personal loss, or other such circumstances beyond the student’s control. The dean of students makes the determination in such matters.
2. Reduction (refund to the program) of institutional, state, or federal financial aid. The student’s withdrawal date for financial aid is determined based on whether the student officially withdrew from the University or stopped attending (walked away). For those who officially withdrew, the withdrawal date is the date the student signs the withdrawal form that is submitted to the dean of student’s office. For those who stopped attending and failed all classes, the withdrawal date is the latter of the midpoint of the semester, the date the student last attended classes, or the last date of academically related activity such as taking a test.

II. CENTER FOR ADULT EDUCATION PROGRAMS REFUND POLICY

If a student in the organizational leadership, university studies, masters of leadership, or masters in public service administration program finds it necessary to completely withdraw from the University before the end of a semester, the withdrawal process begins in the office of the director of adult education where an official date of withdrawal is determined for institutional charges refund purposes. A student’s withdrawal date is determined using the same process as for the federal financial aid refund policy. The director of adult education may determine a different withdrawal date for institutional charges due to extenuating circumstances if such conditions exist and can be documented.

The University’s Adult Education Program institutional charges refund policy treats each five-week courses in the semester as a separate courses. Students register and are billed for the semester at the beginning of the term, but refunds will be calculated based upon the five-week courses completed and/or the time in the five-week courses when the withdrawal occurs. Full refunds for the semester

will be given if the student cancels the enrollment before attending any class in the term. Refunds that occur during the semester will be calculated as follows for each five-week courses:

- During week one 75% refund*
- During week two 50% refund*
- During week three 0% refund*

All other information relative to the withdrawal process is described in the regular policy and conforms to it.

Dropping Adult Program Courses in the Semester

Federal financial aid eligibility is established by attending class. Students with Federal Pell Grants must begin attendance in each module. Because of the nature of the federal withdrawal policy, students who do not begin attendance in all modules and successfully complete those modules may have their aid prorated based on return of Title IV funds regulations.

III. Returning Federal Financial Aid to Accounts

Unearned federal financial aid will returned in the following order:

- Federal Direct Unsubsidized Loan
- Federal Direct Subsidized Loan
- Federal Direct PLUS Loan
- Federal Pell Grant
- Federal SEOG
- TEACH Grant
- Iraq Afghanistan Service Grant

The amount of aid to be returned is determined by the Federal Title IV Return of Funds calculation as provided by the U.S. Department of Education.

Any refunds of charges will be applied to the student’s account and all adjustments for aid, loans, fines and non-refundable fees or deposits will be made before eligibility for a cash refund is determined. If there is a student account balance resulting from the adjustments, the student is responsible for payment.

Sample Return of Funds calculations are available in the Office of Financial Aid.

IV. ADMINISTRATIVE FEES

Official Withdrawals

Students who officially withdraw from the University will be assessed a \$100 administrative fee.

Unofficial Withdrawals (Walkaways)

Students who simply “walk away” during a semester without officially withdrawing, and who earn all Fs or Incompletes will be assessed a \$500 administrative fee.

V. Student and Institutional Responsibilities in Regard to the Return of Title IV funds

The University’s responsibilities include:

- a. Providing each student with information about the refund policy.
- b. Identifying students who are affected by the policy.
- c. Completing the Title IV return of funds calculation for those affected. Notice will be sent/given to student within 30 days of the withdrawal date of the amounts that must be returned to UE.
- d. Returning federal financial aid within 45 days to the Title IV programs any funds that were disbursed directly to the student and which the student was determined to be ineligible for via the Return of Title IV funds calculation.

The student’s responsibilities include:

- a. Cooperating with UE in establishing satisfactory repayment arrangements if it is determined that a repayment is due for a Pell Grant because of the withdrawal.
- b. Returning his or her share of unearned aid attributable to a

- loan under the terms and conditions of the promissory note.
- c. Making payment to the University for any student account balance that results from the adjustments to the account.

Payment in full or payment arrangement should be made within 30 days of the student receiving notice of what is owed.

This policy conforms to the Federal Return of Title IV Funds (Section 668.22) regulations of the 1998 changes to the Higher Education Amendments. Title IV funds refer to the following federal financial aid programs: subsidized and unsubsidized Direct Stafford Loans, Federal Perkins Loans, Federal Direct PLUS Loans, Federal Pell Grants, Federal SEOG, and TEACH grants. Federal work-study funds are excluded from the refund calculation.

Cancellation of Housing and Food Service Contracts

When a student completely withdraws from all classes in the middle of the semester, UE housing and meal plan charges and refunds are governed by the Institutional Charges Refund Policy as “institutional charges.” However, the policies governing new or continuing students who remain enrolled but wish to cancel housing and/or meal plan charges are administered by the UE Office of Residence Life.

Completion of the Housing and Meal Plan Registration on WebAdvisor constitutes a legal and binding agreement between the student and the University of Evansville. A personalized and dated contract is generated upon completion of the online agreement on WebAdvisor. All housing contracts are binding for the duration of the academic year. There are specific provisions and restrictions regarding contract cancellation requests. Information regarding these policies is found online at www.evansville.edu/residencelife, in the student’s personal contract, and in the Residence Life Handbook.

UE Financial Aid Credit Balance Refund Policy

Students whose financial aid results in a credit balance will receive a refund within 14 days of the credit balance occurring unless the credit balance occurred before the term began, in which case, the refund will be issued within 14 days of the start of the term. A student may authorize UE to hold a credit on their account for future charges, but all credits will be refunded at the end of the award year.

Credit balances that result from a Federal Parent PLUS loan will be refunded or held per the borrower’s request on the PLUS Loan Authorization form. Parents may choose to have the balance refunded to them, refunded to the student, or held on the student account for future charges.

Should a credit balance occur as the result of an overpayment, the excess will be refunded to the payer.

Refunds are processed automatically at least weekly once the term begins and enrollment has been verified. If the student has elected an electronic refund, it will be processed as a direct deposit into the student’s bank account, using bank information provided by the student. If a student does not elect direct deposit, a paper check will be issued and mailed to the student’s permanent home address. Refund checks will be held for pick-up in the Office of Student Accounts upon request. Unclaimed checks will be mailed to the permanent home address after seven days.

Regardless of any authorization provided by the student and/or parent, credit balances that resulted from a federal loan will be refunded to the student/parent at the end of the award year in which they were disbursed.

Uncashed and unclaimed refund checks will be credited back to the student’s account and the funds returned to the program from which they came.

Payment Policy

A schedule is published annually listing registration, billing, and payment dates. As a general rule, payment may be made in full or under a two-payment plan. The two-payment plan carries a 1.5 percent-per-month finance charge calculated on the month-end outstanding balance. (Copies are available upon request.)

Responsibility of Charges

Students are responsible for all institutional charges. If any payment is not made when due, the entire balance, including accrued interest, shall, at the discretion of the University of Evansville, become due and payable on demand. In the event of any default, the student will be obligated to pay all collection costs and/or attorney fees incurred by the University of Evansville in the collection of these charges.

For more information about bills and payments, call the Office of Student Accounts at 812-488-2565.

Campus Life

In keeping with the mission of the University, a variety of programs and services are offered to students as part of the total educational process. The goal of this developmental effort is to assist all students in reaching their maximum potential. Both out-of-class learning experiences and support services are part of this effort.

Student Handbook

Further information on student services and guidelines for student life are outlined in the Student Handbook available on AceLink or on the Student Life web page at www.evansville.edu/offices/dean-students. The Student Handbook includes important information regarding excused absences, formal grievance procedures, and the student code of conduct, sexual misconduct policy, and the academic honor code. Every student is expected to be informed regarding University policies and regulations as described in the Student Handbook and to abide by such policies. Any student desiring more than these brief descriptions is invited to call or stop by to meet the staff for information or assistance.

Student Affairs

The University offers a distinctive educational experience that encourages personal transformation through a wide range of opportunities for intellectual, emotional, spiritual, and physical growth. By intentionally creating an environment of self-discovery, the Office of Student Affairs plays a key role in the educational mission of the University. Partnering with the campus to foster character development and community engagement, the office commits itself to personal interaction, quality services, collaborative education, and student empowerment. This commitment encourages and supports the journey of relevant and responsible adult life.

The Office of Student Affairs consists of the Offices of the Vice President for Student Affairs and Dean of Students, Center for Career Development, Counseling Services (including disability services), Cultural Engagement and International Services, Residence Life, Safety and Security, and the Center for Student Engagement (includes Greek life and volunteer opportunities), the Crayton E. and Ellen Mann Health Center, and the Student Fitness Center.

Our staff is dedicated to the philosophy that student development begins with entry into the University, includes in-class and out-of-class opportunities for personal growth and development, and continues through and after graduation.

New Student Orientation

During the summer, Summer Orientation and Academic Registration (SOAR) sessions are held for all new students. During this program, new students have an opportunity to become acquainted with the campus, meet faculty members, administrators, and other students, and learn about academic procedures and student life. During SOAR, each new student meets with an academic advisor and registers for classes. Orientation programs are also provided for parents of new students.

An additional Welcome Week orientation takes place just prior to the start of fall classes. This multi-day program provides students with an opportunity to meet other freshmen as well as upperclassmen. Orientation participants are exposed to a variety of involvement opportunities available throughout the college experience. Information on campus life, academic assistance, and college adjustment issues is readily accessible to students through this special orientation program. Complete information on the orientation programs is mailed

according to the following schedule: SOAR information is mailed in the spring; Welcome Week information is mailed in mid-summer. A special orientation for transfer students, STAR, is also held each semester.

Safety and Security

The Office of Safety and Security is staffed 365 days a year, 24 hours a day. Information regarding services, policies, crime statistics, and emergency response procedures can be found at www.evansville.edu/safety. For general assistance, students may call 812-488-2051. All emergencies should be reported to 812-488-6911.

Counseling Services

The University of Evansville offers counseling services that are designed to help students with a variety of life issues as they make their way through the college experience. It is recognized that interpersonal, psychological, and developmental issues can interfere with learning, and ultimately, personal success. The University of Evansville provides a counseling program with nationally certified and licensed professional counselors to respond to the unique needs of university students so they can achieve maximum benefit from their UE experience. In addition to the services listed below, we can also assist with stress management, test anxiety, and time management.

Personal Development Counseling

Individual counseling is available for psychological or developmental issues such as school adjustment problems, self-esteem enhancement, relationship issues, depression, anxiety, substance abuse issues, and eating disorders. Health education and wellness programs are offered to assist students in making healthy lifestyle choices during their college careers.

Crisis Intervention

Counseling Services is open from 8:00 a.m. to 5:00 p.m. Monday through Friday in the Ridgway University Center. Appointments may be made by calling 812-488-2663. Emergency counseling services are available after hours by calling the Office of Safety and Security at 812-488-2051 and asking for the counselor on call.

Health Education and Wellness Programs

The health education and wellness programs are offered to assist students in making healthy lifestyle choices during their college careers and as a foundation for lifelong lifestyle choices. These programs provide students with education, prevention, and intervention programs related to substance abuse and issues such as responsible sexual behavior, stress management, adjustment, anxiety, depression, and sexual assault.

Information Disclosure

The Counseling Services staff abides by the professional ethical standards of the National Association of Social Workers. A counselor may not reveal information to anyone about a client unless the client gives written permission to do so. For more information, contact Counseling Services at 812-488-2663.

Disability Support Services

The University of Evansville is committed to providing an accessible and supportive environment for students with disabilities and to treating all individuals in a fair and equitable manner. It is the

policy and practice of the University of Evansville to comply with the Americans with Disabilities Act of 1990, as amended, and Section 504 of the Rehabilitation Act of 1973. Under these laws, no otherwise qualified individual with a disability will be denied access to or participation in courses, programs, services, or activities at the University of Evansville.

Procedures to Establish Eligibility

Students who wish to request accommodations must first establish eligibility by providing appropriate written documentation of the disability to Counseling Services, Room 204, Ridgway University Center. As the designated disability service providers for the University of Evansville, the counseling staff of the Office of Counseling Services coordinate the provision of appropriate and reasonable academic accommodations and support services for any qualified student with a properly documented disability. Each student should schedule an appointment to meet with the disability service coordinator (812-488-2663) for an individual consultation. During the consultation, the counselor and student discuss the current impact of the disability in the academic setting. After reviewing the student's medical and/or diagnostic records and meeting with the student and faculty member(s) as appropriate, the counselor makes recommendations for services or reasonable academic accommodations for the student. The medical records and disability documentation will be maintained in Counseling Services and used in accordance with applicable confidentiality.

Procedures for Communicating with Faculty

If the student chooses to receive recommended services that require assistance from an instructor or other staff member, a release form signed by the student will allow the counselor or disability services coordinator to inform the necessary staff members about the student's disability. The counselor or disability services coordinator will be responsible for notifying each professor in writing about the student's approved accommodations as well as offering assistance to implement the accommodations if necessary.

It is the student's responsibility to request the accommodations from individual professors as needed. The student should make an appointment with each professor to discuss the accommodations that are needed for that particular course and to verify that the professor has received the accommodation letter. The student should give the professor two weeks advance notice of accommodation needs to allow adequate time for the professor to make arrangements. Professors often report that they receive an accommodation letter from the Office of Counseling Services, but that the student does not follow up by requesting the accommodations. This sometimes happens because a student feels that he or she will not require an accommodation in a particular course due to the manner in which the material is presented. It is the student's responsibility to request the accommodations he or she wants to use.

Procedural Difficulties with Accommodation Requests

The professor is only required to make available the accommodations that are specified in the accommodation letter issued by Counseling Services. If students or faculty have difficulty with specific accommodation needs, the counselor or disability services coordinator should be contacted for assistance. If, as the semester progresses, the student feels that additional accommodations are warranted, the student should consult with the counselor or disability services coordinator to discuss other support services or options.

Disability Advisory Committee

The Disability Advisory Committee is a committee set up to review atypical requests regarding disability accommodations and to make recommendations regarding requests that involve accommodations related to changes in curriculum or program. This committee is composed of representatives from the faculty, counseling and disability services, academic affairs, academic advising, and the registrar's office. The committee acts in an advisory capacity and submits written recommendations on each request to the vice president for academic affairs, who makes final decisions on the requests.

Grievance Process Regarding Disability Accommodations

If a student is dissatisfied with the accommodations recommended by the counselor or disability service coordinator, the student should discuss this with the disability services coordinator or director of Counseling Services. If the student is still dissatisfied with the decision, the student will complete a grievance/appeal petition (available from the dean of students' office) and the request or complaint will be reviewed by the Disability Advisory Committee. The written petition must be submitted within 180 days of the initial complaint. The Disability Advisory Committee makes a recommendation to the executive vice president for academic affairs, who makes the final decision on the request.

Subsequent Semesters

Students who wish to have academic accommodations must contact the Office of Counseling Services at the beginning of each semester to review progress, review the student's schedule and needs for the semester, and secure appropriate releases for notification of professors. The student is responsible for scheduling the appointment.

Further Information

For further information contact Sylvia Buck, director of counseling services, or Debbie Brenton, coordinator of disability services, at 812-488-2663. Information regarding documentation guidelines and grievance procedures are available upon request.

Center for Career Development

The Center for Career Development provides a primary link to the off-campus world of work for both students and alumni by offering a variety of career and job search related services. The office monitors employment trends; posts up-to-date online listings of full-time, part-time, temporary, and summer job opportunities; schedules on-campus interviews; maintains student résumé files in UE JobLink; compiles employer information; and coordinates a wide range of programs and activities designed to provide useful information on preparing for the world of work.

Actively involved in the University's experiential educational efforts, the office administers the cooperative education program and assists students who seek internships. Additionally, it offers individual career advising, career guidance software programs, and resources for students who are exploring various careers and majors. The office also provides mock interviews, group workshops in career research strategies, effective résumé and cover letter writing, interview techniques, and preparation for graduate school. A comprehensive website and entry into the world of work is found on the office's web page at www.evansville.edu/careercenter.

Community Service Initiatives

University of Evansville students, faculty, and staff enjoy a rich tradition of volunteerism within the Evansville community. Volunteering enhances life skills development and builds a sense of civic responsibility characteristic of an educated individual. These characteristics are highly valued by employers and critical to members of a democratic society.

Under the supervision of the director of student engagement, student volunteer coordinators match student volunteer interests with the needs of the surrounding community. Located on the second floor of the Ridgway University Center, students may call the office at 812-488-2538 from 8:00 a.m. to 5:00 p.m. Monday through Friday.

Residence Life

Several housing options are available for full-time students. Seven residence halls are located on campus for single students. Six fraternities have living accommodations for their members. Several additional alternate housing units (the University Villages), including small cooperative houses, townhouses, and apartments, are also available to upperclassmen. Other students commute from their homes or prefer off-campus living in privately owned facilities.

Effective Fall 2013, all students must reside on campus for a minimum of two academic years or the equivalent of four full term semesters. Transfer students with less than 60 academic credit hours earned at previous institutions (excluding bridge, early-college, dual-credit, and advanced placement credit) are also required to live on campus or in University-sponsored housing.

Students who meet one of the following criteria may request an exemption:

1. The student has attained the age of 21 prior to the start of the academic year
2. The student's local residence is with parents or legal guardians (Transfer students may have a local residence with immediate family over the age of 21)
3. The student is married and/or must live with a dependent.

A complete description of residency requirements for students (including transfers) can be found on the University website and in the Student Handbook.

The residence halls are an integral part of the UE academic community and have been developed, staffed, and programmed to provide an environment that enriches the educational experience. Further information on the residence units, including regulations for residential living, may be found in the Student Handbook.

Health Center

The Crayton E. and Ellen Mann Health Center is staffed by three licensed registered nurses and a part-time physician. Basic first aid, medication, and treatment for minor illness are provided at the center. Students who are seriously ill or require hospitalization will be referred to other facilities. In addition, the center provides health information and health counseling.

Full-time UE students are eligible for treatment of minor illnesses at the health center. A registered nurse is available during regular hours. Each student must be evaluated by a staff nurse prior to an appointment with a physician. Emergency procedures are in place at the center for students needing immediate care.

The University provides a health information form that must be completed by all students prior to registration for the first semester. The health information form requires immunization information and allows for the student to share health insurance information. Note:

The University of Evansville strongly recommends that all students carry adequate health insurance.

The Crayton E. and Ellen Mann Health Center is located in Sampson Hall, next to the McCurdy Wing of the Schroeder Family School of Business Administration Building. The center's telephone number is 812-488-2033. The health center hours are posted on the University website on the student health center link at the beginning of each school year.

During summer sessions, the center's hours are limited. The health center is closed during semester breaks and some holidays. Hours may vary according to University needs.

Diversity Initiatives

The University of Evansville is committed to creating an environment that celebrates the diversity of all cultures. The campus environment fosters a broader sense of community by providing all students with cross-cultural experiences and supporting the needs and interests of all students.

Programs offered throughout the year include guest speakers, film presentations, panel discussions, workshops, and forums designed to enhance awareness of cross-cultural issues and race relations.

Religious Life

As a United Methodist Church-affiliated institution, the vision of the Office of Religious Life is to connect the soul of God to the heart of the University.

The mission of the Office of Religious Life seeks to support the expression of religious commitment through worship, service, study, and fellowship.

Neu Chapel represents the heart of religious life on campus and is a safe place for spiritual growth and interfaith exploration, where students can engage the spiritual dimension of life and be vitally connected to their faith tradition. Our freestanding chapel, built in 1965 includes a 350-seat sanctuary, the Office of the Chaplain, the Office of the Neu Chapel Organist, Grabill Lounge, the John Wesley Gallery, and the Kell Interfaith Prayer Room.

Ecumenical worship services and Roman Catholic Mass are held weekly in Neu Chapel, drawing vital leadership from across the campus and the local community. University Worship, led by students and the University chaplain, is held on Sunday at 10:30 a.m.; Roman Catholic Mass is held on Sundays at 1:00 p.m. and on Wednesdays at 9:30 p.m. A number of diverse Bible studies and fellowship groups are offered throughout the week by a team of campus ministers who represent a variety of religious traditions. The University chaplain is also available for individual spiritual formation and counseling.

Realizing our identity as a church-related institution, we are called to initiate and promote better relationships between Christians and other faith communities of the world based on informed understanding, critical appreciation, and balanced perspective of one another's basic beliefs. The Office of Religious Life seeks to implement interfaith initiatives by intentionally bringing together people of diverse religious traditions for the educational benefit of UE students and the larger community.

Dining Facilities

The University of Evansville contracts with Chartwells to provide quality dining for University residents. Dining on the Evansville campus is offered through a number of venues. For details see the residence life web page evansville.edu/residencelife/dining.cfm.

Cultural Events

Numerous cultural and educational events are available to students throughout the year. These include art exhibits, drama productions, readings, concerts, recitals, and lectures.

Recreation and Athletics

By promoting physical well-being, mental stimulation, and social interaction, recreational and athletic activities at the University form a key component of the total educational program. Students are encouraged to participate in sports instruction, activities, and competitions.

As a member of the National Collegiate Athletics Association, the University sponsors intercollegiate teams for men in baseball, basketball, cross country, golf, soccer, and swimming and diving, and for women in basketball, cross country, golf, soccer, softball, swimming and diving, tennis, and volleyball. In addition, UE has a well-balanced intramural and recreational activities program.

Student Engagement

Located in the Ridgway University Center, the Center for Student Engagement serves as the central clearinghouse for all student organizations and campus activities. Core services include student organization and campus-wide events registration, volunteer services, civic engagement, Greek life, and leadership programming. The center strives to link student interests and skills with campus and community programs that enhance the student's overall education.

Cultural Engagement and International Services

The Office of Cultural Engagement and International Services assists international and American students in a variety of ways related to the international dimensions of their education. As the central office on campus for matters concerning international students, the office assists students in their adjustment to the University and the Evansville community and provides support services to ensure that each student's educational experience is successful. The office advises students on immigration and academic, personal, financial, and professional concerns. In addition, the office provides programs designed to enhance each student's academic experience and to help everyone learn more about each other and the world in which we live. Regular programs include cultural events sponsored by the International Club, the International House, and the UE Global Friends and Families Program.

UEperience: An Experiential Transcript

UEperience, UE's experiential transcript, is an official record of a student's co-curricular experiences. The transcript records participation in recognized student organizations, community service, and other co-curricular activities. Students may create, update, and submit their transcripts for validation via AceLink (acelink.evansville.edu). Once validated, an official transcript bearing the University seal is printed.

Leadership Academy

The Leadership Academy is a two-year, three-tiered program for selected students wishing to enhance and apply their leadership potential. The academy focuses on personal development (Tier I); group development (Tier II); and community involvement, volunteer service, mentor programs, and presentation development (Tier III). The academy is under the supervision of a student advisory council and the Student Government Association.

Student Government Association

The Student Government Association provides a sounding board for student ideas, fosters academic freedom and responsibility, promotes student rights and responsibilities, recruits students to serve on administrative and faculty committees, and seeks to improve inter-University communication and relations.

Student Congress

Members represent students from residence halls, commuters, alternative housing, and all organizations. The congress serves as the legislative body of the Student Government Association and has authority to advise and initiate legislation on issues of student interest or concern.

Student Activities Board

The Student Activities Board initiates campus-wide social and educational programming, including concerts, films, lectures, and recreational opportunities.

Student Media and Publications

Crescent Magazine

A monthly magazine printed for the UE community by students, the *Crescent Magazine* serves as a forum for campus news and opinions through its editorials, columns, and letters to the editor. Coverage of national, local, and campus issues are included in each issue.

Literary Review

Two literary magazines, the *Evansville Review* and *Ohio River Review*, are produced by students.

Student Organizations

Students are encouraged to create or join student organizations based on the Student Handbook guidelines. Student organizations enhance the college experience by providing practical learning opportunities with fellow students and faculty. A current list of all student organizations is available in the Center for Student Engagement or online at evansville.edu/organizations.

Academic, Professional, Honorary

Classroom learning is enhanced through informal faculty and student interaction among academic organizations. Students apply what they learn in class through programming, regional and national competition, workshops, field trips, and professional conferences. Many disciplines also offer selective honorary societies that recognize outstanding achievement and character.

Athletics Support

Athletics support organizations support varsity athletic teams through dance and cheer teams. Membership is offered through try-outs in the fall.

National Social Fraternities and Sororities

Membership is offered in the form of "bids" or invitations after a series of recruitment events. Social fraternity and sorority membership provides opportunities for social, civic, academic, and leadership development, as well as brotherhood and sisterhood. Current men's fraternities include Lambda Chi Alpha, Phi Gamma Delta (Fiji), Phi Kappa Tau, Sigma Alpha Epsilon, Sigma Phi Epsilon, and Tau Kappa Epsilon. Women's fraternities (referred to as sororities) include Alpha Omicron Pi, Chi Omega, Delta Omega Zeta (local sorority),

Phi Mu, and Zeta Tau Alpha. Visit greeklife.evansville.edu for more information.

National Fraternity and Sorority City Chapters

City-wide Greek chapters are offered to students who seek a broader base of membership that may include members from one or more local colleges and universities. Alumni chapter members often help facilitate these organizations through their close contact. Historically African American fraternity and sorority city chapters include Alpha Phi Alpha Inc., Kappa Alpha Psi Fraternity Inc., Alpha Kappa Alpha Sorority Inc., and Delta Sigma Theta Sorority Inc.

Student Publications

The student magazine (Crescent Magazine) and literature reviews (Evansville Review and Ohio River Review) offer journalistic training and literary expression with national award-winning publications.

Religious

Students are encouraged to pursue their personal faith journeys through regular meetings, worship, spiritual retreats, volunteer service, and social activities. Most major religions and Christian denominations are represented at UE.

Social, Civic, Recreational

The majority of student organizations fall into this category. These organizations offer broad social, cultural, and community service opportunities. Membership is open to all students with similar interests.

Student Government

Leadership, governance, and student service epitomize the philosophy and mission of student government. Full-time student activity fees fund these organizations, which in turn provide an array of programs and services for the entire student body. Membership is by election and appointment.

University Committees and Task Forces

Many University departments offer rewarding personal and leadership development experiences that also serve to assist administrative functions. Membership is offered through administrative selection processes and appointments.

University of Evansville Libraries

University of Evansville Libraries provides an array of information services that underwrite the curricular and research programs of the University. Services range from traditional library collections and electronic full-text databases to individualized reference assistance and library instruction. Information on library holdings is available through the online catalog and discovery system known as QUEST, which is accessible across campus as well as remotely.

UE Libraries' collections include more than 240,000 bound volumes of books and periodicals, access to more than 21,000 scholarly e-journal titles, and access to many important online research databases. Collections are supplemented by an active interlibrary loan service through which the resources of other libraries are made available to students and faculty. Circulation policies permit books, journals, DVDs and CDs to be borrowed.

UE Libraries is open extensive hours each week during academic semesters. Professional librarians are eager to assist students with research assignments as well as with general information needs. UE Libraries offers extensive quiet study areas for individuals and groups, including private study rooms that may be reserved in advance. Specialized services and resources include the University Archives as well as the Multimedia Learning Resources Center located in Graves Hall. UE Libraries supports study and teaching at Harlaxton College by providing access to online databases available on the Evansville campus.

Visit the Libraries' web site (evansville.edu/libraries/) or contact the Information Desk at 812-488-2482 for more information.

Degrees, Curriculum, Academic Opportunities

Degrees

Associate Degrees

The University of Evansville offers a specialized Associate of Science (AS) degree in physical therapist assistance.

Baccalaureate Degrees

UE offers undergraduate programs leading to the Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Bachelor of Music (BM), and Bachelor of Science (BS) degrees. A complete list of majors, concentrations, and preprofessional programs follows.

Graduate Degrees

UE offers the following graduate degrees: Master of Physician Assistant Science, Master of Science in Athletic Training, Master of Science in Health Services Administration, Master of Science in Leadership, Master of Science in Public Health, Master of Science in Public Services Administration, and Doctor of Physical Therapy.

Certificates

UE offers two certificate programs: Integrating Business and Career Education (iBACE) and an Energy Engineering Certificate. iBACE is open to all students outside of the School of Business and the Energy Engineering Certificate is open to engineering students.

Organizational Structure and Programs of Study

The University's instructional program is organized into four academic colleges, and schools, two specialized centers of education and the special study abroad campus of Harlaxton College in England.

College of Arts and Sciences

The college provides quality liberal education in the arts, humanities, the natural and social sciences, as well as professional training in the fine and performing arts and creative writing. The programs of study are organized into departmental units (where appropriate) as follows:

Department of Archaeology and Art History

Archaeology

Art History

Department of Art

Art Education

Art and Associated Studies; Studio Art

Schroeder Family School of Business Administration

The school offers the following programs within the confines of its organizational umbrella:

- Accounting
- Finance
- Global Business
- Logistics and Supply Chain Management
- Management
- Marketing

Also available is a Bachelor of Arts and a Bachelor of Science degree with a major in Economics.

College of Education and Health Sciences

The College of Education and Health Sciences offers a number of programs in education and health sciences that share common pedagogical approaches to teaching through supervised teaching and clinicals.

- School of Education
 - Multi-Grade Education
 - Music
 - Special Education
- Elementary Education
- Senior High, Junior High, Middle School Education

General Requirements for Baccalaureate Degrees

Summary of Requirements

To receive a baccalaureate degree, a student must:

- Complete at least 120 semester hours of credit (or more as required for specific programs)
- Complete the Enduring Foundations General Education Program (41 hours)
- Complete a major program of study – at least 51 percent of the course work in the major must be completed at UE (see specific requirements for each major)
- Earn a minimum grade point average of 2.0 in both the major and the total program of study
- Complete at least 48 semester hours of credit at UE
- Complete at least 39 semester hours of credit in courses numbered 300 or above
- Satisfy the foreign language proficiency requirement
- Satisfy the residency requirement
- Formally apply for the degree no later than one year before anticipated graduation

Specific degree program requirements are stipulated by the academic unit offering the degree.

No credit toward graduation is awarded retrospectively to lower-level course work based solely upon satisfactory completion of more advanced course work in the same subject area, except for academic sequence courses in foreign languages and cultures completed at the University of Evansville.

Credit Limits for Bachelor of Arts Degree

No more than 45 hours in any single subject area may be counted toward the Bachelor of Arts degree.

Writing Proficiency Requirement for Freshmen

All incoming freshmen are tested for writing skills through the SAT or ACT as a part of registration for their first terms in residence on campus. Students who do not meet the criteria of entry level college writing through achievement of a specified score on the writing portion of the selected exam will be required to enroll in First-Year Seminar 111. Those meeting the minimum writing proficiency will be placed into First-Year Seminar 112.

Writing Proficiency Requirement for Transfer and Part-Time Students

All transfer and part-time students are tested for writing skills through the SAT or ACT prior to their first terms in residence. Those students who do not have an SAT or ACT score will be required to complete UE's writing placement exam. Students who do not meet the criteria of entry-level writing through achievement of a specified score on the writing placement exam will be required to enroll in First-Year Seminar 111 in their first year to provide extra help in developmental writing skills. Students who meet the criteria on entry-level writing through achievement of a specified score on the writing placement exam will be enrolled in First-Year Seminar 312.

Writing Proficiency Requirement for International Students

All international students may be required to sit for a writing placement exam prior to their initial registration at the University of Evansville. This exam will be administered by the Office of Cultural Engagement and Student Services and will be read by the director of the Writing Center, who will determine the appropriate writing sequence for each student.

International students who are required to enroll in English language courses must take First-Year Seminar 111E before taking First-Year Seminar 112. Students must obtain at least a C in English Language (EL) 111 before enrolling in First-Year Seminar 111E.

Students should begin the First-Year Seminar sequence as soon as possible after successfully completing English language courses in order to maintain progress in reading and writing, and to develop the academic skills necessary for success at UE.

Note that a maximum of nine hours of English language courses may count toward elective requirements for a degree.

International transfer students will be placed in appropriate writing and reading courses on the basis of the writing exam and the Michigan Test of English Language Proficiency. Course work would be selected from English Language 102, 103, 106, 107, 110, and 111.

Foreign Language Proficiency Requirement

All students entering the University are required to demonstrate proficiency in a foreign language equivalent to the completion of a university-level, first-year foreign language course numbered 112.

All Bachelor of Arts degree candidates are required to demonstrate proficiency in a foreign language equivalent to the completion of a university-level, second-year foreign language course numbered 212.

The Bachelor of Arts degree in international studies requires proficiency in reading and speaking a foreign language at a level equivalent to that achieved by satisfactory completion of a foreign language through the third year; or two years of college-level competency in two foreign languages.

These requirements shall be met in one of two ways: by satisfactory completion of the appropriate level of foreign language course work at the University of Evansville or another accredited institution of higher education. Course credit will not be awarded through the proficiency exam, but students may meet the foreign language proficiency requirement (equivalent to 112 for BS degrees, equivalent to

212 for BA degrees) by achieving particular scores on the proficiency exam. The tests are administered only during freshman registration and placement scores expire after one year. See details below.

The foreign language proficiency requirement will be met through the second-year University level if a student successfully completes one of the following: (a) completion of a third-year college course in a foreign language or introduction to literary analysis (b) completion of the College Board Advanced Placement Exam with a grade of four or five. Advanced placement examinations are administered in May at approved testing centers. Should a student take both the Spanish Literature AP exam in addition to the Spanish AP exam and receive a four or five on both, students will place into Spanish 311 and receive 3 credits for a UE elective course not in Spanish.

Foreign Language Proficiency Testing

1. Proficiency testing is required for all students with previous foreign language experience. Proficiency scores expire after one year and students waiting longer than one year to enroll into the course in which they place, must retake the proficiency exam through the department of Foreign Languages and Cultures.
2. Students taking a proficiency exam may enroll one level lower than the exam warrants, with the advice and consent of the student's advisor and the chair of the Department of Foreign Languages and Cultures.
3. Non-graded course credit will be awarded through the proficiency exam if students enroll one-level higher at UE and pass the course with a C or better. Should students meet the foreign language proficiency requirement (equivalent to 112 for BS degrees, equivalent to 212 for BA degrees) by proving proficiency on the exam for that level but not enroll in the next level, they will meet the foreign language proficiency requirement but receive no credit.
4. Students who begin their foreign language study above the 111 level will receive up to six hours of non-graded credit in introductory or intermediate level courses below that level if they successfully complete the upper-level course with a grade of C or higher at UE. Example: Student places into French 211. Upon successful completion of French 211 at UE, the student will receive six hours of non-graded credit for French 111, 112. The Office of the Registrar will process these retroactive credits.
5. No additional credits will be granted to students who are awarded transfer credits in foreign language from approved academic institutions.

International Students

All students whose native language is not English take the Michigan Test of English Language Proficiency in addition to the University's writing skills test as a part of registration for their first term in residence on campus. Placement in appropriate English language improvement courses will be made to provide students with the skills necessary to demonstrate English proficiency. A student may apply no more than nine hours of English language courses toward graduation requirements if the student's program permits free electives.

Students whose native language is not English will satisfy the foreign language requirement by meeting the University's writing requirement; however, no credit hours are granted toward graduation. (Refer to the "Writing Proficiency Requirement" section for details). Furthermore, native speakers of a foreign language may not earn hours toward graduation for foreign language classes in the 111-212 courses or 300 level conversation courses in their native language.

Residency Requirement

In order to ensure that degrees awarded meet the standards and expectations of the University, all degree-seeking students, regardless of major, must earn in residence at the University:

1. At least 48 degree-applicable semester hours;
2. The majority of hours in the major, subject to requirements of specific majors; and
3. The last 15 credit hours toward the degree.

The number of credits a student may transfer to the University of Evansville once he or she has matriculated is limited to three courses (maximum of 10 semester hours). Such transfer credit must have the prior approval of the student's academic advisor and the registrar on a Transfer Credit Request form filed with the Office of the Registrar.

Requests for exceptions to the residency requirements must be submitted in writing to the Admissions and Standards Committee.

Requirements for an Additional Degree

After earning a baccalaureate degree at the University of Evansville, to be eligible for an additional baccalaureate degree, a student must earn a minimum of 30 additional hours in excess of those required for the previous degree and meet all specified requirements for both degrees. A minimum grade point average of 2.0 must be earned in the total program of study. The same courses may be used to meet the requirements for an additional degree. Completion of a double major does not automatically mean requirements for two degrees have been met.

Requirements for an Additional Major

To earn an additional major, a student must complete all requirements for that major as listed in the catalog, including all ancillary courses. A minimum grade point average of 2.0 must be earned in the additional major. At least 51 percent of the hours in the major must be completed in residence. Completion of an additional major does not necessarily mean requirements for two degrees have been met.

Requirements for a Minor

A minor is not required for graduation, although one may be recommended by various departments. If a department offers a minor, the requirements will be listed in that department's section of this catalog. A minor will generally require at least 18 semester hours of course work (some of which may be specified) in the minor subject area, and completion of at least 51 percent of the course work in residence at UE. A minimum grade point average of 2.0 must be earned in the minor.

Enduring Foundations General Education Program

The University of Evansville is committed to the liberal arts and sciences serving as the center of every student's education. The breadth of knowledge and engagement that is characteristic of a liberal education is central to developing strong students from across all majors at the University who are prepared to live and thrive as global citizens in our increasingly complex, diverse, and changing world. The Enduring Foundations General Education Program provides students with that strong foundation in the liberal arts and sciences and supports the University's international focus and commitment to social responsibility. The program is framed in terms of student learning, clearly identifying the variety of ways that students will develop knowledge and skills, exercise creativity and innovation, engage big questions, and learn to make a difference in their world. The Enduring Foundations General Education Program makes up approximately one-third of every undergraduate degree at the University.

General Education Objective

Engaged in the human quest for wisdom in its varied expressions and informed by a core cultural, analytical, and scientific literacy, graduates will be prepared to think critically, communicate effectively, judge ethically, act responsibly, and lead full, rich, and productive lives as global citizens.

General Education Outcomes

As a result of this curriculum, graduates shall demonstrate:

1. Critical reading and thinking (3 hours)
2. Engagement with imaginative expressions of the human condition (3 hours)
3. Knowledge of human history and the historical context of knowledge (3 hours)
4. Engagement with fundamental beliefs about human identity, core values, and humankind's place in the world (3 hours)
5. Understanding of human aesthetic creation and artistic creativity (3 hours)
6. Linguistic and cultural competence in a language other than one's own (6 hours)
7. Quantitative literacy (3 hours)
8. Scientific literacy (7 hours)
9. Understanding of core concepts of society, human behavior, and civic knowledge (6 hours)
10. Knowledge and responsibility in relation to health and wellness (1 hour)
11. An ability to think critically and communicate effectively, orally, and in writing. (3 hours)

In addition to these outcomes, all students must meet university requirements for writing across the curriculum.

General Education Courses

A list of specific courses that satisfy the core general education and overlay graduation requirements outlined below can be found on the Enduring Foundations General Education website or the registrar's website.

General Education for Transfer and Part-Time Students

As with traditional matriculating freshmen, transfer and part-time students will need to complete the same general education requirements. Often, but not always, students who transfer in courses from another institution will meet some or even many of the general education requirements through those transferred courses, depending on the nature and number of what is transferred. Evaluation of transfer applications will provide specific information on what requirements are met through a particular student's transferred courses.

Assessment of Academic Programs

All academic programs at the University of Evansville assess student learning on a regular basis. The mission of student learning assessment is to improve student learning and enhance the effectiveness of the academic programs at the University of Evansville by objectively measuring learning outcomes and using the results to inform both continuity and change. The assessment of student learning is conducted at the program level but is coordinated and evaluated by an Academic Assessment Committee consisting of a faculty member who serves as chair, other faculty members, the dean of the College of Arts and Sciences, and administrators from the Office of the Vice President for Academic Affairs, Student Life, and the Office of Institutional Research. The information gathered is used by the academic programs to continually monitor whether the knowledge,

skills, and attitudes of students are meeting learning outcomes of the program and the educational objectives of the University.

Special Educational Opportunities

ChangeLab

ChangeLab is a program that offers students a chance to use their skills to create positive change in the community locally or globally. Students of any level and any major may participate in the ChangeLab, and many choose to take multiple ChangeLab courses throughout their time at UE. In this experiential program, students enroll in a class and work as part of a multidisciplinary team to provide services or develop innovative solutions.

ChangeLab projects address the needs of clients whose organizations may be for-profit companies, non-profits, or government agencies. Additionally, the ChangeLab program also offers students the unusual opportunity to propose their own course project and work on projects they are passionate about while earning class credit. UE students who participate in the Changemaker Challenge often choose to continue their Changemaker projects by proposing their own ChangeLab course. In any given semester, students have a range of projects to choose from addressing such topics as alternative energy, neuromarketing research, infant mortality, urban planning, product development, food waste, global market expansion, and more. Many projects are conducted in Evansville, but some take place in places such as Guatemala, Cuba, and Harlaxton.

Whether working on a project proposed by a client or one they have proposed themselves, students work as part of a diverse team guided by faculty coaches and industry experts to deliver valuable and meaningful results. Additionally, they receive training in teamwork, project management, creative problem solving, and presentation skills through workshops provided throughout the course. All ChangeLab projects culminate with a professional presentation to the client organization or project stakeholders outlining their research findings and recommended solutions. Participation in ChangeLab enables UE students not only to develop skills critical to the workplace but also provides guidance on ways to showcase those skills to prospective employers or graduate schools. Through this unique experiential program, students have an unparalleled opportunity to develop real-world problem-solving skills that prepare them for the increasingly complex challenges and ever-changing environments of the 21st century.

Honors Program

The Honors Program offers highly motivated and talented students the opportunity to participate in unique academic and extra-curricular experiences alongside peers and faculty who share the love of learning and desire to excel. Honors students are known for their passion and collegiality, and they serve as catalysts who propel the University's academic excellence forward.

The Honors Program provides curriculum that challenges students to maximize their potential in all areas of study and fosters independent thinking. Honors students enroll in at least 15 hours of Honors courses, which are designed to offer a particularly stimulating learning experience and the occasion for close collaboration with faculty and other Honors students. Honors Program students also complete an Honors project, which serves as the capstone of the Honors experience and provides a unique opportunity for students to explore an area of study about which they are passionate. Students present this culmination of their work to faculty and other students during the Honors Program presentation sessions held each spring. In addition to these requirements, students must maintain a minimum

GPA of 3.5 to remain in the Honors Program.

The Honors Program also enhances one’s social experience at the University by fostering a lively community life among its participants. Honors students have the opportunity to live in the Honors residence hall (Powell) and engage in Honors-sponsored events, including informal gatherings, trips, and the annual Nerd Wars trivia competition. The Honors Program also encourages its students to engage in a variety of other extracurricular and cultural activities across the campus and in the community.

Both prospective and current students who meet admission requirements are encouraged to apply. As application criteria can change from year to year, anyone interested in applying to the program should consult with the Office of Admission or Honors Program staff regarding the current requirements.

Undergraduate Research Program

Developed with support from the Lilly Endowment Inc., the undergraduate research program known as UExplore provides students and faculty the opportunity to work together on research by providing funding for joint projects. Undergraduate research is defined in a broad sense as research, scholarship, or creative activities, and thus includes projects from the sciences, humanities, fine arts, and professional programs.

For student-generated proposals, the student researcher is responsible for the majority of the concept development, project design, and proposal writing. Student and faculty collaboration, however, is an essential part of learning. In most cases, research results are presented at campus seminars, regional and national conferences, or published.

Eligible students may participate in fall-semester, spring-semester, or summer research projects. Financial support is available in the form of summer research stipends with free double-occupancy housing during the 10-week summer research period and grants for materials, equipment, or services. Semester projects are limited to grants for materials, equipment, or services. Travel grants are also available for students presenting papers at the National Conference on Undergraduate Research or other discipline-specific conferences.

Cooperative Education (Co-op)

Cooperative Education at the University of Evansville is paid, career-related employment integrated with academic programs requiring at least three measurable learning objectives, self/employer evaluation and reflective writing. A flexible cooperative education plan is available for all undergraduate majors. There are two options available: Traditional (Full-Time) and Concurrent (Part-Time). The University of Evansville’s Cooperative Education Program is managed by the Center for Career Development in full collaboration with each College or School.

Traditional co-op requires most students to complete a 5 year program, as compared to a traditional 4 year academic program. A paid educational employment experience that is full-time, 30-40 hours of work per week for 12-15 weeks. Students must complete at least 3 separate work periods and will usually, but not always rotate between work sessions. Some traditional co-op opportunities may be in consecutive semesters of work, which may provide flexibility with course sequencing and academic requirements. All students should maintain communication with their academic advisor, Center for Career Development and have a degree completion plan.

Prerequisite: EXED 090, Building Your Professional Image; **zero or one credit hour**, Pass/Fail, **Does not count toward graduation.**

UE Courses: College of Engineering and Computer Science: COOP 091-095, **one credit hour**, does not count toward graduation, Pass/Fail.

All other students: EXED 073, one credit hour, Pass/Fail.

Concurrent co-op is a paid educational employment experience, usually 8-20 hours of work per week for usually a minimum of 12 weeks. Concurrent co-op is available for students enrolled full time, in at least 12 credit hours. May be taken only in the fall and spring.

Prerequisite: EXED 090, Building Your Professional Image; **zero or one credit hour**, Pass/Fail, **Does not count toward graduation.**

UE Courses: College of Engineering and Computer Science **ENGR 081, one credit hour, does not count toward graduation, Pass/Fail.**

All other students: **EXED 072, one credit hour, Pass/Fail.**

Traditional Co-op

This co-op plan combines classroom education with full-time professional work experience and provides students with opportunities for earning a part of their University expenses. Through the co-op program, students are offered a variety of professional experiences, ranging from assisting technical staff members to independent research and development. Upon satisfactory completion of the program, the student is designated a co-op graduate and awarded a co-op certificate at the time of graduation.

Under the traditional co-op plan, the student spends alternate or consecutive academic semesters working full time for the co-op employer and studying as a full-time student. Normally, a co-op student is able to earn a bachelor’s degree and work four semesters over a period of five calendar years, provided the student follows the prescribed schedule for work and school shown in the following plan (may vary depending on the major program and year in school).

Schedule One

	Fall	Spring	Summer
First Year	School	School	
Second Year	School + EXED 090 or	School + EXED 090	Work Rotation 1
Third Year	School	Work Rotation 2	Work/School/Open
Fourth Year	Work Rotation 3	School	Work Rotation 4
Fifth Year	School	School	

A second option in the Traditional Program is the 3 or 4 semester consecutive rotations schedule. In this plan, a student would finish at least three semesters of full-time coursework at the University of Evansville.

Schedule Two

	Fall	Spring	Summer
First Year	School	School	
Second Year	School EXED 090	Begin Rotation 1	Complete Rotation 2
Third Year	Complete Rotation 3	School	Internship/School/Open
Fourth Year	School	School	Internship/School/Open
Fifth Year	School	School	

This same pattern may be applied after completing four, five or six semesters of full time academic coursework.

Concurrent Co-op

Not every student has the opportunity to locate a traditional co-op position providing professional full-time experience. Many opportunities exist in Southwest Indiana that provide critical hands-on experience for a wide variety of careers in a part-time capacity. Numerous employers have long-standing relationships hiring students in professional and paraprofessional capacities for their small businesses, nonprofits and global corporations. Students possess in-demand skills such as computer knowledge, creativity, business fundamentals, social media savvy, communication and customer service coupled with flexible schedules and professional energy. A concurrent co-op is a viable option for most majors and provides a way to connect academics to practical training. Careers associated with local part-time paid positions include: engineering, computer science, information technology, marketing, graphic design, communication, media, religion, management, accounting, finance, writing, modeling, analysis, education, health care and human services. When needed, the Center for Career Development will facilitate the concurrent co-op program for students with existing part-time positions that qualify and support others in their search for a suitable opportunity. The concurrent co-op program is a simple and direct way to link professional part-time employment with curriculum and allow the student to earn the University's Co-op Certificate.

Co-op General Information

Students must satisfy the same course requirements whether they pursue the regular four-year study plan or the five-year co-op plan. All students participating in the co-op program should consult with their academic advisors prior to accepting a co-op job offer. To avoid course scheduling problems that would likely cause a delay in the expected date of graduation, the student and advisor should develop and map an academic advising plan that takes into account the choice of cooperative education for the remainder of the student's educational program. Students may delay entering the co-op program from the second summer to the third spring semester provided that they are able to complete at least three semesters of employment.

Application for admission to the co-op program is normally made during the fall semester of the second year by enrolling in Experiential Education 090, which is a zero or one credit seminar managed by the Center for Career Development staff. To be eligible for admission to the co-op program, a student must have a cumulative grade point average of at least 2.25 for Engineering and Computer Science (2.50 for all other majors) based on at least three semesters of full-time study. In addition, the eligible applicant must have completed the equivalent of the first three semesters of their desired degree at the time of the first work period and be able to plan to complete at least three semesters of work.

Some employers require U.S. citizenship or permanent residence status. International students holding an F or J type visa completing an experiential experience in the United States must abide by the requirements stated in the CPT Guidelines and must coordinate these activities with the UE Designated School Official (DSO). A copy of the CPT Guidelines may be obtained from the Center for Career Development's Website: <http://careerservices.evansville.edu>. The Center for Career Development partners with International Student Services, advisors and international students to facilitate their participation in the co-op program.

Transfer students are invited to apply for the co-op program after consulting with their academic advisor to ensure that co-op course schedules will permit satisfactory progress toward their desired degree. Transfer students must satisfactorily complete one semester of full time course work at the University of Evansville and meet all

other guidelines/requirements.

The Center for Career Development staff will seek to identify suitable employment for all eligible applicants. However, final admission to the program is governed by the availability of jobs, and employment in the program cannot be guaranteed. Normally a student is eligible for co-op job commitment only once and is expected to remain employed by the initial co-op employer until the program is completed. If the student requests a change of employer, the Senior Director or designee will review the merits of the request and grant it at his or her discretion. Additional requests for change of employer will normally be denied and may necessitate additional fees.

Students admitted to the co-op program must be regularly enrolled each semester in either full-time studies at UE and/or in the appropriate Cooperative Education course. A cumulative GPA of at least 2.25 must be maintained to continue in the program. A co-op fee is charged for enrollment in the Traditional Program, Cooperative Education 91, 92, and 93; EXED 073 and must be paid in accordance with the University's standard schedule for payment of tuition and fees. Co-op fees are used to help offset the costs of administering the program. There is no cost for enrollment in Concurrent Co-op, EXED 073 as long as a student is enrolled as a full time student with 12-18 hours of credit.

During their co-op employment, students are regular employees of the company and are paid at a rate commensurate with the type of work they are doing within that company's compensation schedule. Co-op students are given assignments of increasing complexity and responsibility as they demonstrate their capability to progress. The student's performance is regularly reviewed by the employer and the Center for Career Development staff with the assistance of the student's academic advisor. The student is expected to maintain communication with the Center for Career Development and their academic advisor while they are enrolled in the co-op program.

Employers participating in the co-op program are located throughout the nation and include large global companies, smaller local companies, public utilities, government agencies, nonprofits, health care, and laboratories. Given marketplace limits, effort is made to meet each student's preference for employer and job location. New co-op firms are often added based on student interest.

Students interested in participating in the co-op program should meet directly with their academic advisor or department chair prior to scheduling a meeting with the Center for Career Development.

Engineering Internship

The University of Evansville College of Engineering and Computer Science Internship Program is managed by the Center for Career Development. It is a paid educational experience, 30-40 hours of work per week for a minimum of 8 weeks and usually available only during summer sessions. Students enrolled in an Engineering Internship must have earned at least 18 earned credit hours at the University of Evansville, with at least nine hours of cumulative progress toward a degree in the College of Engineering and Computer Science during the previous two academic terms. Student must be in good academic standing with a cumulative GPA of at least 2.25. Transfer students should consult with their academic advisor or department chair to ensure that course schedules will permit participation. Transfer students should satisfactorily complete one semester of full time course work at the University of Evansville and meet all other guidelines/requirements. Specific academic requirements include developing at least three measurable learning objectives, self/employer evaluation and reflective writing. The position description and potential learning objectives require prior approval by the Senior Director of the Center for Career Development or designee.

Prerequisite: EXED 090, Building Your Professional Image; **zero to one credit hour**, Pass/Fail.

UE Course: College of Engineering and Computer Science: ENGR 071, Zero Credit, Pass/Fail, **May be repeated**.

Experiential Education EXED

Internship

EXED 071 is a noncredit internship option open to students enrolled in: College of Arts and Sciences, School of Business Administration, College of Education and Health Sciences and Center for Adult Education. It is a paid or unpaid, full or part-time experience for a period of 8-16 weeks in a professional or paraprofessional role associated with a student's major or career interest, requiring a minimum of 50 accumulated work hours per session. Specific academic requirements include developing at least three measurable learning objectives, self/employer evaluation and reflective writing. The position description and potential learning objectives require prior approval by the Senior Director of the Center for Career Development or designee. May be repeated. EXED 071 was designed as an internship option for students whose schedule or circumstances do not allow them to complete an internship in their major. It is meant to be a flexible option and not a substitute for departmental internships.

A student must be in good academic standing with a minimum GPA of 2.25, have earned at least 18 credit hours at the University of Evansville with at least nine hours of cumulative progress earned toward a degree in the College of Arts and Sciences, School of Business Administration or College of Education and Health Sciences during the previous two academic terms. Students in the Center for Adult Education must be enrolled in a Degree Program and have successfully completed one semester as a full-time student in their curriculum. Transfer students should consult with their academic advisor or department chair to ensure that course schedules will permit participation. Transfer students must satisfactorily complete one semester of full time course work at the University of Evansville and meet all other guidelines/requirements.

Prerequisite: It is highly recommended that participants successfully complete EXED 090, *Building Your Professional Image*, prior to enrolling in this course.

Course: EXED 071, zero credit, Pass/Fail, May be repeated.

Professional Preparation

EXED 090 Building Your Professional Image

A person's choice of vocation is just one element in an interconnected web of life-roles, values, and influences. It is important to consider a holistic perspective in life and career choices to better understand the influence of how personal history, characteristics, and priorities impact one's vocational direction. A commitment to a co-op or internship experience is a major step in establishing a professional image and exploring possible career paths.

The course is designed for students who will be completing an internship, co-op or other academically-related work experience. It focuses on self-knowledge and résumé development, professional communication and job search correspondence, mock interviews and interviewing processes, cultural communication competencies, etiquette, networking and job search techniques. The course content is delivered in an active learning environment.

EXED 090 is recommended for all students who have successfully completed one or more years of higher education and plan to have an experiential education experience within the next 12 months. This course was previously listed as COOP 090.

Course: EXED 090, **may be taken for zero or one credit hour**, pass/fail and does not count toward graduation.

Goals

- Students develop self-understanding and discipline specific professional business communication: résumés, cover letters, thank you cards, interviewing techniques, and oral presentations.
- Students improve their ability to connect and articulate their UE experiences with their career goals as they interface with the workforce.
- Students practice the many steps required to present themselves as educated, enthusiastic and competent professionals.

The purposes of this course are to prepare students in developing the skills and approaches to make informed and satisfying career decisions, conduct an effective and professional co-op/intern employment search, and present themselves in a manner that emphasizes the professionalism, relevant skills and background of a chosen field.

Harlaxton College and Other Study Abroad Programs

The University of Evansville maintains a strong commitment to internationalization. This commitment is shown in the emphasis on studying abroad for all students, and the ability for UE students to choose locations all over the world to earn credits towards degree completion and to learn to become global citizens.

The Office of Study Abroad also assists students with applications for various national scholarship programs in support of study abroad, including the Fulbright and Gilman Scholarships.

Students are welcome to study abroad through three different types of programs: Harlaxton College, Faculty Led Programs, International Exchanges, and Provider Programs. The Office of Study Abroad, located in SOBA, is available to help students explore these options and select the best fit for a student's field of study and personal goals. Each of these program types are clearly explained on our website and a study abroad advisor will help you through the process of applying and preparing for your time abroad. Although students must be at least sophomores to participate in study abroad, planning should begin as early as the freshman year. Close consultation with the Office of Study Abroad and the student's academic advisor is essential.

1. Faculty-Led Programs

The University of Evansville offers a variety of faculty-led programs abroad, usually over Spring Break or the summer term. Locations and course topics change annually, with some programs running biennially. Trips typically range from one week to five weeks.

Interested students should look for information on the Study Abroad website throughout the year or come to the office to learn more about programs being offered. Recent faculty led trips have included:

- Designing a marketing plan and then visiting a non-profit organization in Havana, Cuba
- Visiting and shadowing teachers in rural schools in Trinidad
- Participating in a Habitat for Humanity Build in Nicaragua
- Studying Biology in Costa Rica
- Studying Political Science in South Korea

2. Harlaxton College

Harlaxton College, housed in a nineteenth-century manor house, is situated in the East Midlands, just outside Grantham, England, and one hour north of London. Academic programs are rigorous yet personal as the British and American educational systems

combine to produce a unique scholastic environment in which experiential learning plays a large part. Classes are often complemented by field trips to enhance the classroom setting. All parts of the United Kingdom, as well as Paris, Rome, Florence, and Ireland, are common destinations for Harlaxton students.

Harlaxton College operates a semester-length program each fall and spring and a five-week summer session. Costs of the semester-length Harlaxton program are comparable to charges on the Evansville campus, and UE financial aid applies. Tuition for the summer program is identical to Evansville summer course tuition.

The centerpiece of the Harlaxton College curriculum is a six-hour course in British studies, offering an interdisciplinary introduction to British life and culture. Literature, art history, economics, history, and political science are part of the course, which combines lectures, seminars, and travel. In addition, a wide range of humanities and social science courses are offered each semester to enable students to maintain normal progress in their respective academic programs. Approximately 30 courses are offered each semester from which the student may select two or three in addition to the British studies courses, which are required of all students. Courses are taught both by British faculty and visiting faculty from the United States.

3. Exchange and Provider Study Abroad Programs

In addition to studying for a semester or summer at Harlaxton College, University of Evansville students can choose from a wide variety of programs in other locations around the world. Students approved on these programs can typically use their UE financial aid packages during the fall and spring, and the Office of Study Abroad will work to find a program that fits individual interests, goals, and academic requirements.

Major Discovery Program for Undeclared Students

Students who have not declared a major upon entering the University of Evansville have the freedom to explore various disciplines while meeting their general education requirements. The Major Discovery Program is specifically designed to assist incoming freshmen and transfer students in the discovery of an academic area or areas of study in which to major. The program encourages exploration of academic majors, self-discovery, and participation in cocurricular activities offered by the University. Undeclared students are encouraged to take Discussion 100, Journeys and Discoveries, a one-credit course designed to help them make wise and thoughtful choices about their future through participation in readings, discussions, lectures, and activities that guide their exploration of the University, major fields of study, and career opportunities.

Students are advised by faculty members who have a special understanding of the variety of opportunities available at the University and are aware of events that help students connect to campus and to their future studies.

Major Discovery students have a broad range of interests and faculty encourage students to embark on academic explorations without pressure to declare a major before they are ready. Moreover, because undeclared students are often academically strong, they are not discouraged from exploring disciplines beyond the introductory level. Indeed, it may be useful to remember that at least 60 percent of the students who enter the University with declared majors change to another major at least once. Students who enroll in the Major Discovery Program are encouraged to find a major by the end of their freshman year to ensure on-time graduation, but are not pressured to make a decision before they have explored every possible outcome that interests them.

ROTC – Army Reserves Officers' Training Corps

The Army Reserves Officers' Training Corps (ROTC) is available to UE students. Qualifying students are eligible for up to full tuition, merit-based scholarships, and other financial assistance through the US Army. ROTC provides hands-on leadership development in addition to regular college courses. Typically students take two Military Science Level (MSL) ROTC courses each year, one each semester. Course descriptions are listed in the back of the catalog under the undergraduate course descriptions section, under MSL. UE cadets meet with cadets from University of Southern Indiana to conduct weekly physical training. These sessions include cardiovascular fitness, muscular strength, and muscular endurance training. Physical training sessions and courses may be held at USI or at UE, dependent upon enrollment numbers.

To learn more about ROTC scholarships and admission to the program, go to Armyrotc.com. For specific information about UE's ROTC program, please see the UE Office of Veterans Affairs web page at evansville.edu/veteransaffairs/rotc.cfm, or contact:

Academic Policies and Procedures

Students are responsible for familiarizing themselves with the portions of this catalog pertaining to their course of study, University requirements, requirements for their major, academic policies, regulations, and procedures. Students should seek regular assistance from their academic advisors throughout their course of study; however, the student is ultimately liable for keeping up with program changes and for meeting all requirements.

The University reserves the right to change the fees, rules, and calendars regulating admission and registration, to change regulations concerning instruction in and graduation from the University and its various academic units, to withdraw courses, and to change any other regulation affecting the student body. Information in this catalog is not to be regarded as a binding contract between the student and the school.

The University also reserves the right to deny admission to any applicant, to dismiss a student when formal academic action is taken by the Admissions and Standards Committee, to discontinue the enrollment of any student when personal actions are detrimental to the University community, or to request withdrawal of a student whose continuance in the University would be detrimental to his or her health or to the health and safety of others.

Academic Honor Code

In its mission, the University clearly states its intention to be value-oriented in all endeavors. The Academic Honor Code was created by the University community, students and faculty alike, to create an atmosphere conducive to this high ideal and to academic integrity.

The primary purpose of the Academic Honor Code is to enable students and faculty to conduct their academic duties in an atmosphere of freedom. This is an ideal that requires the commitment of both students and faculty. Members of the faculty affirm a commitment to the Academic Honor Code by defining clearly what is or is not unauthorized aid. Student commitment to the Academic Honor Code is implied by his or her matriculation at the University of Evansville. The code, which follows, is appropriate for all academic work that is to be submitted for credit.

I understand that any work I submit for course credit will imply that I have adhered to this Academic Honor Code: I will neither give nor receive unauthorized aid, nor will I tolerate an environment that condones the use of unauthorized aid.

Commitment to the University of Evansville Honor Code is a condition of matriculation at the University. Under the honor system, faculty members often use honor-based testing devices, such as take-home exams and examinations without a proctor. Each instructor is obligated to define unauthorized aid clearly as it relates to assignments within his or her specific course(s). Instructors should discuss the importance of academic integrity, review related items in the syllabus, and clarify the definitions of cheating and plagiarism. When in doubt, the student is obligated to obtain an understanding of the instructor's use of the term. Ignorance is not accepted as a valid excuse for a violation of the Academic Honor Code.

The non-tolerance clause ("nor will I tolerate an environment that condones the use of unauthorized aid") is integral to the Academic Honor Code as the honor system relies on the active participation of all students. Each student, therefore, is responsible for his or her own personal honor and the academic integrity of the University community. The academic honor system functions only when students value their personal honor and that of the community enough to guard it. This is not to say that students must constantly watch for violations; however, it is the student's responsibility to uphold the integrity of the

Academic Honor Code. Any observations or knowledge of misconduct should be reported immediately.

The honor system and the implementation of its procedures fall under the administrative jurisdiction of the faculty and the president. The Office of the Dean of Students keeps records of violations and hearings and may be consulted by the Honor Council chair regarding procedures and past violations.

For more information about the Academic Honor Code and procedures, please reference the Student Handbook.

Academic Advising

The University of Evansville emphasizes the development of individual initiative, responsibility, and self-discipline by students in the planning of their own educational programs. The academic advising system is designed to assist students in the development of educational plans and career goals and to teach them the skills necessary to pursue those goals. In both academic and career areas, planning is a development process to be fostered during the entire period of a student's involvement with the University.

Faculty advisors, with the support of the Center for Academic Advising work closely with students to help them develop intelligent, responsible self-management.

Freshman Advising Program

The Freshman Advising Program provides guidance from the moment a student enters the University. Assigned faculty advisors who are familiar with the students' academic preparation and areas of interest offer freshmen not only direction in the choice of courses but also insight into the nature and importance of a university education. Faculty advisors help to plan incoming students' academic programs on the basis of their backgrounds, abilities, interests, and goals.

When a freshman indicates an area of interest or a major, an advisor is assigned on the basis of academic specialty. For freshmen with wide-ranging interests who are undecided about a major field of study, advisors especially interested in working with undeclared students are assigned, taking into account each student's stated areas of interest.

Whenever possible, a freshman's advisor will also be one of his or her instructors, ensuring the student's opportunity to seek help at any time. This classroom contact also cultivates the advising and counseling relationship between students and faculty advisors. Students comfortable with an advisor they have come to know as professor and friend find it easier to discuss not only which courses to take next term but also which academic programs and career paths to consider.

Transfer Student Advising

Transfer students are assigned to faculty advisors according to their academic interests or intended majors. Advisors, aided by the Office of the Registrar, help transfer students assess standing toward the degree in their chosen field of study and work with them in long-range academic and career planning. A transcript evaluation is completed by the Office of the Registrar after official transcripts are submitted from previous colleges the transfer student attended. It is advisable that all transfer students go over the necessary graduation requirements with their new academic advisor upon matriculating to the University of Evansville.

Academic Load Fall/Spring Semesters

Full-Time: A student enrolled in 12 or more hours per semester

Part-Time: A student enrolled for fewer than 12 hours per semester

The normal load for a full-time undergraduate student is 12 to 16 hours of class and laboratory work per semester. If a student, in consultation with his or her academic advisor, elects to carry more than 16 hours, the grade point average should be a guide in determining the maximum number of hours to be attempted (exclusive of music ensembles and exercise and sport science activity courses). The recommended load limits are:

Up to 1.99 GPA – 16 hour maximum

2.0 to 2.99 GPA – 18 hours maximum

3.0 to 4.0 GPA – 20 hours maximum

Overload: Because academic performance frequently suffers when an overload is taken, a student in good standing wishing to take 21 hours or more and a student on academic probation wishing to exceed 16 hours must petition the dean of his or her major's college for approval and have the support of the academic advisor in doing so.

Most academic failure results from insufficient study outside the classroom. If a student has a job or other non-academic activity requiring 20 or more hours each week, he or she is advised to carry a reduced academic load. Students should allow sufficient time outside the classroom for study (use the guideline of two hours of study for each hour spent in class) as an investment in academic success and their professional future.

Class Attendance

The University is committed to the promotion of a sense of academic community in which the student and instructor join in a shared learning experience. The student and instructor alike assume responsibility for the general well-being of the academic process, each having something to contribute to as well as to gain from a given course.

The University expects regular class attendance by all students and places the responsibility on the student. Students are considered sufficiently mature to appreciate the necessity of regular and punctual attendance, to accept this personal responsibility, and to accept the consequences of failure to attend. An instructor or academic unit may require attendance in courses or types of courses. Instructors are expected to maintain absence policies in keeping with the nature of their courses and may consider attendance in evaluating performance in their courses.

When an absence occurs due to an emergency or medical condition, students are expected to notify their instructors of the absence prior to class or to seek the assistance of the Office of the Dean of Students in notifying instructors. The dean of students has the authority to review and grant requests, if appropriate, for excused absences for documented medical, psychological, or personal reasons, including observation of religious holidays.

Classification of Students

Students are classified on the following basis:

Senior: 90+ credit hours earned

Junior: 60-89.9 credit hours earned

Sophomore: 30-59.9 credit hours earned

Freshman: 0-30 credit hours earned

Registration Procedures

Eligibility for Course Registration

A student must confer with his or her advisor and secure the advisor's approval for all course registrations or changes of registration. Registration for continuing students will take place during the preceding regular semester according to the schedule published by the Office of the Registrar. Registration for new students will be held during special orientation and registration periods or on the opening days of a term as designated by the University calendar.

In general, courses are numbered to suggest the appropriate level of eligible enrollment by students:

0-99 Non-credit

100-199 Freshman Level

200-299 Sophomore Level

300-399 Junior Level

400-499 Senior Level

500-799 Graduate Level

Exceptions to the undergraduate enrollment eligibility guide may be made by the advisor if there are no other prerequisites to enrollment.

Cancellation of Registration

Cancellation of enrollment is permitted prior to the first day of class. The Office of the Dean of Students must be notified. Students who cancel their enrollment by this deadline will be given a full refund for tuition and room and board.

Change of Registration

The student is held responsible for each course in which he or she officially registers. Once enrolled, students may change their course schedule by dropping or adding one or more, but not all, courses. After the first week of classes, an official drop/add form must be filed in the Office of the Registrar with the signature of the academic advisor and the instructor.

Dropping a Course

A course may be dropped without a designated grade through the last day to register or add a course (see the academic calendar for exact dates). From that date through the 11th week, a grade of W is assigned. After the 11th week, a grade of F is assigned. Discontinuance of attendance does not automatically constitute a withdrawal. Students failing to file a proper drop/add form by the appropriate deadline must complete classes for which they are registered or receive a grade of F.

Independent Study

The purpose of independent study is to provide students an opportunity to pursue in detail special topics or projects within the discipline when such topics are not sufficiently covered in existing courses. Normally, such enrollment is restricted to the regular academic year. The student shall be registered for independent study credit in the semester during which the majority of the work is done. Independent study is not to be used as a substitute for regularly scheduled academic offerings except in rare special circumstances, which will be defined by each academic unit. In such cases, the student and sponsoring instructor must submit the approved proposal for independent study form explaining why the course must be taken as an independent study. Tuition for independent study is charged at undergraduate tuition rates.

Auditing Courses

When space is available after the registration of regularly enrolled students, others may request permission of the instructor and the Office of the Registrar to enter a lecture course as auditors. An audi-

tor is subject to attendance regulations and other conditions imposed by the instructor. The audit status for a course must be declared by the last day established for course additions. Laboratory sections of lecture courses, clinical experience in nursing and health sciences, internships and field experience throughout the University, and cohort degree programs are excluded from this policy.

Audit courses are not included in determining full-time enrollment status are not graded, and do not apply towards graduation requirements. An audit course may not be changed to a credit course under any circumstances, which precludes a student attempting to earn credit by departmental or CLEP examination at a later date for a class previously audited. Credit courses may not be changed to audit courses. The tuition charged for audit classes is the same as for credit.

Undergraduates Taking Graduate-level Courses

Undergraduate students with 90 credits or more may register for graduate credit course work with the consent of the student's advisor and the department offering the course. Students may not enroll in more than 6 graduate credits per semester. For students taking graduate coursework, the total course load each semester, graduate and undergraduate, must not exceed 18 credit hours. No more than 12 graduate credits total can be permitted to count toward the undergraduate degree. Graduate course work may apply toward the undergraduate degree with the approval of the department chair of the student's major.

Summer School Registration

Students are limited to a maximum enrollment of three courses (maximum 10 credit hours) during a single summer regardless of the number of sessions or universities attended. Students who wish to take more than 10 credits must have a 2.0 minimum cumulative GPA, submit a petition to the dean of his or her major's college for approval, and have the support of the academic advisor in doing so. Students planning to take courses at another institution must have written approval on a transfer credit request form signed in advance by the student's academic advisor and the registrar.

Withdrawal from the University

A student who finds it necessary to withdraw from all credit courses must apply for formal withdrawal through the Office of the Dean of Students. This process requires the completion of a University withdrawal form, an exit interview and, for students under the age of 18, parental permission. Final approval is subject to clearance from the Office of Student Accounts. If this procedure is not followed, grades of F will be assigned.

After the official last date to withdraw (see the academic calendar), approval for withdrawal from the University without grade penalty will be given for only one of two reasons: medical or psychological problems. A letter from a doctor or psychologist is required.

Failure to complete the term does not cancel the student's obligation to pay tuition and all other charges in full. For specific details regarding refunds and adjustments, refer to the section on tuition and fees in this catalog.

Credit from Other Institutions, Advanced Placement, CLEP, International Baccalaureate, and by Examination

Transfer Credit

The University of Evansville evaluates and may accept credit earned at other regionally accredited educational institutions. The

majority of credit hours required for a University of Evansville degree must be earned from a bachelor's degree program. No more than 60 semester hours of credit from a junior college or community college may be transferred to the University, except in cases where an articulation agreement has been established.

At least 48 hours, including the last 15 hours and the majority of hours in the major, must be completed in residence to earn a baccalaureate degree from the University of Evansville, subject to the requirements of specific majors.

Once matriculated, a University of Evansville student may take no more than three courses (maximum 10 credit hours) from another institution for transfer credit to be applied to his or her degree. Prior written approval from the student's academic advisor and the registrar via the transfer credit request form is required for each course the student takes for transfer credit. Failure to obtain prior approval may result in credits not transferring. The three course limit for transfer credit may not apply to students participating in an approved study abroad program not available through the University of Evansville.

Transfer credit is awarded only upon receipt of an official transcript sent directly to the UE registrar's office from the transfer institution. Each course is evaluated separately (except in cases of articulation agreements) to determine if it can apply toward a UE degree. The University reserves the right to accept or reject courses for transfer credit. Courses with a grade of D or lower and institutional exams will not be accepted for transfer credit. Grades are not transferred, only credits are transferred. Credits from other accredited educational institutions will not be posted to a student's transcript unless the credit applies to a student's degree program.

The University of Evansville has articulation agreements with Ivy Tech Community College of Indiana, Vincennes University, Kentucky Community and Technical College System, Henderson Community College, and Owensboro Community and Technical College.

Credit from Advanced Placement, CLEP, International Baccalaureate, and by Examination

The University of Evansville allows students to earn an unlimited number of hours of credit prior to entrance through the College Board Advanced Placement (AP) testing program, providing a grade of four or better in each examination has been achieved, and through the International Baccalaureate (IB) program, providing a grade of five or better in higher level subjects has been achieved. Exceptions may apply. Contact the Office of the Registrar for details.

Students may also obtain course credit by submitting the results of the College Entrance Examination Board's College Level Examination Program (CLEP) or by taking University of Evansville proficiency examinations administered by an academic department. The number of hours of credit that can be counted toward the total hours required for graduation through CLEP or departmental credit by examination, however, is limited to two courses.

Departmental examinations in specific courses are available to qualified students upon approval of the academic advisor and the chair and/or dean of the academic department in which the examination is to be taken. Credit by examination forms are available from the Office of the Registrar. A nonrefundable departmental examination fee will be charged (see tuition and fees section) by the Office of Student Accounts. Credit for the course will be granted provided the student passes the examination with a grade of C or better. No exam may be repeated if a grade lower than the equivalent of a C is earned. A grade of P is recorded on the transcript for credit earned by examination.

Students are not permitted to schedule departmental examinations in courses that have been audited, in courses in which unsatisfactory grades have been earned, or in courses that have been dropped with a grade of W. No credit toward graduation is awarded retrospectively to lower level course work based solely upon satisfactory completion of more advanced course work in the same subject area except for academic sequence courses in foreign languages.

Credit Hour Policy

The University of Evansville assigns credit on the basis of the semester hour. UE has established a credit hour policy consistent with the Federal definition of a credit hour. A semester credit hour consists of one clock hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 15 weeks for one semester, or an equivalent amount of work through laboratory, practicum, internship, studio, or other academic activity. This equates to 45-75 hours of academic experiences for each semester credit hour. Alternatively, courses may meet the credit hour policy using a learning outcome standard. This requires that the student demonstrates, to the satisfaction of the department awarding the credit, evidence of actual achievement of course objectives that are at least equal to the intended learning outcomes for a course that meets the clock hour requirement described above.

Grades

Grading System

At the conclusion of each semester students receive letter grades indicating the adjudged quality of their work in each course. Grade points are assigned for each semester hour of credit as follows:

A	Excellent	4.0
A-		3.7
B+		3.3
B	Good	3.0
B-		2.7
C+		2.3
C	Average	2.0
C-		1.7
D+		1.3
D	Poor	1.0
F	Failure	0.0
FW	Failure to complete	0.0
I	Incomplete	
NG	No grade	
P	Pass	
W	Withdrew from course	

All A, B, C, and D grades are passing grades. Grades of I, NG, P, or W are not included in computing grade point averages. The grade point average is the quotient resulting from dividing the total points earned by the number of hours attempted (including failure and excluding pass and incomplete).

Midterm and End of Semester Grades

The University does not mail grades at the end of each semester. Students can access their grades on the University's student information website. Midterm grades are not permanently recorded but are used by students and their advisors for information and guidance. End of semester grades become a part of the student's permanent record.

Pass/Fail Option

A student may register for an elective course on a pass/fail basis. The option is intended to encourage the student to explore new academic

areas without endangering the student's grade point average unless the grade earned is an F. Limitations on pass/fail registration are:

- Junior or senior status
- Only one course per semester may be taken pass/fail
- o course required for the major or minor and no course being used to meet a general education requirement may be taken pass/fail
- Pass/fail courses must be listed at the time of registration and must not extend beyond the approved academic load
- A course may not be changed from pass/fail, or vice versa, after the last day established for course additions

Courses offered only on a pass/fail basis are not subject to these regulations, except they must not extend beyond the approved academic load.

Incomplete Grades

All course work is to be completed within the semester it is attempted. If an emergency prevents a student from completing some portion of the required assignments, an instructor may give an I or incomplete grade only if the following circumstances are met:

1. The student's other work in the course would earn a passing grade.
2. The outstanding task can be completed without further class attendance.

Outstanding course work normally should be completed within six weeks of the class ending, but the instructor may allow up to one year from the end of the term for which the I grade is granted. It is the student's responsibility to have this deficiency removed within the agreed-upon period or within one year, whichever is less. (Registering for a course a second time does not remove an incomplete grade.) If the instructor has not submitted a grade change after the grace period, the registrar is authorized to change all grades of I to F.

Repeating Courses

Any student who wishes to better the grade in a course taken at the University of Evansville may elect to repeat that course for grade improvement but must do so at UE. The cumulative grade point average (but not the semester grade point average) will reflect only the higher grade earned for a specific course. Both grades will remain on the transcript. Credit is awarded only once for the course unless otherwise indicated. Some courses may not be repeated; these are determined by the faculty of the appropriate academic unit of the University.

Dean's List

To merit the honor of being placed on the Dean's List for a given semester, a student must have carried a full academic load of 12 hours or more, excluding pass/fail courses, and have earned a grade point average of 3.5 or above.

Grade Appeals

Any student who questions a course grade should speak to the instructor. If the instructor is unwilling to change the grade and the student is not satisfied with the reasons given, the student may commence a formal appeal.

Any student wishing to contest a course grade formally must do so in writing within 60 calendar days after the last day of the semester. Correspondence should be addressed to the instructor with a copy to the immediate supervisor. A change of grade will occur if both the instructor and his or her immediate supervisor approve and both sign a change of grade form, which is forwarded to the Office of the Registrar.

If either the instructor or the immediate supervisor disapproves of the change of grade, the student has the right to appeal to the Admissions and Standards Committee within two weeks of receiving written disapproval. If the student receives no response from either party within 30 calendar days of filing the appeal, the student may appeal directly to the Admissions and Standards Committee. Any appeal to the Admissions and Standards Committee must be filed during the semester (exclusive of summer terms) immediately following that in which the disputed grade was received.

When appealing to the Admissions and Standards Committee, the student must send a copy of the appeal to the instructor and immediate supervisor. The student, the instructor, and the immediate supervisor will be requested to appear before the committee. In exceptional circumstances, the committee may allow other parties to attend the hearing to provide additional information. The committee chair will notify all parties of the decision.

It is the student's responsibility to retain all dated correspondence until the final decision is reached.

Academic Standards

Graduation requires a minimum grade point average of 2.0 in both the major and the total program of study. Additional GPA requirements may be imposed by particular programs. The University reserves the right to dismiss at any time a student whose academic standing or progress is regarded as unsatisfactory.

Academic Good Standing

Good standing refers to the normal academic progress of students who are not on probation or on academic dismissal.

Cumulative grade point averages required for good standing:

After the first semester – not less than 1.6

After completing 30 hours – not less than 1.9

After completing 60 hours or more – not less than 2.0

Progress Toward Degree

All students enrolled for credit are expected to make regular and satisfactory progress toward completion of a degree in a reasonable time. This is especially true for those students using financial aid grants or loans to meet the cost of education.

Expectations

1. All students must maintain scholastic averages that place them at or above good academic standing (see above).
2. Full-time students (i.e., any student enrolled in 12 or more hours in one semester) are expected to accumulate an average of 12 hours of credit for each semester (fall/spring) enrolled.
3. Part-time students (i.e., any student enrolled for fewer than 12 hours per semester) are expected to accumulate a minimum of 24 hours of credit for each 30 semester hours enrolled.

Summer terms are not computed as regular semesters of enrollment; however, credit hours earned during the summer may be applied to degree requirements.

Satisfactory academic progress requirements for financial aid differ from those outlined above. The Office of Financial Aid should be contacted for those guidelines (see page 9).

Academic good standing (minimum and cumulative grade point averages) will be reviewed at the end of each semester (fall/spring).

Academic Probation

Students will be placed on academic probation when they fail to maintain good academic standing, which requires cumulative grade point averages as follows:

Hours of Credit	GPA
-----------------	-----

Fewer than 30	1.6
---------------	-----

30-59.9	1.9
---------	-----

60 or more	2.0
------------	-----

Academic Dismissal

Students who fail to remove probationary status for two consecutive semesters (exclusive of summer terms) may be dismissed from the University.

The University reserves the right to dismiss a student not making satisfactory progress toward a degree at the end of any semester in which minimum academic standards are not met.

As long as a student has not been dismissed from the University, classes may be taken during summer sessions to improve the cumulative grade point average and/or to accumulate earned hours toward satisfactory progress. Transfer credit will only apply to accumulated earned hours and not the cumulative grade point average.

Students who have been academically dismissed from the University may not apply for readmission until at least one full semester (excluding summer terms) has passed. Readmissions are considered on a case-by-case basis, and documentation must be provided indicating conditions favorable toward readmission and future academic success. Recommendations from advisors should be included with the petition. If a student takes courses at another university after being dismissed from UE, an official transcript with all grades must be included in the petition for readmission. The petition for readmission must be filed with the Admissions and Standards Committee through the Center of Academic Advising. All completed documentation must be submitted by December 1 for spring semester readmission and by August 1 for fall semester readmission.

Students dismissed a second time by the University may not apply to be readmitted.

Access to Education Records

The University of Evansville complies with the Family Education Rights and Privacy Act of 1974 (FERPA), as amended (Public Law 93-380), which is designed to protect the privacy of students by giving them rights concerning their education records. Education records include records directly related to a student and maintained by the University. Among other provisions, the act gives students (1) the right to inspect their records, (2) the right to challenge incorrect information in those records, and (3) the right to keep their records private. Students attending the University will be notified of their FERPA rights annually in the Student Handbook. Each University office maintaining educational records must implement this policy by appropriate means.

FERPA further provides that certain information about the student, designated as directory information, may be released by the University unless the student has informed the University in writing that such information may not be released. The following is considered directory information: name, home address, local address, telephone listings, major field of study, full-time or part-time status, participation in officially recognized activities (in athletics, the weight and height of members of athletic teams), dates of attendance, degrees earned, awards received, photographs, and most recent previous school attended.

A student who desires that the above-listed directory information not be released must inform the Office of the Registrar in writing within one week of the beginning of each semester each academic year. Students may rescind their request in writing at the Office of the Registrar. While the University will honor a student's request to withhold directory information, it cannot assume responsibility to contact the student for subsequent permission to release such information. Regardless of the effect upon the student, the University assumes no liability as a consequence of honoring instructions that directory information be withheld.

Also, it is the student's responsibility to seek correction for any apparent errors in end of semester grades. Failure on the student's part to seek correction within a reasonable period indicates that records are accurate as stated.

Effective as of 2012, certain agencies of the federal government may access and release students' records without their consent to any third party designated by a federal or state authority to evaluate a federal or state supported education program or to researchers performing certain types of studies.

Transcript of Academic Record

Students may obtain a certified statement of their academic record from the Office of the Registrar upon written request with signature. There will be a fee charged for each request. Transcript requests will be processed within five working days. Transcripts will not be released if the student has an unpaid financial obligation to the University or if there is an unresolved disciplinary action against the student.

Graduation

Upon the recommendation of the faculty and the approval of the Board of Trustees, the University of Evansville confers its academic degrees. Only those candidates who have fulfilled all scholastic requirements for a degree and who have met their financial obligations to the University will be recommended for the degree. Degrees are conferred five times a year at the end of the following terms: fall semester, winter intersession, spring semester, first summer term, and second summer term.

Application for a Degree

A candidate for a degree must file an application for the degree in the Office of the Registrar one year prior to the intended date of graduation. While the registrar will conduct a degree audit on behalf of the University, it is the student's responsibility to ensure that all graduation requirements are met.

Graduation under a Particular Catalog

University policy allows a student seven years to graduate under the catalog in effect at the time of initial enrollment at the University of Evansville unless the student is readmitted after a one-calendar-year or more break in attendance. Students who are readmitted to the University after a one-year or more absence will follow the catalog in effect at the time of their re-entry.

Students who are pursuing two (or more) degrees simultaneously or who wish to earn an additional degree (see "Requirements for an Additional Degree") after completing the first may follow the same catalog as for the first degree if (a) no more than seven years have elapsed since their initial enrollment at the University and (b) there has not been an absence from the University of more than one academic year.

This policy does not apply to students initially admitted to part-time academic programs. Students admitted to part-time academic programs should consult with the Office of the Registrar for applicable policies.

Candidate Clearance

The University will be responsible for including on the list of graduates only those students who have submitted the application for degree and have met all academic requirements and all financial obligations. Deficiencies in academic requirements, such as incomplete grades and course substitutions, must be cleared no later than two weeks prior to the expected date of graduation.

Graduation with Honors

Bachelor degree candidates who have maintained their scholastic standing at a high level will graduate with honors. Students acquiring a grade point average of 3.85 will receive their degrees summa cum laude; students acquiring a grade point average of 3.70 will receive their degrees magna cum laude; and students acquiring a grade point average of 3.50 will receive their degrees cum laude. Only grades earned at UE are included in the calculation. Students must earn at least the minimum number of hours to comply with the University's residency requirement in order to be eligible for honors.

Commencement

Commencement exercises are held annually in May and December. Students completing degree requirements in the spring semester and following summer sessions may participate in the May ceremony. The December ceremony is for students completing degree requirements in the fall semester.

William L. Ridgway College of Arts and Sciences

Ray Lutgring, Dean

The William L. Ridgway College of Arts and Sciences provides quality liberal education in the arts, humanities, and natural and social sciences, as well as professional training in the fine and performing arts. While baccalaureate degree work includes studies in fundamental disciplines and applied specializations, these are complementary to the overall goals of individual intellectual growth and cultural development through broad study of the nature of humans and the universe.

The college offers baccalaureate degrees in archaeology, art history, art (art education, pre-art therapy, studio art, visual communication design), biology, biochemistry, chemistry, classical studies, cognitive science, communication (advertising and public relations, journalism, organizational communication, multimedia production, sport communication), creative writing, criminal justice, environmental science, environmental administration, foreign languages and cultures (French, German, Spanish), history, interdisciplinary studies, international studies, legal studies, literature, mathematics, music (music education, music management, music performance, music therapy), neuroscience, philosophy, physics, political science, psychology, religion, sociology (anthropology, gerontology, pre-social work), theatre (theatre design and technology, theatre education, theatre management, theatre performance), and writing.

Many preprofessional programs, minors, and concentrations are offered in most of the baccalaureate fields, as are Latin American, and Russian studies, and gender and women's studies. In conjunction with the College of Education and Health Sciences, the college offers bachelor degrees in senior high, junior high, and middle school education with teaching majors in English, language arts, mathematics, music, science, social studies, theatre, and visual arts.

Degrees granted in the College of Arts and Sciences are awarded upon successful completion of all University requirements and those of specific departments and degree programs. Major requirements are outlined within each section describing the academic discipline. Students are required to consult with their faculty advisors before completing class schedules.

iBACE: Integrating Business and Career Education

The iBACE program is designed to provide students in the William L. Ridgway College of Arts and Sciences and the College of Education and Health Sciences with educational and hands-on business experiences that will improve their marketability and career success. The program exposes students to business skills that they can apply in the workplace and builds upon foundational knowledge in their educational disciplines by adding those marketing, management, and finance skills essential for careers in a variety of fields. This program is designed to prepare students for current and future business trends in the professional workplace.

Course Work

The iBACE program contains three areas: coursework, a practical work experience, and a seminar for students seeking an internship. The program requires nine credit hours of coursework providing three building blocks of business training: Accounting 210, Marketing 325, and Management 377. Students must be at least sophomores to take the accounting course and juniors to enroll in the marketing and management courses. iBACE students are also strongly encouraged to add at least one course from those offered in Health Services Administration.

Professional Preparation

Students must enroll in EXED 090, Building a Professional Image, prior to completion of their internship. This is a 6 week non-credit course offered through Career Services for students seeking an internship or co-op program. This seminar course covers job interviewing skills, résumé preparation, currently available internships and details of program administration.

Internship

In addition to any internship, practicum, or clinical experiences iBACE students have within their health sciences major, iBACE students will complete an additional internship that focuses on business aspects of health care or health sciences. The business courses should be completed prior to the internship so that business principles can be applied to the professional experience. An internship in the student's major discipline is preferred.

Application

Interested students should complete an application form to enroll in the program. The enrollment form can be found online at ibace.evansville.edu. A certificate will be awarded at the completion of the program.

Archaeology and Art History

Faculty: Ebeling, Kaiser (Chair), Strobel, Thomas

Bachelor of Arts with a Major in Archaeology

Archaeology

The major in archaeology concentrates on providing students with an introduction to the discipline of archaeology and to the civilizations of the ancient Mediterranean area, the Near East, and Western Europe. It is intended to engage students in a broad-based, interdisciplinary approach that will not only provide a firm foundation for those wishing to pursue the discipline further at the graduate level but also serve as a liberal arts core for undergraduates planning careers in professional areas such as law or library science.

Majors are encouraged to spend at least one semester abroad, either at Harlaxton College or at a program directly related to Mediterranean archaeology (e.g., College Year in Athens or the Intercollegiate Center for Classical Studies in Rome). Harlaxton College is located in an area rich with remains of the Roman civilization in Britain. It is possible to spend a semester in England or even to pursue study-abroad for an entire year and still complete all degree requirements within four years. Students are encouraged to participate in an archaeological field school. In addition to its own field methods class, the department sponsors an excavation at the site of Jezreel in Israel; students may participate in other excavation practica as well. The department contributes to an interdisciplinary major in classical studies, which is described in its own section of this catalog.

Archaeology Minor (18 hours)

Archaeology 105, 106; any two 300-level archaeology courses; one 400-level archaeology course; History 311 or 312 or Interdisciplinary 325

Bachelor of Arts with a Major in Art History

Art History

The art history major offers a baccalaureate degree as preparation for graduate study in art history or for careers related to the visual arts, as well as providing an excellent liberal arts education. The program is international in scope, offering study at the Evansville campus and Harlaxton College. Study abroad may also be pursued through institutionally-approved programs in consultation with the Office of Study Abroad. Internships in major art institutions are recommended. The program offers an emphasis in ancient art and archaeology, Renaissance, Baroque, eighteenth, nineteenth, and twentieth century art, with hands-on experience in museum collections. Students are encouraged to begin their course of study with surveys of art (Art History 208 and 209) to establish a basis for more advanced courses. Independent study and seminar classes are also available to permit individual research projects supervised by a member of the faculty.

Art History Minor (18 hours)

A minor in art history is recommended for students majoring in anthropology, archaeology, communication, English, history, international business, international studies, languages, nursing, philosophy, political science, religion, or in any area of study where a broad knowledge of Western culture is essential.

Art History 208, 209, 389; one from Archaeology 206, 207, 305, 306, 307, 308, 309, or 311; one from Art History H383, 384, or 385; one from Art History H378, H379, 386, or H387

Art

Faculty: Frasier (Chair), Larmann, Matteson

Bachelor of Arts with a Major in Art

Bachelor of Arts

The Bachelor of Arts degree with a major in art is offered to meet the needs of students interested in art as a discipline of study within a liberal studies education.

Bachelor of Fine Arts with a Major in Art

Bachelor of Fine Arts

The Bachelor of Fine Arts degree with a major in art with studio area concentrations in ceramics, painting, and sculpture prepares students for graduate study and to enter the professional field as artists, teachers, designers, and other related professions.

Portfolio and Admission Requirements

BFA students are required to hold a minimum GPA of 2.7 in studio core art courses and submit a portfolio of their creative work for review by a faculty committee which will determine if admission to the BFA program will be granted. Portfolios should be presented for review during the semester following the student's completion of the core curriculum. A minimum of 18 hours in studio art and/or art history must be completed after full admission to the program and before graduation. Admission to the BFA degree program and graduation may not occur within the same academic year.

Graduation Requirements

Prior to graduation with a BFA degree, studio majors must meet the following requirements: Hold a minimum GPA of 2.7 in studio art courses, pass an exit review, and submit a display of their studio work for approval by an art faculty committee.

Bachelor of Science with a Major in Art Education

Art Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Bachelor of Science with a Major in Art and Associated Studies

Art and Associated Studies

The Bachelor of Science degree with a major in art is designed for students who want to combine a general art major with an associated field of study such as archaeology, art history, business, communication, history, psychology, or literature.

Bachelor of Science with a Pre-art Therapy Concentration

Pre-art Therapy Concentration

The Bachelor of Science degree with a pre-art therapy concentration is designed to prepare students for a master's degree program in art therapy or to work in a related field.

Bachelor of Science with a Major in Visual Communication Design

Visual Communication Design

The Bachelor of Science degree with a major in visual communication design is designed for students who wish to pursue a career in art with an emphasis in computer technology.

Studio Art Minor (20 hours)

The art (studio) minor is designed for students who desire a program of study for their own personal growth and enjoyment or for an adjunct to other major interests such as art history, archaeology, anthropology, business, communication, foreign languages and cultures, history, literature, philosophy, or religion.

Art 210, 220 or 221, 325; one course from Art 330, 340, 345; one course from Art 350, 360, 370; one course from Art History 208, 209; three hours in studio electives

Visual Communication Design Minor (18 hours)

The visual communication design minor is designed for students who prefer to supplement their interest in computers as the artist's tool.

Art 210, 213, 220 or 221, 315, 316, 410 or 417

Bachelor of Arts

Biology

Faculty: Aldred, Davis, Edwards (Chair), Gordon, Hochwender, Powell, Stamm

Bachelor of Arts or Bachelor of Science with a Major in Applied Biology

Bachelor of Arts or Bachelor of Science with a Major in Applied Biology Education

Bachelor of Arts or Bachelor of Science with a Major in Professional Biology

The Bachelor of Arts and Bachelor of Science degrees with a major in professional biology provide background for further education in one of the health professions (including medicine, dentistry, optometry, and veterinary medicine) or for further graduate study in all specialized areas of the biological sciences. The Bachelor of Arts and Bachelor of Science degrees with a major in applied biology prepare students for careers as laboratory or research assistants, for high school teaching, or for government service. Both biology majors offer a broad knowledge of the biological sciences, including exposure to cell biology, developmental biology, ecology, evolution, genetics, microbiology, molecular biology, physiology, organismal biology, and systematics. Undergraduates are encouraged to conduct in-depth research and, depending upon career goals, student projects may involve topics from gene cloning to complex ecosystem interactions. Students pursuing the Bachelor of Arts must meet the foreign language proficiency requirements at the second-year level and may not earn more than 45 hours of biology credit toward graduation.

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Gulf Coast Research Laboratory Affiliation

In 1995 an affiliation was established with the Gulf Coast Research Laboratory of the University of Southern Mississippi in Ocean Springs. Students may obtain transfer credit through summer study in marine science areas such as marine ecology, marine invertebrate zoology, marine psychology, and oceanography. See Dr. Edwards for details.

Biology Minor (18 hours)

Biology 118, 119, 120; additional 200, 300, and 400 level courses in biology to total a minimum of 18 hours (of the additional courses, six hours must be 300- or 400-level biology courses)

Certificates (16 hours)

The Department of Biology awards a certificate in each of four areas upon the completion of a minimum of 16 hours selected from among the courses listed in an area. Up to four hours of independent research (Biology 460) in a specific area may be applied toward the completion of the certificate requirements. Certificates are not reflected on the academic transcript.

Botany: Biology 215, 225, 305, 414, 428

Zoology: Biology 214, 333, 350, 425, 427, 434, 450

Field biology: Biology 214, 215, 320, 360, 414, 423

Microbiology: Biology 305, 331, 340, 110 or 430, 434, 442

Biotechnology: requires successful completion of a degree program in biology or chemistry, with the following courses: Biology 107, 119, 331, 340, 430; Chemistry 118.

British Studies

Faculty: Baldock, Boyle, Bujak (Chair), Green, Lock

British Studies provides an interdisciplinary survey of cultural and historical developments within British society from the earliest times to the present. It explains the political development of the various nations that make up the British Isles and the changing nature of the often-fractious relationship between and among those countries: England, Scotland, Wales, and (Northern) Ireland. The central theme of the required course at Harlaxton is national identity; it is concerned with and seeks to explain the nature of Britain historically, politically, culturally, and intellectually. The course helps students understand the protracted and difficult process by which the United Kingdom became unified.

Elements of the core course are integrated into Harlaxton's wide range of extracurricular activities, including the travel program. Through this holistic approach, students are encouraged to reflect on concepts of identity—national and individual—and the challenges posed by an increasingly globalized world. As part of the wider Harlaxton experience, British Studies supports students' development as responsible global citizens.

The required British Studies course aims that students will:

- 1) Acquire a clear understanding of major historical and cultural trends in Britain and Ireland;
- 2) Gain a greater sense of personal and social responsibility through intercultural knowledge and competence;
- 3) Develop a range of intellectual and practical skills, including:
 - a. inquiry/research and analysis
 - b. critical and creative thinking
 - c. written and oral communication
 - d. information literacy
 - e. teamwork and problem solving

A range of elective courses, to be taken either at Harlaxton or UE, further supports these objectives and also supplements and deepens the student's appreciation of British history and national identity and the U.K.'s political, artistic, cultural, intellectual and religious traditions.

British Studies Minor (18 hours)

BRIT 282/383/382H, 12 hours from the following: Art History H378, H379, H383, H387, H388; Education H498; English 231, 232, 233, 300, 350, 351, 370, 375, 380, 385; History 318, 319, 381, 383, 385, H491; Interdisciplinary 235, H280, H290; Political Science H385; Religion 250.

British Studies Certificate (12 hours)

BRIT 282/383/382H, 6 hours from the following: Art History H378, H379, H383, H387, H388; Education H498; English 231, 232, 233, 300, 350, 351, 370, 375, 380, 385; History 318, 319, 381, 383, 385, H491; Interdisciplinary 235, H280, H290; Political Science H385; Religion 250.

Chemistry

Faculty: Kaufman, Lampkins, Lynch, Miller (Chair), Slade, Thananattachon, Wilson

Bachelor of Arts or Bachelor of Science with a Major in Chemistry – Basic

The University of Evansville is approved by the American Chemical Society for undergraduate professional training in chemistry. The professional chemistry major described below meets the guidelines formulated by the Committee on Professional Training of the American Chemical Society. The Department of Chemistry offers three chemistry majors, a co-op program for interested professional chemistry majors, and a major in biochemistry.

It is possible, with advanced planning, to spend a semester in England and still complete all degree requirements within four years by taking general education courses at Harlaxton College.

Bachelor of Science with a major in Chemistry Basic Education

Chemistry Minor (20 hours)

Chemistry 118, 240, 280, 360; one from Chemistry 341, 351, or 370 and 371

Bachelor of Arts or Bachelor of Science with a Major in Chemistry – Professional

Environmental Studies

Director: Arlen Kaufman

The environmental studies program provides degree opportunities in three different environmental career areas. These include the Bachelor of Science degree with a major in environmental science, the Bachelor of Science degree with a major in environmental administration, and a baccalaureate degree selected from any traditional major combined with those courses constituting the environmental studies minor.

Graduates with a major in environmental science are well prepared for a variety of career opportunities dealing with the complex environmental problems that confront our society. This major stresses a strong background in basic science combined with courses dealing specifically with environmental problems. It is intended for the person interested in laboratory and fieldwork or the general area of detection, measurement, and solution of environmental problems.

Environmental Administration emphasizes, as a vocational objective, a management position for a person familiar with the scientific aspects of environmental matters and the general political, social, and economic framework of our society. In addition, a general background is provided in public administration that should aid in advancement possibilities within public agencies.

Bachelor of Science with a Major in Chemistry – Business Administration

Environmental Studies Minor (28 hours)

This program provides environmental perspectives to those entering conventional occupations where environmental awareness is important in decision-making and everyday life.

Biology 120, 320; Biology 423 or Chemistry 360; Chemistry 118, 240; Environmental Studies 360; Environmental Studies 103 or Biology 118; Geology 130

Bachelor of Arts or Bachelor of Science with a Major in Biochemistry

Bachelor of Science with a Major in Environmental Science

Co-op Program

A cooperative education plan for chemistry or environmental majors is available as an alternative to the traditional four-year plan. The co-op plan combines classroom education with full-time work experience in industry. Please refer to Special Educational Opportunities located in the Degrees, Curriculum, Academic Opportunities section of the catalog.

Classical Studies

Faculty: Kaiser (Archaeology/Art History), Stein (Philosophy/Religion), Thomas (Archaeology/Art History), Ware (Philosophy/Religion)

Bachelor of Arts with a Major in Classical Studies

The major in classical studies is an interdisciplinary liberal arts major intended for students who wish to study Greek and Roman antiquity with an emphasis on classical language, literature, and history. The major requires that students have a minimum of three years of either Greek or Latin, or two years of both Greek and Latin. Other classes will be selected from archaeology, history, philosophy, and world literature. These courses will provide a broad perspective on Greek and Roman civilization, while the facility that students develop with the classical languages enables them to use primary source material in their studies.

Bachelor of Arts with a Major in Classical Studies and a Concentration in Language and Literature

Students develop powers of critical analysis, an appreciation of literature, and an understanding of the documents and traditions which constitute the foundations of Western civilization. The major provides a superior liberal arts education offering excellent college preparation for a number of professional fields such as law or library science. The major also prepares students for graduate studies in classics or to obtain a master's degree in teaching Latin for preparatory and high schools. The minor will be of particular interest to students majoring in archaeology, literature, history, Biblical studies, or a foreign language.

Majors are encouraged to spend at least one semester abroad, either at Harlaxton College or at another approved study abroad program such as College Year in Athens or the Intercollegiate Center for Classical Studies in Rome. Harlaxton College is located in an area rich with remains of the Roman civilization in Britain. It is possible to spend a semester in England or even to attend study-abroad programs for an entire year and still complete all degree requirements within four years.

Classical Studies Minor (18 hours)

The courses in Greek or Latin which satisfy the minor requirement also satisfy the University's foreign language requirement.

At least three courses in Greek or Latin numbered 200 or above; at least two courses from Archaeology 105, 106, 305, 306, 307, 308, 309, 320, 395, 492; at least one course from History 311, 312, Interdisciplinary 250, 325, Philosophy 211, Religion 210, 330

Classical Languages Minor (18 hours)

In the classical languages minor, students gain facility in both classical languages, Greek and Latin. Students choose an area of primary competence in one classical language (Greek or Latin) and an area of secondary competence in the other classical language (or the other classical language and Hebrew). Classical language minors develop a mastery of the classical languages, powers of critical analysis, an appreciation of literature, and an understanding of the documents and traditions which constitute the foundation of Western civilization.

Primary competence: four courses in Greek or Latin numbered 200 or above

Secondary competence: two courses numbered 200 or above in the other classical language or the course numbered 211 in the other classical language and Hebrew 112

Communication

Faculty: Shifflet (Chair), Atkinson, Smith, Wandel, Zhang

**Bachelor of Arts or
Bachelor of Science
with a Major in
Communication**
specialization in Advertising
and Public Relations, Journal-
ism, Multimedia Production
or Other available.

The Department of Communication offers Bachelor of Arts and Bachelor of Science degrees in communication

This major prepares students for a variety of related professional careers involving communication. Students receive cross-training in various media and communication skills while also studying in greater depth one of three specialty areas: advertising and public relations, journalism, or multimedia. To acquire practical experience in the area of their choice, students are required to earn both practicum and internship credits. They are also required to earn either a minor or a specialization in an area outside communication. Communication courses are scheduled to allow students to attend Harlaxton College without disrupting their course sequences and graduation schedule.

**Bachelor of Arts or
Bachelor of Science
with a Major in
Health
Communication**

Communication Minor (18 hours)

Communication 130, 485; two from Communication 210, 211, 220, 221, 231, 251; two from one of the four specialty areas - advertising and public relations, journalism, multimedia production, or organizational communication.

**Bachelor of Arts or
Bachelor of Science
with a Major in
Sport
Communication**

Creative Writing

Faculty: Bone, Griffith (Chair), Mullins, Nikolidakis

Bachelor of Arts with a Major in Writing

The Department of Creative Writing offers majors and minors in writing for students preparing for careers in such fields as writing, teaching, publishing, business, librarianship, law, medicine, ministry, and diplomacy. Courses are also available for non-majors seeking personal enrichment or wishing to expand their powers of written expression. The Bachelor of Arts or Bachelor of Fine Arts degree may be earned in creative writing. Requirements for students in English preparing for secondary education are outlined in the College of Education and Health Sciences section.

Harlaxton College in Grantham, England

Study at Harlaxton College can be especially valuable for a writing student. Courses on Shakespeare and the English novel, along with several electives in literature, are offered most semesters at Harlaxton (see www.harlaxton.evansville.edu). Special programs are often arranged at the Royal Shakespeare Theatre in Stratford-upon-Avon, and visits to locales of significant authors and works are readily arranged.

Bachelor of Fine Arts with a Major in Creative Writing

Writing Minor (21 hours)

Writing 204, 205, and five or more courses from 206, 207, 306, 307, 308, 309, 390, 490 or 495

Foreign Languages and Cultures

Faculty: Andueza, Bates, Crowe, Curran, Kaiser, Meredig, Pleasant (Chair), Rodríguez Quevedo, Thomas, Ware

Bachelor of Arts with a Major in French

In keeping with the global focus of the University of Evansville, the Department of Foreign Languages and Cultures offers an array of degree programs. Students may elect a full liberal arts major or minor in French, German, or Spanish as well as an education major or minor in these three languages. Further options include a minor in Russian studies and classes in Greek and Latin. A classical studies major and minor and a classical languages minor are also offered. Students are encouraged to combine a language major with an additional major such as History, International Studies, Environmental Studies, Archaeology, Global Business, Public Health Administration, Creative Writing, etc. These complementary degrees provide graduates with an edge to compete in a global market.

Bachelor of Arts with a Major in German

Classical Languages Minor (18 hours)

In the classical languages minor, students gain facility in both classical languages, Greek, and Latin. Students choose an area of primary competence in one classical language (Greek or Latin) and an area of secondary competence in the other classical language (or the other classical language). Classical language minors develop a mastery of the classical languages, powers of critical analysis, an appreciation of literature, and an understanding of the documents and traditions which constitute the foundation of Western civilization. The requirements are primary competence in Greek or Latin – four courses numbered 200 or above; secondary competence – two courses numbered 200 or above in the other classical language or the course numbered 211 in the other classical language.

Bachelor of Arts with a Major in Spanish

French, German, or Spanish Minor (18 hours)

Foreign language and culture minors are required to take 18 hours at the 200-level and above in the target language. French/German/Spanish minors take 211, 212, 12 hours at the 300/400-level. FREN 311 is a prerequisite for all French upper-level courses. GERM 311 or 312 is a prerequisite for all upper-level German courses. SPAN 312 is a prerequisite for all upper-level Spanish courses. French, German, and Spanish minors who take FLC 401 as their capstone course must present their senior thesis in the target language as part of FLC 401.

Bachelor of Arts with a Major in Spanish with a Medical Spanish Specialization

Medical Spanish Minor (18 hours)

The medical Spanish minor requires 18 credit hours, which includes the following specific courses: SPAN 211, 212, 312, 325, 350, and another 300/400-level Spanish course. SPAN 312, 325, and 350 must be taken at UE.

Bachelor of Science with a Major in French Education German Education or Spanish Education

Russian Studies Minor (18 hours)

The minor in Russian studies combines Russian language courses with courses taught in English on Russian culture and literature. It requires 18 credit hours at the 200-level or above, including a minimum of 12 hours of Russian language courses (Russian 211-312); and the choice of two courses from Russian culture or literature (Russian 333, 334, and English 344) Nine semester hours of course work at a Russian university may be counted toward these requirements.

Secondary Education Teaching Minors

Grades 9-12. Students may not count 111 or 112 toward the minor.

In addition to the University's general education requirements, foreign language minors are required to take 24 hours at the 200-level and above. An approved study abroad program of at least six semester hours is highly recommended. Those courses replace University of Evansville courses.

French (24 hours): 211, 212, and 18 hours beyond

German (24 hours): 211, 212, and 18 hours beyond

Spanish (24 hours): 211, 212, and 18 hours beyond

Course Summaries

Beginning and Intermediate Language Sequence

Beginning foreign language courses (111, 112) introduce the student to the four skills of speaking, listening, reading, and writing, with emphasis on cultural awareness. Students may be required to do additional work with audio-visual media, or computer-assisted practice.

Intermediate foreign language courses (211, 212) are designed for the student who already has a good grasp of the elements of the language and is somewhat advanced in the four skills of speaking, listening, reading, and writing. Students placed in these courses usually have had three or four years of high school foreign language or have made an appropriate score on the proficiency test. Intermediate foreign language courses continue development of speaking and listening skills and stress growth in the areas of reading, composition, and cultural awareness. Students may be required to do additional work with a foreign language teaching assistant, audio-visual media, or computer-assisted practice.

Advanced Courses

Advanced courses are at the 300-level and 400-level courses. Courses are offered in rotation and address culture, literature, language analysis, linguistics, business, politics, society, and cinema. All courses emphasize conversation, composition, and reading skills within a cultural context. Lectures and assignments are in the target language.

Please refer to the back of the catalog for individual course descriptions and prerequisites.

Elective Credit (5 hours)

39 Hours of 300/400 level courses

Gender and Women's Studies Minor

Coordinator: Parks

The Gender and Women's Studies minor has two major goals: offer an interdisciplinary program of study in GWS and to promote the understanding of gender and women's issues in an informed curriculum that reflects new scholarship and applications. The objective of the gender and women's studies minor is to encourage students to analyze the roles, perspectives, and contributions of women and to examine the influences of gender on historic and contemporary life. Through examining women's history, present conditions, and future possibilities, students will come to understand how gender is socially constructed. The curriculum consists of three categories of courses: (1) department courses that take women or gender as their primary focus, are based on recent scholarship, are interdisciplinary in nature, and are offered directly by the gender and women's studies program; (2) core courses offered by academic departments that take women or gender as their primary focus and are based on recent scholarship; and (3) affiliated courses which are not gender and women's studies courses but have significant gender and women's studies content.

Harlaxton College in Grantham, England

The British studies course at Harlaxton College includes lectures and seminar discussions on roles of women and other gender-related issues in successive epochs of British and European history. The opportunity for travel and observation of gender and women's issues, conditions, and opportunities is rich at Harlaxton.

Gender and Women's Studies Minor (18 hours)

Gender and women's studies minors must pursue a major in a primary discipline.

Curriculum: Gender and Women's Studies 101 and five additional courses from department, core, and affiliated courses; at least two of the five additional courses must be from either department or core courses

Department Courses

Gender and Women's Studies 101, 492, 493

New courses meeting the criteria of either core or affiliated may be added for inclusion in the program. Certain departmental special topics courses, approved for women's studies, may also be included within the course of study. The following are tentative offerings. Please consult the class schedule for current approved offerings.

Core Courses

(See the appropriate department for course descriptions.)

Archaeology 415, Art History 492*, History 320, 380*, 428; Legal Studies 420, Political Science 326, Religion 340, 375, Sociology 335, 435, Spanish 438*. *These courses can be repeated with a change in topic.

Affiliated Courses

(See the appropriate department for course descriptions.)

History 418, Interdisciplinary 255, Psychology 229, Theatre 395*, English 348*, History 380*, Philosophy 450, Sociology 350, 460, Religion 305. *These courses can be repeated with change in topic.

History

Faculty: Byrne, Bujak (Harlaxton), Gahan, Green (Harlaxton), MacLeod (Chair), Parks

Bachelor of Arts with a Major in History

The main objective of study in history is to acquire an understanding and an appreciation of the historical world in which we live. History courses explore the past so that students will be better equipped to explain the complexities of the world in our time through exploring the characteristics and impact of each age in the past. The ultimate goal is to help students understand the problems they face, appreciate the richness of the human experience, and act with reason and judgment.

Students with a degree in history will be proficient in the areas of analysis, critical thinking, finding and using evidence, and both written and oral communication skills. Earning the degree is excellent preparation for graduate studies in history or related fields as well as for law school. Additionally, history majors will also be prepared for careers in diverse areas such as education, business, government, politics, or journalism.

Bachelor of Arts or Bachelor of Science with a Major in History Education

These goals can also be advanced through a semester of study at Harlaxton College or a similar study abroad program. History courses are offered each semester at Harlaxton (see www.harlaxton.evansville.edu). This is a wonderful opportunity not just to study history in class, but also to visit the very sites where many important historical events took place. It is possible, with advanced planning, to spend a semester abroad and still complete all degree requirements within four years.

History Minor (21 hours)

Seven courses in history (no more than two at the 100 level and at least one at the 400 level)

Students majoring in a variety of disciplines (e.g. business, communication, political science, or pre-law) will find history courses relevant to their studies and are encouraged to consider taking a history minor.

Bachelor of Arts in History Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Bachelor of Science in History Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Bachelor of Arts HISTORY

Social Studies Concentration

History Education majors must complete a concentration in either Economics, Government & Citizenship, Psychology, Sociology, or General Social Studies. Complete one of the following:

Economics

- ECON 101: Principles of Macroeconomics (3 hrs)
- ECON 102: Principles of Microeconomics (3 hrs)
- ECON 300/400 level elective (3 hrs)

Government & Citizenship

- PSCI 100: World Politics (3 hrs) *or*
- PSCI 160: Intro to International Relations (3 hrs)
- PSCI 143: American National Government and Politics (3 hrs)
- PSCI 300/400 level elective (3 hrs)

This checklist is informational only. The University reserves the right to modify regulations and curriculum at any time. Please see the automated degree audit on Student Planning for the most up-to-date program information.

Psychology

PSYC 121: Introduction to Psychology (3 hrs) *or*
PSYC 226: Child & Adolescent Psychology (3 hrs)
PSYC 229: Social Psychology (3 hrs)
PSYC 259: Abnormal Psychology (3 hrs)

Sociology

SOC 105: Introduction to Sociology (3 hrs)
SOC 230: Social Problems of the Modern World (3 hrs)
SOC 300/400 level elective (3 hrs)

General Social Studies

Complete one course from three of the four disciplines:

1. Economics

ECON 101: Principles of Macroeconomics (3 hrs)
ECON 102: Principles of Microeconomics (3 hrs)
ECON 300/400 elective (3 hrs)

2. Political Science

PSCI 100: World Politics (3 hrs)
PSCI 143: American National Government and Politics (3 hrs)
PSCI 160: Intro to International Relations (3 hrs)
Any 300/400 PSCI elective (3 hrs)

3. Psychology

PSYC 121: Introduction to Psychology (3 hrs)
PSYC 226: Child & Adolescent Psychology (3 hrs)
PSYC 229: Social Psychology (3 hrs)
PSYC 259: Abnormal Psychology (3 hrs)

4. Sociology

SOC 105: Introduction to Sociology (3 hrs)
SOC 230: Social Problems of the Modern World (3 hrs)
Any 300/400 SOC elective (3 hrs)

39 Hours of 300/400 level courses

Interdisciplinary Studies

Bachelor of Arts or Bachelor of Science with a Major in Interdisciplinary Studies

The interdisciplinary studies major allows students more flexibility in designing their major than any other program. Within an interdisciplinary studies major, students select courses that either more precisely meet their professional or personal educational goals or anticipate future trends in employment markets.

An interdisciplinary studies major consists of an integrated series of courses selected from at least two established University academic disciplines. An advisor from each academic discipline will be assigned to the student, with one primary advisor chosen by the advisors in each discipline and the student. Students will devise, in consultation with their academic advisors, an academic program suited to an area of special interest. Because the student must be involved in planning this major, the student will need to think critically about personal and professional goals and articulate reasons for pursuing this major. Although in principle any area of academic investigation may constitute the subject of an interdisciplinary studies major, such a major would ordinarily be defined in one of three ways:

- An area of the world, geographically, politically, or culturally prescribed, such as American Studies, Latin American Studies, Asian Studies, European Studies, British Studies;
- A period of time in history of some part of the world such as the Enlightenment, the Renaissance, the Middle Ages; or
- A specific problem that is treated in several disciplines such as the concept of social justice, revolutionary movements, and the concept of energy.

The minimum credit requirement for a major in interdisciplinary studies is 39 hours selected from two established academic disciplines. It is desirable for the student to select approximately 20 hours from each discipline, but at least 15 hours must come from each discipline. More than two established academic disciplines may be chosen, but at least 15 hours must be earned from each discipline chosen. Of the total hours earned in each discipline, at least 9 hours must be in upper division courses (i.e., 300- or 400-level courses), and the total number of upper division hours must be at least 24. Courses from each discipline may be chosen in consultation with advisors to meet personal and professional goals of the student. Courses should fulfill the University of Evansville writing requirements, and the proposal should address the University's learning objectives. University General Education requirements must be satisfied with courses outside any of the chosen disciplines, with the exceptions of foreign language and the senior seminar. Each candidate for a bachelor's degree with a major in interdisciplinary studies must have a GPA of at least 2.0 in the 39 hours of interdisciplinary studies major courses as well as a 2.0 GPA overall.

Students taking the interdisciplinary studies major will prepare a list of courses to be completed and a letter to the Interdisciplinary Studies subcommittee. The letter will include the student's personal and professional goals and describe how the interdisciplinary studies major will enable the student to attain those goals. The letter also will identify the student's advisors. The subcommittee will review the letter and the course plan and either approve or disapprove the plan. The subcommittee recommends that the application for the interdisciplinary studies major be completed by the end of the sophomore year to ensure that sufficient time is left for successful completion of the major. The Interdisciplinary Studies Subcommittee has final say on the integrity of the proposed major and may choose not to consider proposals submitted after the end of the sophomore year. The student may appeal the decision of the subcommittee regarding approval of a plan and review of a plan to the Admissions and Standards Committee.

The list of courses developed by the student and the advisors may include a list of courses from which the student will complete the requirements for that discipline rather than an exhaustive list of courses. For example, the list of courses from a discipline may include courses that total 24 credits, and the student must complete at least 15 credits from that list. This allows for some flexibility in scheduling without requiring a formal modification to the plan. After the plan is approved by the subcommittee and filed with the Registrar, any deviations from the plan require approval by the subcommittee.

120 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

Additional foreign language

- 6 hours: Bachelor of Arts requires proficiency in or completion of a foreign language through the course numbered 212

An interdisciplinary studies major consists of an integrated series of courses selected from at least two established University academic disciplines. International Studies

Faculty: Kim

Bachelor of Arts with a Major in International Studies

International studies is an interdisciplinary major that rests on the understanding that twenty-first century problems and careers are not restricted to single disciplines. Each student has unique talents, desires, needs, and career goals that need not be forced into traditional academic boundaries. The curriculum offers a strong foundation in international affairs, political science, economics, and foreign languages and cultures.

Study/Internship Abroad

Each major must study abroad for one semester or complete at least a semester-long internship or work experience approved by the director. If the student chooses a semester of study, an academic load of 12 semester hours must be completed. Nine semester hours of this work should be upper-division courses approved in advance by the director. A semester at Harlaxton or the University of Evansville's summer programs in Asia, Latin America, or the Middle East can satisfy this requirement.

International Studies Minor (18 hours)

One from Political Science 100 or 160; one from Political Science 361, 362, 363, 435, 461; one from Political Science 320, 360, 380, H385, 459, 461, 489

Three courses, in consultation with the director, from anthropology, archaeology, history, modern foreign languages and cultures, religion, and world literature; no more than two courses may be taken from any one subject; British Studies 282 or 382 (Harlaxton) may substitute for two courses toward this requirement

Law, Politics, and Society

Faculty: Berry, Dion (Chair), Gray, Kim, Maass, Plikuhn, Shelby

Bachelor of Arts or Bachelor of Science with a Major in Criminal Justice

Bachelor of Arts or Bachelor of Science with a Major in Political Science

Bachelor of Arts or Bachelor of Science with a Major in Sociology specialization in Anthropology or Gerontology available

The Department of Law, Politics, and Society offers Bachelor of Arts and Bachelor of Science degrees with majors in criminal justice, political science, and sociology with specializations in anthropology, general sociology, and gerontology. In addition, the department offers a minors in anthropology, criminal justice, legal studies, political science, preprofessional social work, social and human services, and sociology and a certificate in gerontology. Students are required to earn at least a C- in all courses required for the major and minor. The department also advises pre-law students.

The criminal justice degree is designed for students who intend to work in a justice-related field such as private security, law enforcement, the courts, institutional or community corrections, or the juvenile justice system. The degree also prepares students for graduate work in the social sciences or for law school – especially in the area of criminal law. In addition to covering the major components of the system, course requirements for the degree also include criminological and sociological theory and the sociology research sequence.

Sociology and anthropology are behavioral sciences that describe and explain social behavior, while gerontology is an occupation in which knowledge from the behavioral sciences is applied to societal needs in aging, public health, and the life course.

Sociologists study how behavior is influenced by our social environment, including the informal groups and larger social organizations to which we belong. Anthropologists study cultural diversity in societies around the world. Sociologists, anthropologists, and gerontologists study such diverse topics as deviant behavior and crime, environmental studies, family related issues, aging, and health care. The knowledge developed is widely used in social planning and business.

The study of sociology and anthropology prepares students for a wide range of occupations in industry and government. Sociology and anthropology are excellent majors for individuals fascinated by groups and the social behavior of people. Sociology and anthropology majors are well-prepared to pursue graduate work in sociology, social work and counseling, criminal justice, law, public health, community outreach, cultural resource management, non-profit and governmental agencies, human resources and public relations, and research and data analysis. Career advancement in social work requires a master's degree, and the program is designed to provide students with the knowledge base required by social work graduate programs.

Internships

Internships are available to majors of junior or senior standing who have completed the core courses. While internships are recommended for all sociology majors, certain GPA requirements must be met, and students must file an internship application with their advisor. For more details, please consult the Sociology Student Handbook.

Minors

Students majoring in such disciplines as business, public health, communication, nursing, psychology, political science, pre-law, or history will find departmental courses relevant to their studies and are encouraged to pursue one of the minors of the department.

Anthropology Minor (18 hours)

Anthropology 200, 207 and 12 additional credits of anthropology courses.

Criminal Justice Minor (18 hours)

Criminal Justice 205, 210 plus any four additional criminal justice courses.

Legal Studies Minor (18 hours)

Legal Studies 125 and 345, two courses from Criminal Justice 342 (or Legal Studies 343), Law 201, or Political Science 363, and six hours selected in consultation with the Legal Studies advisor.

Political Science Minor (18 hours)

Two courses from Political Science 100, 143, 160; Political Science 212; one course from Political Science 320, 360, 361, 362, 363, 380, 435, 459, 461, 489; one course from Political Science 312, 313, 326, 343, 344, 345, 349; one course from Political Science 376.

Preprofessional Social Work Minor (21 hours)

Sociology 105, 230 or 330, 335, 386 or 460, 438; Social Work 120, and Criminal Justice 410.

Social and Human Services Minor (21 hours)

Sociology 230 and Social Work 120, either Public Health 190 or 195, and twelve hours of elective credits selected in consultation with the Sociology advisor.

Sociology Minor (18 hours)

Sociology 105, 230 plus 12 additional credits of sociology courses; Anthropology 453 is also an option.

Gerontology Certificate (15 hours)

A Gerontology Certificate is awarded following completion of a prescribed course of study in gerontology. A certificate may be earned by professionals who are already involved in their careers or by current students as a part of their bachelor's degree. In past years, students in nursing, sociology, social work, music therapy, physical therapy, pre-medicine, and psychology have taken advantage of this opportunity to learn about aging. Completing a Gerontology Certificate requires 15 hours of interdisciplinary course work. As a rule, three course modules are offered each semester, including during the 10-week summer session.

To find out more about the Gerontology Certificate program contact Dr. Mari Plikuhn, Director of the Gerontology Center at mp168@evansville.edu.

Pre-law Advising

Students planning to enter the legal profession are advised to pursue baccalaureate degrees in academic areas best suited to their interests. Law schools are most interested in students who can communicate effectively, read comprehensively, and think critically. Because admission requirements of law schools vary, students need to become acquainted with the admission process of the schools they hope to attend.

Study in English, economics, foreign language, history, legal studies, logic and philosophy, mathematics, political science, and sociology is recommended. Most law schools do not require a specific pattern of courses, nor do they stipulate majors for concentrated study; however, students must select an undergraduate major and complete requirements for that major in order to graduate. A course of study should be carefully planned with the pre-law advisor and the Law School Admission Test should be taken in conjunction with application to law school. For more information, contact the pre-law advisor, Dr. Kevin Gray.

CRIMINAL JUSTICE

2018-2019 | 120 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

Outcome 1: (3 hrs) Critical Reading and Thinking
 ■ FYS 112 or 312 First Year Seminar

Outcome 2: (3 hrs) Imaginative Expressions of Human Condition
 ■

Outcome 3: (3 hrs) Human History and Historical Context of Knowledge
 ■

Outcome 4: (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place
 ■

Outcome 5: (3 hrs) Human Aesthetic Creation and Artistic Creativity
 ■

Outcome 6: (6 hrs) Linguistic and Cultural Competence in Language
 ■
 ■

Outcome 7: (3 hrs) Quantitative Literacy
 ■

Outcome 8: (7 hrs with at least one lab course) Scientific Literacy
 ■
 ■

Outcome 9: (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge
 ■ SOC 105 – Intro to Sociology
 ■

Outcome 10: (1 hr) Knowledge and Responsibility Health and Wellness
 ■

Outcome 11: (3 hrs) Think Critically and Communicate Orally and in Writing
 ■ CJ 450: Senior Seminar in Criminal Justice (or SOC 450)

Overlay: Writing Across the Curriculum (4 courses)
 ■
 ■
 ■
 ■

Major Requirements (39 hours)

- CJ 205: Intro to Criminal Justice (3 hrs)
- CJ 210: Deviance and Crime (3 hrs)
- CJ 360: The Correctional System (3 hrs)
- CJ 370: The Police (3 hrs)
- CJ 410: Juvenile Delinquency (3 hrs)
- SOC 230: Social Problems of the Modern World (3 hrs)
- SOC 343: Social Research Methods (4 hrs)
- SOC 344: Introduction to Behavioral Statistics (4 hrs)
- SOC 438: Race and Ethnic Relations (3 hrs)

Complete one course from:

- SOC 327: Human Behavior/Social Environment (3 hrs)
- PSYC 229: Social Psychology (3 hrs)

Complete one course from:

- CJ 342: Criminal Law (3 hrs)
- CJ 380: Courts and Justice (3 hrs)

Complete two courses from (minimum 4 hrs):

- CJ 342: Criminal Law (3 hrs)
- CJ 380: Courts and Justice (3 hrs)
- CJ 301: Special Topics - Criminal Justice (3 hrs)
- CJ 354: Intro to Forensic Science (3 hrs)
- CJ 420: International Crime and Justice (3 hrs)
- CJ 440: Criminal Justice Ethics (3 hrs)
- CJ 496: Internship (1-6 hrs)
- PSYC 320: Psych and the Law (3 hrs)

Free Electives (40 hours)

39 Hours of 300/400 level courses

Mathematics

Faculty: Azarian, Davis, Dwyer (Chair), Gruenwald, Kimberling, Nguyen, Salminen, Weber, Xiao

Bachelor of Arts or Bachelor of Science with a Major in Mathematics

Courses in mathematics and statistics are designed to develop quantitative reasoning skills, conceptual understanding, computational skills, and the ability to apply mathematical and statistical techniques to address real-world problems. Students may pursue four options in Mathematics – a Bachelor of Arts with a major in mathematics, a Bachelor of Science with a major in mathematics (appropriate for students seeking certification to teach mathematics at the senior high, junior high, and middle school levels), a Bachelor of Science with a major in applied mathematics, and a Bachelor of Science with a major in predoctoral mathematics. In addition, the department offers a Bachelor of Science degree in Statistics and Data Science. Alternatively, students may pursue a minor in mathematics or take mathematics and statistics courses to support work in other areas.

Bachelor of Science with a Major in Applied Mathematics

Mathematics

The mathematics major is designed for students seeking an exposure to advanced mathematics as part of a broad-based liberal arts curriculum. It is particularly suitable for students interested in pursuing graduate study in mathematics or related disciplines.

Applied Mathematics

The applied mathematics major offers a firm foundation in applied mathematics by combining a rigorous program of study in mathematics with a concentration in one or more fields of application – disciplines in which mathematical tools are used to solve real-world problems. Since this program provides for both a sound mathematical education and the development of highly marketable practical skills, graduates receiving this degree are prepared for either immediate employment or continued study at the graduate level.

Bachelor of Science with a Major in Predoctoral Mathematics

Predocctoral Mathematics

The predoctoral major prepares mathematically gifted students for graduate study leading to a PhD in the mathematical sciences. The curriculum is highly advanced, with an emphasis on the development of independent learning skills. Students are expected to participate in undergraduate research and to complete the department's professional development program. Students in this program are assigned a faculty mentor who supervises all aspects of the student's academic development. Only the most highly qualified applicants are admitted to the predoctoral program.

Bachelor of Science in Statistics and Data Science

Statistics and Data Science

This program is grounded in the mathematically rigorous tradition of classical, applied statistics while incorporating cutting-edge techniques and tools in the emerging field of data science. The program is designed to equip students with the quantitative, technical, and communication skills necessary to tease out forward-looking, predictive insight from data to help organizations make better decisions. Statistics courses in the curriculum are project-driven, with an emphasis on the analysis of real-world data using statistical methods implemented by powerful statistical software.

Bachelor of Science with a Major in Math Education

Mathematics Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Mathematics Minor (20 hours)

Mathematics 221, 222; at least four mathematics courses numbered 300 or above; Engineering 390 (Applied Engineering Mathematics) and Physics 305 (Mathematical Physics) may be applied towards this total.

Statistics and Data Science Minor (18 hours)

Statistics 266, 267, 300; a programming course (such as Computer Science 205 or 210) or a computationally intensive course (such as Quantitative Methods 160) approved by the Chair of the Department of Mathematics; 6 hours of 300/400-level courses that are either applied statistics courses offered by the Mathematics Department or statistically intensive courses (such as Economics 300, Biology 415, Quantitative Methods 227) approved by the Chair of the Department of Mathematics.

Calculus Sequence

The complete calculus sequence through multivariable calculus is Mathematics 221, 222, 323. A one-semester survey of calculus is provided by Mathematics 134. Be advised that Mathematics 134 does not satisfy the prerequisite for Mathematics 222, and credit will not be given for both Mathematics 134 and 221.

Credit by Examination

The Department of Mathematics adheres to the University policy on credit by examination. Students may not earn credit by examination in any mathematics course listed as prerequisite for a course in which they already have credit.

Bachelor of Arts

MATHEMATICS

2018-2019 | 120 Hours Required

Enduring Foundations General Education Requirements

(48 hours)

Outcome 1: (3 hrs) Critical Reading and Thinking

Music

Faculty: Chen, Dallinger, Fiedler, Josenhans (Chair), Keenan, Malfatti, McCluskey, Montgomery, Rike, Steinsultz, Strandberg, Sullivan, Teichmer, Ungar, Wylie, Zifer

Bachelor of Music in Music Education

Department of Music curricula are designed to prepare students for professional careers in music, to give all students opportunities to understand themselves and the world around them through participation and study of music, and to contribute to the artistic and cultural life of the University and broader community.

Bachelor of Music with a Major in Performance

The department offers the following degrees: Bachelor of Music with majors in performance, music education, and music therapy; Bachelor of Science with a major in music; and Bachelor of Science with a major in music and an emphasis in music management. Auditions are required for entry into all degree programs.

Bachelor of Music in Music Therapy

The department has been a member of the National Association of Schools of Music since 1948. Entrance and graduation requirements are in accordance with published regulations of NASM.

Bachelor of Science with a Major in Music emphasis in Music Man- agement available

Requirements

Participation in the appropriate major ensemble is required each semester the student is enrolled (with the exception of students enrolled at Harlaxton or in student teaching). Students may be assigned to participate in additional ensembles depending on the needs of the department as determined by the faculty. Part-time fifth-year seniors who are no longer receiving a music scholarship are exempt from this requirement.

Students enrolled in applied music are expected to appear frequently in workshop recitals. The actual number of performances is determined through consultation with the student's applied teacher.

All students enrolled in music ensembles are responsible for obtaining appropriate formal attire for concerts, particularly University Choir, University Bands, and University Symphony Orchestra; see specific course syllabi. Check the Music Student Handbook or contact the instructor for more information.

The music faculty considers attendance at recitals to be of great importance in the development of musicianship and requires recital attendance. Students must enroll in Recital Attendance (Music 100, 101, 200 etc.) each semester in residence. Specific recital attendance requirements and guidelines are described in the Music Student Handbook.

All non-keyboard music majors must enroll in class piano (or, if placed, in applied piano) as the minor instrument requirement until the appropriate piano proficiency requirements are completed for each respective degree. Once piano proficiencies are successfully completed, remaining minor credit hour requirements may be fulfilled by study of any instrument or voice. Piano class enrollment should begin at the same time as Music 141 (Diatonic Harmony). Students placed in Music 140 (Fundamentals of Diatonic Harmony) should not enroll in piano class.

It is the responsibility of the student to be aware of departmental regulations and procedures as identified in this catalog and the Music Student Handbook.

Music Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states. The program includes vocal, instrumental, or all area emphases (vocal and instrumental) and prepares students for certification at the P-12 levels for each chosen discipline.

Performance

This degree is designed for students who wish to pursue a career in performance or a related field. It is the most music-intensive degree offered. Students are admitted to the program conditionally pending completion of comprehensive juries at the end of the freshman and sophomore years. Acceptance is highly selective to promote student success.

Music Therapy

This degree prepares musicians for careers in music therapy. The curriculum emphasizes the study of music and music therapy, as well as the behavioral sciences. This program is fully approved by the American Music Therapy Association, making students eligible to take the board certification exam after successful completion of course work and clinical internship.

Music Therapy Equivalency Program

This program is for individuals who have already completed a degree in a field related to music therapy (music education, music performance, etc.). Although no degree is awarded, the completion of this program and a six-month internship qualifies the student to take the board certification exam.

Earn Two Degrees: Music Therapy and Music Education

This program is for students interested in combining their skills and talents as music therapists and music educators. A particular combination of courses ensures the requirements for both degrees are met. All course work and student teaching are completed in five years, followed by a music therapy internship. The degrees lead toward becoming a credentialed music therapist and earning an Indiana teacher certificate in vocal or instrumental music (K-12).

Music

This major integrates the study of music within a liberal arts curriculum. It provides an appropriate background for students wishing to pursue advanced degrees in music theory, musicology, composition, and music librarianship. The music content of the degree is flexible, making it ideal for combining with degrees in non-music fields.

Emphasis in Music Management

This major combines music and business studies for the student interested in working in the music industry (retail, arts management, music technology). The music and business courses are supplemented with electives in each area to allow for the development of individual interests.

Music Studies Minor (20 hours)

This curriculum allows the major in another area with a strong interest in music to obtain a minor in music studies.

Music 140 or 141, 142, 355, 356

Applied music – 4 hours: One hour per semester for four semesters

Major ensemble – 4 hours: One hour per semester for four semesters

Suzuki Violin Pedagogy Certificate (12 hours)

The Suzuki pedagogy certificate can be earned through a 12-hour program that offers comprehensive teacher training in Suzuki Talent Education™ to violinists pursuing any degree in music. The program includes six semesters of classroom study, observation of experienced teachers, and practicum teaching in the University of Evansville Suzuki Violin Program. Upon completion, participants receive a certificate that may be registered with the Suzuki Association of the Americas.

Music 260, 261, 360, 361, 460, 461

Jazz Studies Certificate (12 hours)

The jazz studies certificate is a 12-hour program that includes the performance of jazz as well as jazz music analysis, composition and arrangement of jazz music, and learning the art of improvisation. The jazz studies certificate is open to any UE student who has completed the prerequisite courses and has also received permission from the instructor(s).

Music 158, 243, 245, 341, six semesters of Music 113-413 Jazz Ensemble I (for a total of 3 hours)

Performing Ensembles

The Department of Music sponsors performing ensembles open to music and non-music majors alike. These ensembles perform regularly in concert on and off campus. All UE students are encouraged to participate. Some ensembles require an audition at the beginning of the semester. Interested students should contact the Department of Music for additional information.

Vocal ensembles include University Choir, Mixed Chorus, Women's Chorus, and Kantorei. Opera Main Stage provides theatrical performing opportunities for music and non-music majors.

Instrumental ensembles include Wind Ensemble, University Band, Aces Brass, and University Symphony Orchestra. Jazz ensembles include two full-size bands and small combos.

Chamber music opportunities include brass choir, a large string ensemble, woodwind quintet, string quartets, and piano trios. Like-instrument groups include percussion, guitar, flute, clarinet, trumpet, low brass, and other ensembles.

Additional information is included in the "Course Offerings and Descriptions" section of this catalog.

Applied Music - Complete 13 hours from your major instrument.
 Note: Voice majors must complete 12 hours of APM as well as MUS 102 and MUS 103.

Complete 4 hours from a minor instrument.
 Allowable courses include APM 115, 215, 315, 415; MUS 104, 105, 204, 205

Complete 8 hours of ensembles.
 Ensemble participation is a requirement of each semester of residency.

Proficiency
 MUS-PROF I (0 hrs)
 MUS-PROF II (0 hrs)
 MUS-GTR (0 hrs)

Recital
 Students must complete MUS 100-400/101-401 Recital Attendance for 0 hrs
 Students must complete a Senior Recital (half)

Clinical Training
 Students must complete a 6-month clinical training.

Free Electives (1 hour)

MUSIC MANAGEMENT

2018-2019 | 123 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

- Outcome 1:** (3 hrs) Critical Reading and Thinking
 - FYS 112 or 312 First Year Seminar
- Outcome 2:** (3 hrs) Imaginative Expressions of Human Condition
 -
- Outcome 3:** (3 hrs) Human History and Historical Context of Knowledge
 -
- Outcome 4:** (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place
 -
- Outcome 5:** (3 hrs) Human Aesthetic Creation and Artistic Creativity
 -
- Outcome 6:** (6 hrs) Linguistic and Cultural Competence in Language
 -
 -
- Outcome 7:** (3 hrs) Quantitative Literacy
 -
- Outcome 8:** (7 hrs with at least one lab course) Scientific Literacy
 -
 -
- Outcome 9:** (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge
 -
 -
- Outcome 10:** (1 hr) Knowledge and Responsibility Health and Wellness
 -
- Outcome 11:** (3 hrs) Think Critically and Communicate Orally and in Writing
 - MUS 498: Seminar in World Music
- Overlay:** Writing Across the Curriculum (4 courses)
 -
 -
 -
 -

- Major Requirements** (82 hours)
- MUS 140: Diatonic Harmony (5 hrs) OR
 - MUS 141: Diatonic Harmony (3 hrs)
 - MUS 142: Chromatic Harmony (3 hrs)
 - MUS 355: History of Music I (3 hrs)
 - MUS 356: History of Music II (3 hrs)
 - MUS 391: Music Business Opportunities (2 hrs)
 - MUS 392: Intro to Music Business & Technology (3 hrs)
 - ECON 101: Principles of Macroeconomics (3 hrs)
 - ECON 102: Principles of Microeconomics (3 hrs)
 - QM 160: Introduction to Data Analytics (3 hrs)
 - QM 227: Introduction to Statistics (3 hrs)
 - ACCT 210: Principles of Accounting I (3 hrs)
 - ACCT 211: Principles of Accounting II (3 hrs)
 - LAW 201: Legal Environment of Business (3 hrs)
 - FIN 361: Fundamentals of Finance (3 hrs)
 - MGT 311: Management Information Systems (3 hrs)
 - MGT 377: Organizational Behavior (3 hrs)
 - MKT 325: Principles of Marketing (3 hrs)
 - MUS 390: Music Management Internship (5 hrs)

Complete 3 hours from 300/400 level MUS.

Applied Music
Complete 14 hours from your major instrument. Voice majors must complete 12 hours of APM as well as MUS 102 & 103.

Complete 2 hours from a minor instrument.
Allowable courses include APM 115, 215, 315, 415; MUS 104, 105, 204

Complete 8 hours of ensembles.
Ensemble participation is a requirement of each semester of residency.

Piano Proficiency

39 Hours of 300/400 level courses

Philosophy and Religion

Faculty: Beavers, Gupta, Jones, Kretz, Stein (Chair), Ware

Bachelor of Science with a Major in Cognitive Science

The Department of Philosophy and Religion offers a Bachelor of Science degree with a major in cognitive science, Bachelor of Arts and Bachelor of Science degrees with a major in ethics and social change, and a Bachelor of Arts in philosophy or religion. In addition, the department offers a minor in cognitive science, ethics, ethics and social change, philosophy, and religion.

Cognitive Science

Director: Jones

Cognitive science is the general study of intelligence. It seeks to understand how thought processes function, how they might be instantiated in machinery, and how our cognitive initiatives relate to the brain. Researchers in cognitive science work in a variety of areas ranging from artificial intelligence and neurophysiology to cognitive psychology and the philosophy of mind. The cognitive science program at the University of Evansville was designed to prepare students for a range of possible vocations, many of which will require further study in graduate school. Indeed, most of our majors continue their studies by pursuing this path.

In keeping with the interdisciplinary spirit of cognitive science, majors are encouraged to add depth and breadth to their experience by the way they use the 40 to 45 elective credits permitted by the program. For instance, to supplement their degree, students often complete a second (or third) major, pick up additional minors, or design their own path through a variety of relevant courses. Additional majors that fit well with cognitive science include applied mathematics, biology, computer science, economics, neuroscience, philosophy, and psychology, depending on the particular methods requirement a student may select (see below).

All majors in cognitive science automatically meet the requirements for a minor in philosophy, though they must declare the philosophy minor along with the cognitive science major.

Bachelor of Arts or Bachelor of Science with a Major in Ethics and Social Change

Ethics and Social Change

Director: Kretz

The ethics and social change major combines academic study with field experience in order to equip students to address complex problems in local communities and the world. The program takes a multidisciplinary approach to allow students to complement an ethics core with concentrations in two other areas, thereby facilitating a possible double major with one of the two areas of concentration. Students may choose from a variety of concentration pairings to create a program tailored to individual values and interests. Fieldwork is built directly into the curriculum providing ample opportunities to get involved and make a real difference in the world.

Bachelor of Arts with a Major in Philosophy

Philosophy

Philosophy fosters an appreciation for the role of critical thinking in all aspects of life. It is a humanities-based discipline that makes students aware of perennial issues confronting human beings, particularly respecting their place within society, their claim to knowledge, and their commitment to values. As such, the philosophy major provides students with the tools they need to succeed in a variety of graduate programs, including philosophy, religion, political science, law, and business. The philosophy minor supplements other majors by affording students the opportunity to build their own program.

Bachelor of Arts with a Major in Religion

Religion

The Department of Philosophy and Religion offers a major in religion that allows students the opportunity to work closely with an advisor to select courses that meet their individual goals and interests. By doing so, the religion major provides outstanding preparation for seminary or graduate study in religion, an excellent foundation for pre-law or pre-medicine, a comprehensive education for work in nonprofit areas or various aspects of ministry, and a well-rounded liberal arts curriculum for those who find religious questions and issues compelling. Students interested in ministry may want to consider the Pre-Ministry advising track in conjunction with the Religion major.

Cognitive Science Minor (18 hours)

Cognitive Science 111, 498; Neuroscience 125; and any three of the following: Neuroscience 357; Philosophy 345, 447, 451; Psychology 355, 366. Substitutions for the three elective courses are permitted with pertinent courses from other areas with the approval of the director of cognitive science. These can include courses from anthropology, biology, cognitive science, computer science, economics, education, engineering, mathematics, or other courses from philosophy or psychology.

Ethics Minor (18 hours)

Ethics 121 or Philosophy 121; Religion 201 (both of these entry-level courses must be completed with a grade of B- or above); Ethics 499; Three courses from: Communication 485; Criminal Justice 440; Exercise and Sport Science 310; Health Services Administration 406; History 438; Philosophy 241, 316, 317, 321, 450, 301 or 459 (dependent on topic); Religion 305, 350, 445. Other courses may apply with the approval of the director of the program.

Ethics and Social Change Minor (18 hours)

Ethics 121, 200, 345, 375, 475, and 499

New Testament Greek Minor (19 hours)

The department offers a minor in the language of the New Testament to develop skills in using ancient Greek to study and interpret biblical texts.

Greek 211, 212; one from Greek 351, 371, 411, or 421; Religion 320, 330; Religion 435, normally taken in conjunction with the upper level biblical studies course above

Philosophy Minor (18 hours)

Eighteen hours in philosophy, which may include Cognitive Science 498

Religion Minor (18 hours)

The religion minor consists of any eighteen hours in religion. Students may take ETH 200 (Social Justice Movements), ANTH 453 (Anthropology of Religion), and/or GRK 371 (New Testament Greek Exegesis) toward their religion minor requirements

New Testament Greek Minor (19 hours)

The department offers a minor in the language of the New Testament to develop skills in using ancient Greek to study and interpret biblical texts.

Greek 211, 212; one from Greek 351, 371, 411, or 421; Religion 320, 330; Religion 435, normally taken in conjunction with the upper level biblical studies course above.

Physics

Faculty: Stamm (Chair), Braun, Reisetter

Bachelor of Arts or Bachelor of Science with a Major in Physics

Bachelor of Arts with a Major in Physics Education

A major in physics provides a foundation in the most fundamental of the sciences. This can prepare one for graduate studies in physics or engineering; for a wide range of science-related careers in medicine, electronics, energy, or computer science; or for a career in teaching. Physics courses range from an introduction of basic principles to in-depth studies of the fundamental properties and behavior of energy and matter.

The Department of Physics offers the Bachelor of Science and Bachelor of Arts degrees. Students who plan a career in secondary education, or who wish to include physics as part of a broader liberal arts program, should consider the Bachelor of Arts degree. The Bachelor of Science degree is recommended for students considering a career as a physicist, engineer, or other professional scientist.

It is possible, with advanced planning, to spend a semester in England and still complete all degree requirements within four years by taking general education courses at Harlaxton College.

Bachelor of Arts with a Major in Physics Education

Successful completion of this degree qualifies students for teacher certification in Indiana and most other states.

Physics Minor (21 hours)

Physics 210, 211, 213, 214, 305; one from Electrical Engineering 320, Physics 312, 401; one from Physics 416, 471; additional hours must be chosen from 300- or 400-level physics courses (not including Physics 499)

(Physics 350 will not be allowed as an elective for electrical engineering majors who are minoring in physics.)

A co-op program leading to a Bachelor of Science degree with a major in physics is available. Under this program, a student usually works in industry or at a government laboratory during the summers and one semester. Call or write the chair of the Department of Physics for more information and an application.

Undergraduate Research

Undergraduate research is required for the BS degree in physics. The research may be completed on campus, under the direction of one of the University physics faculty members, or it may be completed off campus (typically, through the National Science Foundation's summer Research Experiences for Undergraduates program).

Secondary Science Core

Complete 3 courses from outside the major. Courses may be used in conjunction with general education and major requirements.

Complete three courses from:

BIOL 107: General Biology (4 hrs)

CHEM 118: Principles of Chemistry (4 hrs)

ASTR 101: Descriptive Astronomy (3 hrs)

GEOG 230: Physical Geography (4hrs)

39 Hours of 300/400 level courses

Professional Programs

Because of the fundamental nature and breadth of many of the disciplines offered by the University of Evansville, there are a number of programs available for the student intending to pursue a professional career. Most of these preprofessional preparatory programs are designed for the student to meet baccalaureate requirements although admission to some professional programs is available prior to completion of an undergraduate degree.

Pre-Dentistry

A four-year baccalaureate program in liberal arts with significant work in the natural sciences at the University of Evansville is recommended as a prerequisite to seeking admission into dental school. Successful completion of the four-year curriculum satisfies admission requirements of most dental schools. Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Common Pre-requisites for Admission to Dental School:

Biology (IU Dental requires 20 hours)

BIOL 107 or BIOL 119 (General Biology or Intro Biology - Molecular Perspectives)
BIOL 120 (Intro to Organismal Diversity)
BIOL 331 (Genetics)*
BIOL 430 or 442 (Microbiology or Immunology)
BIOL/EXSS 112 (Human Anat & Phys I)
BIOL/EXSS 113 (Human Anat & Phys II)

Chemistry (IU Dental requires 12 hours)

CHEM 118 (Principles of Chem)
CHEM 240 (Organic Chem I)
CHEM 341 (Organic Chem II)
CHEM 280 (Inorganic Chem)
CHEM 370/371 (Biochemistry & lab)*
*Recommended courses, but not required

Physics

PHYS 121 (Algebra Physics I)
PHYS 122 (Algebra Physics II)

Social Science

PSYC 121 (Intro to Psychology) OR
COMM 130 (Intro to Communication)

Humanities

Choose at least 3 credit hours of Foreign Language, English composition, Literature, Philosophy, or History

NOTE:

Course requirements for dental schools may vary, please check any school of interest website
100+ hours of job shadowing local dentists is recommended.
To be competitive - Maintain a GPA of 3.4 or higher, Score a 19 on DAT exam

Pre-Law

Students planning to enter the legal profession are advised to pursue baccalaureate degree work in academic areas best suited to their interests. Law schools are most interested in students who can communicate effectively, read comprehensively, and think critically. Because admission requirements of law schools vary, students need to become acquainted with the admission process of the schools they hope to attend. Study in English, economics, foreign languages and cultures, history, legal studies, logic and philosophy, political science, and sociology is recommended. Most law schools do not require a specific pattern of courses, nor do they stipulate majors for concentrated study. A course of study should be carefully planned with the pre-law advisor and the Law School Admission Test should be taken in conjunction with application to law school. For more information, contact the pre-law advisor, Dr. Kevin Gray.

Pre-Medicine

A student may be admitted to certain medical schools after three years of undergraduate work. However, pursuit of a four-year baccalaureate program in liberal arts with significant work in the natural sciences at the University of Evansville is recommended as a prerequisite to seeking admission into medical school. Successful completion of the four-year curriculum satisfies admission requirements of most medical schools. A course of study should be carefully planned with the pre-medicine advisor, and the Medical College Admission Test should be taken at the appropriate time. Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Common Pre-requisites for Admission to Medical School:

Biology

BIOL 107 or BIOL 119 (General Biology or Intro Biology - Molecular Perspectives)

BIOL 120 (Intro to Organismal Diversity)

BIOL 331* (Genetics)

Chemistry

CHEM 118 (Principles of Chem)

CHEM 240 (Organic Chem I)

CHEM 280 (Inorganic Chem I)

CHEM 341 (Organic Chem II)

CHEM 370 (Biochemistry)

* recommended for MCAT prep

Physics

PHYS 210 or 121 (Calc Physics I or Algebra Physics I)

PHYS 211 or 122 (Calc Physics II Algebra Physics II)

Mathematics

MATH 221 (Calculus I)* or MATH 134 (Survey of Calc)*

Sociology

SOC 105 or 230 (Intro to Sociology or Social Problems in the Modern World)

Psychology

PSYC 121 (Intro to Psychology)

Ideally, courses should be completed before taking the MCAT exam

NOTE:

Course requirements for medical schools may vary, please check any school of interest website

To be competitive - Maintain a GPA of 3.6 or higher, Score minimum 500 on MCAT exam

Pre-Occupational Therapy

Contact the Pre-Professional Health Advisor with questions Francie Renschler.

Common Pre-requisites for Admission to Occupational

Therapy Master's program:

Biology

BIOL/EXSS 112 (Human Anat & Phys I)

BIOL/EXSS 113 (Human Anat & Phys II)

BIOL 415 (Biostatistics) or QM 227 (Statistics)

Social Science

PSYC 121 (Intro to Psychology)

PSYC 225 (Lifespan Developmental Psychology)

PSYC 259 (Abnormal Psychology) Health Sciences

HE 111 (Medical Terminology)

HS 205 Pharmacology

EXSS 356 (Biomechanics)

NOTE:

Course requirements for OT schools may vary, please check any school of interest website

Application cycle is usually January – February before a fall start date

To be competitive – maintain a 3.5 GPA or higher

Pre-Optometry

While most optometry schools will consider an applicant with three years of undergraduate work, the student who has completed a baccalaureate degree is in a more competitive position for admission. The curriculum presented at the University of Evansville meets the requirements of the Indiana University School of Optometry and most other schools in the Midwest, though students considering optometry should become familiar with expectations of optometry schools to which they may apply. Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Common Pre-requisites for Admission to Optometry School:

Biology

BIOL 107 or BIOL 119 (General Biology or Intro Biology - Molecular Perspectives)

BIOL 120 (Intro to Organismal Diversity)

BIOL 430 (Microbiology)

EXSS 112 (Human Anat & Phys I)*

EXSS 113 (Human Anat & Phys II)*

Chemistry

CHEM 118 (Principles of Chem)

CHEM 280 (Inorganic Chem I)

CHEM 240 (Organic Chem I)

CHEM 370 (Biochemistry)

Physics

PHYS 121 (Algebra Physics I)

PHYS 122 (Algebra Physics II)

Psychology

PSYC 121 (Intro to Psychology)

PSYC 245 (Statistics for Psychologists)

MATH

3 credit hours of math MATH 221 or 134

Humanities

6 credit hours of Foreign Language

6 credit hours of arts and humanities

6 credit hours of English Composition

*Recommended, but not required

Course requirements for optometry schools may vary, please check any school of interest website

Maintain a GPA of 3.6 and an OAT score of 326
Rolling admissions – plan to apply early!

Pre-Pharmacy

Admission to a college of pharmacy generally requires satisfactory completion of two years of academic work in basic sciences and liberal arts. Because admission requirements vary, pre-pharmacy students should become acquainted with the specific admission requirements of the pharmacy college to which application will be made. The following suggested first-year curriculum meets the requirements of most pharmacy colleges in the Midwest. Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Common Pre-requisites for Admission to Pharmacy School:

Biology

BIOL 107 or BIOL 118, 119 (General Biology or Intro Biology - Molecular Perspectives)
BIOL 120 (Intro to Organismal Diversity)
BIOL 110 (Clinical Microbiology)
BIOL 442 (Immunology)
BIOL/EXSS 112 (Human Anat & Phys I)
BIOL/EXSS 113 (Human Anat & Phys II)

Chemistry

CHEM 118 (Principles of Chem)
CHEM 240 (Organic Chem I)
CHEM 280 (Inorganic Chemistry I)
CHEM 341 (Organic Chem II)
CHEM 370/371 (Biochemistry & lab)

Physics

PHYS 121 (Algebra Physics I)

Math

MATH 221 (Calculus I)
MATH 222 (Calculus II)

Other

COMM 210 (Professional Speaking)
QM 227 (Introduction to Statistics) or Stats for your major such as BIOL 415 (Biostatistics)
FYS 112 (First Year Seminar)
ECON 102 (Principles of Microeconomics)
One Social Science class

NOTE:

To be competitive – Maintain a GPA of 3.0 or higher, C or better in pre-requisites

Course requirements for pharmacy schools may vary, please check any school of interest website

Pre-Physician Assistant:

Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Pre-requisites for Admission to UE Master of Physician Assistant Science:

Biology

BIOL 107 or BIOL 119* (General Biology or Intro Biology - Molecular Perspectives)
BIOL 110 or 430* (Clinical Microbiology or Microbiology)
BIOL/EXSS 112 (Human Anat & Phys I)
BIOL/EXSS 113 (Human Anat & Phys II)

Chemistry

CHEM 118 (Principles of Chem)
CHEM 280 (Inorganic Chem I)
CHEM 240 (Organic Chem I)
CHEM 341 (Organic Chem II)

Psychology

PSYC 121 (Intro to Psychology)

Social Science (one additional course)

Example: Anthropology, Cognitive Science, Communication, Economics, Gender/Women's Studies, Political Science, Sociology

Medical Terminology

HE 111 (Medical Terminology)
*Preferred course

NOTE:

To be competitive – Maintain GPA 3.6 or higher (minimum GPA 3.0), C or better in pre-requisites required, GRE Score minimum of 300 (Average for 2018 PA class was 307)

UE Master of PA program begins in January, so application cycle is April-July of previous year

Pre-Ministry

Students planning to attend theological school or seminary for ministerial preparation work in close consultation with the pre-ministry advisor to plan a course of study which meets their individual needs and vocational goals. Pre-ministry students must choose a major (pre-ministry is not a major). What major students choose will depend upon which pre-ministry track or path they decide is right for them. Students choose from the preferred admission/advanced standing track, the alternative track, and (for Catholic students) the Catholic ministry track.

Preferred Admission/Advanced Standing Track

Students take a religion major, with special focus on biblical and theological study, and complete a New Testament Greek minor. This is the recommended course of study for students seeking preference in admission, preference in scholarship aid, and advanced standing at the seminary of their choice. Advanced standing can be awarded for up to one-quarter of the total credits needed for completion of the seminary degree, allowing qualified students either to shorten the length of time needed for completion of their program or to take more advanced courses (Association of Theological Schools, Educational Standards 7.4.1-3). Students also complete two internships, and meet regularly for interaction and mentoring with a professional active in ministry.

Alternative Track

Students choose a major in any field, working with the pre-ministry advisor to map out an overall course of study that contributes to their vocational formation. Majors in the humanities, such as archaeology, anthropology, art history, classical studies, economics, English, ethics and social change, foreign language, history, international

studies, music, philosophy, political science, psychology, religion, sociology, and creative writing, are especially recommended. Students also complete at least one internship, and meet regularly with a professional mentor active in their chosen field of ministry. This track serves well students planning a vocation in ministry outside the mold of traditional pastoral ministry, as well as students considering the ministry but also weighing other career options.

Catholic Ministry Track

This track serves students discerning a vocation to the priesthood, as well as students intending to pursue an M.A. in theology leading to certification as a lay ecclesial minister, such as director of religious education, catechist, director of worship and liturgy, pastoral associate, director of social ministries, or lay hospital chaplain. The student and the pre-ministry advisor work closely together with the diocesan vocations director or the director of the office of catechesis to map out an individual plan of study offering optimal preparation for the student's intended program of graduate study and vocational goals.

Preprofessional Clinical Psychology

Offered through the Department of Psychology, this program prepares students for graduate study in clinical psychology. Clinical psychology involves the study of abnormal behavior, psychological assessment, and the psychotherapeutic treatment of children, adolescents, and adults. Students major in psychology with a clinical psychology specialization as outlined in the "Psychology" section of this catalog.

Preprofessional Clinical Social Work

Offered through the Department of Psychology, this program prepares students for graduate study in clinical social work, a specialization within the social work profession. Clinical social work involves the psychotherapeutic treatment of children, adolescents, and adults. Students major in psychology with a clinical social work specialization as outlined in the "Psychology" section of this catalog.

Preprofessional Social Work

This minor helps to prepare students for graduate study in social work. Admission requirements of graduate social work programs vary, but the courses included in the sociology major and preprofessional social work minor provide a solid foundation in the behavioral sciences and other areas related to the practice of social work. Course requirements are outlined in the "Law, Politics, and Society" section of this catalog.

Pre-Veterinary Medicine

The admission requirements of veterinary medicine schools vary, but the University of Evansville's recommendations meet the requirements of the Purdue University School of Veterinary Medicine as well as many other schools throughout the United States. Contact the Pre-Professional Health Advisor with questions, Francie Renschler.

Common Pre-requisites for Admission to Veterinary School:

Biology

BIOL 107 or BIOL 119 (General Biology or Intro Biology - Molecular Perspectives)

BIOL 120 (Intro to Organismal Diversity)
 BIOL 331 (Genetics)
 BIOL 430 (Microbiology)
 BIOL/EXSS 112 (Human Anat & Phys I)*
 BIOL/EXSS 113 (Human Anat & Phys II)*

Chemistry

CHEM 118 (Principles of Chem)
 CHEM 240 (Organic Chem I)
 CHEM 280 (Inorganic Chem I)
 CHEM 341 (Organic Chem II)
 CHEM 370 (Biochemistry)

Physics

PHYS 121 (Algebra Physics I)
 PHYS 122 (Algebra Physics II)
 *required for some/not all vet schools

Other

COMM 210 (Professional Speaking)
 FYS 112 (English Composition)
 Humanities Electives (3 semesters)
 QM 227 (Introduction to Statistics) or Stats for your major such as BIOL 415 (Biostatistics)
 Animal Nutrition (not offered at UE)
 Course requirements for veterinary schools may vary, please check any school of interest website
 Maintain a GPA of 3.3 (3.6 or higher in science courses); GRE or MCAT required for some Vet schools
 Variety of clinical experience is expected

Psychology

Faculty: Becker, Hennon (Chair), Kopta, Stevenson

Bachelor of Arts or Bachelor of Science with a Major in Psychology

Psychology

Psychology is the study of behavior as well as the mental, biological, and social processes related to behavior. As a science, psychology researches the causes of behavior; as a profession, it applies these findings to improve human health and well-being.

Students who major in psychology have preparation for a career in social services, criminal justice, business, industry, or public relations. They are also prepared for graduate studies in psychology or related fields such as law, business, social work, or counseling.

The Bachelor of Arts and Bachelor of Science degrees are offered with a major in psychology. Students pursuing the Bachelor of Arts degree may not earn more than 45 hours of psychology credit toward graduation and must meet foreign language proficiency requirements at the second-year level. For the Bachelor of Science degree, students must meet foreign language proficiency requirements at the first-year level. A minor in psychology is offered for students who want to gain helpful knowledge of behavior relevant to a wide range of fields including business, communication, public relations, criminal justice, education, health sciences, the humanities, law, and other social sciences.

Bachelor of Science with a Major in Neuroscience

Psychology Minor (18 hours)

Psychology 121 and a minimum of 15 hours in psychology electives, at least 6 of which are at the 300- or 400-level, selected in consultation with major advisor and psychology minor advisor

Neuroscience

Director: Lora Becker

Students interested in how the brain regulates thoughts and behavior may earn a Bachelor of Science degree with a major in neuroscience. This interdisciplinary program combines courses from psychology, biology, chemistry, and other sciences to understand the structure and function of the nervous system. Completion of this program, through consultation with one's academic advisor, prepares students for graduate training in neuroscience, including the behavioral, cognitive, or molecular fields. This program also fulfills admission requirements for most medical schools and other health care professional schools. Eventual career options include teaching and research as a university professor, employment with a pharmaceutical or biotechnology company as a research scientist, and practice as a physician or other health care provider.

Neuroscience Minor (22 hours)

Neuroscience 125, 357, 358, 457; Psychology 125, 357, 358, 457; and four of the following courses: Biology 333, 427; Cognitive Science 498; Neuroscience 355, 499; Psychology 366, 450, or 466

Bachelor of Arts

Race and Ethnicity Studies

Faculty: Shelby, Stein (director), Stevenson

An interdisciplinary minor in which students critically examine the complexity and constructions of race and ethnicity in different socio-historical and cultural contexts. The minor includes experiential education in which direct experience with racial/ethnic issues is supported by critical analysis. Students complete a common core and work with an advisor to select from a range of elective courses which include options in the humanities, social sciences, education, and public health. The minor prepares students from a wide variety of majors to engage an increasingly diverse world as informed, ethical citizens.

Race and Ethnicity Studies Minor

The Race and Ethnicity Studies minor requires the completion of 18 credit hours consisting of a common core, experiential education, and two electives.

Religion 275, Psychology 431, Sociology 438; 3 hours of anti-bias workshop or pre-approved Changelab class, internship or undergraduate research; and 6 hours of elective courses from Anthropology 310, 315, 319, Communication 380, Education 385, English 361, Ethics 200, French 333, Gender and Womens Studies 101, History 321, 323, 343, 349, Public Health 360, Philosophy 321, 450, Psychology 229, Religion 120, 305, 345, Race and Ethnicity Studies 492, 493, Spanish 333, 320, or 433.

Theatre

Faculty: Boulmetis, Brewer, Cowden, Lank, Meacham, Miley, Nelson, Rager, Renschler (Chair), Smith

Bachelor of Fine Arts or Bachelor of Science with a Major in Theatre Performance

The courses of study in theatre are offered for students who plan careers in professional theatre or intend to continue their study at the graduate level and for those seeking an intellectual and aesthetic appreciation of theatre as a complement to a broad liberal arts and sciences education.

Theatre Admission Requirements

To seek admission into the Department of Theatre, new students must make formal application to the University as well as audition for or interview with the Department of Theatre faculty. This requirement applies also to transfer students and students currently enrolled at the University of Evansville who are seeking entry or re-entry into the department. Acceptance based on University admission requirements and the audition or interview will classify the new theatre student as provisional. Admission to full candidacy status for one of the several theatre degree programs will be granted after students have satisfactorily completed the specific number of lower-division courses. Students also are expected to demonstrate potential appropriate to the goals established for the degree and major they are pursuing. Although full candidacy will usually be granted at the end of the first year, circumstances may require earlier or later acceptance. All students and their degree programs will be reviewed annually by the theatre faculty. Retention is contingent upon the student having met the guidelines outlined in the Theatre Handbook and satisfactory completion of the review process.

Bachelor of Fine Arts or Bachelor of Science with a Major in Theatre Design and Technology

Bachelor of Fine Arts

The Bachelor of Fine Arts degree with a concentration in theatre is designed for students seeking professional training and desiring an intensive program in theatre curriculum. Students following this degree program pursue a course of study with a high degree of specialization in either theatre performance (acting or directing) or theatre design and technology (scene, light, costume, sound design, and technical direction). The philosophy of the BFA degree program is to encourage students to explore the total theatre experience by developing an overall view of theatre as an art form while perfecting specific career specializations within the liberal arts and sciences environment.

Bachelor of Science with a Major in Stage Management

Theatre Performance Major: The primary emphasis of this curriculum is actor training with its attendant disciplines. Students may also develop a secondary emphasis in directing.

Bachelor of Science with a Major in Theatre Studies

Theatre Design and Technology Major: Students are directed toward the development of design skills (scenic, lighting, sound, and costume) as well as technical theatre.

Bachelor of Science with a Major in Theatre Management

Bachelor of Science

The Bachelor of Science degree with a concentration in theatre is designed for students who wish to concentrate in theatre as well as explore other disciplines. The curriculum allows the student to develop, with advisor approval, a broad-based educational program that meets individual desires and abilities. This degree is particularly suitable for students who wish to study theatre without confining themselves to a particular area of specialization, but it can also allow students to enhance areas of specialization with a closely related program of study (e.g., a theatre design student with an associated study in art or a theatre performance student with an associated study in literature). Students pursuing the BS degree choose one of six majors: theatre performance, theatre design and technology, stage management, theatre studies, theatre management, or theatre education.

The Bachelor of Science with a major in stage management combines classes in theatre, management, and communications for the student interested in a career in stage management. This curriculum allows the student to develop a broad-based educational program that meets individual desires and abilities while specializing in stage management. Students are allowed to enhance this area of specialization with a closely related program of study through the requirement of an associated study.

The Bachelor of Science with a major in theatre studies allows students with broad interests in the theatre to explore an in-depth education in multiple areas of the theatre. The free electives allow for individual customization of this degree with additional courses in theatre or other areas of interest, including associated studies or minors.

The Bachelor of Science with a major in theatre management combines theatre, business, and communication studies for the student interested in a career in arts management and administration. Because of its dual emphasis, this program has different departmental requirements for general education, core curriculum, and theatre practicum, and it includes a minor in business administration.

Bachelor of Fine Arts

THEATRE PERFORMANCE

2018-2019 | 120 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

- Outcome 1:** (3 hrs) Critical Reading and Thinking
 - FYS 112 or 312 First Year Seminar
- Outcome 2:** (3 hrs) Imaginative Expressions of Human Condition
 -
- Outcome 3:** (3 hrs) Human History and Historical Context of Knowledge
 -
- Outcome 4:** (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place
 -
- Outcome 5:** (3 hrs) Human Aesthetic Creation and Artistic Creativity
 -
- Outcome 6:** (6 hrs) Linguistic and Cultural Competence in Language
 -
 -
- Outcome 7:** (3 hrs) Quantitative Literacy
 -
- Outcome 8:** (7 hrs with at least one lab course) Scientific Literacy
 -
 -
- Outcome 9:** (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge
 -
 -
- Outcome 10:** (1 hr) Knowledge and Responsibility Health and Wellness
 -
- Outcome 11:** (3 hrs) Think Critically & Communicate Orally & in Writing
 - THTR 465-Senior Seminar in Theatre, OR
 - THTR 472-Acting VIII: Advanced Project
- Overlay:** Writing Across the Curriculum (4 courses)
 -
 -
 -
 -

Major Requirements (60 hours)

- THTR 111: Fundamentals of Acting (3 hrs) OR
- THTR 171: Acting I: Process Awareness (3 hrs)
- THTR 125: Introduction to Makeup & Costumes (3 hrs)
- THTR 130: Color & Design for Theatre (3 hrs)
- THTR 160: Survey & Analysis of Dramatic Literature (3 hrs)
- THTR 361: Theatre History I (3 hrs)
- THTR 362: Theatre History II (3 hrs)

Complete 2 hours from each:

- THTR 190: Theatre Practicum (1 hr)
- THTR 290: Theatre Practicum (1 hr)
- THTR 390: Theatre Practicum (1 hr)

Performance Core:

- ENGL 350: Shakespeare (3 hrs)
- THTR 225: Makeup (3 hrs)
- THTR 375: Acting in Dialect (3 hrs)
- THTR 481: Directing I (3 hrs)

Complete one course from:

- THTR 363: Period Styles Theatre 1: Architecture & Decor (3 hrs)
- THTR 364: Period Styles Theatre 2: Costume History (3 hrs)

Dance Elective: Complete two hours from:

- THTR 245: Dance I (2 hrs)
- THTR 246: Dance I (2 hrs)
- THTR 345: Dance II (2 hrs)
- THTR 346: Dance II (2 hrs)

Voice Elective: Complete one hour from:

- Options include APM 123, 124, 223, 224, 323, 324, 423, 424

Theatre Electives

- Complete electives as needed to total 60 hrs in Theatre.
- Minimum of 27 hrs in acting, dance, voice, and directing (including courses from the core curriculum).
- Must include a non-performance elective of 3 hrs.

Free Electives (19 hours)

Must include 3 credits from fine arts, outside of Theatre.

39 Hours of 300/400 level courses

Schroeder Family School of Business Administration

Greg Rawski, Schroeder Family Dean

Business administration is an interdisciplinary field of study that leads to dynamic and rewarding careers in global commerce or public service. At the University of Evansville, the business major is based on four important principles. First, the curriculum embraces the spirit of traditional liberal arts and sciences education. Second, the content of the program is global in nature, recognizing the fact that world developments in trade and commerce have come to transcend the boundaries of nations and cultures. Third, degree requirements allow students to reach beyond the traditional limits of business courses to include other areas of study. Finally, students are required to complete internships and are encouraged to take advantage of work opportunities that connect their formal academic training with meaningful experiences in a variety of professional settings.

There is no practical limit to the range of career opportunities for students who prepare themselves carefully for the challenges of global business. In addition, the University of Evansville program offers excellent preparation for graduate study in business, law, and a variety of other fields.

Mission Statement

We prepare undergraduate students in a liberal arts framework to become globally aware business professionals. We are distinctive in experiential learning, career support, and faculty scholarship in a balanced teacher-scholar environment.

Statement of Principles

Consistent with the values and mission of the University, it is the objective of the Schroeder Family School of Business Administration to produce business alumni who have an integrated understanding of business principles and perspectives necessary for effective leadership. Consequently, students will:

- Master communication, organizational, and critical thinking skills
- Acquire a broad foundation in the liberal arts and sciences through general education together with a depth of knowledge in one or more disciplines of their choice
- Understand the ethical significance of their personal and professional decisions
- Understand the global nature of our world, learn about other cultures, and appreciate diversity and tolerance
- Have the opportunity to participate in international studies programs
- Understand the necessity of being actively involved through involvement in study, internships, and extracurricular activities

Accounting and Business Administration

Faculty: Alhenawi, Bayar, Dwyer, Fenton, Hughes, Johnson, Kerr, Khan, Montgomery, Mousa, Murphy, Obaze, Rawski, Stilwell, Yazdanparast, Zimmer

Bachelor of Science in Accounting

Bachelor of Science in Business Administration with a Major in Finance

Bachelor of Science in Business Administration with a Major in Global Business

Bachelor of Science in Business Administration with a Major in Logistics and Supply Chain Management

Bachelor of Science in Business Administration with a Major in Management

Objectives of the Degree Programs

The Schroeder Family School of Business Administration offers degree programs in accounting, economics, and business administration.

The principal objective of our programs is to develop potential leaders who have a broad background in the liberal arts, possess an awareness of the social responsibilities of corporate leadership, and have thorough knowledge of fundamental tools of decision-making in a global context. The Bachelor of Science in Accounting degree is offered for students desiring careers in corporate or public accounting. The Bachelor of Science in Business Administration degree is offered with majors in finance, global business, logistics and supply chain management, management, and marketing.

Requirements for Degree Programs

- **Minimum Grade Policy:** Students are required to (1) earn a grade of C- or better in the prerequisites for any upper-level Schroeder School courses outside of the business core; (2) earn a grade of C- or better in the prerequisites for MGT 497 (senior seminar); and (3) earn a grade of C- or better in MGT 497.
- **Course Level Policy:** Normally, students will not enroll in 200-level business courses before the third semester. After completion of the third semester, students may enroll in FIN 361, MGT 310, MGT 311, MGT 377, or MKT 325 if prerequisites are satisfied. After completion of the fourth semester, students may enroll in other 300- and 400-level business courses for which prerequisites have been satisfied. Exceptions that permit earlier enrollments include but are not limited to the following:
 - Students with formal plans to study at Harlaxton or in some other program of study abroad
 - Students who wish to avail themselves of opportunities to take 300- and 400-level courses that are offered only on an alternate year basis and for which the alternate year scheduling cycle is stated with the catalog course description
 - Students with exceptional preparation through advanced placement or credit by exam that warrants early enrollment
 - Students who require preparation specific to the requirements of planned internships
- **Minimum GPA requirement:** Minimum 2.5 gpa required in each major area of study. A minimum 2.0 gpa must be maintained in the business administration core. Students must also satisfy the university's graduation requirement of 2.0 gpa for total program of study.
- **On-line Policy:** A maximum of four business core courses and two major courses may be completed online.
- **Transfer Credit Policy:** Transfer credit not accepted for any business school course previously failed or withdrawn from at UE. Appeals to this policy may be made to the Schroeder School Academic Standards Committee.
- Double-counting of courses in the business core or across majors is not permitted.
- For transfer students, at least 50 percent of the business credit hours required for a degree from the Schroeder Family School of Business Administration must be earned at the University of Evansville.
- It is recommended that no more than 50 percent of a business student's total credit hours (excluding Economics 101, 102 and Quantitative Methods 160, 227) be taken in the Schroeder Family School of Business.
- Students studying outside the Schroeder Family School of Business Administration and planning to earn more than 25 percent of their work in business and economics (excluding Economics 101, 102 and Quantitative Methods 160, 227) must earn a Bachelor of Science in Accounting or a Bachelor of Science in Business Administration.

**Bachelor of Science
in Business
Administration
with a Major in
Marketing**

Co-op Program in Business Administration

A cooperative education plan for accounting and business students is available as an alternative to the traditional four-year plan. The co-op plan combines classroom education with full-time work experience in the industry. Please refer to Special Educational Opportunities located in the Degrees, Curriculum, Academic Opportunities section in this catalog.

Business Administration Minor (21 hours)

Accounting 210; Economics 102; Finance 361; Management 377; Marketing 325; six hours of 300- or 400-level courses in the Schroeder Family School of Business Administration for which the student has satisfied the appropriate prerequisites. This excludes internship, independent study, and special topics courses.

In addition to the 21 hours for the minor, the student may take other business courses for which he or she has the appropriate prerequisites; however, no more than nine additional hours in business courses (excluding Economics 101, 102 and Quantitative Methods 160, 227) will apply toward graduation requirements.

Bachelor of Science in **ACCOUNTING**

2018-2019 | 124 Hours Required

Economics

Faculty: Bayar, Kerr, Murphy

Bachelor of Arts with a Major in Economics

Bachelor of Science with a Major in Economics with

a specialization in
Business Administration or
Math

Economics combines the best in liberal arts education to prepare students for careers in industry, commerce, or public service. Students can major in economics by completing a Bachelor of Science or a Bachelor of Arts degree. A minor in economics is also available.

The Bachelor of Arts degree requires a core of economics courses and permits a generous choice of free electives. The appeal of the Bachelor of Arts degree is its exceptional flexibility in permitting the student to enjoy the broadening experience of a liberal arts education together with preparation for professional careers. Students consult with their advisors in selecting from the many disciplines that are complemented by economics. With proper planning, it is possible to complete a Bachelor of Arts degree with a double major in economics and one of a selected number of other fields.

The Bachelor of Science degree requires a supporting area of study in addition to the economics core. Both degrees provide a bridge between the liberal arts and sciences and a variety of attractive professional careers. A major in economics combines the best in liberal arts and sciences education with the expertise and training necessary for successful careers in all fields of industry, commerce, or public service. Economists occupy positions of leadership in every sector of American industry. An economics major provides preparation for careers in state, local, or federal government. In addition, a degree in economics is an excellent background for graduate school in business administration, health care administration, law, or public administration.

Requirements for Degree Programs

- **Minimum Grade Policy:** Students are required to (1) earn a grade of C- or better in the prerequisites for any upper-level Schroeder School courses outside of the business core; (2) earn a grade of C- or better in the chosen course to satisfy Outcome 11 in general education.
- **Course Level Policy:** Normally, students will not enroll in 200-level business courses before the third semester. After completion of the third semester, students may enroll in FIN 361, MGT 310, MGT 311, MGT 377, or MKT 325 if prerequisites are satisfied. After completion of the fourth semester, students may enroll in other 300- and 400-level business courses for which prerequisites have been satisfied. Exceptions that permit earlier enrollments include but are not limited to the following:
 - Students with formal plans to study at Harlaxton or in some other program of study abroad
 - Students who wish to avail themselves of opportunities to take 300- and 400-level courses that are offered only on an alternate year basis and for which the alternate year scheduling cycle is stated with the catalog course description
 - Students with exceptional preparation through advanced placement or credit by exam that warrants early enrollment
 - Students who require preparation specific to the requirements of planned internships
 - **Minimum GPA requirement:** Minimum 2.5 gpa required in each major area of study. A minimum 2.0 gpa must be maintained in the business administration core. Students must also satisfy the university's graduation requirement of 2.0 gpa for total program of study.
 - **On-line Policy:** A maximum of six courses in the major requirements (and supporting area combined for BS degree) may be completed online..
 - **Transfer Credit Policy:** Transfer credit not accepted for any business school course previously failed or withdrawn from at UE. Appeals to this policy may be made to the Schroeder School Academic Standards Committee.
- Accreditation rules for the Schroeder Family School of Business Administration stipulate for this degree that a maximum of ten courses with the prefix of ACCT, BUS, FIN, LSCM, MGT, or MKT can apply towards graduation requirements.
 - Double-counting of courses in the business core or across majors is not permitted.
 - For transfer students, at least 50 percent of the business credit hours required for a degree from the Schroeder Family School of Business Administration must be earned at the University of Evansville.
- It is recommended that no more than 50 percent of a business student's total credit hours (excluding Economics 101, 102 and Quantitative Methods 160, 227) be taken in the Schroeder Family School of Business.
 - Students studying outside the Schroeder Family School of Business Administration and planning to earn more than 25 percent of their work in business and economics (excluding Economics 101, 102 and Quantitative Methods 160, 227) must earn a Bachelor of Science in Accounting or a Bachelor of Science in Business Administration.

Economics Minor (18 hours)

Economics 101, 102, 345, 346; two 300- or 400-level economics electives

Bachelor of Arts

ECONOMICS

2018-2019 | 124 Hours Required

Enduring Foundations General Education Requirements
(47 hours)

- Outcome 1:** (3 hrs) Critical Reading and Thinking
 - FYS 112 or 312 First Year Seminar
- Outcome 2:** (3 hrs) Imaginative Expressions of Human Condition
 -
- Outcome 3:** (3 hrs) Human History and Historical Context of Knowledge
 -
- Outcome 4:** (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place
 -
- Outcome 5:** (3 hrs) Human Aesthetic Creation and Artistic Creativity
 -
- Outcome 6:** (12 hrs) Linguistic and Cultural Competence in Language
 -
 -
 -
 -
- Outcome 7:** (3 hrs) Quantitative Literacy
 - MATH 134: Survey of Calculus (or MATH 221)
- Outcome 8:** (7 hrs with at least one lab course) Scientific Literacy
 -
 -
- Outcome 9:** (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge
 - ECON 101: Principles of Macroeconomics*
 -
- Outcome 10:** (1 hr) Knowledge and Responsibility Health and Wellness
 -
- Outcome 11:** (3 hrs) Think Critically & Communicate Orally & in Writing (*Minimum grade of C-*)
 -
- Overlay:** Writing Across the Curriculum (4 courses)
 -
 -
 -
 -

Major Requirements (33 hours)

(Double counting of courses across majors is not permitted. Minimum 2.5 GPA required.)

- ECON 101: Principles of Macroeconomics (3 hrs)*
- ECON 102: Principles of Microeconomics (3 hrs)
- ECON 345: Intermediate Microeconomics (3 hrs)
- ECON 346: Intermediate Macroeconomics (3 hrs)
- ECON 372: Money and Banking (3 hrs)
- ECON 398: Internship in Economics (3 hrs)
- ECON 425: International Trade (3 hrs)
- EXED 090: Building a Professional Image (0 hrs)
- BUS 400: ACES Passport Program (0 hrs)
- QM 227: Introduction to Statistics (3 hrs)

Four upper division economics elective courses (may substitute 300/400 level FIN or QM courses). No additional hours of internship may apply.

-
-
-
-

Free Electives (44 hours)

39 Hours of 300/400 level courses

NOTES:

- *Satisfies both a general education and a major requirement for a total of 3 hours in one area only.
- Accreditation rules for the Schroeder Family School of Business Administration stipulate for this degree that a maximum of ten courses with the prefix of ACCT, BUS, FIN, LSCM, MGT, or MKT can apply towards graduation requirements
- Enrollment in upper level business school courses outside of the business administration core requires a grade of C- or better in their prerequisites
- A maximum of six courses in the major requirements may be completed online.
- Transfer credit not accepted for any business school course (department ACBU course) previously failed or withdrawn from at UE. Appeals to this policy may be made to the Schroeder School Academic Standards Committee.

ECON 398: Internship in Economics (3 hrs)

ECON 425: International Trade (3 hrs)

EXED 090: Building a Professional Image (0 hrs)

BUS 400: ACES Passport Program (0 hrs)

QM 227: Introduction to Statistics (3 hrs)

MATH 134 or 221 as supporting area requires (3-4 hrs)

Two upper division economics elective courses (may substitute 300/400 level FIN or QM courses).
 ■

Supporting Areas - Choose one:

Business Administration:

ACCT 210: Introduction to Financial Accounting (3 hrs)

FIN 361: Fundamentals of Finance (3 hrs)

MGT 331: International Business Strategy (3 hrs)

MGT 377: Organizational Behavior (3 hrs)

MKT 325: Principles of Marketing (3 hrs)

QM 160: Introduction to Data Analytics (3 hrs)

Mathematics:**

MATH 221: Calculus I (4 hrs)

MATH 222: Calculus II (4 hrs)

MATH 365: Probability (3 hrs)

MATH 466: Mathematical Statistics (3 hrs)

Complete 6 hours in MATH above the 222 level (6 hrs)

Other Areas:

Economics majors are invited to consult with their faculty advisors in designing other supporting areas. Examples might include political science, foreign language, or international studies. Students must obtain approval for the self-designed area prior to the beginning of the senior year.

Free Electives (35 hours)

39 Hours of 300/400 level courses

NOTES:

- *Satisfies both a general education and a major requirement for a total of 3 hours in one area only.
- **Students who anticipate pursuing graduate studies in economics are advised to include MATH 341: Linear Algebra among their mathematics electives
- Accreditation rules for the Schroeder Family School of Business Administration stipulate for this degree that a maximum of ten courses with the prefix of ACCT, BUS, FIN, LSCM, MGT, or MKT can apply towards graduation requirements
- -A maximum of six courses in the major requirements and supporting area combined may be completed online.
- Transfer credit not accepted for any business school course (department ACBU course) previously failed or withdrawn from at UE. Appeals to this policy may be made to the Schroeder School Academic Standards Committee.
- Enrollment in upper level business school courses outside of the business administration core requires a grade of C- or better in their prerequisites.

College of Education and Health Sciences

Mary P. Kessler, Dean

The College of Education and Health Sciences is composed of the School of Education, the Department of Physical Therapy, the Department of Physician Assistant Science, the School of Health Sciences, and the Dunigan Family School of Nursing. Through the School of Education, in cooperation with appropriate departments in the arts and sciences, students can earn a baccalaureate degree that prepares them for teacher licensure in a wide variety of areas including music, art, theatre, foreign language, history, biology, chemistry, physics, mathematics, English/language arts, teaching English as a second language, special education, and elementary education.

The college offers an array of programs in the health sciences, some of which can be combined to provide multiple credentials. Baccalaureate degrees are offered in the professional areas of athletic training, clinical laboratory science, exercise science, health services administration, nursing, and public health. Physical therapy majors earn an entry-level doctoral degree in physical therapy. An associate's degree is offered in physical therapist assistance. Master's degrees are available in athletic training, health services administration, physician assistant science and public health.

All degree programs in teacher education are fully accredited by the Indiana Department of Education and the Council for Accreditation of Educator Preparation. The nursing program is accredited by the Accreditation Commission for Education In Nursing Inc. and the Indiana State Board of Nursing. Physical therapy programs are accredited by the Commission on Accreditation in Physical Therapy Education. The public health program is an applicant for accreditation by the Council on Education for Public Health. The athletic training program is accredited by the Commission on Accreditation of Athletic Training Education. The physician assistant program has been granted Accreditation-Provisional status by The Accreditation Review Commission on Education for the Physician Assistant.

iBACE: Integrating Business and Career Education

The iBACE program is designed to provide students in the William L. Ridgway College of Arts and Sciences and the College of Education and Health Sciences with educational and hands-on business experiences that will improve their marketability and career success. The program exposes students to business skills that they can apply in the workplace and builds upon foundational knowledge in their educational disciplines by adding those marketing, management, and finance skills essential for careers in a variety of fields. This program is designed to prepare students for current and future business trends in the professional workplace.

Course Work

The iBACE program contains three areas: coursework, a practical work experience, and a seminar for students seeking an internship. The program requires nine credit hours of coursework providing three building blocks of business training: Accounting 210, Marketing 325, and Management 377. Students must be at least sophomores to take the accounting course and juniors to enroll in the marketing and management courses. iBACE students are also strongly encouraged to add at least one course from those offered in Health Services Administration.

Professional Preparation

Students must enroll in EXED 090, Building a Professional Image, prior to completion of their internship. This is a 6 week non-credit course offered through Career Services for students seeking an internship or co-op program. This seminar course covers job interviewing skills, résumé preparation, currently available internships and details of program administration.

Internship

In addition to any internship, practicum, or clinical experiences iBACE students have within their health sciences major, iBACE students will complete an additional internship that focuses on business aspects of health care or health sciences. The business courses should be completed prior to the internship so that business principles can be applied to the professional experience. An internship in the student's major discipline is preferred.

Application

Interested health sciences students should complete an iBACE application form to enroll in the program. The enrollment form is available online through the College of Education and Health Sciences web page. Completed forms are to be submitted to the student's academic advisor and the Dean of the College of Education and Health Sciences.

Education

Faculty: Bellamy, Hale, Iber, Jones, Lombardo-Graves, McBride, Nayden, Gieselman (Chair)

The future of our nation and our culture rests with children. Teaching, therefore, is a moral act. It is moral because, in a macro sense, student achievement and successful school experiences are related economically and ethnically to the improvement of social and cultural conditions. Well-taught students grow to become adults who are able to participate fully in our democratic, pluralistic society. In a micro sense, teaching is moral because students' individual lives are improved as they grow and learn. Teachers must, therefore, value and be committed to educating and working with all children, regardless of background or ethnicity – a difficult and challenging task, especially as the American culture becomes increasingly diverse.

Teaching is also a complex act. Teachers must be highly skilled at working with students who have individual needs and abilities; they must be skilled at collaborating and working with others in the educational community; they must know their respective disciplines and content areas well (to teach something well, teachers must understand it well); they must be able to analyze and reflect on nearly every action taken in a classroom; and they must work toward continual improvement and learning. Teachers must also be resilient; the work of teaching can be challenging and difficult, so being flexible and knowledgeable is important.

The University of Evansville's teacher education programs are firmly based on these ideas as the conceptual framework around which its programs, courses, and activities are designed.

The Interstate Teacher Assessment and Support Consortium (InTASC) principles, standards, and competencies are embedded in the conceptual framework and have been established and adopted by both the University and the state of Indiana. These comprehensive standards and competencies are also embedded in the course work and field placements that our students complete while in teacher education programs. Teacher candidates are required to successfully demonstrate not only wide-ranging teaching skills but also certain attitudes and dispositions. In addition, the State of Indiana revised new licensure requirements in 2015. Standards for teacher preparation have been developed to align to the Revision to Educator Preparation and Accountability (REPA 3) requirements. These principles and standards provide the basic framework for the requirements that all teacher education students must meet prior to graduation.

The University of Evansville, School of Education is accredited by the Council for the Accreditation of Educator Preparation. Each program is recognized by the Indiana Department of Education and the State Board of Education. Special Professional Association recognition has also been granted by the Association for Childhood Education International, Council for Exceptional Children, and the National Council for Teachers of English.

Teacher Education

The School of Education offers undergraduate education programs leading to a Bachelor of Science or a Bachelor of Arts degree in many teaching areas and teacher licensure with majors in elementary education, secondary education, special education-elementary, special education-secondary, multi-grade (P-12) education in theatre, visual arts, and music. All elementary majors must also complete a minor in a licensure area; the most common minors for elementary majors are Teaching English as a Second Language, Reading, and any one of several middle grades content minors. Other minors are also available and may be selected with advisor and School of Education approval. Students seeking licensing in secondary education (5th grade through 12th grade) complete a core pedagogy sequence within the School of Education.

General Requirements

Advising

All education students have a School of Education faculty advisor. Students pursuing a teaching license in senior high, junior high, middle school, or multi-grade education are also assigned an advisor from the area of the content teaching major. Students must obtain approval from their advisor prior to registration each semester. Certain education courses may not be repeated without approval from the faculty of the School of Education.

Admission to Teacher Education

All students seeking teaching licenses typically apply for admission to teacher education during their sophomore year. **Candidates cannot enroll in internships until they are admitted.** Application forms are available on Acelink. Application forms are submitted through the LiveText Data Management System and review for admission will be facilitated through enrollment in Education 300: Admission to Teacher Education (0 credit hours). Admission to teacher education is granted when the following requirements are met.

- Grade of C or better in Education 100, 200, or 150 and 320
- Overall GPA of 2.80 or better
- Passing scores on the reading, writing, and mathematics sections of the Basic Skills Assessment test (Indiana uses the CASA Basic Skills Assessment but will accept specified ACT or SAT benchmark scores.) This test must be completed during the freshman year or prior to completion of Education 100 or Education 150.
- Submission and approval of the Professional Education Portfolio on LiveText
- Satisfactory interview with Admission to Teacher Education Committee
- Approval by the School of Education faculty

Note: ACT score of 24 or above, GRE scores of 1100 will qualify students for waiver of Basic Skills Assessment. See School of Education Office for SAT benchmark.

Performance Expectations and Standards

Our teacher education program is extensively clinical-based. Success in many of the courses is directly related to the degree to which a student's performance meets the expectations established by the School of Education and the local school district partners. The significance of successful performance during these field experiences is vital because the students' success is tied directly to children's learning and academic achievement. Some clinical courses may not be repeated without prior approval of the School of Education faculty.

Student Teaching

Students should consult with their advisors concerning the submission of an application for student teaching. Application forms are available on AceLink in the Education area, and on the School of Education website. The completed form should be submitted **one year prior to the student teaching year**, typically during the fall semester of the junior year. Eligibility requirements are:

- Admitted to teacher education
- Grade of C or better in all education courses (All courses required for any licensure program area)
- GPA of at least 3.00 in all education courses
- GPA of at least 3.00 overall
- GPA of at least 3.00 in the courses for the teaching major for secondary and multi-grade education students
- GPA of at least 2.75 in the courses for teaching minors
- Portfolio evaluated at "meets expectations" level
- Students cannot begin their school placements until they have been officially admitted to student teaching.

Note: Admission to Student Teaching applications are evaluated through Education 400: Admission to Student Teaching (0 credit hours). Enrollment in this course requires submission of the application form.

Bachelor of Science in Elementary Education

The Elementary Education program leads to an Indiana initial practitioner license to teach all subjects in grades K-6. An Indiana teaching license qualifies a graduate to teach in most of the 50 states, but students should obtain the Indiana licensure before applying for a license in another state.

To ensure consistency with Indiana teacher licensure regulations, some of the following license areas, curricula, and courses may be revised or reorganized prior to the beginning of each academic year. Students will be assisted by faculty advisors to blend current and new requirements to obtain teacher licensure.

This program provides students early and continuous clinical experiences in local school system classrooms. Education courses with practicum and internship components include opportunities for classroom observation and apprentice teaching. During the senior year a student teaching placement with a master teacher is the final clinical experience.

Elementary education students must complete a minor with additional courses in an approved content area to extend the teaching coverage of the basic elementary education license. Completing the minor in Teaching English as a Second Language (TESL) will provide licensure for teaching English Learners with appropriate state licensing tests. Other available minors include world languages, English language arts, mathematics, reading, science, and social studies, TESL, music, reading, visual arts. When combined with the elementary education major, successful completion of this additional teaching minor will qualify the student for an additional Indiana teaching license.

Bachelor of Science in Elementary Education/ Accelerated Second Degree

Accelerated Second Degree

The Accelerated Second Degree program allows individuals who have completed a college degree to participate in an accelerated program that allows them to earn an elementary education teaching license.

Bachelor of Science in Educational Studies

Bachelor of Science

ELEMENTARY EDUCATION

2018-2019 | 127 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

- Outcome 1:** (3 hrs) Critical Reading and Thinking

 - EDUC 432: Supervised Teaching in Elementary School (12 hrs)
 - EDUC 435: Supervised Teaching Seminar (1 hr)

- Complete one course from:**
- EDUC 421: Preschool and Beginning Reading Skills (3 hrs)
 - EDUC 427: Corrective Reading (3 hrs)

39 hours of 300/400 level courses

Elementary Education Specialization

All students must complete a specialization from one of the following: Science, Social Studies, Language Arts, Mathematics, Reading, or Teaching English as a Second Language.

*Students seeking middle school licensure must select a qualifying specialization noted by an asterix below.

Science*

BIOL 107: General Biology (4 hrs)
 CHEM 108: Elementary Chemistry (4 hrs)
 GEOG 230: Physical Geography (4 hrs)
 PHYS 121: Algebra Physics I (4 hrs)
 EDUC 443: Curriculum & Learning - Middle School (3 hrs)

Complete one course from:

ES 103: Fundamentals of Environmental Science (3 hrs)
 ASTR 101: Descriptive Astronomy (3 hrs)
 BIOL 214: Field Zoology (3 hrs)
 BIOL 215: Field Botany (3 hrs)
 Other science course may be approved by advisor

Social Studies*

EDUC 443: Curriculum & Learning - Middle School (3 hrs)

Complete two courses from:

HIST 141: American History to 1865 (3 hrs)
 HIST 142: American History since 1865 (3 hrs)
 HIST 111: World History to 1500 (3 hrs)
 HIST 112: World History since 1500 (3 hrs)

Complete one course from:

PSCI 143: American National Government and Politics (3 hrs)
 PSCI 160: Intro to International Relations (3 hrs)

Complete one course from:

GEOG 120: World Regional Geography (3 hrs)
 GEOG 240: Cultural Geography (3 hrs)

Complete three hours from: ECON, PSYC, OR SOC

Language Arts*

EDUC 422: Teaching Reading & Lang Arts Elementary School (4 hrs)
 EDUC 443: Curriculum & Learning - Middle School (3 hrs)
 EDUC 428: Reading in the Content Areas (3 hrs)

Complete one course from:

ENGL 122: Modern World Literatures (3 hrs)
 ENGL 223: World Classics (3 hrs)
 ENGL 352: The Young Adult Novel (3 hrs)

Complete one course from:

ENGL 231: Masterpieces of British Literature I (3 hrs)
 ENGL 232: Masterpieces of British Literature II (3 hrs)
 ENGL 241: Major American Writers I (3 hrs)
 ENGL 242: Major American Writers II (3 hrs)

Complete one course from:

WRTG 202: Survey of English Language (3 hrs)
 WRTG 204: Copy Editing (3 hrs)
 WRTG 205: Intro to Creative Writing (3 hrs)
 WRTG 206: Intro to Poetry Writing (3 hrs)
 WRTG 207: Intro to Short Story Writing (3 hrs)
 WRTG 3XX: 3 hrs of 300-level writing (3 hrs)

Mathematics*

EDUC 443: Curriculum & Learning - Junior High/Middle School (3 hrs)
 MATH 101: Mathematical Ideas (3 hrs)
 MATH 105: College Algebra (3 hrs)
 MATH 202: Mathematics for Elementary Teachers (3 hrs)
 MATH 221: Calculus I (4 hrs)
 MATH 222: Calculus I (4 hrs)
 MATH 355: Foundations of Geometry (3 hrs)

Reading

EDUC 322: Strategies for Special Needs Students K-12 (3 hrs)
 EDUC 330: Literature for the Elem./Adolescent Child (3 hrs)
 EDUC 421: Preschool and Beginning Reading Skills (3 hrs)
 EDUC 427: Corrective Reading (3 hrs)
 EDUC 428: Reading in the Content Areas (3 hrs)

Complete one course from:

TESL 325: Developmental Linguistics (2 hrs)
 EDUC 264: Assessment, Evaluation, and Remediation of Students with Special Needs (3 hrs)
 ENGL 352: Young Adult Novel (3 hrs)

Teaching English As a Second Language (TESL)

COMM 380: Intercultural Communication (3 hrs)
 TESL 200: Second Language Acquisition (3 hrs)
 TESL 301: English Teaching Grammar ESL/EFL (2 hrs)
 TESL 302: Assessment in ESL/EFL (2 hrs)
 TESL 325: Developmental Linguistics (2 hrs)
 TESL 326: Principles and Methods in TESL (2 credits)
 TESL 328: Foundations of Dual Language Instruction History (2 hrs)
 TESL 417: Internship English as a New Language (3 hrs)
 Note: Students may substitute TESL 491 International Clinical Experience in TESL (3 hrs)
 TESL 433: Supervised Teaching & Observation in ESL (6 hrs)
 Note: Education majors may substitute EDUC 432 (12 hrs)

Foreign Language

211, 212 and 18 hours at the 300 or 400 level

Music

MUS 140: Fundamentals of Diatonic Harmony (5 hrs) or MUS 141: Diatonic Harmony (3 hrs)
 MUS 142: Chromatic Harmony (3 hrs)
 MUS 270: Teaching Music in the Elementary School (3 hrs)
Complete three hours from applied music/music ensembles
 MUS 241: Introduction to Form (3 hrs)
 MUS 242: Post-Tonal Theory (3 hrs)
 MUS 355: History of Music I (3 hrs)
 MUS 356: History of Music II (3 hrs)
 MUS 357: Topics Music History & Culture
Complete six hours from applied piano or voice

Visual Arts

ART 210: Design (3 hrs)
 ART 213: Computer Graphics (3 hrs)
 ART 220: Drawing (3 hrs) or ART 221 Drawing (3 hrs)
 ART 325: Life Drawing (2 hrs)

ARTH 208: Survey of Art History I (3 hrs) or ART 209: Survey of Art History II (3 hrs)

Complete one course from:

ART 330: Printmaking (3 hrs)

ART 340: Painting (3 hrs)

ART 345: Watercolor (3 hrs)

39 Hours of 300/400 level courses

Senior High and Middle School Education (SH/MS)

Students wishing to become secondary teachers (grades 5-12) must have at least the equivalent of a major in their teaching field; in addition, the standards for teachers are quite high and therefore require a significant commitment of time and course work, including a number of practica and internships. Students are assigned two advisors, one from teacher education and one from his or her discipline area.

To ensure consistency with Indiana teacher licensure regulations, some of the following license areas, curricula, and courses may be revised or reorganized prior to the beginning of each academic year. Students will be assisted by faculty advisors to blend current and new requirements to obtain teacher licensure.

The SH/MS education program leads to an Indiana initial practitioner license to teach in the subject areas completed. Most subject area licenses are for grades 5-12 and require students to complete at least a content teaching major. Students are also encouraged to complete one or more supplemental or minor licensure programs.

This program provides students early and continuous laboratory experiences in local school system classrooms. Education courses with practicum and internship components include opportunities for classroom observation and apprentice teaching. During the senior year, a student teaching placement with a master teacher is the final clinical experience.

The curriculum of the SH/MS education program requires the completion of at least 120 semester hours, including course work in general education, professional education, teaching majors, teaching minors, and electives.

SH/MS Teaching Minors

While teaching minors are not required, senior high and middle school education students are strongly encouraged to choose teaching minors which complement their teaching majors.

Teaching English as a Second Language (TESL) Minor – 21-27 hours
Education students who complete the Teaching English as a Second Language (TESL) minor in addition to another teacher education major are eligible for licensure to teach English Learners. TESL 491 may be substituted for TESL 417.
COMM 380; TESL 200, 301, 302, 325, 326, 328, 417 or 491. TESL 433 (6 hours) is optional. Students may choose to substitute EDUC 436 (12) for EDUC 433 (6 hours).

English Language Arts Minor – 24 hours
English 120, 231, 232, 241, 242; English 223; Writing 205, one 300-level writing course

Foreign Language Minor – 24 hours
Students may not count 111 or 112 toward the minor. An approved study abroad program of at least six semester hours is highly recommended. Study abroad courses replace University of Evansville courses.
French, German, or Spanish: 211, 212, 18 hours at the 300 or 400 level

Mathematics Minor – 24 hours
Mathematics 221, 222, 323, 341, 355, 365; QM 160 or equivalent course approved by Department of Mathematics.

Science Minor
For the science minor, at least one of the following is required. Licensure is obtained only for the one area chosen.

Chemistry – 28 hours
Chemistry 118, 240, 280, 351, 360; Mathematics 222; Physics 121 or 210

Life Science – 31 hours
Biology 107, 108, 109, 320, 331; Chemistry 108 or 118; Exercise and Sport Science 112, 113

Physics – 32 hours
Mathematics 221, 222, 323; Physics 210*, 211*, 213, 214, 312, 305

*In special cases approved by the chair of the Department of Physics, Physics 121 and 122 may be substituted for Physics 210 and 211.

Visual Arts Minor – 20 hours
Art 210, 213, 220 or 221, 325; Art 330 or 345; one from Art 350, 360, 370; Art History 208 or 209

Multi-Grade Education Programs

To ensure consistency with anticipated changes in Indiana teacher licensure regulations, some of the following license areas, curricula, and courses may be revised or reorganized prior to the beginning of each academic year. Students will be assisted by faculty advisors to blend current and new requirements to obtain the teacher licensure they wish to achieve.

Music Education P-12

Students completing the music education major will meet the requirements for an Indiana K-12 teaching license in either general and vocal music or general and instrumental music. Students should

see the “Department of Music” section for specific courses.

Transition to Teaching

The Transition to Teaching program allows individuals who have completed a college degree to participate in an accelerated program that allows them to earn a secondary education teaching license. The program is available for math, life science/biology, chemistry, physics, history, English, foreign languages and cultures, visual art and music. Much of the instruction in the transition to teaching program occurs in the schools through a series of internships and student teaching experiences. Beyond university coursework, students must also pass state licensing exams and meet the basic skills competencies required by the Indiana Department of Education.

Courses in the Transition to Teaching program are typically completed in a calendar year. The required student teaching course allows students to spend a full semester in a classroom working with a mentor teacher and university supervisor.

Professional Education Requirements - 17-18 hours
Psychology 226 Child and Adolescent Psychology (3)
Education 320 Teaching Strategies in K-12 Schools (3)
Education 363 Principles and Strategies of Teaching in Secondary Schools (3)

One teaching methods course: EDUC 451, 453, 454, 456, 461, Music 372, Music 373, (2) hours or Art 497 (3) hours: Methods of Teaching (content area) in Senior High, Junior High, Middle Schools

Education 497 Supervised Teaching and Observation in Elementary, Middle School, Junior High, and Senior High (5)

Education 435 Supervised Teaching Seminar (1)

Teaching English as a Second Language (TESL) Minor for Non-Education Majors

The minor in Teaching English as a Second Language (TESL) prepares students to teach English to non-native speakers. Students will work with non-native speakers as interns under the supervision of an experienced TESL teacher. This minor is open to students in all schools and colleges within the University, however they would not be licensed for classroom teaching.

Non-education majors (22 hours): COMM 380; TESL 200, 301, 302, 325, 326, 328, 417*; one 300 or 400 level communication elective.

*Students may substitute TESL 491 for TESL 417.

**Bachelor of Science
with a Major in
Special Education
Elementary**

The special education program leads to a dual Indiana initial practitioner license to teach special education (p-12) and either elementary education (K-6) or secondary education (5-12). Successful completion leads to licensure in serving individuals with mild and/or intense disabilities. In addition to teaching positions, graduates may find employment in clinics, agencies, and centers devoted to the care and education of persons with disabilities.

School of Health Sciences

Faculty: Brown, Collins, Coppus, Jeong, Kelley, Liu, Memmer, Patel-Dovlatabadi, Rodd, Stroube, Tilly (Chair), Wilson

The School of Health Sciences is dedicated to helping students find ways to improve the quality of life through a variety of innovative undergraduate programs. To achieve this goal, the school offers distinct academic majors in athletic training, applied and pre-professional exercise science, clinical laboratory science, health services administration, public health, and sport management. Courses offered through these programs are designed to prepare students for successful entry into their chosen career path or for admission to graduate school or professional programs.

Bachelor of Science with a Major in Athletic Training

Program Director: Jeff Tilly

The certified athletic trainer (ATC) is a highly educated and skilled allied health professional. In cooperation with physicians and other allied health personnel, the ATC functions as an integral member of the health care team for the physically active. Traditionally, secondary schools, colleges and universities, sports medicine clinics, orthopedic surgeon offices, industrial settings, and professional sports teams have employed certified athletic trainers.

The athletic training major is designed for those individuals who seek certification as an athletic trainer for the Board of Certification ((BOC). The Commission on Accreditation of Athletic Training Education (CAATE) is the accrediting body for athletic training education programs. The University of Evansville's athletic training program is accredited by CAATE. The University of Evansville's athletic training program is competitive, and a set number of students are allowed entry per year.

The bachelor's degree program prepares the athletic training student for challenges that will be encountered as an allied health professional. This includes the integration of a strong liberal arts and science foundation with problem solving and clinical skill development. The concurrent clinical education model allows the student to work under the supervision of an approved clinical instructor. The majority of clinical education occurs while working with the University's NCAA Division I athletic teams. Convenient off-campus assignments with clinic- and high school-based athletic trainers as well as physicians exist to ensure a well-rounded practical experience.

Many athletic training students find it advantageous to pursue additional degrees in related health care areas offered at the University of Evansville. These include the Doctor of Physical Therapy, the Associate of Science in Physical Therapist Assistance, and the Master in Physicians Assistance Science degree. All three programs are accredited by their respective accrediting organizations. The University of Evansville is currently one of only three institutions that offer these three programs in a seven state area in the Midwest. This makes the athletic training program at the University of Evansville a unique experience which enables students to individually structure their learning to meet the needs of the current job market.

Admission

Entry into the program is competitive. Admission criteria include: Completion or current enrollment in each of the following prerequisite courses: Athletic Training 280; Exercise and Sport Science 112, 113, 150, 244 (2 hours); Health Education 100, ; Physical Therapy 100

(Basic skill acquisition and 100 hours of clinical observation are components of Exercise and Sport Science 244. The 100 hours must be accumulated prior to application to the program. Athletic training students have 20 weeks to achieve these totals with an average of five hours per week; each week should be documented by their approved clinical instructor. Weekly submission of the signed hours and a journal is needed to apply to the program.) (Note application deadline below.)

- A grade of C or better in the prerequisite courses
- Minimum cumulative grade point average of 2.75
- Completion of the ATP technical standards
- Completion of a written application
- Personal interview
- Completion of AT-FYE Clinical Skills Checklist
- Completion of all required work for Exercise and Sport Science 244 (2 semesters)

After submitting all application material, the prospective student may be granted an interview with the admission committee. An interview is required for admission into the program.

Applications are due the last Friday in January. The selection process will be completed in time for fall semester registration, and all applicants will be notified of their status at this time. Acceptance into the program is conditional based on successful completion of the student's current semester course work.

Direct entry into the program is available for a small number of qualified incoming freshmen who have been accepted into the direct entry physical therapy program. These students must meet certain ACT and SAT score standards and have a formal interview with the physical therapy department as well as the faculty of the athletic training education program.

Admission criteria are subject to change. Applications and additional information are available from the program director.

Transfer students may be considered for admission into the program.

Bachelor of Science

ATHLETIC TRAINING

2018-2019 | 120 Hours Required

Enduring Foundations General Education Requirements
(41 hours)

Outcome 1: (3 hrs) Critical Reading and Thinking

- FYS 112 or 312 First Year Seminar

Outcome 2: (3 hrs) Imaginative Expressions of Human Condition

-

Outcome 3: (3 hrs) Human History and Historical Context of Knowledge

-

Outcome 4: (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place

-

Outcome 5: (3 hrs) Human Aesthetic Creation and Artistic Creativity

-

Outcome 6: (6 hrs) Linguistic and Cultural Competence in Language

-

-

Outcome 7: (3 hrs) Quantitative Literacy

-

Outcome 8: (7 hrs with at least one lab course) Scientific Literacy

-

-

Outcome 9: (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge

-

-

Outcome 10: (1 hr) Knowledge and Responsibility Health and Wellness

-

Outcome 11: (3 hrs) Think Critically & Communicate Orally & in Writing

-

Overlay: Writing Across the Curriculum (4 courses)

-

-

-

-

Major Requirements (70 hours)

HE 111: Medical Terminology (1 hr)

EXSS 112: Human Anatomy and Physiology I (4 hrs)

EXSS 113: Human Anatomy and Physiology II (4 hrs)

EXSS 150: Intro to Exercise Science (2 hrs)

AT 180: Intro to Athletic Training (3 hrs)

AT 282: Basic Skills in Athletic Training (3 hrs)

AT 287: Therapeutic Modalities in Athletic Training (3 hrs)

AT 291: Clinical Education in Athletic Training (2 hrs)

AT 292: Clinical Education in Athletic Training II (2 hrs)

AT 350: Administration of Athletic Training (3 hrs)

AT 388: Evaluation of the Lower Body (3 hrs)

AT 389: Evaluation of the Upper Body (3 hrs)

AT 390: Rehabilitation of Athletic Injuries (3 hrs)

AT 391: Clinical Education in Athletic Training III (2 hrs)

AT 392: Clinical Education in Athletic Training IV (2 hrs)

AT 490: Pharmacology and Medical Conditions (2 hrs)

AT 491: Clinical Education in Athletic Training V (2 hrs)

AT 492: Clinical Education in Athletic Training VI (2 hrs)

EXSS 320: Nutrition, Performance & Health (3 hrs)

EXSS 321L: Applied Human Anatomy and Physiology Lab (2 hrs)

EXSS 352: Physiology of Exercise (3 hrs)

EXSS 356: Biomechanics (3 hrs)

EXSS 388: Exercise Prescription (3 hrs)

EXSS 427: Exercise Testing and Leadership (2 hrs)

EXSS 451: Exercise/Sport Psychology (3 hrs)

Complete 2 hours of practicum.

EXSS 244: Practicum (1 hr)

Complete one course from:

HSA 405: Health Care Systems: Issues and Trends (3 hrs)

HSA 406: Jurisprudence/Ethics in Health Care (3 hrs)

Free Electives (9 hrs)

39 Hours of 300/400 level courses

Bachelor of Science with a Major in Clinical Laboratory Science

A clinical laboratory scientist (medical laboratory scientist) is capable of performing, under the supervision of a pathologist or other qualified physician or laboratory director, the various chemical, microscopic, bacteriologic, and other medical laboratory procedures used in the diagnosis, study, and treatment of disease.

Students pursuing the clinical laboratory science major complete approximately 100 semester hours at UE (six semesters of course work) and then complete 12 months of study at a hospital endorsed by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) and the American Society of Clinical Pathology (ASCP) of the American Medical Association. The first three years of study provide a solid foundation based on the natural sciences with an emphasis on biology and chemistry. The fourth year consists of combined classroom and laboratory studies that provide experience in clinical chemistry, hematology, immunohematology (blood banking), microbiology, serology/immunology/ virology, parasitology and mycology, urinalysis, and instrumentation. Completion of prerequisite courses at UE does not guarantee admission to a hospital program. Acceptance is based on academic performance, letters of recommendation, motivation, aptitude, work experience, and interviews.

Some students complete a four-year BS degree before entering the clinical year of training. An option for those students interested in a career in clinical laboratory science is to complete the four-year combined exercise science and clinical laboratory science degree, prior to the clinical experience during the fifth year.

Clinical Exercise Science Minor (24 hours)

The clinical exercise science minor prepares students for careers related to exercise in a clinical setting. The curriculum of the minor prepares students for the application of exercise and physical activity in those clinical and pathological situations where it has been shown to provide therapeutic or functional benefit.

Clinical (32 hrs)

EXSS 478: CLS Clinical

Credit granted upon successful completion of two semesters of clinical experience and a summer clinical. Prerequisite: Successful admission into clinical laboratory program.

39 Hours of 300/400 level course

Bachelor of Science with a Major in Exercise Science – Applied

Bachelor of Science with a Major in Exercise Science – Pre-professional

The exercise science major embraces a strong science foundation and focuses on the scientific aspects of exercise related to healthy, injured, and high-risk populations to understand the consequences of physical activity. Exercise science is an applied discipline; therefore, the curriculum includes laboratory or laboratory-type activities in exercise physiology, biomechanics, and exercise testing and leadership. In addition, University- and community-based projects are incorporated into the academic curriculum to give exercise science students exposure to various populations similar to those they may encounter in their chosen professions. Exercise science courses are regularly taught at Harlaxton College in the summer.

All exercise science majors participate in an intensive internship program that is required for graduation. Internship opportunities exist in cardiac rehabilitation, corporate fitness, wellness and fitness centers, strength and conditioning programs, and sport-specific conditioning programs, as well as in other areas of interest to the student. In addition, opportunities exist for students to engage in undergraduate research activities with faculty and other students.

A major in exercise science prepares students for graduate study in areas such as exercise physiology, biomechanics, wellness, health promotion, nutrition, and exercise and sport psychology. It also prepares students to enter such professional schools as physical therapy, physician assistant, or medical schools. Students are prepared for careers in preventative exercise, wellness programs, and to work with healthy populations in maintaining healthy lifestyles.

The exercise science major has two tracks, applied and pre-professional.

Applied Track

The applied track prepares students for leadership roles in a growing number of career opportunities dealing with human health and wellness such as exercise instruction, cardiac rehabilitation, personal training, strength and conditioning specialist, or as a health and wellness professional. In addition, this degree prepares students for graduate study in such areas as exercise physiology, biomechanics, or exercise and sport psychology.

Pre-professional Track

The pre-professional track may be used as preparation for graduate study in areas such as exercise physiology, biomechanics, wellness, health promotion, and public health. The primary emphasis of this track is, however, as a preparation for entry into such professional schools as physical therapy, physician assistant, medical, and podiatry schools. Students can earn both the undergraduate and Doctor of Physical Therapy degrees in six or seven years, depending on the selected pathway.

Exercise Science Minor (21 hours)

The minor in exercise science prepares students for careers working with relatively healthy populations. The curriculum of this minor prepares students for careers with personal fitness training, corporate wellness programs, or fitness centers.

Exercise and Sport Science 352, 356, 388, 415, 427, 451, 453; Public Health 195

Exercise and Sport Psychology Minor (20 hours)

Exercise and sport psychology is a rapidly growing subdiscipline of exercise science that studies a wide array of cognitive issues related to physical activity. Exercise psychology examines relationships such as the mental health benefits associated with regular participation in exercise programs and factors related to exercise adherence. Sport psychology is the study of cognitive factors that influence sport performance such as motivation, overtraining and staleness, anxiety, and coach-athlete relationships. The curriculum of this minor prepares students for graduate study in exercise and sport psychology, motor learning, or psychology. The core curriculum of this minor combines classes from the School of Public Health and the Department of Psychology.

Exercise and Sport Science 218, 352, 451, 453; Psychology 226, 229, 357 or 370

Sport Management Minor (24 hours)

This minor provides students with a broad background in business-related aspects of sport. The minor is designed for students interested in working in ticket sales and promotions, advertising, athletics administration, or in sporting retail sales.

Accounting 210; Law 201; Management 377; Economics 102; Exercise and Sport Science 201, 310 350; one from Accounting 211, Finance 361, 362, Management 392,412, 430, Marketing 325, 330.

*Pre-Med take BIOL 120, BIOL 331, CHEM 341, and CHEM 370

Bachelor of Science with a Major in Health Services Administration

Combined Bachelor and Master of Science in Health Services Administration

The University of Evansville offers both bachelor's and master's degrees in health services administration. The program is structured so that a combined bachelor's and master's degree can be earned in five years. Under this option the student receives both the bachelor's and master's degree at the same time. Students who do not choose the combined program may earn the bachelor's degree in four years. The time required for the combined degree can be shortened by taking course work during the summer. Additionally, students who already hold a bachelor's degree may enroll in the master's program and attend on a part-time or full-time basis.

The many changes in health care over recent years have created a need for managers who can deal with the multitude of challenges specific to the health care industry. Health care administrators are employed in a wide variety of organizations and work environments. These may include hospitals, managed care companies, outpatient care facilities, mental health facilities, pharmaceutical companies, government agencies, health insurance companies, public health agencies, voluntary health agencies, health maintenance organizations, and clinics. This undergraduate major prepares students for employment in the field of health care, or as preparation for graduate or professional programs such as the master's degree in HSA program, or post-graduate programs in public health, physician assistant, or physical therapy.

Internships and field placements are an important part of each student's exposure to various areas of future employment. All students complete six credits of internship during their junior and senior year. The student, the advisor, and the program director mutually agree upon the internship location and content. Internships may be completed during the fall, spring, or summer sessions. Additionally, all master's students participate in up to six credits of field experience. These opportunities provide students with a variety of organizational experiences.

Combined Program

In addition to the course work required for the bachelor's degree program, students must declare their intention to pursue the five-year combined degree no later than the beginning of their fourth year of study. Exceptions for later admission to the five-year program will be reviewed on an individual basis. For students pursuing the combined BS and MS program, a grade of C- or above is required in all graduate classes and all undergraduate required classes. Variations in course sequencing will occur during the final two years of the five-year program.

Harlaxton College in Grantham, England

The health services administration program offers a summer program at Harlaxton College which attracts students from programs across the U.S. as well as from the University of Evansville.

Bachelor of Science in Public Health – Health Policy or Nutrition Emphasis

Bachelor of Science and Master of Public Health

This degree program trains students in multidisciplinary approaches to public health practice and research. The degree plans to explore both quantitative and qualitative aspects of public health at all levels of analysis. Graduates will advance, through selective employment or further education, to become the new generation of public health professionals prepared to face the emerging challenges to human health from a population perspective.

A major in public health prepares students for graduate study in areas such as health care management, wellness and health promotion, and nutrition. It also prepares students to enter professional programs such as business, physical therapy, and medical school along with several other programs. For graduates with the bachelor's degree who wish to enter the job market directly, there is a plethora of opportunities. Careers in public health can be found in a number of areas in private and public organizations such as statewide and regional health care agencies, community clinics, biomedical companies, health-education institutions, and non-governmental organizations. The undergraduate major prepares students for employment in the field of public health or for preparation in post-graduate programs or professional programs such as those in medicine, public health, physician assistant science, physical therapy, and more. Students may also earn both the public health and doctorate of physical therapy degrees in six or seven years, depending on the selected pathway.

The public health major has two emphases areas – health policy and nutrition – to meet the academic and professional goals of students.

Health Policy Emphasis

The Health Policy emphasis prepares graduates to be decision makers, critical thinkers, and future leaders in both the public and private sectors of the health system. The health care industry offer students a vast array of opportunities. Such opportunities are with the state and local health departments, hospital systems, government agencies, health insurance companies, research institutions, and consulting firms, to name a few.

Nutrition Emphasis

The Nutrition emphasis prepares graduates to promote healthy eating and lifestyle choices among individuals and groups as well as those with special nutritional needs. Due to the multidisciplinary nature of Public Health, graduates can pursue diverse career paths. The Nutrition emphasis prepares graduates for rewarding careers as nutritionists, wellness experts, food service managers, lifestyle counselors, weight-loss coaches as well as a number of other careers.

Combined Program

In addition to the course work required for the bachelor's degree program, students must declare their intention to pursue the five-year combined degree no later than the beginning of their third year of study. Exceptions for later admission to the five-year program will be reviewed on an individual basis. For students pursuing the combined bachelor of science and master of public health program, a grade of C- or above is required in all graduate classes and all undergraduate required classes. Variations in course sequencing will occur during the final two years of the five-year program.

Public Health Minor (23 hours)

The minor in public health prepares students for careers that are focused on disease prevention and health promotion. The curriculum of this minor prepares students for careers with community health centers, health agencies, and wellness programs.

Dunigan Family School of Nursing

Faculty: Cobb, Fedor-Bassemier, LaMar (Chair), Lever, Price, Rea, Schaefer

Bachelor of Science in Nursing

The nursing faculty is committed to education that involves the acquisition of knowledge, skills, and professional experience. The study of the art and science of nursing is coordinated with the study of natural, behavioral, and social sciences, emphasizing learning through practice in various clinical settings. Upon program completion, graduates are eligible to take the National Council Licensure Examination for Registered Nurses. Graduates are prepared for beginning professional practice positions in varied settings as well as for entry into graduate study.

The Bachelor of Science in Nursing degree program is accredited by the Accreditation Commission for Education in Nursing, 3343 Peachtree Road NE, Suite 850, Atlanta, Georgia 30326, www.acenursing, 404-975-5000. It is also accredited by the Indiana State Board of Nursing. The Dunigan Family School of Nursing is a member of the American Association of Colleges of Nursing and the National League for Nursing.

To graduate with a BSN degree the student must complete all the courses in the nursing curriculum plan and maintain an overall cumulative GPA of at least 2.5 and a nursing cumulative GPA of at least 2.5. Additionally, students must have a grade of C- or above in all nursing courses as well as in Biology 110, Chemistry 108 or 118, Exercise and Sport Science 112, 113, Health Sciences 205, Nutrition 304, Psychology 121, and Sociology 105. Specific information regarding curriculum progression policies is found in the University of Evansville Baccalaureate Program in Nursing Student Handbook.

Students in the nursing major may participate in a campus-based student nurse organization and are considered for induction into the Eta Lambda Chapter of Sigma Theta Tau International Nursing Honor Society.

Fees and Assistance

In addition to regular University costs, additional expenses incurred by nursing students include, but are not limited to, immunization, testing and lab fees, criminal background checks, drug screen, uniforms, and travel to clinical sites. All students are required to have a laptop or netbook that meets University of Evansville recommended computer system requirements. Starting in the sophomore year, students must have an iPod Touch or iPad mini with required nursing references installed. Students should consult the Office of Financial Aid for information about additional financial aid available to students in the nursing major. Additional resources are also often available through health care agencies in the student's local community as well as service and professional organizations.

Clinical Facilities

Several types of clinical facilities are used in the educational programs of the department. These include inpatient, outpatient, and various community health care settings. Students may have an opportunity to study nursing at Harlaxton College in England or in other countries through study abroad courses.

Admission

Entering freshmen may qualify for direct entry into UE's Bachelor of Science in Nursing program. University of Evansville accepted applicants must meet the following requirements in order to be accepted directly into the BSN program: rank in upper third of the student's high school graduating class, a minimum of four years of English and three years of mathematics, a minimum of three years of science (including grades of C or above in two semesters of chemistry), and SAT-R score of 1100 or above or ACT score of 22 or above. Students meeting academic requirements also must be in good health, eligible for licensure, certification, or registration and capable of meeting clinical practice requirements. Students who do not meet admission criteria are considered on an individual basis by the program's Admission, Standards, and Progression Committee. Applicants to the program may be requested to arrange a personal interview with a faculty member. The program accepts students who change their majors, transfer students, and international students. Students interested in transferring to the nursing program and international students must contact the Dunigan Family School of Nursing for specific admission and transfer policies.

Nursing at Harlaxton College in Grantham, England

Nursing course work is offered in the fall semester at the Harlaxton near Grantham, England. Students at the senior level in the nursing program may have an opportunity to participate. For details, contact the Dunigan Family School of Nursing

Combined Program with Master of Public Health

Students pursuing a BSN also have the option to earn a Master in Public Health degree in their 5th year. See Public Health for program requirements.

39 Hours of 300/400 level courses

RN to BSN Option

RN to BSN Option

The University of Evansville offers registered nurses (RNs) an opportunity for advanced placement in the baccalaureate nursing program. The program focuses on meeting the needs of the adult learner and working nurse. Graduates of the program demonstrate enhanced critical thinking skills, advanced knowledge of health care issues, research, quality improvement, and leadership. The educational plan for the RN to BSN student shares the same program outcomes as the undergraduate nursing program while providing an accelerated pathway to earn a BSN.

Completion of the option requires a total of 120 credit hours. While at UE, RN to BSN students complete a total of 9 nursing courses, which total 32 credit hours. Students in the RN to BSN Program may petition to earn up to 7 hours of nursing credit for work experience or specialty certifications.

Upon successful completion of Nursing 351 (Transition to Professional Nursing), RNs who are graduates of an accredited diploma or associate degree in nursing program receive credit for 34 hours in nursing, 3 hours for nutrition, and 3 hours for pharmacology. The remaining 48 hours of general education and BSN required credit hours for the BSN degree may be transferred in from another college or university or taken at UE.

Admission Requirements for the RN to BSN Option

- Admission to the University of Evansville
- Unencumbered current United States registered nurse license
- Completion of diploma or associate degree in nursing from an accredited nursing program
- Minimum cumulative college GPA of 2.5 on a 4.0 scale

NURS 468: Nursing Modalities: For the Community (4 hrs)

NURS 469: Strategies for Success in Professional Nursing (2 hrs)

NURS 477: Dynamic Integration: Complex Illness Problems (3 hrs)

NURS 478: NM: Health Promotion in Complex Problems (4 hrs)

Complete one from:

QM 227: Introduction to Statistics (3 hrs)

SOC 344: Intro to Behavioral Statistics (3 hrs)

HSA 467: Statistics Appraisal/Evaluation (3 hrs)

PSYC 245: Statistics for Psychologist (3 hrs)

39 Hours of 300/400 level courses

Physical Therapy

Faculty: McFelea, Whitaker (Chair)

Associate of Science Physical Therapist Assistance

The University of Evansville's program for physical therapist assistants is designed for individuals who want to provide direct patient care. The physical therapist assistant (PTA) is not responsible for initial patient examinations or for developing or revising the patient's plan of care. The PTA is a skilled technical health care worker who, under the supervision of a licensed physical therapist, performs select patient interventions. Duties of the assistant include educating patients in exercises and activities of daily living, providing interventions utilizing special therapeutic equipment, assisting in performing tests, measures and complex interventions, and observing and reporting patient responses to treatment. Assistants can work in various settings, including hospitals, outpatient clinics, extended care facilities, and schools.

The University of Evansville's PTA Program is a two-year program which leads to an Associate of Science in Physical Therapist Assistance degree and is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The two-year curriculum is composed of basic studies courses and professional technical courses with a laboratory component. Clinical education in a variety of health care settings is also part of the program. Completion of the program on a part-time basis is an option. Many students complete the program in conjunction with an undergraduate degree. Undergraduate degree programs which complement the program include exercise science, athletic training, health services administration, and psychology.

Students may participate in the following professionally related activities: Ace CARE, Physical Therapy Club, and Physical Therapist Assistant Club, (student organizations of the University of Evansville) and the American Physical Therapy Association.

Clinical Internships

The Department of Physical Therapy affiliates with local, regional, and national health care facilities to provide a diverse range of quality clinical education experiences. While the Evansville community provides a number of clinical opportunities, including initial observational and more advanced direct patient care experience, students should anticipate the personal and financial impact associated with transportation and accommodation outside the Evansville area for the majority of their full-time clinical course work.

Applying to the PTA Program

Application calendar, application materials, and admission criteria are available on the web at pt.evansville.edu. Admission criteria are subject to change. The Department of Physical Therapy reserves the right to make final decisions concerning all admission criteria.

Associate of Science

PHYSICAL THERAPIST ASSISTANCE

2018-2019 | 72.5 Hours Required

Major Requirements (72.5 hrs)

CHEM 100: Fundamentals of Chemistry (4 hrs) OR
CHEM 108: Elementary Chemistry (4 hrs) OR
CHEM 118: Principals of Chemistry (4 hrs)
EXSS 112: Human Anatomy and Physiology I (4 hrs)
EXSS 113: Human Anatomy and Physiology II (4 hrs)
FYS 111: First Year Seminar (3 hrs) OR
FYS 112: First Year Seminar (3 hrs)
HE 111: Medical Terminology (1 hr)
ID 356: Functional Anatomy/Biomechanics (3 hrs) OR
EXSS 356: Biomechanics (3 hrs)
MATH 105: College Algebra (3 hrs)
PT 101: Patient Care Skills and Interventions (3 hrs)
PT 102: Musculoskeletal Rehabilitation (4.5 hrs)
PT 103: Introduction to Clinical Practice (3 hrs)
PT 106: Functional Anatomy Lab (2 hrs)
PT 110: Field Experience for the PTA (1 hr)
PT 111: Clinical I (4 hrs)
PT 152: Clinical and Professional Issues (1 hrs)
PT 200: Pathophysiology (3 hrs)
PT 210: Multiple Systems Rehab (4 hrs)
PT 249: Clinical II (5 hrs)
PT 250: Clinical III (5 hrs)
PT 251: Neuromuscular Rehabilitation (4 hrs)
PT 252: Clinical and Professional Issues (2 hrs)

PSYC 121: Introduction to Psychology (3 hrs)
SOC 105: Introduction to Sociology (3 hrs)

Adult Education

Lindsay Roberts, Director

Bachelor of Science with a Major in Organizational Leadership

Bachelor of Art or Bachelor of Science with a Major in University Studies

The Center for Adult Education demonstrates the University of Evansville's commitment to lifelong learning. The unit serves nontraditional students through both credit and non-credit offerings. Two master's degree programs and two bachelor's degree program designed especially for adults are offered in the evenings. Non-credit classes that meet professional and personal educational needs allow community members to update essential skills or develop new interests. Additionally, the Center for Adult Education provides customized education and training to area businesses and industries.

Organizational Leadership

The Bachelor of Science degree with a major in organizational leadership is designed specifically for the mature adult learner who has earned an Associate of Arts, Associate of Science, or its equivalent (60 hours), and meets University of Evansville general education requirements. The University designed the organizational leadership program to assist mid-career adult learners who wish to complete a bachelor's degree. Adult education offers this undergraduate degree program during the evening.

Objectives

The primary objectives of the organizational leadership program are to assist each learner in the following:

- Incorporation of the major dimensions of the general education core goals in course work completed by students, including critical thinking skills, data and statistical analysis, effective writing and creative expression, and the ability to assess and render judgments of value in such areas as ethics, aesthetics, and public policy
- Development of a thorough understanding of the theory and practices associated with modern leadership and organizational management
- Development of the knowledge and skills in research, critical thinking and problem solving, and decision making
- Involvement in teamwork and leadership development through participation in classroom activities and applied research projects
- Understanding of professional ethics and its application to organizational environments

An emphasis on leadership and global issues provides learning experiences which not only enrich the life of the individual but also develop understanding and competencies to meet important societal needs. In the age of change and specialization, the generalist who understands the totality of the human condition and can make wise decisions will make a significant contribution to society. The organizational leadership program at the University of Evansville is designed to meet this societal need and to assist students in achieving their full potential.

The purpose of the program is to provide qualified individuals with the opportunity to complete a bachelor's degree and develop intellectual capacities necessary for successful leadership. The most significant learning objective is to advance students' abilities in strategic thinking, problem solving, and decision making. Students will be engaged in the practice and application of the fundamental concepts needed for supervision and leadership. The curriculum is designed to develop social responsibility and foster a global perspective.

University Studies

The University Studies degree is a new, unique, flexible academic program that allows adult students who have been out of high school for five years or more, the opportunity to obtain an undergraduate degree from the University of Evansville. Students may choose either the Bachelor of Arts or Bachelor of Science degree with two distinct pathways for degree completion.

- Pathway 1 is for adults who have already earned an Associate of Arts or Associate of Science or its equivalent (60 hours).
- Pathway 2 is for adult students who have not earned any previous college credit or have a limited amount of credit earned.

The flexible nature of this program provides courses available in both the traditional classroom and in an online format. The student will work directly with their advisor to map out a distinct academic plan and will choose courses that work best to satisfy the needs for the degree completion.

The program is designed to allow students to create an individual plan of study by selecting courses that will assist in the development of intellectual and practical skills, personal and social responsibility, and the competencies necessary for career development and advancement. Courses are offered in-seat and in online formats.

Up to 12 hours of prior learning credit may be available. The student must be admitted to the program to submit a portfolio for review for each course for which prior learning credit is requested. There is a standard fee for portfolio assessment and for the college-equivalent credit awarded.

Applicants with military training and experience may be able to receive up to 12 credit hours depending on their military experience and the degree program the student chooses. A full review of the transcripts will be completed after an offer of admission is granted.

Bachelor of Science

ORGANIZATIONAL LEADERSHIP

2018-2019 | 63 Hours Required

Complete all of the following:

- CHNG 280 Social Entrepreneurship (3 hrs)
- CHNG 330 Transformative Action (3 hrs)
- FYS 312 Writing Across the Disciplines (3 hrs)
- OL 300 Adult Learner (3 hrs)
- OL 310 Applied Leadership (3 hrs)
- OL 311 Quantitative Skills for Leadership (3 hrs)
- OL 312 Human Behavior in Organizations (3 hrs)
- OL 320 Persuasive Written and Oral Communication (3 hrs)
- OL 321 Principles and Issues of Human Resources (3 hrs)
- OL 322 Leadership Ethics (3 hrs)
- OL 330 Supervision (3 hrs)
- OL 350 Leadership Practicum (3 hrs)
- OL 360 Leadership Practicum (3 hrs)
- OL 410 Leadership: Conflicts and Change (3 hrs)
- OL 411 Leadership: Strategic Decision-Making (3 hrs)
- OL 412 Customer Development and Leadership (3 hrs)
- OL 420 Global Issues Seminar (3 hrs)
- OL 421 Organizations: A Strategic Approach (3 hrs)
- OL 422 Leadership: Individual and Team Processes (3 hrs)
- GL 430 Technology for Leaders (3 hrs)
- OL 460 Capstone (3 hrs)

Bachelor of Arts

UNIVERSITY STUDIES

2018-2019 | 120 Hours Required

Enduring Foundations General Education Requirements

(47 hours)

Outcome 1: (3 hrs) Critical Reading and Thinking

- FYS 112 or 312 First Year Seminar

Outcome 2: (3 hrs) Imaginative Expressions of Human Condition

-

Outcome 3: (3 hrs) Human History and Historical Context of Knowledge

-

Outcome 4: (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place

-

Outcome 5: (3 hrs) Human Aesthetic Creation and Artistic Creativity

-

Outcome 6: (12 hrs) Linguistic and Cultural Competence in Language

-
-
-
-

Outcome 7: (3 hrs) Quantitative Literacy

-

Outcome 8: (7 hrs with at least one lab course) Scientific Literacy

-
-

Outcome 9: (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge

-
-

Outcome 10: (1 hr) Knowledge and Responsibility Health and Wellness

-

Outcome 11: (3 hrs) Think Critically and Communicate Orally and in Writing

-

Overlay: Writing Across the Curriculum (4 courses)

-
-
-
-

Free Electives (15 hours)

39 Hours of 300/400 level courses

Major Requirements (58 hours)

- OL 300 (if less than 30 hours of college credit)

This checklist is informational only. The University reserves the right to modify regulations and curriculum at any time. Please see the automated degree audit on Student Planning for the most up-to-date program information.

College of Engineering and Computer Science

Ying Shang, Dean

The College of Engineering and Computer Science is composed of the Department of Electrical Engineering and Computer Science and the Department of Mechanical and Civil Engineering. Baccalaureate degrees are offered in the professional areas of civil engineering, computer engineering, electrical engineering, mechanical engineering, software engineering, and computer science. A minor in engineering management is offered in conjunction with the Schroeder Family School of Business Administration. A Biomedical Option is available in Electrical Engineering and in Mechanical Engineering. The College also offers an Energy Engineering Certificate. The Department of Electrical Engineering and Computer Science offers a minor in computer science.

The mission of the College of Engineering and Computer Science is to provide high quality, personalized educational experiences in engineering or computer science to talented and motivated students who seek a baccalaureate degree.

All programs in the College of Engineering and Computer Science share certain goals:

- Graduates will know the fundamentals of mathematics, basic science, and engineering and/or computer science appropriate to their major discipline. Their level of knowledge will be sufficient to permit them to enter professional practice or to pursue advanced study and will serve as the basis for continued learning, both formally and informally.
- Graduates will possess certain skills, including, but not limited to, teamwork, communication skills, critical thinking, computer skills, problem solving, information management skills, and decision-making, as appropriate to their discipline. Their skill level will be sufficient to permit them to enter professional practice or to pursue advanced study.
- Programs will assist students in developing personal values. Emphasis is placed on ethical behavior, global-mindedness, active citizenship, and intellectual growth.

The curricula of the various programs provide an appropriate balance between humanities, fine arts and social sciences, the physical sciences and mathematics, the engineering sciences, and design and creative activities. Our programs are rich in project-based learning, team experiences, and close faculty-student interaction.

The civil engineering program, computer engineering program, electrical engineering program, and mechanical engineering program are accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org. The computer science program is accredited by the Computing Accreditation Commission (CAC) of ABET, www.abet.org.

The University has chapters of the engineering honor societies: Chi Epsilon for civil engineers, Eta Kappa Nu for electrical and computer engineers, Pi Tau Sigma for mechanical engineers, and Tau Delta Kappa for all branches of engineering and computer science. Membership is available in student chapters of the following national professional societies: American Society of Civil Engineers (ASCE), American Society of Mechanical Engineers (ASME), American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE), Association for Computing Machinery (ACM), Institute of Electrical and Electronics Engineers (IEEE), Society of Automotive Engineers (SAE), and Society of Women Engineers (SWE).

Admission Requirements

Students who have explicitly demonstrated the ability and preparation needed to successfully complete a degree program of their choice will be considered for admission. The number of students admitted to each degree program is limited by available space and resources to ensure a high quality, personalized, educational experience. Admission to a specific degree program is a three-part process: (1) admission to the University, (2) admission to the lower division of the College of Engineering and Computer Science, and (3) admission to the upper division of one of the departments as a candidate for a specific degree.

Admission to the College of Engineering and Computer Science lower division for civil engineering, computer engineering, electrical engineering, software engineering and computer science is based on standardized test scores (SAT or ACT) and specific high school course work grades. Minimum acceptable test scores are 560 on the math portion of the SAT or 25 on the math portion of the ACT. Minimum high school preparation must include the following:

- Three-and-one-half years of mathematics comprising two years of algebra, one year of plane geometry, and one-half year of trigonometry with an average grade of B or better
- Two years of science including at least one year of chemistry with a laboratory and an average grade of B or better
- Four years of English
- Applicants whose native language is not English must achieve a minimum TOEFL score of 70 or IELTS score of 6.0.
- Highly recommended additional high school course work includes:
 - One or more years of physics
 - Additional chemistry
 - Additional mathematics such as analytic geometry, college algebra, calculus
 - Two or more years of a foreign language

Admission to mechanical engineering lower division is described in the Mechanical Engineering Program section.

Students who do not meet these standards may be admitted with pre-engineering status. Pre-engineering students will concentrate on specific mathematics courses and other courses intended to prepare them for full admission to the lower division of engineering. Full admission will typically be granted upon petition after achieving grades of C or better in Mathematics 221 and Chemistry 118, and, for students whose native language is not English, demonstrating proficiency in English.

In some cases, an interview between an applicant and a faculty member or alumnus will be considered in the admission and financial aid process. Other evidence of exceptional motivation will be considered in marginal cases such as related (high school) elective course work, hobbies, extracurricular activities, or a pre-engineering exploration program.

Admission of Transfer Students

Application materials from transfer students are reviewed at two levels. At the university level, a minimum grade point average of 2.0 is required for acceptance. The Office of the Registrar reviews the overall record and determines the transfer status of general education and other non-technical courses. Materials are then sent to the College of Engineering and Computer Science, either to the dean or to the chair of the appropriate department. The dean or chair determines the acceptability

of any engineering (and sometimes mathematics or science) courses presented for transfer and also makes the decision to grant or deny admission to the program.

Students Currently Pursuing a Degree at the University of Evansville

Students currently pursuing a degree in engineering or computer science at UE may take courses elsewhere for transfer to UE. (See the “Academic Policies and Procedures” section of this catalog for the University policies regarding transfer work.) Normally, such courses will be taken during the summer or while the student is on a co-op assignment. For engineering courses at the 200 level or above, only those taken from EAC-ABET or CAC-ABET accredited programs may be transferred. Courses in mathematics, science, or general education may be transferred from any regionally accredited university or junior college. Any engineering courses must have the prior approval of the dean or the appropriate department chair. Generally, approval to take a required engineering course elsewhere will be granted only in exceptional circumstances.

Credit for Courses Taken Elsewhere

Course work presented by an applicant for transfer of credit is carefully reviewed by the Office of the Registrar together with either the dean of engineering and computer science or the appropriate department chair. Only courses with a grade of C (2.0 on a 4 point scale) or better may be transferred. Engineering courses taken from an EAC-ABET or CAC-ABET accredited program will be transferred when there is a clear correspondence with a UE course. Other courses (science, mathematics, and general education) may be transferred with a grade of C or better if taken at a regionally accredited institution. An exception to this policy will be granted if a formal articulation agreement is in place. In all other cases of technical/engineering courses taken from non-EAC/CAC-ABET accredited programs, suitability for transfer is evaluated by review of the course syllabi and/or student’s work. When a clear one-to-one correspondence exists with one or more of our engineering courses and the student has at least a grade of C, credit may be granted up to a maximum of 12 hours (or four courses), at the discretion of the dean or department chair. High quality course work (with grade of C or better) of obvious merit for an engineer but not corresponding to one of our courses may be accepted as technical electives or free electives up to a maximum of seven hours (two courses).

In the case of courses from non-U.S. schools, syllabi and student work are reviewed and, where apparent equivalence is found, credit may be granted on a conditional basis. The condition is generally in the form of requiring a C or better performance in one or more courses whose prerequisites include the work to be transferred.

Students requesting an exception to these policies may petition the College of Engineering and Computer Science Executive Committee or the University’s Admissions and Standards Committee, as appropriate.

Engineers at Harlaxton College

Harlaxton College study for one semester is highly recommended for engineering and computer science students. Normally, students are encouraged to plan for Harlaxton study during the fall semester of the second year. Some students may have additional options for scheduling Harlaxton study, including in the summer. Degree plans for engineering or computer science students that include study at Harlaxton are available from College of Engineering and Computer Science academic advisors. Students who wish to study at Harlaxton should begin planning with their academic advisor as early as possible.

Personal Computers

All students in the College of Engineering and Computer Science are required to have a personal computer. Students who do not own a personal computer are strongly encouraged to acquire one during their first semester of full-time studies. Several specially equipped PCs are provided by the college to augment students’ PCs; some of these and other PCs provided in the University’s academic computing labs can be used on a time-available basis until students acquire their own PC. Incoming students should consult their academic advisor or the dean’s office for information on required minimum PC specifications.

Degree Requirements

In addition to meeting all degree requirements of the University, students in the College of Engineering and Computer Science must meet specific departmental requirements described in the following sections. These include: University Enduring Foundations General Education requirements, courses required for each degree, and area electives chosen from approved course work for each degree.

Exceptions to requirements for degrees and policies of the College of Engineering and Computer Science may be approved when unusual and mitigating circumstances are present. Students may request approval for such exceptions by submitting an academic petition with the academic advisor’s approval to the appropriate department chair for consideration by the dean and department chair.

The degree programs in engineering and computer science can normally be completed in eight semesters of full-time study (potentially including one semester at Harlaxton College) by the entering student with adequate high school preparation or its equivalent.

Co-op Program

A cooperative education plan for all of the college’s programs is available as an alternative to the traditional four-year plan. The co-op plan combines classroom education with full-time work experience in industry. Please refer to Special Educational Opportunities located in the “Degrees, Curriculum, Academic Opportunities” section of this catalog.

Other Opportunities for Work Experience

Students desiring a smaller scale work experience may participate in an internship or concurrent co-op. In the College of Engineering and Computer Science, an internship is a full-time, paid work experience lasting at least 8 weeks. Most internship opportunities occur in the summer.

Concurrent co-op is a plan wherein full-time students work part time in a professional environment. Students carry a full-time course load and work eight to 15 hours per week. Concurrent co-op is most often used as a pre-co-op experience or as a post-co-op experience when employers wish to have former co-op students carry a work project to completion.

Engineering Management and the Energy Engineering Certificate

Engineering Management Program Director: Swenty ■ Energy Engineering Certificate Program Director: Stamps

A minor in engineering management is offered by the College of Engineering and Computer Science in cooperation with the Schroeder Family School of Business Administration.

The minor in engineering management has two sets of course requirements. One set complements a major in engineering or computer science; the other set complements a major in business administration or accounting. In order to earn the engineering management minor, the student must also earn the appropriate accounting, business, computer science, or engineering degree. The minor is especially appropriate for students seeking careers in operations, production management, construction management, or technical sales and marketing. It is also a means by which undergraduate engineering students can prepare for future graduate studies in either an MBA or graduate program in engineering management.

Engineering Management Minor (18 hours)

The following courses are required for students whose major is civil engineering, computer engineering, electrical engineering, mechanical engineering, software engineering or computer science.

Economics 101* or 102*; Engineering 390, 409; Interdisciplinary 150 or Communication 380; Management 331 or 377; Management 310¹ or Civil Engineering 324

The following courses are required for students whose major is accounting or business administration.

Chemistry 118*; Civil Engineering 324 or 374; Engineering 101 or Electrical Engineering 210; Mathematics 134 or 221*; Mechanical Engineering 197; Physics 121* or 210*

Energy Engineering Certificate (12 hours)

A certificate in energy engineering is available to students in the engineering programs. This certificate prepares engineers for careers in the energy industry. Students may earn the certificate by completing the following requirements:

Electrical Engineering 430; plus any three of the following: Civil Engineering 374; Electrical Engineering 330; Mechanical Engineering 463, 470, 472, 476; Civil Engineering 497 or Electrical Engineering 497 or Mechanical Engineering 497 (with an approved energy-focused project) or Cooperative Education 91 - 95 or Experiential Education 71 - 73 (with an approved energy-focused employer).

With careful curriculum planning including an approved energy-focused project or co-op, engineering students can earn an energy engineering certificate by taking no more than one additional course.

The Energy Engineering Certificate may also be earned by persons who already hold a degree in engineering. In this case the 497, Cooperative Education, and Experiential Education courses will not be counted towards the Certificate.

Electrical Engineering and Computer Science

Faculty: Blandford (Chair), Chandler, Howe, Hwang (Computer Science Program Director), Lotfalian, Mitchell, Morse, Randall, Richardson (Electrical Engineering Program Director), Roberts

Bachelor of Science in Electrical Engineering

Bachelor of Science in Electrical Engineering: Biomedical

Bachelor of Science in Computer Engineering

Bachelor of Science in Software Engineering

Bachelor of Science in Computer Science

The Department of Electrical and Computer Science offers four baccalaureate degrees: Bachelor of Science in Electrical Engineering, Bachelor of Science in Computer Engineering, Bachelor of Science in Software Engineering, and a Bachelor of Science in Computer Science. Both the electrical engineering and computer engineering programs are accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org. The computer science program is accredited by the Computing Accreditation Commission (CAC) of ABET, www.abet.org. Students in any of the baccalaureate degree programs may participate in cooperative education. The degree requirements for co-op students are the same as those shown below. The sequencing for the co-op program is described in the College of Engineering and Computer Science program description. Students who wish to enroll at Harlaxton College will follow a modified course schedule and should consult their academic advisor.

Student chapters of the Institute of Electrical and Electronics Engineers and the Association for Computing Machinery are sponsored by the department to support and encourage the professional development of the students. Students may also participate in college-wide chapters of the Society of Women Engineers and the National Society of Black Engineers.

Objectives

The electrical engineering, computer engineering, software engineering, and computer science programs share the following objectives that apply to graduates three to five years after graduation:

- Graduates will be engaged in a professional career and/or continued or advanced study in their chosen field. This implies that graduates will recognize the value and necessity of lifelong learning.
- Graduates will be engaged in applications of problem solving and communication skills for a wide variety of problems in engineering and/or computer science, either as individuals or in teams.
- Graduates will be active ethical participants in a local, national, or global engineering or computer science community.

Electrical Engineering

Electrical engineering is a very broad field and the undergraduate electrical engineering program matches this breadth by introducing the student to almost every aspect of electrical engineering. Modern life is permeated with electric devices, ranging from the ubiquitous small electric motor and the computer controlled appliance to the fiber optic communications link. Electrical engineering has transformed the way we live and the way we think about the natural world. This transformation is ongoing and to be successful in the profession, electrical engineers must be open to the continuous learning of new concepts and ideas. At the same time, the electrical engineer must be a responsible and ethical member of society.

Electrical engineering is a challenging field. Career opportunities are available in manufacturing, research, and development. The bachelor degree can also provide access to graduate school where students can continue their professional studies.

The curriculum in electrical engineering is purposefully broad and places a high value on creativity, invention, the continual learning of new concepts, and the ethical practice of the profession. The first two years of the program provide a firm foundation in mathematics, natural science, basic engineering analysis and design, and an appreciation for the humanities and social sciences. The technical part of the first two years provides instruction in the C++ programming language, electric circuit analysis, computer aided design and simulation, and the logical design of digital circuits. Laboratories emphasize the use of computers and provide instruction in the use of basic instrumentation common to the profession.

The last two years of the program are project oriented. Students take project labs in which they are assigned open-ended projects requiring invention and design to meet specifications. Many students work one-on-one with professors. Class sizes for upper-level electives range from as small as four students to as large as 25. Some specialization is possible in the last three semesters when a student can choose two technical electives in areas such as computers, electronics, electro-optics, power systems, or linear systems and controls. In addition to the design labs that are required, most courses at the junior and senior level have semester-long projects as part of the course homework. Many projects require teamwork. For example, in the microcontroller course (Electrical Engineering 454) students typically design and construct a system requiring a real time microcontroller. In the communication electronics course (Electrical Engineering 440), students design complete communication systems for a semester-long project. During the senior year, every electrical engineering student is required

to complete a year-long senior design project that is often sponsored by industry. During the first semester, the student writes a proposal and does a preliminary design. This design is subject to a design review process and a formal presentation of the ideas and concepts is required. During the second semester, the student completes the design and constructs a final product. .

With careful curriculum planning including an approved energy-focused project or co-op, engineering students can earn an energy engineering certificate by taking no more than one additional course.

The Energy Engineering Certificate may also be earned by persons who already hold a degree in engineering. In this case the 497, Cooperative Education, and Experiential Education courses will not be counted towards the Certificate.

Biomedical Option in Electrical Engineering

Electrical engineering majors may earn a bachelor's degree in electrical engineering with a biomedical option.

Computer Engineering

Computer engineering bridges the areas of electrical engineering and computer science. Computer engineering graduates are sought by industries involved with industrial automation and embedded computer systems. The program in computer engineering provides an in-depth understanding of those topics in electrical engineering that are related to the design and use of computers as well as those topics in computer science that deal with software design and implementation, particularly those applications that involve real-time operation. Computer engineers typically design systems that have dedicated computers of which the user is largely unaware. Some typical computer engineering applications are engine controllers and body computers in automobiles, numerous computer controlled appliances such as the VCR, microwave oven, washing machine, and industrial automation including industrial robots. The computer engineering curriculum provides a broad-based understanding of both hardware and software and their interaction, as well as an opportunity to study particular aspects in more depth. Computer engineering is a rapidly changing area and to be effective in the profession, computer engineers must be open to the continuous learning of new concepts and ideas. At the same time, the computer engineer must be a responsible and ethical member of society.

Computer engineering is a challenging field. Career opportunities are available in manufacturing, research, and development. The bachelor's degree can also provide access to graduate school where students can continue their professional studies. The curriculum in computer engineering is purposefully broad and places a high value on creativity, invention, the continual learning of new concepts, and the ethical practice of the profession.

The first two years of the program provide a firm foundation in mathematics, natural science, basic engineering analysis, and design, and an appreciation for the humanities and social sciences. The technical part of the first two years provides instruction in the C++ programming language, data structures, electric circuit analysis, computer aided design and simulation, and the logical design of digital circuits. Laboratories emphasize the use of computers and provide instruction in current methods of software design and in the use of basic instrumentation common to the profession.

The last two years of the program are project oriented. Students take project labs in which they design and invent hardware and software to meet specifications. Many students work one-on-one with professors. Class sizes for upper level electives range from as small as four students to as large as 25. Through area elective choices, students majoring in computer engineering may concentrate their studies in the areas of

digital systems and controls, computer hardware and architecture, artificial intelligence, graphics, or systems programming. In addition to the design labs that are required, most courses at the junior and senior level have semester-long projects as part of the homework for the class. Many projects require teamwork. During the senior year, every computer engineering student is required to complete a year-long senior design project that is often industrially sponsored. During the first semester, the student writes a proposal and does a preliminary design. This design is subject to a design review process and a formal presentation of the ideas and concepts is required. During the second semester, the student completes the design and constructs the final product.

Software Engineering

The software engineering curriculum focuses on all aspects of the craft of software development. Software Engineering students are prepared to enter the software industry as developers and designers of software systems of all sizes. Students complete a set of core requirements in the first two years of the program, providing a firm foundation in mathematics, natural science, basic programming analysis and design, and an appreciation for the humanities and social sciences. The technical part of the first two years provides instruction in programming using languages such as C, C++, and Java, basic data structures and algorithms, and object-oriented design.

The last two years of the program emphasize the design and implementation of computer software systems with a particular emphasis on the design and management of large projects requiring multiple developers to complete. Students will work on group software projects for real clients from the community. Class sizes for upper-level electives range from as small as four students to as large as 25. Through elective choices, students majoring in software engineering may concentrate their studies in the areas of graphics, artificial intelligence, large software systems and parallel programming. Many courses at the junior and senior level have significant projects as part of the homework for the class. During the senior year, every software engineering student is required to complete a year-long senior design project that is often industrially-sponsored. During the first semester, the student writes a proposal and does a preliminary design. This design is subject to a design review process, and a formal presentation of the ideas and concepts is required. During the second semester, the student completes the design and constructs the final product.

The software engineering program allows sufficient free electives for students to minor easily in a field of application such as business or in a complementary field such as a foreign language.

Computer Science

The computer science curriculum prepares students for all areas of the computer industry, for industrial positions where computers are applied, and for further study in graduate programs. Computer science students complete a set of core requirements in the first two years of the program, providing a firm foundation in mathematics, natural science, basic programming analysis and design, and an appreciation for the humanities and social sciences. The technical part of the first two years provides instruction in programming using languages such as C, C++, and Java, basic data structures and algorithms, object-oriented design, and basic machine organization.

The last two years of the program emphasize the design and implementation of computer software systems, and the scientific and industrial applications of computer science. Many students work one-on-one with professors. Class sizes for upper-level electives range from as small as four students to as large as 25. Through elective choices, students majoring in computer science may concentrate their studies in the areas of graphics, artificial intelligence, systems programming,

or Internet applications. Many courses at the junior and senior level have significant projects as part of the homework for the class. During the senior year, every computer science student is required to complete a year-long senior design project that is often industrially sponsored. During the first semester, the student writes a proposal and does a preliminary design. This design is subject to a design review process, and a formal presentation of the ideas and concepts is required. During the second semester, the student completes the design and constructs the final product.

In addition, the computer science program allows sufficient free electives for students to minor easily in a field of application such as business or in a complementary field such as a foreign language.

Computer Science Minor (21 hours)

Students with no prior background in programming are encouraged to take Computer Science 101 or 105 before taking Computer Science 210. Although there are no mathematics courses required for a minor in computer science, students should be aware that mathematical principles from calculus and discrete mathematics are regularly used throughout the computer science program.

Computer Science 210, 215, 220, 290; 9 hours of 300- or 400-level computer science courses

Bachelor of Science in

ELECTRICAL ENGINEERING

2018-2019 | 129 Hours Required

Enduring Foundations General Education Requirements
(43 hours)**Outcome 1:** (3 hrs) Critical Reading and Thinking

- FYS 112 or 312 First Year Seminar

Outcome 2: (3 hrs) Imaginative Expressions of Human Condition

■

Outcome 3: (3 hrs) Human History and Historical Context of Knowledge

■

Outcome 4: (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place

■

Outcome 5: (3 hrs) Human Aesthetic Creation and Artistic Creativity

■

Outcome 6: (6 hrs) Linguistic and Cultural Competence in Language

■

■

Outcome 7: (3 hrs) Quantitative Literacy

- MATH 221 (4 hrs)

Outcome 8: (7 hrs with at least one lab course) Scientific Literacy

- Chemistry 118 (4 hrs)
- Physics 210 (4 hrs)

Outcome 9: (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge

■

■

Outcome 10: (1 hr) Knowledge and Responsibility Health and Wellness

■

Outcome 11: (3 hrs) Think Critically & Communicate Orally & in Writing

- Electrical Engineering 495:Senior Project Phase I

Overlay: Writing Across the Curriculum (4 courses)

- FYS 112
- EE 495
- EE 497
-

Major Requirements (74 hrs)

MATH 222: Calculus II (4 hrs)

MATH 323: Calculus III (4 hrs)

MATH 324: Differential Equations (3 hrs)

PHYS 211: Calculus Physics II (4 hrs)

ENGR 101: Introduction to Engineering (3 hrs) OR

ENGR 102 (if English is second language)

ENGR 123: Programming for Engineers (3 hrs) or CS 210

ENGR 212: Statics (3 hrs)

EE 210: Circuits (3 hrs)

EE 215: Circuits & Systems (3 hrs)

EE 224: Electrical Engineering Programming Lab (2 hrs)

EE 254: Logic Design (3 hrs)

EE 310: Linear Systems & DSP I (3 hrs)

EE 311: Linear Systems & DSP II (3 hrs)

EE 320: Engineering Electromagnetics (3 hrs)

EE 342: Electronics I (3 hrs)

EE 343: Electronics II (3 hrs)

EE 354: Digital Systems (3 hrs)

EE 360: Linear Control Systems (3 hrs)

EE 380: Intermediate Electrical Projects Lab (2 hrs)

EE 421: Photonics I (3 hrs)

EE 430: Energy Conversion Systems (3 hrs)

EE 454: Microcontroller Applications (3 hrs)

EE 470: Analog Communication Theory (3 hrs)

EE 471: Digital Communication Theory (3 hrs)

EE 494: Senior Project Seminar (0 hrs)

EE 497: Senior Project Phase II (3 hrs)

Technical Electives (12 hours)

- One course from: EE 390 or MATH 365

- One course from: PHYS 213, 305; MATH 341, 370, 425

- Two courses from:

ENGR: 366

CS: 215, 320, 355, 375, 380, 415, 430, 475, 480

EE: 330, 356, 410, 422, 425, 432, 437, 438, 440, 445, 458, 465, 499

ME: 342, 344, 362, 368; PHYS 312, 330, 331, 416, 421, 427, 471

39 Hours of 300/400 level courses**NOTES**

- All Electrical Engineering majors must take 32 hours of math and science to meet ABET requirements.
- Students must have a minimum GPA of 2.0 in all College of Engineering and Computer Science courses (CE, CS, EE, ENGR, and ME).

Bachelor of Science in

ELECTRICAL ENGINEERING: BIOMEDICAL

2018-2019 | 138 Hours Required

Enduring Foundations General Education Requirements
(43 hours)**Outcome 1:** (3 hrs) Critical Reading and Thinking

- FYS 112 or 312 First Year Seminar

Mechanical and Civil Engineering

Faculty: Allen, Layer, Fulcher (Mechanical Engineering Program Director), Lofton, Mukherjee, Schmidt, Selvaraj, Stamps, Swenty (Chair), Unger

Bachelor of Science in Civil Engineering

Bachelor of Science in Mechanical Engineering

Bachelor of Science in Mechanical Engineering: Biomedical

The Department of Mechanical and Civil Engineering offers programs leading to the degrees of Bachelor of Science in Civil Engineering and Bachelor of Science in Mechanical Engineering. Both programs are accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org. The department also offers courses in support of the engineering management minor and a certificate in energy engineering. A biomedical option is available to mechanical engineering majors. The recommended co-op option has course requirements identical to those listed in this section; however, students follow a modified course schedule. Please refer to Special Educational Opportunities located in the “Degrees, Curriculum, Academic Opportunities” section of this catalog.

Students desiring to study at Harlaxton College follow a modified course schedule and should consult their academic advisor.

Civil Engineering

Civil engineering is a profession focused on designing, building, and maintaining infrastructure that improves the quality of living while protecting public safety. Community, societal, and environmental needs are met through the planning, design, construction, and maintenance of public and private facilities. Civil engineers apply their technical knowledge and skills to diverse projects including buildings, foundations, dams, highways, tunnels, bridges, airports, harbors, flood protection facilities, water and wastewater treatment plants, and off-shore structures. Civil engineering career opportunities exist in industry, government, and the private sector. Practice areas include design, construction, project management, consulting, research, and teaching.

The civil engineering undergraduate program is designed to provide students with a personalized educational experience. Program educational objectives are:

- Graduates will be actively engaged in a professional career as a civil engineer or pursuing advanced study
- Graduates will understand professional practice issues and demonstrate a commitment to professional licensure and continuing education
- Graduates, guided by the principles of sustainable development and global interconnectedness, will understand how civil engineering projects affect society and the environment

The civil engineering curriculum prepares students to meet present and future challenges in the profession and to develop insight into economical, physical, social, and political constraints affecting the engineering decision-making process. Today’s engineers must be adept at working in a global marketplace. To assist engineers in meeting that challenge, the University of Evansville provides students with an opportunity for an international experience at Harlaxton College. A student chapter of the American Society of Civil Engineers (ASCE) is sponsored by the department to support and encourage professional development. UE’s award-winning ASCE chapter has been recognized as one of the best in the nation. Students may also participate in Chi Epsilon (the national civil engineering honor society) and the college-wide chapter of the Society of Women Engineers.

To be prepared to meet present and future challenges in the profession, students follow a curriculum that provides them with a broad body of knowledge and a comprehensive understanding of civil engineering fundamentals. This is achieved through a set of required core courses in the areas of materials, structural engineering, water resources engineering, geotechnical engineering, transportation engineering, construction engineering, surveying, and environmental engineering. In addition, the curriculum provides options for students to take upper-division elective courses in structural analysis, advanced structural design, engineering economics, engineering hydrology, environmental engineering, advanced pavement design and management, and special topics such as earth dams, open channel hydraulics, and advanced computer visualization and modeling.

Students are introduced to engineering design in the fall of their freshman year in Engineering 101. The freshmen in this course closely interact with a faculty member who is also the student’s advisor. Past freshman projects include the design of balsa wood bridges and retaining walls. Upperclassmen interact with freshmen as course assistants.

After students gain an understanding of fundamental concepts, design education is continued during the junior year through a variety of design projects such as a steel frame walkway in Civil Engineering 341 and a concrete baseball bat in Civil Engineering 331. Design is heavily emphasized in senior-level civil engineering required and elective courses and is

developed through the use of both individual projects and design teams. Students utilize computer software in several design exercises: slope stability software in Civil Engineering 438; structural analysis software to design reinforced concrete structures in Civil Engineering 342; hydraulic engineering software to design spillways and bridges in Civil Engineering 469, and rainfall-runoff modeling software to design sustainable, environmentally compliant storm water management facilities in Civil Engineering 468. The design projects become progressively more complex leading up to the year-long senior capstone design project in Civil Engineering 495/497. Students work on multifaceted projects, such as dams, bridges, buildings, roadways, trails, storm water management facilities, athletic complexes, and green infrastructure. In order to obtain a broad design experience and exposure to practical design criteria, students interact with design professionals, base their designs on national and international building codes and standards, prepare engineering reports and design drawings, make presentations at conferences, and prepare applications for local, state, and federal permits at the completion of the senior project.

After completing the civil engineering curriculum, students have 34 credit hours in basic mathematics and science and approximately 72 credit hours in engineering topics, depending on electives chosen in the senior year. The engineering topics are divided into approximately two-thirds engineering science and one-third engineering design. The allocation between engineering science and design prepares civil engineering graduates to enter the practice of engineering or to further their education in graduate school.

Mechanical Engineering

Mechanical engineering is one of the broadest fields of engineering, encompassing applications as diverse as automotive or aerospace vehicles, power generation, manufacturing processes, plastic and other petrochemical products, and electronic hardware. These applications require a fundamental understanding of the static and dynamic relationships between forces and motion, the nature of materials, principles of energy conservation, and transformation, design, and analyses of machines, the transmission of heat, and the flow of fluids. The mechanical engineering curriculum provides a rigorous treatment of fundamental principles in these subject areas and the necessary background in mathematics and the basic sciences to prepare students for these courses. Through elective choices, students may investigate special areas of mechanical engineering including internal combustion engines, combustion engineering, turbomachinery, power plants, finite elements, mechanical vibrations, and advanced computational methods.

In addition to strong technical skills, today's engineers in the global marketplace must be adept at working with other people who have very different professional backgrounds and who may be from other countries with different cultures. The University of Evansville helps engineers meet that challenge by providing students with a strong liberal arts background and providing an opportunity for an international experience at Harlaxton College.

The mission of the mechanical engineering program is to provide a personalized educational experience for talented and motivated students who seek a Bachelor of Science in Mechanical Engineering. Program educational objectives include:

- Graduates shall be engaged in professional practice, continuing education, and/or other activities benefitting society.
- Graduates shall have developed habits consistent with an attitude of professionalism, an awareness and appreciation for different cultures, and the understanding of engineering influence in a global context.

The mechanical engineering program strives to maintain a balance between a traditional approach to teaching engineering principles and incorporating current industrial practices. For example, computer-aided design and analysis, applications of automatic data acquisition, and concurrent engineering have all been incorporated into the curriculum. Program faculty aggressively seek to develop laboratories and courses that use state-of-the-art equipment. The size of the program allows students to define individual experiences in undergraduate research or projects in student sections of professional societies. Student chapters of the American Society of Mechanical Engineers (ASME) and the Society of Automotive Engineers (SAE) are sponsored by the department to support and encourage the students' professional development. A national honor society for mechanical engineering students, Pi Tau Sigma, is represented. Students may also participate in the college-wide chapter of the Society of Women Engineers (SWE).

A unique and exciting integrated design sequence is offered to freshman through senior students. Students from different grade levels work together on engineering projects. Students apply design skills obtained in their course work and throughout the integrated design sequence directly to meaningful projects. The goal is to teach both technical and non-technical skills through collaborative "design, build, and test" projects.

The integrated design sequence consists of courses numbered Mechanical Engineering 197, 297, 397, and 497 that offer specific skills that will be used in the team environment. The freshman course, Mechanical Engineering 197, provides skills in computer-aided modeling, sketching and product fabrication techniques. The sophomore course, Mechanical Engineering 297, provides instruction in basic computer-controlled machining and rapid prototyping techniques and further instruction in computer-aided modeling. The junior course, Mechanical Engineering 397, provides skills in instrumentation and automatic data acquisition for measurements. The senior course, Mechanical Engineering 497, provides skills in project management.

After students gain an understanding of fundamental concepts, design education is continued during the junior year through assigned design projects as a part of normal course work. The design projects are progressively more complex up to the senior capstone design experience, Mechanical Engineering 495 and 497. There are many different types of projects including industrially sponsored projects, such as the SAE Mini Baja, Formula SAE cars, and a human-powered lunar rover that are entered into national and regional competitions, and undergraduate research projects. This approach prepares our graduates to enter the professional practice of mechanical engineering or to further their education in graduate school.

Lower Division Acceptance in Mechanical Engineering

Lower division acceptance into the mechanical engineering program requires that degree-seeking students meet the University's admission requirements and the mechanical engineering program's requirements. Program lower division acceptance is required before a student is permitted to participate in any 100- or 200-level mechanical engineering course. A limited number of students are accepted into the program as lower division status to ensure a high quality, personalized, educational experience. The mechanical engineering program's requirements are established to provide the best background for the program's curriculum. The requirements focus on appropriate preparation for the program such as prior course work, GPA, and minimum standardized test scores. Minimum high school preparation for lower division admission must include the following:

- Three-and-one-half years of mathematics with an average grade of B comprised of algebra, plane geometry, trigonometry, pre-calculus, and/or calculus

- Two years of science with an average grade of B including at least one year of chemistry with a laboratory
- SAT-I (MATH only) score of 560 or higher; SAT-R (MATH only) score of 580 or higher; or an ACT (MATH only) score of 26 or higher
- Four years of English

Applicants whose native language is not English must achieve a minimum TOEFL score of 550 (PBT), 79 (IBT), or 213 (CBT), or a minimum IELTS score of 6.5. As an alternate language consideration, a SAT-R (Reading and Writing) minimum score of 560 or an ACT (English) minimum score of 23 may be submitted in lieu of the TOEFL/IELTS requirements by students whose native language is not English.

If program space permits, an interview between an applicant and a faculty member may be considered in the admission process; other evidence of exceptional motivation may be considered in marginal cases. Enrolled university students that do not meet the above math and/or English language standards may apply for mechanical engineering lower division, if program space permits, once the following university preparations have been demonstrated:

- Completion of MATH 105 with a grade of B or better; or completion of MATH 221 with a grade of C- or better
- Completion of all university required English Language courses (EL 102, 103, 106, 107, 110, and/or 111) with a grade of B or better

Admission to full candidacy status in the mechanical engineering program is obtained through the successful upper division application process.

Upper Division Admission in Mechanical Engineering

Students pursuing the Bachelor of Science in Mechanical Engineering (BSME) must be admitted to upper division by the mechanical engineering program faculty before they are permitted to participate in any 300- or 400-level mechanical engineering courses. Application for upper-division admission is normally made at the beginning of the fourth semester of full-time study. The application process consists of submitting an application form for review by the mechanical engineering faculty prior to the review period, which is the third week in the semester. To meet the requirements for admission to upper division, students must have met the following requirements:

- Completion of 60 credit hours with a minimum GPA of 2.5.
- Completion of the following courses with a grade of C- or better: Chemistry 118; Engineering 212, 213, 232; First-Year Seminar 112; Mathematics 221, 222, 323, 324; Mechanical Engineering 101/102, 197, 297; Physics 210.

Following the review period, conditional acceptance will be granted to students who have successfully completed the requirements or who will complete them by the end of the semester. Conditional acceptance allows the student to preregister for 300-level mechanical engineering courses for the upcoming semester. Enrollment in 300-level and 400-level mechanical engineering courses requires fulfillment of all requirements. Students are notified of their full acceptance status within four weeks following the end of the semester in which they apply.

Transfer students must also apply for admission to upper division. Transfer students may request a one or two semester probationary period in order to meet the upper division requirements listed above. The request must be made in writing, and submitted no later than the end of the first week in the semester.

Biomedical Option in Mechanical Engineering

Mechanical engineering majors may earn a bachelor's degree in mechanical engineering with a biomedical option. With careful curriculum planning, mechanical engineering students can complete the biomedical option with no additional classes.

Bachelor of Science in CIVIL ENGINEERING

2018-2019 | 132 Hours Required

Enduring Foundations General Education Requirements (43 hours)

Outcome 1: (3 hrs) Critical Reading and Thinking

- FYS 112 or 312 First Year Seminar

Outcome 2: (3 hrs) Imaginative Expressions of Human Condition

■

Outcome 3: (3 hrs) Human History and Historical Context of Knowledge

■

Outcome 4: (3 hrs) Fundamental Beliefs: Human Identity, Core Values, Place

■

Outcome 5: (3 hrs) Human Aesthetic Creation and Artistic Creativity

■

Outcome 6: (6 hrs) Linguistic and Cultural Competence in Language

■

■

Outcome 7: (3 hrs) Quantitative Literacy

- MATH 221 (4 hrs)

Outcome 8: (7 hrs with at least one lab course) Scientific Literacy

- Chemistry 118 (4 hrs)
- Physics 210 (4 hrs)

Outcome 9: (6 hrs) Core Concepts: Society, Human Behavior, Civic Knowledge

■

■

Outcome 10: (1 hr) Knowledge and Responsibility Health and Wellness

■

Outcome 11: (3 hrs) Think Critically & Communicate Orally & in Writing

- CE 495: Design Project I

Overlay: Writing Across the Curriculum (4 courses)

- FYS 112: First Year Seminar
- CE 374: Environmental Engineering I
- CE 380: Hydraulics Lab
- CE 495: Design Project

Major Requirements (77 hrs)

MATH 222: Calculus II (4 hrs)

MATH 323: Calculus III (4 hrs)

MATH 324: Differential Equations (3 hrs)

PHYS 211: Calculus Physics II (4 hrs)

CHEM 240 or CHEM 280 may be substituted for PHYS 211 w/advisor approval

ENGR 101: Intro to Engineering (3 hrs)

ENGR 212: Statics (3 hrs)

ENGR 213: Dynamics (3 hrs)

ENGR 232: Mechanics of Materials (3 hrs)

ENGR 366: Fluid Mechanics (3 hrs)

ENGR 390: Applied Engineering Math (3 hrs)

CE 183: Surveying (3 hrs)

CE 324: Construction Management (3 hrs)

CE 331: Construction Materials (3 hrs)

CE 338: Soil Mechanics & Soil Behavior (3 hrs)

CE 339: Soil Mechanics Lab (1 hr)

CE 340: Structural Analysis (3 hrs)

CE 341: Design of Steel Structures (3 hrs)

CE 342: Design of Concrete Structures (3 hrs)

CE 350: Transportation Engineering (3 hrs)

CE 374: Environmental Engineering I (3 hrs)

CE 380: Hydraulics Lab (1 hr)

CE 438: Geotechnical Engineering (3 hrs)

CE 469: Design of Hydraulic Structures (3 hrs)

CE 497: CE Design Project II (3 hrs)

Science Elective (1 course)

BIOL 100, 107, 110, 112, 201; ES 103, 360; or GEOL 130

Engineering Elective (1 course)

ENGR 123, ENGR 230, EE 210, ME 362, or CS 210

Technical Electives (6 hours)

Complete two technical electives; at least one technical elective must be a 400-level CE course.

CE 443, 449, 450 468, 475, 498, 499; ENGR 409; ME 432, 434, 446, 448, 463, or 466;

Free Electives (6 hours)

Courses numbered MATH 202 or lower, Physics 1XX, CHEM 10X, software application courses, and English Language courses may not be applied to free or technical electives.

39 HOURS OF 300/400 LEVEL COURSES

NOTES

- All Civil Engineering majors must take 32 hours of math and science to meet ABET requirements.
- Students must have a minimum GPA of 2.0 in all College of Engineering and Computer Science courses (CE, CS, EE, ENGR, and ME)

Bachelor of Science in

MECHANICAL ENGINEERING

2018-2019 | 133 Hours Required

- Students must have a minimum GPA of 2.0 in all College of Engineering and Computer Science courses (CE, CS, EE, ENGR, and ME).

Harlaxton College

Gerald Seaman, Principal

Harlaxton College, housed in a 100 room English Manor, is a home for living, learning, personal growth and development and travel. Harlaxton has semester programs each fall and spring and a 5 week summer program from late May until the end of June. Each of these programs draws students from the University of Evansville as well as from partner institutions throughout the United States and Internationally.

Course Offerings

During the semester program, students take a six-credit course titled The British Experience from the Celts to the Present Day. This is an interdisciplinary course taught by a team of British professors. This course is available at 200 and 300 level and may also be taken for honors credit.

Around this core, students take traditional courses offered by visiting American professors from the University of Evansville and our partner universities and colleges. Courses are determined two years in advance and are available online at www.harlaxton.evansville.edu. Most students, with some advance planning, can spend a semester at Harlaxton and still complete their course work in normal time frames.

Travel Programs

Travel is organized in many different ways for Harlaxton students. Students can take advantage of local cultural trips and British Studies field trips, which are built into the price of the program. These trips are organized by Harlaxton and available to students to explore more local and regional offerings. These trips take place each semester and students will receive information on their locations and dates in their Harlaxton orientation.

Students are also encouraged to travel throughout Europe and the UK. This can be done through College Sponsored travel. Each semester Harlaxton will offer a travel package for students to purchase. These options include destinations in Europe such as Paris, Barcelona, and Rome. Students also have options in the UK such as London, Edinburgh, and the Lake District. These trips can be booked before traveling abroad and help the student create a wide ranging travel experience. Should students choose to travel independently while at Harlaxton, there is support from our Student Development Office as well as a weekend check out mandate for safety and security.

Student Development

A full range of student life programs and support systems are available for students at Harlaxton. Medical and counseling services are available within Harlaxton Manor itself. Student development staff members coordinate all student activities and look after student well-being. Faculty members are close at hand – professors also live in Harlaxton Manor, eat meals in the refectory with students, and themselves participate in choir, sports teams, church, the talent show, and campus life generally.

Students are also engaged in the local community through the Meet-a-Family Experience, sporting competitions, where teams formed at the Manor compete against local teams, and volunteer opportunities to help local community programs.

Library

The Harlaxton library is open 24 hours a day, 7 days a week. The library maintains an excellent small collection of 25,000 volumes in addition to online resources. An interlibrary loan relationship with the British Library can provide any book in print in the United Kingdom. The University of Evansville Libraries also assist the Harlaxton College Library, particularly through web-based journal subscriptions and also through special acquisitions.

The Centre for British Studies

The University's Harlaxton-based faculty is a truly out-standing collection of teacher-scholars. Their research interests are broad and interdisciplinary and include medieval and modern history, literature, art history, politics, and music. They take a close interest in the pedagogy of British Studies and interdisciplinary teaching.

Building on the model of interdisciplinary centers in British, American, and Continental universities, this faculty forms the Centre for British Studies. Further details of the members of the centre, their research interests, and the programs they offer may be found at the Harlaxton College website (www.harlaxton.evansville.edu).

Intensive English Center

Mary Kay Purcell, Director

The Intensive English Center is an integral part of the University's commitment to international educational programs. The center's goal is to enhance the educational opportunities for international students who wish to study English as either a new or a second language. The Intensive English Center coordinates the intensive English program and English language credit courses.

Intensive English Program

The Intensive English Center teaches English as a second language for international students planning to study in an American college or university. The program also welcomes professionals, businesspersons, and others who wish to improve their knowledge of English.

Two sessions are held during each fall and spring semester. Two additional sessions are offered during the summer. Classes are scheduled Monday through Thursday and generally have 10 to 15 students per class. Full-time students study 20-25 hours per week in a multi-level program. The curriculum at each level includes courses in English structure, listening comprehension, speaking refinement, reading development, and written communication; a state-of-the-art language laboratory strengthens the skills presented in these courses. Study in TOEFL preparation is offered as a supplemental course for interested students. A semi-intensive program, which may include enrollment in the University and English language credit courses, is available for students who have achieved sufficient progress at the advanced level.

Admission to this program is open to participants who have completed secondary school in good standing and are able to meet educational and living expenses.

English Language Credit Courses

English Language (EL) credit courses for qualified students are administered through the Intensive English Center. All undergraduate, graduate, and special status students whose native language is not English take the Michigan Test of English Language Proficiency and the University's Writing Proficiency Test to determine their placement in appropriate English courses. Language improvement courses taken at the beginning of a student's academic study will provide the student with an opportunity to learn the skills necessary for academic success. A student may apply up to nine hours of English language courses toward graduation requirements if the student's program of study permits free electives. This applies only to non-native English speakers. See English Language (EL) in the course offerings and descriptions section of this catalog for course descriptions.

Special Programs and University-to-University Agreements

To meet the needs of specific groups, the Intensive English Center can offer adjusted terms of study. As with the standard terms, an on-campus intensive English program facilitates intercultural experiences and enhances global awareness in concert with English language development.

Undergraduate Course Descriptions

Accounting (ACCT)

Accounting courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

ACCT 210 Introduction to Financial Accounting (3) This course is an introduction to financial accounting concepts, with emphasis on communicating financial information to external users for decision making purposes. Students are introduced to the U.S. Generally Accepted Accounting Principles (GAAP), the accounting process, transaction analysis, financial statement preparation, and related topics.

ACCT 211 Introduction to Managerial Accounting (3) This course is an introduction to managerial accounting concepts, with emphasis on using financial information for decision making purposes. Students are introduced to cost classifications and product costing, multiple methods of income statement and cash flow statement preparation, budget preparation and variance analysis, financial statement analysis, and other related topics. Prerequisite: ACCT 210.

ACCT 310 Intermediate Accounting I (3) Stresses basic theory and alternative approaches to income determination and asset valuation. Includes study of basic financial statements, the accounting cycle, cash, receivables, inventory, property, plant and equipment, intangibles, and liabilities. Prerequisites: Grade of C- or better in ACCT 210. Fall.

ACCT 311 Intermediate Accounting II (3) Examines problems in accounting for stockholders' equity, investment, revenue recognition, income taxes, pensions, and leases. In-depth study of accounting changes and error analysis, statement of cash flows, financial statement analysis, disclosure requirements, and changing prices. Prerequisite: Grade of C- or better in ACCT 310. Spring.

ACCT 317 Cost Accounting (3) Examines issues and procedures in product costing for financial statement purposes under both historical and standard costing. Includes job costing, process costing, and activity-based costing methods, along with inventory management, pricing decisions, cost allocations, and other advanced topics. Prerequisite: Grade of C- or better in ACCT 211. Fall.

ACCT 321 Accounting Information Systems (3) This course is an introduction to the design, implementation and evaluation of accounting information systems. Topics also include transaction processing techniques, internal controls, enterprise resource planning systems, electronic business, and related topics. Prerequisite: ACCT 211. Spring.

ACCT 329 Introduction to Taxation (3) Examines the role of taxes in society and their impact on business entities and individuals. An introduction to income, exclusions, deductions, and credits. Tax planning and analysis for decision-making will also be considered. Prerequisite: Grade of C- or better in ACCT 210. Fall.

ACCT 347 International Accounting (3) Introduces and examines accounting for transactions in a global economy. Course dedicated to an overview of the convergence of U.S. Generally Accepted Accounting Principles with International Financial Reporting Standards. Specific topics include financial disclosure, foreign exchange, taxation, and ethics. Prerequisite: Grade of C- or better in ACCT 310. Offered periodically.

ACCT 360 Computer Accounting (3) This course introduces students to popular accounting software applications used by millions of small and medium-size organizations around the world. Students will learn to use the software processes and procedures to prepare reports related to the accounting cycle, general ledger, accounts payable, accounts receivable, payroll and inventory system. Accounting concepts are demonstrated in real-world business situations. Grade of C- or better in ACCT 211.

ACCT 380 Special Topics in Accounting (3) Covers topics not included in other courses, gives greater depth in certain areas, and explores current accounting topics. Repeatable course. Content changes each time course is offered. Prerequisite: Grade of C- or better in ACCT 211. Offered periodically.

ACCT 395 Independent Study (1-3) Independent research in accounting conducted under faculty supervision. Prerequisites: Grade of C- or better in ACCT 210 and permission of instructor.

ACCT 398 Internship in Accounting (3) First internship; a structured assignment that allows student to gain practical experience in an accounting position relating to an area of career interest. Student is directed by the internship director and supervised by a member of the cooperating organization. Enrollment in course must be concurrent with work experience. A contract (available from the business school's internship director) must be approved and an offer letter from the internship provider must be on file before registering for course. Sponsoring institutions may require students to have completed specific course(s) in addition to the following prerequisites prior to beginning the internship. Prerequisites: ACCT 310; EXED 090; permission of the internship director of the Schroeder Family School of Business Administration.

ACCT 414 Auditing (3) Studies the auditing profession and its relationship to the financial community. Includes an examination of professional ethics, auditing standards, risk assessment, internal controls, audits of cycles, sampling, analytical and substantive procedures, and reporting. Students are also introduced to computer assisted auditing techniques. Prerequisite: Grade of C- or better in ACCT 310. Spring.

ACCT 420 Advanced Accounting (3) Studies the theory and techniques of accounting and reporting for acquisitions, consolidated financial statements, partnerships, variable interest entities, and foreign currency translation. Prerequisite: Grade of C- or better in ACCT 310. Offered periodically.

ACCT 429 Advanced Taxation (3) A deeper study of federal, state, and local tax laws as it relates to entities, building upon content covered in Accounting 329. Examines the taxation, formation, reorganization, and liquidation of entities. Prerequisite: Grade of C- or better in ACCT 329. Spring.

ACCT 430 Advanced Managerial Accounting (3) Studies the application of management accounting to strategy and the impact of new and evolving management thinking. Topics include cost allocations, sales variances, management control systems, transfer pricing, performance evaluation, and compensation systems. Prerequisite: Grade of C- or better in ACCT 317. Offered periodically.

ACCT 498 Internship in Accounting (3) Second internship; a structured assignment that allows the student to gain practical experience in an accounting position relating to an area of career interest. Must be a distinct work experience from that provided by Accounting 398. Credits earned apply only as free elective credits. Student is directed by the internship director and supervised by a member of the cooperating organization. Enrollment in course must be concurrent with work experience. A contract (available from the business school's

internship director) must be approved and an offer letter from the internship provider must be on file before registering for course. Sponsoring institutions may require students to have completed specific course(s) in addition to the following prerequisites prior to beginning the internship. Prerequisites: Grade of C- or better in ACCT 398; permission of the internship director of the Schroeder Family School of Business Administration.

ACCT 499 Professional Internship (12) A structured, full-time, professional assignment that allows students to gain practical experience in an accounting position relating to an area of career interest. Students are directed by the internship director and supervised by a member of the cooperating organization. Enrollment in the course must be concurrent with work experience and all requirements of course must be met during the semester in which the student is enrolled in the course. A contract (available from the business school's internship director) and an offer letter from the internship provider must be reviewed and approved by a review committee before the student may register for the course. Cooperating organizations may require students to have completed specific courses in addition to the following prerequisites prior to beginning the internship. Student must work at least 35 hours per week, totaling at least 540 hours at the cooperating organization. Prerequisites: Grade of C- or better in ACCT 310; EXED 090; permission of internship director and review committee of the Schroeder Family School of Business Administration. Fall and Spring only. May not be repeated.

Anthropology (ANTH)

Anthropology courses are taught by the faculty of the Department of Law, Politics, and Society.

ANTH 200 World Prehistory (3) Introduces the field of prehistoric archaeology and traces the evolution of culture from the earliest stone tools to the formation of ancient civilizations in both the Old and New Worlds.

ANTH 207 Cultural Anthropology (3) Studies societies all over the world, from hunter-gatherers to industrial states. Explores the range of variation in forms of subsistence technology, family, government, religion, and other institutions. Seeks to explain cultural differences.

ANTH 301 Special Topics in Anthropology (3) Topics chosen on the basis of programmatic need or student interest. Prerequisite: ANTH 200 or 207.

ANTH 310 Indians of North America (3) Surveys the origins, prehistory and traditional ways of life of the Native Americans. Studies representative societies from each of the major culture areas. Prerequisite: ANTH 207.

ANTH 315 Indians of the Great Plains (3) Covers the buffalo-hunting societies of the American West, their habitat, prehistory, ways of life, and wars with the United States. Prerequisite: ANTH 207.

ANTH 319 Peoples of Africa (3) Surveys African geography, history, and representative societies from different regions of the continent. Prerequisite: ANTH 207.

ANTH 416 Human Evolution (3) Outlines the stages of hominid biological and cultural evolution, with attention to human variation and the primates. Prerequisite: ANTH 200 or 207.

ANTH 440 Linguistic Anthropology (3) Surveys phonetics and phonology, morphology, syntax, children's language acquisition, language origins, historical linguistics, ethnolinguistics, and sociolinguistics. Prerequisite: ANTH 207.

ANTH 453 Anthropology of Religion (3) Explores theories of religious beliefs and behavior in non-Western societies. Covers cosmology, myth, ritual, religious specialists, and dynamics. Prerequisites:

Six hours of anthropology; junior or senior standing.

ANTH 494 Directed Study (1) See Sociology 494. Prerequisites: Nine hours of anthropology; junior or senior standing; permission of instructor.

ANTH 496 Internship (1) Internships available to majors of junior or senior standing who have completed core courses. GPA requirements must be met and student must file an internship application with advisor.

ANTH 497 Internship in Teaching Anthropology (1) Provides majors of junior or senior standing with a comprehensive, supervised field experience in teaching and anthropological pedagogy. Designed for students who are preparing for graduate study in the social sciences. GPA requirements must be met and students must file a teaching internship application with advisor. Prerequisites: Sociology-Anthropology major, sponsorship by the supervising faculty member, junior or senior standing, or permission of instructor. 1-2 credits.

Archaeology (ARCH)

Archaeology courses are taught by the faculty of the Department of Archaeology and Art History.

ARCH 100 Great Discoveries in Archaeology (3) This course provides an introduction to the discipline of archaeology, an overview of great archaeological discoveries worldwide, and a critical discussion of archaeological myths and hoaxes. It is intended for students in any major who are interested in learning about the past and how it is presented to the public.

ARCH 105 Introduction to Greek Archaeology (3) Comprehensive overview of the material culture of the Greeks from the Bronze Age through the Hellenistic period, tracing the main developmental trends in architecture, city planning, sculpture, and the minor arts both in the Greek mainland and the Greek colonies overseas. Although primarily archaeological in orientation, necessary historical context is provided. Fall.

ARCH 106 Introduction to Roman Archaeology (3) Comprehensive survey of the material culture of the Romans examining architecture, city planning, art, and technology. Traces development of Roman civilization from the Republic to the Late Antique period. Spring.

ARCH 192 Introductory Archaeology Seminar (3) Seminar intended primarily for freshman or new archaeology majors. Emphasizes fundamental concepts relating to stratigraphy, relative and absolute chronologies, types of archaeological data, map/section reading, recording procedures, approaches to interpretation, and research skills.

ARCH 206 Introduction to Near Eastern Archaeology (3) Study of Mesopotamia, Anatolia, and the Levant from the Neolithic period to the establishment of the Persian Empire.

ARCH 207 Introduction to Egyptian Archaeology (3) Overview of Egyptian civilization from the predynastic period to the New Kingdom through the exploration of funerary architecture, sculpture, wall painting, tomb furnishings, and other minor arts. The course examines archaeological evidence from a historical perspective, focusing on both the local history of Egypt and on its relationship with other Mediterranean civilizations.

ARCH 285 Technical Skills for Archaeologists (3) Introduces archaeology students to skills and techniques useful in recording and analyzing field data as well as developing 3-D models of the project site. Topics include technical sketching and utilizing computer aided (CAD) techniques for development of accurate 2-D drawings as well as 3-D models. Prerequisites: Sophomore standing.

ARCH 305 Greek Painted Pottery (3) Traces the development of the shape and decoration of Greek pottery from the Late Bronze Age

through the end of the Classical period. The characteristics of individual artists and the treatment of various Greek myths in different periods are studied. Prerequisite: ARCH 105 or ARTH 208 or permission of instructor.

ARCH 306 Greek Architecture (3) Traces the development of Greek architecture from the Late Bronze Age through the Hellenistic period. Studies the development of city planning, temples, secular buildings, and funerary monuments. Prerequisite: ARCH 105 or ARTH 208 or permission of instructor.

ARCH 307 Roman Architecture (3) Examines the development of Roman building from its roots in Greek and Etruscan architecture to the eclectic Roman architectural idiom of the Empire. Emphasizes the Roman integration of traditional building elements with their own increasing technical virtuosity as structural engineers. Prerequisite: ARCH 106 or ARTH 208 or permission of instructor.

ARCH 308 Greek and Roman Sculpture (3) Examines the development of sculpture within the Greco-Roman world. Topics covered include the evolution of naturalism in the Greek Archaic period, the high classical style of the 5th century BCE, the varied genres of the Hellenistic world, Roman Republican portraiture, and Roman historical reliefs. Prerequisite: ARCH 105 or 106 or ARTH 208 or permission of instructor.

ARCH 309 The Etruscans (3) A study of the origins of the Etruscans, who made their appearance in central Italy in the 7th century BCE, and their impact on other Mediterranean cultures. An attempt is made to reconstruct their culture as it can be understood from the architecture and artifacts preserved today. Prerequisite: ARCH 105 or ARTH 208 or permission of instructor.

ARCH 311 Archaeology of Syro-Palestine (3) Examines the archaeology of Syro-Palestine (modern Israel, Jordan and the Palestinian National Authority) from late prehistory through the Persian period (ca. 8000-332 BCE). Although archaeological data is the primary source of information, other sources, including the Hebrew Bible (Old Testament) and other texts, are employed where appropriate.

ARCH 320 Topics in Archaeology (3) Focuses on a topic not offered regularly, such as Aegean archaeology or northern European prehistory. May be repeated. Prerequisite: ARCH 105 or 106 or ARTH 208 or permission of instructor.

ARCH 340 Field Techniques (3) Introduces students to the process of field archaeology. Projects vary from year to year, but involve either excavation of a historical site in Evansville, or assisting with an excavation or survey conducted locally.

ARCH 394 Non-UE Archaeology Field Practica (3) This course is used to record archaeological field practica sponsored by institutions other than the University of Evansville.

ARCH 395 Practicum in Archaeology (3) This practicum in archaeology introduces students to both the practical and theoretical aspects of archaeology. Students participate in an excavation as well as in documentation and conservation of artifacts. The work is conducted under the supervision of a professional staff of archaeologists. Prerequisite: ARCH 105 or 106 or permission of instructor.

ARCH 400 Archaeological Method and Theory (3) Examination of the theoretical bases of the discipline of archaeology, the history of the discipline, and the major schools of interpretation. Also, research design, development of chronologies, and the application of scientific techniques to analysis of archaeological remains. Prerequisites: ARCH 105 or 106; one 300-level archaeology course; or permission of instructor. Course fulfills capstone requirement.

ARCH 415 Women in Antiquity (3) Seminar focuses on women in antiquity. Reviews recent studies of archaeological investigations of

women's social and cultural roles and focuses on selected case studies of women in the ancient Near East and eastern Mediterranean from late prehistory through Classical antiquity.

ARCH 420 Northern European Prehistoric Archaeology (3) Examines the archaeology of northern Europe from the Neolithic period through the Roman period. Emphasis on the Celtic cultures of northern Europe.

ARCH 492 Topical Seminars in Archaeology (3) Special seminar topics in archaeology not included in the regular course offerings. May be repeated.

ARCH 493 Independent Study in Archaeology (1) Research in areas of archaeology on topics not sufficiently covered in existing courses. Subject and credit earned must be approved by the supervising faculty member and department chair. May be repeated for a maximum of six hours of credit. Prerequisites: Junior standing; consent of instructor.

Art (ART)

Art courses are taught by the faculty of the Department of Art.

ART 102 Art in Elementary Schools (3) Examination of the perceptual, creative, and aesthetic growth and development of children through art experiences. Some basic studio instruction with art appreciation and historical overview. Lab fee. Spring.

ART 105 Introduction to the Visual Arts (3) Lecture. Studies architecture, painting, and sculpture with emphasis on social and aesthetic considerations. Fall, spring.

ART 200 Introduction to Studio Art (3) An introduction to the studio disciplines for non-art majors. Instruction of the art elements as used in such areas as drawing, painting, printmaking, and sculpture. Lab fee. Fall, spring.

ART 201 Introduction to Art Therapy (3) Introduces students to the fundamentals of art therapy including theory, methods of practice, and techniques through lecture, experience, and case study presentations. No prior art experience required. Prerequisites: Sophomore status; recommended courses PSYC 121, 226. Fall.

ART 210 Design (3) Introductory studio course emphasizes basic principles of design, composition, and color theory. Six hours studio. Fall.

ART 213 Computer Graphics (3) An introduction to the basic uses of the Macintosh computer as used in the visual arts. Emphasizes experimentation with various software packages and the development of the interchangeable and flexible moves from hands-on skills to electronic means. Fall, spring.

ART 214 Basic Photography (3) Introduction to basic camera usage and traditional darkroom techniques. Access to a 35mm print film camera is required. Six hours studio. Lab fee.

ART 220 Drawing (3) Introduces and explores various drawing media with emphasis on perception and drawing techniques. Six hours studio. Fall.

ART 221 Drawing (3) Explores a variety of media and techniques with emphasis given to composition and creative expression. Six hours studio. Spring.

ART 301 Creative Development and Art Therapy (3) Introduces the fundamentals of creative development and art therapy including theory, methods of practice, and techniques through lecture, experience, and case studies. No prior art experience required. Prerequisites: Sophomore status; recommended courses PSYC 121, 226. Spring

ART 314 Creative Photography (3) Emphasizes creative and innovative uses of photography with instruction in camera and darkroom procedures. Prerequisite: ART 214 or permission of instructor. Six hours studio. Lab fee.

ART 315 Typography (3) A fundamental study of the history of type, its creative use and function as a communicative tool. Explores basic principles of good layout design. Six hours studio. Macintosh lab. Prerequisites: ART 210, 213; or permission of instructor.

ART 316 Publication Design (3) A study of layout design, the creative arrangement of type and visuals on a page. Using appropriate layout software, students create layout designs for various publications (magazines, newspapers, brochures, books). File preparation for print is covered. Six hours studio. Macintosh lab. Prerequisites: ART 213, 315; or permission of the instructor.

ART 322 Digital Photography (3) Introduction to digital photography methods and creative manipulation on the computer, as an alternative to traditional techniques. Familiarity with Photoshop helpful. Macintosh lab. Prerequisite: ART 213 or permission of instructor. Repeatable. Lab fee.

ART 325 Life Drawing (2) Drawing from the model as a means of understanding form, shape, and line. Four hours studio. Repeatable. Lab fee.

ART 330 Printmaking (3) Emphasizes basic printmaking methods to the development of ideas and aesthetic considerations of materials and techniques employed in printmaking. Six hours studio. Repeatable. Lab fee. Spring.

ART 340 Painting (3) Emphasizes basic painting techniques with investigation of different advanced media. Six hours studio. Repeatable. Fall, spring.

ART 345 Watercolor (3) Covers basic, creative, and technical problems in watercolor painting. May be applied toward the painting major in the studio BFA and BS degrees. Six hours studio. Repeatable.

ART 350 Metalwork/Jewelry (3) Studies basic forming methods: fabricating, casting, forging, and raising with investigation of different materials and techniques employed in metalwork and jewelry. Six hours studio. Repeatable. Lab fee.

ART 360 Ceramics (3) Offers basic methods of hand building and wheel throwing and the use of glazes and kiln firing procedures with investigation of materials and techniques employed in ceramics. Six hours studio. Repeatable. Lab fee. Fall, spring.

ART 370 Sculpture (3) Introduces concepts, materials, and tools of sculpture. Creative expression as well as exploration into idea, form, and material relationships. Six hours studio. Repeatable. Lab fee. Fall, spring.

ART 401 Art and Culture (3) Senior seminar devoted to special topics concerning historical traditions in the visual arts, current art issues, and professional development. Prerequisite: Senior status.

ART 405 Art Therapy Seminar (2) In-depth investigation of the fundamentals of creative development and art therapy, focusing on assessment, research, application, and exploration of the dynamics of the group process. Lecture, experiential learning, and case study presentations included. No prior art experience required. Prerequisites: ART 201, 301; PSYC 121, 226.

ART 410 Portfolio Preparation (3) Study of current trends in graphic design fields and possible career paths. Preparation of a professional graphic design portfolio that demonstrates the student's proficiencies and strengths. Includes résumé preparation, personal logo, and self promotional projects. Six hours studio. Repeatable. Macintosh lab. Prerequisites: ART 213, 315, 316; or permission of instructor.

ART 417 Advanced Imaging and Illustration (3) Study of painting, drawing, and photo manipulation software as well as of traditional media to produce illustrations for various uses. Also explores the creative process and idea generation. Six hours studio. Macintosh lab. Prerequisite: ART 213, 315, 316; or permission of instructor.

ART 490 Practicum in Art (1) A practical experience in a supervised university setting that specializes in the field of art or design. Precedes internship and prepares students to perform for employers outside the university community. Prerequisite: sophomore standing; permission of sponsoring faculty member. Repeatable up to 12 hours.

ART 492 Topical Workshops (1) Special topics in art not included in the regular course offerings. Based on lecture or lecture/studio. Repeatable.

ART 493 Independent Study in Art (1) Research in an area of visual arts that pertains to individual interests. May not be substituted for regular course offerings. Subject and credit earned must be approved by the instructor. May be repeated for a maximum of six hours of credit. Prerequisites: Sophomore level; permission of instructor; approval of department chair.

ART 495 Internship in Art (3) An apprenticeship or internship program designed to meet the educational needs of students' professional goals. Visual communication design majors may qualify for internships with professional agencies, BFA studio majors with professionally qualified artists or institutions, and BS in art and associated studies majors with institutions related to their career interests. A maximum of 12 credit hours may be earned in Art 495 toward the degree. Prerequisites: Junior standing; permission of sponsoring faculty member.

ART 497 Methods of Teaching Art in Senior High/Junior High/Middle School and Elementary Schools (3) This course explores the creative and mental growth of elementary, middle school, and secondary school students participating in classes for the visual arts. In addition, development of an area-specific portfolio is required. This class is for art education majors only.

Art History (ARTH)

Art History courses are taught by the faculty of the Department of Archaeology and Art History.

ARTH 208 Survey of Art I (3) A survey of architecture, sculpture, and painting from prehistory through the late Gothic period, including non-Western civilizations of India, Southeast Asia, and China. Fall.

ARTH 209 Survey of Art II (3) A survey of architecture, sculpture, and painting of Western and non-Western regions from the Renaissance to the present, including the Muslim world and Japan. Spring.

ARTH 384 Renaissance Art (3) Architecture, sculpture, and painting in Italy, France, Germany, and the Netherlands ca. 1300-1600. Prerequisite: ARTH 208 or 209 or permission of the instructor.

ARTH 385 Baroque Art (3) Architecture, sculpture, and painting in southern Europe, Belgium, England, Germany, and the Netherlands ca. 1600-1750. Prerequisite: ARTH 208 or 209 or permission of the instructor.

ARTH 386 Eighteenth and Nineteenth Century Art (3) Study of the major movements of the 18th and 19th centuries, including Neoclassicism, Romanticism, Realism, Impressionism, and Postimpressionism to 1900. Prerequisite: ARTH 208 or 209 or permission of the instructor.

ARTH 389 Twentieth Century Art (3) Western painting and sculpture from 1900 to the present. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH 391 Topics in Asian Art (3) Thematic introduction to the visual arts of China and Japan, with emphasis on Chinese art from the Han period through the 20th century. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH 492 Topical Seminars in Art History (3) Special topics in art history not included in regular course offerings. Consists of lectures and discussion with an emphasis on research. May be repeated for a maximum of nine credit hours. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH 493 Independent Study in Art History (1) Research in areas of art history on topics not covered in existing courses. Subject and credit earned must be approved by the supervising faculty member and department chair. May be repeated for a maximum of six credit hours. Prerequisites: Junior standing; permission of instructor.

ARTH 495 Internship in Art History (3) Internships designed to meet the educational needs of students' professional goals are recommended for art history majors and may be arranged with a professional individual or institution. A maximum of 12 credit hours earned in Art History 495 may count toward the degree. Prerequisites: Junior standing; permission of faculty advisor, faculty/museum liaison, and department chair.

ARTH H378 British Romantic Art (3) A study of British art from 1790 to 1850, including academic traditions, landscape painting, genre painting, and the pre-Raphaelites. Taught at Harlaxton College. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH H379 Art and Architecture in Victorian Britain (3) A study of art and architecture produced in Britain during the reign of Victoria, including revival and industrial architecture, the arts and crafts movement, and the "New Sculpture." Taught at Harlaxton College. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH H383 Medieval Art (3) Architecture, sculpture and painting from early Christianity through Gothic in the Byzantine Empire and Western Europe. Taught at Harlaxton College. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH H387 English Art and Architecture From the Late Roman Period to 1533 (3) A study of British art from the late Roman occupation. Migration art, manuscript painting, and domestic and ecclesiastical architecture through the reigns of Henry VII and early Henry VIII. Taught at Harlaxton College. Prerequisite: ARTH 208 or 209 or permission of instructor.

ARTH H388 English Art and Architecture 1500-1850 (3) Survey of the visual arts in England from Elizabethan times to the mid-19th century. This is a period when the English became a consumer culture. In addition to such artists as Holbein, Van Dyck, Reynolds, Constable, and Turner, the patrons, promoters, collectors, and travelers will be considered. Prerequisites: ARTH 208, 209; or permission of instructor.

Astronomy (ASTR)

Astronomy courses are taught by the faculty of the Department of Physics.

ASTR 101 Descriptive Astronomy (3) Studies the solar system, stellar structure and evolution, galaxies and cosmology, emphasizing the historical development and observational basis for our understanding of the universe. Lecture.

ASTR 320 Astrophysics (3) A detailed study of the physical processes that drive a variety of astrophysical phenomena. Topics include radiation production and interaction with matter, accreting systems, and observational techniques from radio to gamma-rays. Specific applications may include (depending on student interest) stellar structure and evolution, compact objects, galactic composition and dynamics, and the origin and structure of the universe. Lecture. Prerequisites: MATH 323; PHYS 213. Recommended: ASTR 101. Same as PHYS 320.

ASTR 422 Cosmology (2) Explores the history and evolution of the universe with an emphasis on theoretical models that may be tested by modern experimental and observational techniques. Topics include the Big Bang, cosmic microwave background radiation, dark energy, dark matter, origins of structure in the universe, general relativity, and specific topics of interest to researchers in the field. Lecture. Prerequisite: PHYS 305. Recommended: ASTR 101, 320. Same as PHYS 422.

Athletic Training (AT)

Athletic Training courses are taught by the faculty of the School of Public Health.

AT 180 Introduction to Athletic Training (3) Introduces the field of athletic training and the care and prevention of athletic injuries. Topics include, but are not limited to, the organization, administration, education, and counseling techniques used in caring for athletes, as well as the foundation of injury prevention, assessment, treatment, and rehabilitation.

AT 282 Basic Skills in Athletic Training (3) Addresses various topics that develop the student's competence as an athletic trainer. Emphasis placed on skills such as construction and application of protective devices, taping and bandaging techniques, on-field assessment techniques, and emergency care. Designed to satisfy CAATE competences related to the above-mentioned content areas and intended for athletic training majors. Prerequisite: AT 180. Corequisite: AT 282L.

AT 287 Therapeutic Modalities in Athletic Training (3) Lecture/lab course addresses the principles, indications, contraindications, physiological effects, safety precautions, and application of therapeutic modalities for the treatment of athletic injuries. Information includes knowledge of the inflammatory response to injury and illness and the effectiveness of therapeutic modalities to assist the body in the healing process. Designed to satisfy CAATE competences related to the use of modalities and intended primarily for athletic training majors. Corequisite: AT 287L.

AT 291 Clinical Education in Athletic Training (2) One of a series of six clinical education courses designed to provide proficiency instruction and clinical experience in the field of athletic training. Emphasis placed on clinical anatomy and goniometry. Content includes palpation of various bony landmarks and soft tissue structures as well as goniometric skill development. Clinical application and understanding emphasized. Field experience rotations assigned per the clinical instruction plan. Class meets formally approximately one hour per week outside of the clinical setting.

AT 292 Clinical Education in Athletic Training II (2) One of a series of six clinical education courses designed to provide proficiency instruction and clinical experience in the field of athletic training. Emphasis given to clinical application of therapeutic modalities. Field experience includes sport team rotations with an emphasis in the application of modalities. Student works toward completion of the proficiency check-off sheet. Class meets formally at least one hour per week outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies.

AT 350 Administration of Athletic Training (3) Familiarizes students with the administration and management responsibilities of athletic training. Topics of study include management of athletic training facilities, personnel, students, facility design, purchasing of supplies and equipment, and budgeting. Designed to satisfy CAATE competences related to health care administration and intended for athletic training majors. Prerequisite: AT 388.

AT 388 Evaluation of the Lower Body (3) Addresses the theory, techniques, and laboratory experiences relative to the assessment and evaluation of athletic injuries with emphasis on the lower body. Other

topics related to assessment are covered including common illness recognition. Content areas include knowledge and skills for clinical evaluation to determine the proper injury or illness treatment and referral when appropriate. Designed to satisfy CAATE competences related to evaluation and illness of the lower body and intended for athletic training majors. Prerequisite: AT 282.

AT 389 Evaluation of the Upper Body (3) Addresses the theory, techniques and laboratory experiences relative to the assessment and evaluation of athletic injuries with emphasis placed on the upper body. Other topics related to assessment are covered including common illness recognition. Content areas include knowledge and skills for clinical evaluation to determine the proper injury or illness treatment and referral when appropriate. Designed to satisfy CAATE competences related to evaluation and illness of the upper body and intended for athletic training majors. Prerequisite: AT 388.

AT 390 Rehabilitation of Athletic Injuries (3) Lecture/lab course provides the student knowledge related to all aspects of the rehabilitation of athletes. Emphasis placed on development of a theoretical model to assess and fully rehabilitate an athlete following an injury, surgery or related illness. Lab time develops the skills required to implement a rehabilitation program in the clinical setting. Designed to satisfy CAATE competences related to rehabilitation and exercise and intended for athletic training majors. Prerequisite: AT 389.

AT 391 Clinical Education in Athletic Training III (2) One of a series of six clinical education courses designed to provide proficiency instruction and clinical experience in the field of athletic training. Emphasis on basic taping and bandaging techniques, emergency procedures, and field assessment. Field experience includes local high school football coverage and other field experience as assigned. Student works toward completion of the proficiency check-off sheet. Class meets formally at discretion of the instructor outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies. Prerequisite: AT 292.

AT 392 Clinical Education in Athletic Training IV (2) One of a series of six clinical education courses designed to provide clinical experience in the field of athletic training. Emphasis given to evaluation of athletic injuries and illness. Field experience spent with a college trainer working primarily in a traditional college athletic training room setting. Student works toward completion of the proficiency check-off sheet. Class meets formally at discretion of the instructor outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies. Prerequisite: AT 391.

AT 490 Pharmacology and Medical Conditions (3) Offers insight on current trends in pharmacology use in an athletic training environment. Also offers current evaluation of general medical conditions, treatment, and a referral base for conditions found in athletics.

AT 491 Clinical Education in Athletic Training V (2) One of a series of six clinical education courses designed to provide clinical experience in the field of athletic training. Emphasis given to rehabilitation. Field experience assigned per the clinical instruction plan and may include time in a physical therapy outpatient setting. Student works toward completion of the proficiency check-off sheet. Class meets formally at discretion of the instructor outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies. A case study approach is utilized to emphasize integration of previously learned skills into the complete care of the athlete. Prerequisite: AT 392.

AT 492 Clinical Education in Athletic Training VI (2) One of a series of six clinical education courses designed to provide clinical experience in the field of athletic training. Emphasis placed on phar-

macology, nutritional aspects, psychosocial intervention, and referral. Emphasis also placed on preparation for the BOC exam. Class meets formally at discretion of the instructor outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies. Field experience assignment made per the clinical instruction plan. Prerequisite: AT 491.

Biology (BIOL)

Biology courses are taught by the faculty of the Department of Biology.

BIOL 100 Fundamentals of Biology (4) Course for non-science majors that explores fundamental concepts of biology and relates them to social issues. Three hours lecture, two hours lab. Credit not applicable for biology majors or minors. Fall, spring, summer.

BIOL 107 General Biology (4) Course for health science majors that introduces basic principles of cell biology, metabolism, genetics, molecular biology, and evolution. Three hours lecture, two hours lab. Fall.

BIOL 110 Clinical Microbiology (3) Introduces microorganisms and includes isolation, pathogenicity, serology, identification, ecology, and the significance of microorganisms to humans. Two hours lecture, two hours lab. Credit not applicable for professional biology majors. Fall.

BIOL 112 Human Anatomy and Physiology I (4) Introduces basic anatomy and physiology using a systems approach. Emphasizes cells, tissues, musculoskeletal system, and nervous system. Three hours lecture, two hours lab. Credit not applicable for biology majors or minors. Same as EXSS 112. Fall.

BIOL 113 Human Anatomy and Physiology II (4) Continues the study of topics covered in Biology 112 and includes the endocrine, cardiovascular, immune, respiratory, urinary, and digestive systems. Three hours lecture, two hours lab. Credit not applicable for biology majors or minors. Prerequisite: Biology 112 with a grade of C- or better or permission of the instructor. Same as EXSS 113. Spring.

BIOL 118 Modern Biology: Environmental Perspectives (3) Gives biology majors foundational knowledge and skills for subsequent courses in the major. Seminar style course introduces environmental topics by exploring ecological, societal, and ethical issues surrounding the relationship of humans to their environment. Prerequisite: Freshmen admission to the biology or environmental sciences programs or permission of the chair of the Department of Biology. Spring.

BIOL 119 Introductory Biology: Molecular Perspectives (4) Course designed for students majoring in applied biology, professional biology, biochemistry, neuroscience and clinical lab science. Introduces basic principles of biochemistry, molecular biology and genetics, and their relevance to modern society. Four hours integrated lecture and lab.

BIOL 120 Introductory Biology: Organismal Diversity (4) Provides an introduction to the major groups of living organisms, with an emphasis on their structure, function, and evolutionary relationships. Four hours of integrated lecture and lab.

BIOL 199 Special Topics in Biology (1) Lectures, discussions, or special laboratory topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in biology. May be repeated. Prerequisites announced when specific topics scheduled.

BIOL 201 Human Genetics and Society (3) Discusses human genetics and its relation to social issues. Credit not applicable for biology majors or minors.

BIOL 214 Field Zoology (3) Emphasizes the identification, structure, functions, ecology, and behavior of animals. Regional field study involved. Summer.

BIOL 215 Field Botany (3) A study of mosses, ferns, conifers, and flowering plants, including identification, morphology, and ecology. Field study involved. May be taken twice for credit if the field sites are different. Summer.

BIOL 225 Horticulture (3) A study of the growth, development, and technology involved in the production, maintenance, use, and marketing of horticultural plants and products. Two hours lecture, two hours lab. Spring, alternate years.

BIOL 299 Special Topics in Biology (1) Lectures, discussions, or special laboratory topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in biology. May be repeated. Prerequisites announced when specific topics scheduled.

BIOL 305 Microbial Ecology (3) Concerned with the wide range of microorganisms that exist and their roles in the environment. Concentrates on the following areas: (1) microbial environments; (2) detection of microbial activity; (3) impact of microbial activity on the environment in terms of nutrient cycling and pollutant fate; (4) detection and control of pathogens in the environment; (5) bioremediation (includes risk assessment and environmental biotechnology). Three hours lecture, field studies at sites that utilize microbes (e.g., sewage treatment plants, fermentor facilities). Prerequisite: A 100-level biology course with a grade of C- or better or permission of instructor. Spring, alternate years.

BIOL 310 History of Life (3) A study of major events in the history of life from the origin of life some four billion years ago to the extinction and speciation episodes that have resulted in the variety of organisms that occupy the planet in more recent geologic time. Prerequisite: A 100-level biology course with a grade of C- or better or permission of instructor. Fall, alternate years.

BIOL 315 Ethnobotany (3) Examines the intimate connection between plants and human society. It is integrative in that it includes information from botany, chemistry, archaeology, anthropology and history. Topics covered will include agriculture, genetically modified crops, medicinal plants, plant secondary compounds and psychoactive plants. The goal of the course is to provide students with a better understanding of the importance of plants and plant products to human civilization. Students will gain experience in reading and summarizing scientific articles and books.

BIOL 320 Evolution and Ecology (4) Introduces principles and concepts of evolution and ecology, with emphasis on the intricate and intrinsic relationship between these disciplines. Examines mechanisms of evolutionary change and interactions of organisms, populations, and communities of organisms within their environment. Addresses how these interactions occur, what effects they have on the functioning of natural communities, and how they influence the evolution of populations and species. Three hours lecture, three hours lab. Prerequisites: BIOL 118 and 120 with a grade of C- or better or permission of instructor. Fall.

BIOL 322 Biological Physics (3) Introduces biophysical methods from a physics perspective and discusses the application of these methods toward research questions in biology. Topics include biomolecular structures, structure determination and simulation, and molecular motors. Three hours lecture. Prerequisite: MATH 221; PHYS 121 or 210. Same as PHYS 322.

BIOL 323 Tropical Ecology of Costa Rica (3) Provides a detailed understanding of the natural history and ecology of Costa Rica, including the identifiable features of many plants and animals of Costa Rica. Designed primarily for biology and environmental studies majors, the course develops writing and presentation skills, while also framing student learning in an ecological and conservation

context. The course culminates in a trip to Costa Rica (~ 2 weeks); the trip component of the course helps to solidify student learning through experiential learning. Two hours lecture, field trip to Costa Rica. Prerequisite: BIOL 118 with a grade of C- or better or permission of instructor. Spring.

BIOL 330 Mycology (4) Introduces fungi with emphasis on ecology, morphology and taxonomy of representative groups. Two hours lecture, four hours lab. Prerequisites: BIOL 119 and 120 with a grade of C- or better or permission of instructor.

BIOL 331 Genetics (4) Fundamental principles of inheritance in animals, plants, and microorganisms with emphasis on molecular genetics. Three hours lecture, three hours lab. Prerequisite: Biology 119 with a grade of C- or better or permission of instructor. Recommended: BIOL 120 with a grade of C- or better. Fall, spring.

BIOL 333 Animal Behavior (3) Studies the principles of biological rhythms, migration, aggression, competition, learning, reproduction, and social behavior of animals. Three hours lecture, field studies. Prerequisite: BIOL 120 with a grade of C- or better or permission of instructor. Spring.

BIOL 340 Cellular and Molecular Biology (4) Covers the principles of eukaryotic cell structure and function and the molecular bases of cellular processes. Topics will include: macromolecules; energetics; membranes; cellular organelles; gene expression; signaling; cell division; DNA replication; RNA and protein synthesis and processing; and molecular aspects of immunology, cancer and recombinant DNA technology. The course will build on the survey knowledge from the required prerequisite courses. Prerequisite: BIOL 331 or permission of instructor. Spring.

BIOL 350 Vertebrate Zoology (4) Emphasizes the taxonomy, comparative morphology, behavior, and life history of vertebrates. Three hours lecture, three hours lab, field studies. Prerequisite: BIOL 120 with a grade of C- or better or permission of instructor. Spring.

BIOL 360 Summer Field Station Study (1) Biology studies conducted at a marine, freshwater, mountain, or desert field station. Summer.

BIOL 399 Special Topics in Biology (1) Lectures, discussions, or special laboratory topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in biology. May be repeated. Prerequisites announced when specific topics scheduled.

BIOL 414 Plant Diversity (4) Studies the identification and classification of local vascular plants. Herbarium collection required. Three hours lecture, four hours lab. Prerequisite: BIOL 120 with a grade of C- or better or permission of instructor. Spring, alternate years.

BIOL 415 Biostatistics Computational Biology (4) Explores biological systems using quantitative biological models. Application of statistical tools, numerical data sets, and computer-based techniques to test hypotheses, create predictive models, and interpret results and patterns. Three hours lecture, three hours lab. Prerequisite: BIOL 320 with a grade of C- or better or permission of instructor. Spring, alternate years.

BIOL 423 Ecology (4) Examines how organisms interact with each other and with their environment. Addresses the physical environment and the way physiological adaptations organisms have evolved to exploit it, population dynamics, interactions between species populations, biogeography, and environmental issues, especially those that relate to the impact of humans on the ecology of natural populations of plants and animals. Three hours lecture, three hours lab, field studies. Prerequisite: BIOL 320 with a grade of C- or better or permission of instructor. Fall, alternate years.

BIOL 425 Developmental Biology (4) Studies the cellular, genetic, and molecular interactions of animal development. Three hours lecture, three hours lab. Prerequisite: BIOL 331 with a grade of C- or better or permission of instructor. Spring, alternate years.

BIOL 427 Animal Physiology (4) Studies the normal functions of animal organs and systems. Topics include metabolism, transmission of nerve impulses, reproduction, and effects of hormones. Three hours lecture, two hours lab. Prerequisites: BIOL 119 or 120, and CHEM 240 with a grade of C- or better; or permission of instructor. Fall.

BIOL 428 Plant Physiology (4) Major biological activities of higher plants with emphasis on water relations, mineral nutrition, metabolism, growth, and development. Three hours lecture, two hours lab. Prerequisites: BIOL 120 and CHEM 118 with a grade of C- or better; or permission of instructor.

BIOL 430 Microbiology (4) Covers general principles of bacterial growth and activities. Three hours lecture, four hours lab. Prerequisite: BIOL 119 with a grade of C or better; or permission of instructor. Recommended: BIOL 120 with a grade of C- or better. Fall.

BIOL 434 Parasitology (4) Studies the nature of parasitism with respect to morphology, physiology, and host parasite relationships. Three hours lecture, two hours lab. Prerequisites: BIOL 119 and 120 with a grade of C- or better; or permission of instructor. Fall, alternate years.

BIOL 436 Human Physiology (3) A detailed study of human function, beginning at a cellular level. Emphasis is placed on the neuromuscular, cardiovascular, pulmonary, renal, and endocrine systems. The effects of exercise and pathology are integrated into each system. Prerequisite: PT 431 or permission of the instructor. Fall.

BIOL 440 Cell Biology (4) Studies the basic principles and information that form the foundation of cell biology, provides exposure to some of the underlying questions of cell biology, and improves skills in analyzing and communicating scientific information. Three hours lecture, two hours lab. Prerequisites: BIOL 340 and CHEM 240 with a grade of C- or better; or permission of instructor. Spring.

BIOL 442 Immunology (4) Studies cellular and molecular aspects of the immune response. Two hours lecture, two hours lab. Prerequisites: BIOL 119, 120, 340 and CHEM 240 with a grade of C or better; or permission of instructor. Spring, alternate years.

BIOL 445 Molecular Biology (4) Considers the molecular aspects of biology at the cellular and subcellular levels. Emphasis on the genetic material and intercellular processes and laboratory procedures for studying biology at the molecular level. Three hours lecture; three hours lab. Prerequisites: Biology 331 and Chemistry 240, 341 with a grade of C- or better; or permission of instructor. Recommended: BIOL 440. Fall, alternate years.

BIOL 450 Evolution (3) Addresses a variety of topics related to evolutionary biology, including the history of evolutionary thought, evolution of sex, group selection, speciation, phylogenetic systematics, coevolution, and molecular evolution. Three hours lecture. Prerequisite: BIOL 320 with a grade of C- or better or permission of instructor. Recommended: BIOL 119. Spring, alternate years.

BIOL 455 Genomics in Research & Medicine (4) Examines current tools and techniques in genomics research and discusses applications of genomics, especially in healthcare and medicine. Topics include the use of home genomics kits to infer ancestry and predict health outcomes; genomics and personalized medicine; genomics in species conservation and evolution, etc. Students will also use a variety of genomics tools to investigate a novel genomics research problem.

BIOL 460 Special Problems (1) Independent research of a biological problem under the guidance of a faculty member. Prerequisite: permission of instructor. Fall, spring.

BIOL 480 Senior Seminar I (2) Focuses on the interdisciplinary nature of biology and how life sciences relate to contemporary problems and circumstances. Involves investigative projects, written reports, and presentation of reviews. Prerequisites: At least one 400-level biology course; senior standing. Fall.

BIOL 481 Senior Seminar II (2) Focuses on interdisciplinary nature of biology and how life sciences relate to contemporary problems and circumstances. Involves written and oral analysis of class material. Prerequisites: At least one 400-level biology course; senior standing. Spring.

BIOL 482 Biology Senior Seminar (3) Focuses on interdisciplinary nature of biology problems and circumstances. Involves investigative projects, written reports, presentation of reviews, and integrative book reviews primarily in seminar format. Prerequisites: at least one 400-level biology class.

BIOL 498 Internship in Biology (1) Internships are designed to meet the educational needs of students' professional goals and to provide practical experience in a position relating to a specific area of career interest. Developed by the student in conjunction with a faculty supervisor and site supervisor.

BIOL 499 Special Topics in Biology (1) Lectures, discussions, or special laboratory topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in biology. May be repeated. Prerequisites announced when specific topics scheduled.

British Studies (BRIT)

British Studies courses are taught by the British Studies faculty of Harlaxton College.

BRIT 282 The British Experience From the Celts to Present Day (6) Interdisciplinary introduction to the broad cultural and historical developments within British society from the earliest times to the present. Taught only at Harlaxton College and required of all students attending.

BRIT 382 The British Experience From the Celts to Present Day (6) Interdisciplinary introduction to the broad cultural and historical developments within British society from the earliest times to the present. Taught only at Harlaxton College and required of all students attending.

Business (BUS)

Business courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

BUS 265 Contemporary European Business Issues (3) Strategic business concepts in the context of the European Union. Multidisciplinary approach to issues related to the European Monetary Union, global challenges facing European business, and comparative business and leadership experiences. Students participate in site visits in the United Kingdom to develop understanding of operations of corporations from a global perspective. Exposure to historical and cultural context of European business to enhance business decision-making skills. Conducted at Harlaxton College. Open to majors in accounting, business administration, and economics. Prerequisite: ECON 102 or ID 150.

BUS 365 Contemporary European Business Issues (3) Strategic business concepts in the context of the European Union. Multidisciplinary

plinary approach to issues related to the European Monetary Union, global challenges facing European business, and comparative business and leadership experiences. Students participate in site visits in the United Kingdom to develop understanding of operations of corporations from a global perspective. Exposure to historical and cultural context of European business to enhance business decision-making skills. Conducted at Harlaxton College. Open to majors in accounting, business administration, or economics. Prerequisite: Grade of C- or better in ID 150 or ECON 102.

BUS 380 Special Topics in Business (3) Covers topics not included in other courses to give greater depth in certain areas and to explore current topics. Repeatable course. Content changes each time course is offered. Prerequisite: Grade of C- or better in ID 150. Offered periodically.

BUS 398 Internship in Business (3) First internship; a structured assignment in which student gains practical experience in a business position related to an area of career interest. Student is directed by the internship director and supervised by a member of the cooperating organization. A contract (available from the business schools internship director) must be approved and an offer letter from the internship provider must be on file before registering for course. Sponsoring institutions may require students to have completed specific course(s) in addition to the following prerequisites prior to beginning the internship. Prerequisites: EXED 090; at least one of FIN 361, MGT 311, MGT 377, or MKT 325; permission of the internship director of the Schroeder Family School of Business Administration.

BUS 400 ACES Passport Program (0) The ACES Passport Program provides a road map for students to develop career advancement techniques and network contacts. All students are required to establish an alumni/career mentor, attend career fairs, and take the EXED 090 course and complete BUS 398. Students are also required to select other professional development activities, including but not limited to, joining a business club, attending career advancement speaker events, networking, and Employer in the Foyer events, conducting mock interviews, and engaging with employers at company information sessions. Activities will be approved and documented by the Schroeder Family School of Business Administration Career Advancement office. Enrollment limited to students majoring in business or accounting.

BUS 498 Internship in Business (3) Second internship; a structured assignment in which student gains practical experience in a business position related to an area of career interest. Must be a distinct work experience from that provided by Accounting 398 or Business 398. Credits earned apply only as free elective credits. Student is directed by the internship director and supervised by a member of the cooperating organization. Enrollment in course must be concurrent with the work experience. A contract (available from the business school's internship director) must be approved and an offer letter from the internship provider must be on file before registering for the course. Sponsoring institutions may require students to have completed specific course(s) in addition to the following prerequisites prior to beginning the internship. Prerequisites: Grade of C- or better in ACCT 398 or BUS 398; permission of the internship director of the Schroeder Family School of Business Administration.

ChangeLab (CHNG)

ChangeLab courses are taught by an interdisciplinary faculty.

CHNG 280 Social Entrepreneurship (0-4) This course will explore the motivation for social entrepreneurship and the various forms of social ventures. Social entrepreneurship will be contrasted with traditional models of charity and social assistance. This course will examine successes and failures of social ventures, emphasizing how

business strategies and market principles can be used to achieve social goals in ways that are self-sustaining. Students will propose projects that identify new, innovative approaches to address social and environmental problems.

CHNG 300 ChangeLab Project (0-4) This is an experiential learning opportunity in which students complete real-world projects for start-ups or organizations (business, not-for-profit, civic, or educational). Projects have a social responsibility focus. All teams are guided by a coach. Competencies are developed in project management, teamwork, professional interaction, and presentation skills. Students draw upon diverse team member strengths to deliver value on their projects. Course is repeatable. Projects change each time the course is taught.

CHNG 310 ChangeLab Project Social Responsibility (0-4) This is an experiential learning opportunity in which students complete real-world projects for start-ups or organizations (business, not-for-profit, civic, or educational). Projects have a social responsibility focus. All teams are guided by a coach. Competencies are developed in project management, teamwork, professional interaction, and presentation skills. Students draw upon diverse team member strengths to deliver value on their projects. Course is repeatable. Projects change each time the course is taught.

CHNG 320 ChangeLab Project International (0-4) This is an experiential learning opportunity in which students complete real-world consulting projects for start-ups or existing organizations (business, not-for-profit, civic, or educational). Projects have an international focus and may include international travel. All teams are guided by a coach. Competencies are developed in project management, teamwork, professional interaction, and presentation skills. Students draw upon diverse team members strengths to create value on their projects. Projects change each time the course is taught.

CHNG 330 Social Innovation Concepts and Application (0-4) This is a course in which students propose their own social innovation project. Projects are completed in teams guided by a coach. Competencies are developed in social innovation, empathy, creative problem-solving, design thinking, story-telling, project management, teamwork, and presentation skills. Students draw upon diverse team member strengths to create impact on a social or environmental issue. Course is repeatable. Projects change each time the course is taught. Prerequisite CHNG-280 and/or permission of instructor.

Chemistry (CHEM)

Chemistry courses are taught by the faculty of the Department of Chemistry.

CHEM 100 Fundamentals of Chemistry (4) Includes historical development of some fundamental concepts illustrating methodology and experimental basis of chemistry. Examines impact of chemistry on modern society. Credit may not be applied to science majors. Intended for students with little or no chemistry background. Three hours lecture, two hours lab. Fall.

CHEM 108 Elementary Chemistry (4) Considers fundamental concepts of chemistry, organic chemistry, and biochemistry and their applications in science, technology, and society. Three hours lecture; two hours lab. Prerequisite: CHEM 100 or two semesters of high school chemistry. Spring.

CHEM 118 Principles of Chemistry (4) Covers principles of stoichiometry, chemical bonding and structure, thermochemistry, chemical equilibrium, and kinetics. Three hours lecture, two hours lab. Prerequisite: Two semesters of high school chemistry. Fall, spring.

CHEM 195 Introduction to Chemical Research (1) Participation in a directed research project. Prerequisites: CHEM 118; permission of instructor. Fall, spring.

CHEM 240 Organic Chemistry I (4) Introduction to the structure, nomenclature, and chemistry of carbon compounds. Covers all major functional group classes and their simple characteristic reactions. Introduces mechanistic considerations as a basis for understanding reactions. Laboratory includes basic techniques, simple reactions, and qualitative analysis. Three hours lecture, three hours lab. Prerequisite: CHEM 118 with a grade of C- or better. Spring.

CHEM 280 Inorganic Chemistry I (4) An introduction to the inorganic chemistry of metallic and nonmetallic elements with special attention given to the applied industrial and biochemical uses of their compounds. Surveys the behavior of selected elements and coordination compounds. Three hours lecture, three hours lab. Prerequisite: CHEM 240 with a grade of C or better or permission of instructor. Spring.

CHEM 299 Special Topics in Chemistry (1) Lecture, discussion, or lab course devoted to a topic not covered in regular chemistry course offerings. Topics vary depending on interests of faculty and students. May be repeated. Prerequisites announced when course scheduled. Fall, spring.

CHEM 341 Organic Chemistry II (5) Studies the reactions of organic and bioorganic molecules organized around mechanistic principles. Introduces multistep syntheses and synthetic strategies. Laboratory includes studies of reactions, synthesis, and identification of compounds. Four hours lecture, four hours lab. Prerequisite: CHEM 240 with a grade of C- or better. Fall.

CHEM 351 Physical Chemistry I (4) Introduction to thermodynamics and chemical kinetics as applied to the states of matter, chemical reactions, and chemical equilibria. Three hours lecture, four hours lab. Prerequisites: CHEM 280; MATH 222; PHYS 121 or 210. Fall.

CHEM 360 Quantitative Analysis (4) Studies fundamental principles of chemical analysis and their application. Topics include data handling, chemical equilibrium, gravimetric and volumetric analysis, and certain instrumental methods of analysis. Laboratory experiments illustrate realistic examples of chemical analysis. Three hours lecture, four hours lab. Prerequisite: CHEM 240 or 280 with a grade of C- or better, or permission of instructor. Fall.

CHEM 370 Biochemistry I (3) An introduction to biologically important molecules and their role in biological systems at a cellular level. Three hours lecture. Prerequisite: CHEM 341. Fall.

CHEM 371 Biochemistry I Lab (1) An introduction to important basic techniques used in the biochemistry laboratory. Four hours laboratory. Fall.

CHEM 452 Physical Chemistry II (4) Introduction to quantum theory and statistical thermodynamics. Emphasis on the study of the structure of small molecules using visible, infrared, and magnetic resonance spectroscopy. Three hours lecture, four hours lab. Prerequisites: CHEM 351; MATH 323; PHYS 122 or 211. Spring.

CHEM 461 Instrumental Analysis (4) Studies modern methods of instrumental analysis. Topics include electronics in instrumentation, spectroscopic methods of analysis, and separation science. Laboratory experiments provide experience with instrumental design and operation. Three hours lecture, four hours lab. Prerequisites: CHEM 341, 351, 360. Recommended: CHEM 452. Spring.

CHEM 473 Biochemistry II (3) A discussion of advanced topics includes biologically important compounds and their role in biological systems at a cellular level. Three hours lecture. Prerequisites: CHEM 280, 360, 370 with grades of C- or better. Spring.

CHEM 474 Biochemistry II Lab (1) An introduction to advanced techniques used in the biochemistry laboratory. Four hours laboratory. Prerequisites: CHEM 370 and 371 with grades of C- or better, must be taken concurrently with CHEM 473. Spring.

CHEM 483 Inorganic Chemistry II (4) Surveys classical and contemporary approaches to the study of molecular structure, chemical bonding, spectra, acid-base chemistry, the solid state, and coordination compounds. Three hours lecture, four hours lab. Prerequisites: CHEM 341, 351, 360. Fall.

CHEM 493 Short Topics in Advanced Chemistry (1) Each 4 1/2 week section explores an advanced topic in chemistry. Topics vary, depending on interests of faculty and students. May be offered with or without lab. Fourteen class hours, four lab periods if lab is offered. Prerequisites: Vary but generally include several upper level chemistry courses. Fall, spring.

CHEM 495 Research (1) Involves participation in and completion of an individual research project under the direction of a faculty member. Requires written and oral report of the literature search and laboratory work. Prerequisite: Permission of instructor. Fall, spring.

CHEM 498 Internship in Chemistry or Biochemistry (1) Supervised and structured assignment in a workplace or similar setting where student works with chemical or biochemical professionals and gains practical experience in a position related to a specific area of career interest. Internship arranged in advance by the student, the site supervisor and the faculty supervisor. Prerequisites: Completion of at least eight hours of college chemistry courses; permission of faculty advisor and faculty internship supervisor. Fall, spring, summer.

CHEM 499 Chemistry Senior Capstone (3) Serves as a senior capstone for students majoring in chemistry and biochemistry. Involves resume writing, book reviews, a written thesis, a large group project and presentations.

Civil Engineering (CE)

Civil engineering courses are taught by the faculty of the Department of Mechanical and Civil Engineering. Pre-engineering students and students not admitted to the College of Engineering and Computer Science may not enroll in any civil engineering (CE) course numbered 200 or above without specific permission of the instructor, chair, or dean.

CE 183 Surveying (3) Introduces students to modern surveying instruments, surveying methods, and engineering graphics. Includes instruction in measurement of distances, horizontal angles and vertical angles, traverse and differential leveling, mapping, survey computations, and computer applications using AutoCAD. One hour lecture, five hours lab. Fall.

CE 324 Construction Management (3) Covers basic construction management functions, general principles of planning, contracting, scheduling, and cost estimating. Also covers construction safety, sustainability, productivity, quality control and cost accounting. Includes the use of project scheduling and cost estimation software. Spring.

CE 331 Construction Materials (3) Introduction to civil engineering materials in construction, specifically steel, timber, aggregate, Portland cement concrete, and asphaltic concrete. The focus is on the manufacture, origin, and design of materials; physical and chemical properties of materials; stress-strain behavior of materials up to failure; sustainability of materials and evaluation of materials through destructive and nondestructive methods. Hands-on labs emphasize characterization of physical and mechanical properties of materials, planning and execution of experiments, and interpretation of experimental data. Two hours lecture, three hours lab. Corequisites: CE 331L and ENGR 232 or permission of instructor. Spring.

CE 338 Soil Mechanics and Soil Behavior (3) Covers soil origin, index properties of soil, weight volume relationships, soil classification, principles of effective stress, stress distribution, permeability, seepage, lab and field compaction, theory of consolidation, elastic and

consolidation settlement, time rate of settlement, and shear strength of cohesive and cohesionless soil. Prerequisite: ENGR 232, C- or better. Spring.

CE 339 Soil Mechanics Laboratory (1) Experiments in index and engineering properties of soil such as moisture content, specific gravity, sieve analysis, Atterberg Limits, permeability, field and lab compaction, consolidation, triaxial, and direct shear. Corequisite: CE 338.

CE 340 Structural Analysis (3) Load determination and tributary area calculations, analysis of statically determinate structures for internal forces and displacements, influence line theory, approximate analysis techniques, energy methods, and analysis of statically indeterminate systems. Prerequisite: ENGR 232 with a grade of C- or better or permission of instructor. Fall.

CE 341 Design of Steel Structures (3) LRFD design of basic structural steel members. Includes design for block shear and shear lag in tension members, lateral torsional buckling and bearing criteria of flexural members, and effective length criteria and base plate design for columns. Design of simple bolted and welded connections. Prerequisite: CE 340. Spring.

CE 342 Design of Concrete Structures (3) Design and analysis of reinforced concrete structural members including rectangular sections for bending and shear. Design of columns for axial load and bending. Rebar development length concepts. Prerequisites: CE 331 & CE 340. Fall.

CE 350 Transportation Engineering (3) Covers road vehicle performance, geometric design of highways, empirical pavement design, fundamentals of Superpave, traffic flow, traffic surveys, highway capacity and level of service analysis and fundamental concepts in railway engineering. Emphasis on land transportation. Prerequisites: CE 183; ENGR 213. Spring.

CE 374 Environmental Engineering I (3) Introduction to environmental engineering topics, including water quality, water treatment processes, air quality, solid and hazardous waste management, and environmental sustainability. Includes a study of environmental laws. Prerequisite: CHEM 118 with lab. Spring.

CE 380 Hydraulics Laboratory (1) Experiments in fluid mechanics and hydraulics, including viscosity, flow measuring devices, momentum forces, turbines, and weirs, and frictional losses and pipes. Corequisite: ENGR 366. Fall.

CE 438 Geotechnical Engineering (3) Application of soil mechanics to the design of building foundations, including shallow and deep foundation systems; foundation repair; stability analysis of earth slopes; lateral earth pressures and design of retaining walls. Also includes subsoil exploration and seismic site characterization. Prerequisite: C- or better in CE 338. Fall.

CE 443 Intermediate Structural Analysis (3) Analysis of statically determinate and indeterminate structures using force and displacement methods such as energy methods, stiffness method, slope-deflection relationships, moment distribution, and matrix techniques. Settlement and sidesway calculations are considered throughout. Prerequisites: CE 340.

CE 449 Advanced Structural Design (3) Advanced topics in structural design including steel connections, plate girders, composite beams, steel and concrete frames, two-way slabs, and reinforced concrete foundations. Prerequisites: CE 341, 342.

CE 450 Advanced Pavement Design & Management (3) Application of mechanistic empirical methods for flexible and rigid pavement design, perpetual design of pavements, design of continuously reinforced concrete pavements, airfield pavement design, network & project level pavement management, distresses in rigid and flexible

pavements, distress surveys, pavement management system development, maintenance strategies for rigid and flexible pavements, and new and emerging technologies in pavement design, management and rehabilitation practices. Prerequisite: CE 350.

CE 468 Engineering Hydrology (3) Study of the hydrologic cycle, watershed characteristics, unit hydrographs, stream flow analysis, ground water hydrology, flood frequency analysis, flood hydrographs, routing methods, and hydrologic design using computer simulation models. Prerequisite: ENGR 366.

CE 469 Design of Hydraulic Structures (3) Design methods for open channels, spillways, outlet works, and conduits. Water distribution system design and pipe network analysis. Design of drainage structures such as inlets, storm drain pipes, detention and retention basins, and culverts. Prerequisite: ENGR 366. Fall.

CE 475 Environmental Engineering II (3) Design and analysis of unit operations and processes for water and wastewater treatment. Topics include physical, chemical, and biological unit processes. Design of sewer networks. Analysis of water treatment plant processes and wastewater treatment plant facilities. Prerequisites: CE 374; ENGR 366; Or permission of the instructor.

CE 495 Civil Engineering Design Project I (3) Introduces concepts of project management, business, public policy, globalization, and leadership, the importance of professional licensure, professional and ethical responsibility, and skills such as technical writing, time management, teamwork, and negotiations. Selection of senior project, incorporating appropriate engineering standards, multiple realistic constraints, and sustainability concepts. Written and oral presentation of preliminary work. Prerequisites Senior Standing, as indicated by concurrent enrollment in CE 342, CE 438, and CE 469 or permission of the instructor.

CE 497 Civil Engineering Design Project II (3) Completion of project selected in Civil Engineering 495. Design plans and a formal written report covering all phases of the project are prepared and submitted. Oral presentation of the design before peers, professional sponsors, and faculty. Discussion of the project's impact on the environment, compliance with engineering codes, standards, and society. Prerequisite: CE 495.

CE 498 Independent Study in Civil Engineering (1) Independent study of topic of interest to the student. Requires faculty sponsor and approved detailed study plan of proposed topic.

CE 499 Special Topics in Civil Engineering (1) Study of topics of special interest. Topics will be announced. Repeatable course. Content changes each time course is offered. Prerequisite will be announced when scheduled.

Cognitive Science (COGS)

Cognitive science courses are taught by the faculty of several departments.

COGS 100 Proseminar in Cognitive Science (0) Explores current issues in cognitive science insofar as they are pertinent to the interests of students as individuals. Facilitates oral presentation skills by having students make short presentations and receiving feedback from other students and the instructor. Grading for the course will be pass/fail. Students may take the course for 1 hour of credit no more than three times. Freshmen should enroll in COGS 100, sophomores in COGS 200, juniors in COGS 300, and seniors in COGS 400. Prerequisite: A declared major in cognitive science.

COGS 111 Introduction to Cognitive Science (3) Introduces basic concepts, issues, and methodologies associated with the study of human cognition. Insights appropriately drawn from several fields including biology, computer science, philosophy, and psychology.

COGS 200 Proseminar in Cognitive Science (0-1) Explores current issues in cognitive science insofar as they are pertinent to the interests of students as individuals. Facilitates oral presentation skills by having students make short presentations and receiving feedback from other students and the instructor. Grading for the course will be pass/fail. Students may take the course for 1 hour of credit no more than three times. Freshmen should enroll in COGS 100, sophomores in COGS 200, juniors in COGS 300, and seniors in COGS 400. Prerequisite: A declared major in cognitive science.

COGS 292 Internship in Cognitive Science (1) Offers students the opportunity for supervised field experience in teaching or research either on campus or at some other facility appropriate to the student's field of study. Repeatable for credit.

COGS 300 Proseminar in Cognitive Science (0-1) Explores current issues in cognitive science insofar as they are pertinent to the interests of students as individuals. Facilitates oral presentation skills by having students make short presentations and receiving feedback from other students and the instructor. Grading for the course will be pass/fail. Students may take the course for 1 hour of credit no more than three times. Freshmen should enroll in COGS 100, sophomores in COGS 200, juniors in COGS 300, and seniors in COGS 400. Prerequisite: A declared major in cognitive science.

COGS 345 Complex Systems & Cognition (3) Studies dynamics involved in animal (human and non-human) and machine cognition from a complex systems perspective. Focuses on both internal systems of cognitive agents and their collective behavior. Specific topics may include neural networks, sensory and motor systems, environmental and agent-to-agent relations, and the role of constraints in cognitive behavior. Includes a computer modeling component, but no previous knowledge of mathematics or computer programming is necessary. Prerequisite: Major or minor in Cognitive Science or permission of the instructor.

COGS 400 Proseminar in Cognitive Science (0-1) Explores current issues in cognitive science insofar as they are pertinent to the interests of students as individuals. Facilitates oral presentation skills by having students make short presentations and receiving feedback from other students and the instructor. Grading for the course will be pass/fail. Students may take the course for 1 hour of credit no more than three times. Freshmen should enroll in COGS 100, sophomores in COGS 200, juniors in COGS 300, and seniors in COGS 400. Prerequisite: A declared major in cognitive science.

COGS 492 Internship in Cognitive Science (1-3) Offers students the opportunity for supervised field experience in teaching or research either on campus or at some other facility appropriate to the student's field of study. Prerequisite: At least two courses in cognitive science, philosophy, psychology or computer science. Repeatable course.

COGS 498 Seminar in Cognitive Science Psychology (3) Explores a specific interdisciplinary topic that is pertinent to the contemporary study of cognition and behavior. (Course may be repeated for credit as topic changes; however, it may be counted only once as a requirement toward the cognitive science major.) Prerequisite: Four other courses in cognitive science, philosophy, psychology, or neuroscience.

COGS 499 Independent Study in Cognition and Behavior (1) Offers research on special problems or persons under the direction of an individual faculty member. Prerequisite: Permission of the director of the cognitive science program.

Communication (COMM)

Communication courses are taught by the faculty of the Department of Communication.

COMM 130 Introduction to Communication (3) Introduction to the fundamental questions, methods, and theories that define the communication discipline and professions in advertising, journalism, public relations, multimedia production, and organizational communication.

COMM 210 Professional Speaking (3) This course focuses on a variety of presentations

COMM 211 Advertising & Promo Strategy (3) Focuses on the practical and creative skills necessary for advertising professionals. Students learn broad fundamentals of advertising, including brand positioning, copywriting and media placement. An introduction to marketing research is included, allowing students to learn how to create advertising that sells based on qualitative and quantitative research. How advertising fits into an overall integrative communication plan will be discussed. Prerequisite: COMM-130 or permission of instructor.

COMM 220 Principles of Public Relations (3) This course is intended to offer students an overview of the field of public relations. Students will learn basic public relations concepts and processes including the evolution of public relations; public relations in corporations, government and institutions; public opinion; target audiences; and ethics of public relations.

COMM 221 Media Writing (3) Develop basic writing and research skills necessary for creating persuasive tools in print, broadcast, and online media. Special focus on developing a competency in the mechanics of concise clear writing through appropriate use of Associated Press style. Prerequisite: COMM 130 or permission of instructor.

COMM 231 Basic Reporting (3) Basic news gathering, writing, reporting, and editing skills relevant to journalism and mass communication. Examines the news selection process and focuses on the principles of news writing and reporting, construction of the news story to include lead writing, Associated Press style, and ethical and legal issues. Emphasis on interviewing and research skills. Prerequisite: Communication 130 or permission of instructor.

COMM 240 Live Events (3) From running the camera to producing from the truck, this course teaches students the necessary skills to be part of a live event broadcast, and offers hands-on opportunities to apply those skills in real-world settings. Fall.

COMM 251 Principles of Multimedia (3) Introduces basic concepts of Web site development, video production, and Photoshop. Prerequisite: COMM 130 or permission of instructor.

COMM 312 Advertising Copy and Layout (3) Advanced techniques in message creation, emphasis on advertising campaign development and presentation. Covers product and audience research, creative strategy statements, idea generation techniques, computer assisted layouts, preparation of a professional portfolio, and job hunting strategies. Prerequisite: COMM 211.

COMM 314 Advertising and PR Campaigns (3) Details the establishment of advertising and public relations strategies, and the execution and evaluation of outcomes using research-based goals. Students create and carry out a campaign for a real-world client. Course offers an opportunity for students to integrate prior learning and problem-solving for a comprehensive campaign plan which incorporates traditional and new media platforms. Prerequisites: COMM 211.

COMM 322 Strategic Public Relations (3) Includes the historical evolution of public relations with in-depth instruction on the concepts of public opinion, audience analysis, and persuasion. Profes-

sional, ethical, and legal responsibilities of public relations examined. Emphasis on use of communication strategies to achieve organizational goals and objectives. Covers applications of public relations in a global environment. Prerequisite: COMM 220, 221.

COMM 325 Sports Promotion (3) This course covers relationship management within the sports industry, including sponsorship (endorsement and licensing). Students will gain skills in research and market segmentation, marketing mix consideration, ticket sales and special events. Prerequisites: COMM 130, 221 and 231.

COMM 332 Advanced Writing (3) In-depth instruction and critiques of student's journalistic work done with different reporting methodologies including interviewing, official records, direct and participant observation, and survey research. Emphasis on how to cover speeches and meetings and report on local government. Prerequisite: COMM 231.

COMM 333 News Copyediting (3) Overview of the skills and uses of editing. Emphasizes the practice of copyediting and headline-writing skills for print and online publications. Skills developed include tightening writing, sharpening leads, headline writing, cutline writing, and basics of layout. Prerequisite: COMM 231.

COMM 335 Sports Writing (3) This writing-intensive course helps students gain skills in sports journalism through various story forms, including newspapers, magazines and social media. Students will explore human-interest stories with social significance and gain understanding of the role of sports in society. Prerequisites: COMM 130, 221, and 231.

COMM 345 Video Production (3) The focus of this class will be on understanding the key principles and characteristics of video production - from concepts to the final edit. Prerequisite: COMM 251. Fall.

COMM 351 Web Design (3) Introduces the basic concepts of website development. Utilizes HTML and appropriate text and graphics software applications to build websites. Includes overview of basic design, writing, and information architecture principles that apply to website development. Prerequisite: COMM 251. Fall.

COMM 352 Multimedia Strategies (3) Advanced techniques in Web site development, including concept of dynamic HTML. Includes the integration of video and audio as well as working with the Flash application for integrating interactive multimedia elements. Prerequisite: COMM 251 and 350.

COMM 380 Intercultural Communication (3) Examines the communication process of individuals from different cultures or subcultures. Explores possible sources of misunderstandings in intercultural communication (e.g., time/space factors, linguistic and nonverbal factors, ethnocentric communication, communication problems of persons engaged in personal or professional intercultural contacts).

COMM 381 Relationship Management (3) Critical examination of research and theories dealing with selected variables in one-to-one relationships. Explores development, maintenance, and deterioration stages of professional and personal relationships. Prerequisite: COMM 130 or permission of instructor.

COMM 382 Team Building and Group Communication (3) Theoretical foundations and practical skills for examining and applying communication principles in groups. Surveys concepts such as cohesiveness, leadership, groupthink, deviance, networks, choice shift, and brainstorming as they relate to communication. Prerequisite: COMM 130 or permission of instructor.

COMM 383 Conflict Management (3) Examination of the factors that lead to conflicts, and theory and practice in using communication strategies to resolve conflict. Prerequisite: COMM 130 or permission of instructor.

COMM 388 Organizational Communication Models (3) Application of the tools of communication in an organization. Topics include information flow, motivation and influence, power, leadership transactions, networks, channels, teamwork, and territoriality. Prerequisite: COMM 130 or permission of instructor.

COMM 390 Practicum (1) Supervised practical experience in student media or other university information outlets. May be repeated for up to three hours credit. No more than six hours total credit given for COMM 390 and 395 combined.

COMM 391 Professional Development (1) Supervised practical experience in student media or other university information outlets. May be repeated for up to three hours credit. No more than six hours total credit given for COMM 390 and 395 combined.

COMM 395 Internship (1) Supervised practical experience in an off-campus mass communication-related organization. Application required. May be repeated for up to three hours credit. Prerequisites: one course from COMM 211, 221, 231, 251, 341; GPA of 2.50 or better; 36 hours of completed academic credit.

COMM 410 Health Communication (3) Provides students the opportunity to learn how communication in different contexts (interpersonal, organizational, mediated, etc.) can be utilized effectively to promote physical, mental and social well-being. Contexts include provider-patient communication, communication in healthcare organizations, risk communication and new media technologies related to health communication.

COMM 450 Multimedia Portfolio (3) The focus of this class will be on understanding the key principles and characteristics of video production and building a portfolio of material that will prepare students to succeed in the field after graduation. Prerequisite: COMM 352 or permission of instructor. Spring.

COMM 483 Media Theory and Research (3) Introduction to theory and research in the field of mass media. Examines the role of mass media in modern society and the influence of media institutions and messages on individuals, communities, and society. Includes an overview of basic research methods associated with media research. Students integrate theoretical knowledge into media research areas relevant to communication professionals today. Prerequisite: Junior or senior standing.

COMM 485 Media Law and Ethics (3) Examines the rights, responsibilities, and constraints on public communication in the United States. Emphasis on the effects and interaction of differing ethical constructs and First Amendment theories and sources of constraints on the mass media. Covers regulatory policies affecting advertising, public relations, journalism, and present and future electronic mass mediums. Also examines legal areas of libel, privacy, obscenity, access to and ownership of information, and media outlets. Prerequisite: Junior or senior standing.

COMM 488 World Media Systems (3) The focus of this class will be to help students identify and understand the key elements that define and influence media systems around the world. These will include specific philosophies of media systems, the state's relationship with media, how the media is financed, accessibility of the media, and the influence of culture on media audiences. Specific attention will be given to the process of media globalization and how media imports and exports influence various media systems. Students will have the opportunity to analyze specific media systems through comparative analysis allowing them to not only have a broader understanding of the variety of media systems around the world, but also to develop a greater appreciation for the factors that influence the development of the media system of the United States.

COMM 490 Special Topics in Communication (3) Varied topics

of periodic interest not covered in regular course offerings. May be repeated. Prerequisite: Senior standing and permission of instructor.

COMM 499 Independent Study in Communication (1) Completion of individual course of study under faculty supervision. Topic and credit hours must be approved in advance in accordance with University policy. May be repeated twice for up to six hours credit.

Computer Science (CS)

Computer science courses are taught by the faculty of the Department of Electrical Engineering and Computer Science. Pre-engineering students may not enroll in any computer science (CS) course numbered 206 or above without specific permission of an instructor, chair, or dean.

CS 101 Introduction to Computer Science (3) Hands-on introduction to computer science and engineering. Meets with electrical and computer engineering sections of Engineering 101. Includes short introductions to programming, robotics, and sensors. Fall.

CS 105 Survey of Computer Science (3) Intended for students who are not computer science or engineering majors. Provides broad introduction to various concepts and tools used in computing. Topics include number systems, Boolean algebra, problem solving, computability, databases, networking, Internet/Web, user interfaces, artificial intelligence, robotics, and short introduction to programming. Background should include two semesters of high school algebra. Credit not given for more than one of CS 101 or 105 or ENGR 101.

CS 205 Programming for the Sciences (3) Explores the power and limitations of using computers in the sciences. Includes the study of various approaches to solving scientific problems such as numerical representations, computational numerical methods, and scientific simulations. Course may not be counted toward graduation for computer science or engineering majors. Prerequisite: MATH 134 or 221.

CS 210 Fundamentals of Programming I (3) Emphasizes problem-solving techniques used in the analysis and design of software solutions, including structured top-down design, abstraction, good programming style, debugging, and testing. Programming constructs covered include control structures, functions, and basic, and aggregate data types. Introduction to recursion and dynamic allocation. Fall, spring.

CS 215 Fundamentals of Programming II (3) Project and problem-solving course emphasizes the use of classes for encapsulation of abstract data types and abstract data structures. Topics include classes, templates, dynamic allocation, searching and sorting, recursion, and exception handling. Introduction to algorithm analysis. Prerequisite: Grade of C- or better in CS 210. Fall, Spring.

CS 220 Logic Design and Machine Organization (3) Introduction to logic design and computer hardware concepts. Topics include Boolean algebra, number representations, sequential logic, counters and registers, microcomputer architecture, and assembly language programming. Spring.

CS 290 Object Oriented Design (3) In-depth study of abstract data types and objects, including inheritance and polymorphism, frameworks and design patterns, and the use of these principles in problem solving and program design. Prerequisite: CS 215. Spring.

CS 310 Puzzle Programming (1) Study of problem solving under time pressure. Simulation of the programming contest environment. All problems considered come from past programming contests. Highly recommended for any student interested in programming competitions. Prerequisite: CS 215 or permission of instructor. May be repeated for up to three credit hours. Fall.

CS 315 Algorithms and Data Structures (3) Design and implementation of algorithms and advanced data structures with attention to

complexity and space analysis. Problem-solving strategies including greedy and divide-and-conquer algorithms as well as dynamic programming techniques. Prerequisites: CS 215, MATH 370. Spring.

CS 320 Computer Architecture (3) Studies the architecture of computer systems from four-bit machines to supercomputers. Memory systems, I/O processors, and multi-computer systems are studied in detail. RISC, CISC and Neural Nets are introduced. Establishes the relationship of hardware and software. Includes hands-on projects dealing with graphical user interfaces and their implementation. Prerequisites: CS 210; CS 220 or EE 254. Spring.

CS 350 Computer/Human Interaction (3) Study of user interface design, including ergonomic factors. Includes hands-on projects dealing with graphical user interfaces and their implementation. Prerequisite: CS 215.

CS 355 Computer Graphics (3) Fundamental course in computer graphics. Topics include rendering two and three-dimensional images, two and three-dimensional transformations, line clipping, hidden lines, shading, and perspective projections. Prerequisites: CS 215; MATH 323.

CS 375 UNIX System Programming (3) Coverage of UNIX software development and UNIX administration. Includes discussion of common shells and scripting languages, X Windows, and interprocess communication. Prerequisite: CS 215.

CS 376 Small Computer Software (3) Introduction to graphical user interface provided by Windows(TM) operating system using C#.NET. Topics include console applications, windows forms, elementary graphics, ASP.Net web forms, ADO.NET, TCP/IP connection between computers, and dynamic-link libraries (DLLs), and/or device drivers. Prerequisites: ENGR 123 or CS 210; EE 254 or CS 220. Same as EE 356. Fall.

CS 380 Programming Languages (3) Comparative analysis of selected high-level languages. Covers virtual computers represented by various programming languages, representation of data types, sequence control constructs, data access, scoping, typing systems, runtime storage management, languages semantics, alternative, programming paradigms, and parallel language constructs. Prerequisite: CS 215. Fall.

CS 381 Formal Languages (3) Models of computation including finite automata, regular grammars, regular expressions, pushdown automata, context-free grammars, Turing machines, computability, and undecidability. Prerequisites: CS 210; MATH 370. Fall.

CS 390 Software Engineering (3) Study of the software design and development process in the context of a large group-programming project. Topics covered include: project management, software management, requirements and specifications methods, software design and implementation, verification and validation, aspects of software testing and documentation standards, technical documents, contracts, risks, and liabilities. Prerequisite: CS 215. Recommended: CS 290. Fall.

CS 391 Software Engineering II (3) A continuation of CS-390 Software Engineering. Real-world experience developing a large-scale, ongoing software applications for external clients. Topics covered include: project management, quality assurance, and expectation management. Prerequisite: CS 390. Spring.

CS 395 Software Project Management (3) Issues and techniques for managing software projects. Project evaluation, scope management, stakeholder management, risk assessment, scheduling, quality, rework, negotiation and conflict management. Ethics of software development. Prerequisite: CS 390 either previously or concurrently.

CS 413 Software Security (3) Provides a systematic treatment for software design and implementation to create computer programs

and applications that are secure. Types of vulnerabilities and security issues involving software implementation and as well as web, cryptographic, and networking applications are identified and solutions provided including software development lifecycle models that incorporate security. Prerequisite: CS 390 either previously or concurrently.

CS 415 Cryptography (3) Introduces conventional and public-key cryptography, cryptosystems such as DES and RSA, and applications of cryptography to network and system security. Prerequisites: CS 215; MATH 370.

CS 430 Artificial Intelligence (3) Basic ideas and techniques underlying the design of intelligent computer systems. Topics include heuristic search, problem solving, game playing, knowledge representation, logical inference, and planning. Advanced topics such as robotics, expert systems, learning, and language understanding as time allows. Prerequisite: CS 215. Recommended: CS 315, 380.

CS 440 Databases (3) Presents database concepts and architectures. Topics include basic file structures, data dictionaries, data models, languages for data definition and queries, and transaction management for data security, concurrency control, and reliability. Hands-on experience with database and query systems. Prerequisites: CS 215; MATH 222.

CS 445 Programming in the Large (3) Techniques for scaling software to large numbers of users. Topics will include web application programming, database scaling techniques, using web services and APIs, virtualization and containers. Prerequisite: CS 380.

CS 455 Advanced Computer Graphics (3) Advanced course in computer graphics. Topics include raster graphics, texture mapping, curve approximation, and ray tracing. Prerequisite: CS 355.

CS 470 Operating Systems (3) Components of operating systems. Tasking and processing, process coordination and scheduling, memory organization and management, device management, security, networks, distributed and real-time systems. Prerequisite: CS 215. Recommended corequisite: CS 320. Spring.

CS 472 Concurrent & Parallel Programming (3) The various programming models used for parallel architectures. Topics will range from concurrent programming on clusters, to multi-core programming, to highly parallel and GPU programming. Parallel algorithms and strategies. Prerequisite: CS 470.

CS 473 Mobile Application Development (3) Hands-on, project-oriented course that explores the principles and tools involved in the design and construction of applications for mobile devices. Topics include and overview of mobile application development, application architecture, managing application resources, designing user interfaces, data storage options, integrating audio and video, and location-based services. Each offering will concentrate on one of the current mobile platforms. Repeatable course for different mobile platform content. Prerequisite: CS 215. Recommended: CS 290.

CS 475 Networks (3) Digital data communication systems in hardware and software, synchronous and asynchronous communication, standards, protocols, network configurations, network applications. Prerequisites: CS 215; MATH 222.

CS 478 Embedded Systems and Real-Time Programming (3) Covers real-time programming techniques that are commonly used on embedded systems. Topics include real-time operating system concepts, concurrent programming and task scheduling algorithms, mutual exclusion and synchronization methods, and interprocess communication. Students gain real-world experience by writing applications for two popular embedded operating systems. Prerequisites: EE 354 or CS 215; or permission of instructor. Same as EE 458. Spring.

CS 491 Software Quality Assurance (3) Various aspects of software quality assurance. Dynamic analysis approaches, such as assertions and testing. Static analysis approaches such as reviews and verification. Emphasis on various testing techniques such as unit, integration, system, acceptance and regression testing. Corequisite: CS 390 either previously or concurrently.

CS 494 Senior Project Seminar Programming (0) Provides guidance for the selection of a topic for the senior design project. Projects (some industry-sponsored) are presented for student selection. An outline and short presentation of the project selected is required. Prerequisite: 12 hours of 300-level computer science courses. Computer engineers may substitute EE 494. Spring.

CS 495 Senior Project Phase I (3) Plan the computer science project and formulate the preliminary design under the guidance of faculty and industrial advisors. Discussion of the relationship of computer science as a discipline to the humanities and social sciences. Preparation of a written formal proposal and an oral presentation of the proposal. Seminar session addresses ethical, environmental, economic, safety, and ergonomic aspects of computer science. Written reaction to seminar topics. Prerequisites: CS 494; GPA of at least 2.0. Computer engineers may substitute EE 495. Fall.

CS 497 Senior Project Phase II (3) Student completes and builds the design proposed in CS 495. A formal design review is conducted early in the semester. A practice oral report, a written final report, a final oral report, and a demonstration of the completed project are required. Prerequisite: CS 495. Computer engineers may substitute EE 497.

CS 498 Independent Study in Computer Science (1-3) Independent study of a topic of interest to the student. Requires faculty sponsor and approved detailed study plan.

CS 499 Special Topics in Computer Science Programming (1-3) Study of topics of special interest. Topics will be announced. May be repeated. Prerequisites will be announced when scheduled.

Cooperative Education (COOP)

COOP 081 Concurrent Co-Op (0-1) Part-time employment in a professional or paraprofessional role associated with the student's major. Requires full-time student status, prior approval of the job description by the co-op director and submission of a written summary and evaluation of the work experience. Students are expected to work 8-15 hours per week. At least 10 weeks of work must be completed during the semester. May be repeated. Co-requisite: 12 hours of enrolled credit during the fall and spring.

COOP 091 Professional Practice (0-1) For co-op students only. Students register for Cooperative Education 9X during the Xth co-op work period (e.g., Cooperative Education 93 during the third work period). Requires satisfactory work performance and written co-op work report.

COOP 092 Professional Practice (0-1) For co-op students only. Students register for Cooperative Education 9X during the Xth co-op work period (e.g., Cooperative Education 93 during the third work period). Requires satisfactory work performance and written co-op work report.

COOP 093 Professional Practice (0-1) For co-op students only. Students register for Cooperative Education 9X during the Xth co-op work period (e.g., Cooperative Education 93 during the third work period). Requires satisfactory work performance and written co-op work report.

COOP 094 Professional Practice (0-1) For co-op students only. Students register for Cooperative Education 9X during the Xth co-op

work period (e.g., Cooperative Education 93 during the third work period). Requires satisfactory work performance and written co-op work report.

COOP 095 Professional Practice (0-1) For co-op students only. Students register for Cooperative Education 9X during the Xth co-op work period (e.g., Cooperative Education 93 during the third work period). Requires satisfactory work performance and written co-op work report.

Criminal Justice (CJ)

Criminal justice courses are taught by the faculty of the Department of Law, Politics, and Society.

CJ 205 Introduction to Criminal Justice (3) Views crime and crime control in historical and societal context. Explores the extent of crime and its impact on modern society. Explores causes of crime and the development and operation of the criminal justice system with emphasis upon constitutional restraints. Explores the police, court, and correctional system.

CJ 210 Deviance and Crime (3) Examines deviance through a number of sociological and other perspectives.

CJ 301 Special Topics - Criminal Justice (3) Topics chosen on the basis of programmatic need or student interest. Prerequisite: CJ 205 or 210.

CJ 342 Criminal Law (3) Studies both substantive and procedural law including specific topics in each. Prerequisite: CJ 205 or LS 125.

CJ 354 Introduction to Forensic Science (3) Studies the organization and functions of investigative agencies, basic considerations in the investigation of crime, collection and preservation of physical evidence, and the apprehension process. Prerequisite: CJ 205 or permission of instructor.

CJ 360 The Correctional System (3) Explores the entire correctional process: history and development, probation and parole, institutional corrections, and community based corrections. Prerequisites: CJ 205; SOC 105, 210; or permission of instructor.

CJ 370 The Police (3) Survey of the organization and functions of police agencies, focusing on law enforcement, peacekeeping, and public service responsibilities. Prerequisites: CJ 205; SOC 105, 210; or permission of instructor.

CJ 380 Courts and Justice (3) Introduction to the American court system. The role of the criminal courts emphasized. Prerequisites: CJ 205; LS 125; or permission of instructor.

CJ 410 Juvenile Delinquency (3) Studies the nature, extent and causes of juvenile crime, at-risk behavior and child abuse. The juvenile justice system and methods of prevention, treatment and correction are analyzed. Prerequisites: CJ 205; SOC 105, 210; or permission of instructor.

CJ 420 International Crime and Justice (3) Focuses on international criminals and a cross-cultural examination of criminal justice systems. Also deals with the relationship between international crime and crime in the United States. Prerequisites: CJ 205; SOC 105, 210; or permission of instructor.

CJ 440 Criminal Justice Ethics (3) This course provides an overview and exploration of the study of ethics as they relate to the criminal justice system. The course begins with a broader approach and examination of general ethics and morality and then applies ethical frameworks to issues of crime and justice. Specific attention is paid to issues surrounding law enforcement, the law and courts, and corrections issues - especially issues surrounding the punishment of criminals. Prerequisites: CJ 205 or CJ 210/SOC 210; or permission of instructor.

CJ 450 Senior Seminar in Criminal Justice (3) Students complete an original research paper that uses data gathering and interpretive skills. Course content includes the general topics of social organization, social change, and social stratification as they relate to the world cultures courses. Prerequisite: SOC 343, 344 and criminal justice or sociology major or permission of instructor.

CJ 496 Internship (1-6) Internships available to majors of junior or senior standing who have completed core courses. GPA requirements must be met and student must file an internship application with advisor. Prerequisites: Criminal justice major; junior or senior standing.

Discussion (DISC)

Discussion groups are sponsored by faculty members from various University departments. These groups are organized throughout the academic year, and are available for academic credit.

DISC 100 Journeys & Discoveries (1) This discussion class is designed to encourage new UE students who are undecided about their academic major to examine their own journeys and discoveries as college students, including their explorations of new subjects through general education classes, readings and activities outside the classroom. The course will feature readings about personal quests, focused exploration of majors, opportunities to talk with faculty from various disciplines, attendance at cultural events that broaden students' perspectives, and interaction with Career Services and other relevant student support services. Class discussion and oral reports are required. A grade of P for passing or a grade of F for failure will be assigned upon completion. Enrollment is limited to entering students who have not declared an academic major. Learning objectives include practice in critical reading, thinking and discussion.

DISC 110 Student Success Strategies (1) This course is designed for freshman or those transferring to the University. The goal of this course is to increase students' college knowledge by providing academic and social support as they begin their UE college career. Topics include: time-management and balancing, campus academic resources, career services, strategies for planning and achieving academic and career goals, and campus policies and procedures. Fall and spring.

DISC 300 Faculty Sponsored Discussion Group (1) Provides a forum in which teachers and students meet in small groups to discuss readings each week. May be repeated for a total of three credit hours to be used as free elective credit only. A grade of P for passing or a grade of F for failure will be assigned upon completion. Each discussion group centers on a single topic. Students are required to read one-and-a-half to two hours per week and then meet for one hour per week with the group (including a faculty member) to discuss the reading assignment. Students are limited to one discussion group enrollment per semester. Prerequisite: Permission of instructor.

Economics (ECON)

Economics courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the Schroeder Family School of Business Administration section of this catalog for the complete leveling policy.

ECON 101 Principles of Macroeconomics (3) Macroeconomics is the branch of economics that studies the domestic economic system as a whole and its interaction with foreign economies. This course focuses on the behavior of the aggregate economy as it pertains to the determination of national income, production, level of employment, general price level, and trade flows. Particular attention is devoted to

fiscal policy and monetary policy and their respective impact on the economic system. Satisfies Outcome 9.

ECON 102 Principles of Microeconomics (3) Markets are among the oldest social institutions known to man. Microeconomics is a branch of economics that studies the dynamics of individual markets and prices. Focuses on the behavior of producers and consumers and the interdependence in the market process. Pays particular attention to the structure and evolution of competitive markets. Satisfies Outcome 9. ECON 101 is not a prerequisite.

ECON 300 Regression Analysis (3) Second course in applied statistics for students in economics and other social sciences, business administration, mathematics, or natural sciences. Topics include simple and multiple regression analysis, extensions of the classical regression model, and problems associated with forecasting. Assigned work exposes students to problems from a wide range of applications. This course includes introduction to econometric software and experiments involving a variety of real world data sets. Prerequisite: Grade of C- or better in QM 227 or another course in principles of statistics. Offered alternate fall semesters.

ECON 345 Intermediate Microeconomics (3) Microeconomics provides the foundation for logical and disciplined reasoning in virtually every aspect of economics. A rigorous introduction to the behavior of buyers and producers and their interaction in the market, course covers theories of rational choice, principles of production, and the economic costs of production. Attention devoted to the nature of competitive and monopoly markets and to markets for factors of production. In each area, emphasizes the principles of economic efficiency and the concept of economic welfare. Prerequisites: Grade of C- or better in ECON 102 and MATH 134 or higher math course. Offered alternate years.

ECON 346 Intermediate Macroeconomics (3) Macroeconomics is the study of the economy as a whole. Course analyzes the factors determining the growth in income, changes in prices, and the rate of unemployment. As appropriate, the course makes use of models suited to the long run and the short run and models of both open and closed economies. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered alternate years.

ECON 372 Money and Banking (3) Monetary economics examines the effect of money on economic outcomes. The course focuses on the theory and applications of monetary economics with emphasis on how money supply and interest rates are controlled in practice. Discussion topics include the role of interest rates in the economy and their determination in financial markets, operating goals and procedures of the Federal Reserve in its implementation of monetary policy, and alternative theories regarding the determination of aggregate output, employment, and prices. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered alternate years.

ECON 380 Special Topics in Economics (3) Covers topics not included in other courses, to give greater depth in certain areas and to explore current economic topics. Repeatable course. Content changes each time course is offered. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered periodically.

ECON 381 Economics of Public Policy (3) Uses the normative standards of efficiency, equity, and freedom to evaluate various public policies. Policies discussed include policies on agriculture, housing, the environment, market power, income distribution, taxation, and economic growth. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered alternate years.

ECON 395 Independent Study (1-3) Independent research in economics conducted under faculty supervision. Prerequisite: Permission of instructor.

ECON 398 Internship in Economics (3) A structured assignment in which student gains practical experience in an economics position. Student is directed by the internship director and supervised by a member of the cooperating organization. Enrollment in course must be concurrent with the work experience. A contract (available from the business school's internship director) must be approved and an offer letter from the internship provider must be on file before registering for course. Sponsoring institutions may require students to have completed specific course(s) in addition to the following prerequisites prior to beginning the internship. Prerequisite: EXED 090, Grade of C- or better in ECON 101, ECON 102 and one from ECON 300, 345, 346, 372; permission of the internship director of the Schroeder Family School of Business Administration. Not repeatable.

ECON 400 Econometrics (3) Continuation of Economics 300. An introductory treatment of econometric techniques and their application to business and social science research. Topics include general linear regression models, nonlinear regression, simultaneous equation models, and models with limited dependent variables. Based on a series of experiments using real world data sets. Prerequisite: Grade of C- or better in ECON 300. Offered alternate spring semesters.

ECON 425 International Trade (3) Analyzes theories and empirical foundations of international trade and factor movement, trade barriers, international monetary relations, foreign exchange systems, balance of payments, and current international economic problems. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered alternate years.

ECON 435 International Monetary Economics (3) This course focuses on the theory of international monetary economics and applies it towards gaining an understanding of current developments and policy issues. The discussion topics on the theory side include the national income accounting, the foreign exchange markets and exchange rate determination, the effect of money and inflation on interest rates and exchange rates, the effect of exchange rates on aggregate demand and output, the choice of the exchange rate regime, and the effect of monetary and fiscal policy on employment and output in an open economy under flexible and fixed exchange rate regimes. The insights gained from the theoretical discussion will help discuss various topics such as the US current account deficit, the impact of the Chinese exchange rate policy on its trade partners, the role of monetary and fiscal policy coordination in the aftermath of the global financial crisis. Prerequisites: Grade of C- or better in ECON 101 and ECON 102.

ECON 470 Financial Institutions and Markets (3) The operation and management of financial institutions and the markets in which they operate discussed. Managerial and public policy issues toward financial institutions and markets also addressed. Same as FIN 470. Prerequisite: Grade of C- or better in FIN 361. Offered alternate years.

ECON 475 Development of Economic Thought (3) Surveys the range of economic ideas from ancient times to the present. As in other seminars, the student is responsible for substantial research and presentation of his or her ideas. Prerequisites: Grade of C- or better in ECON 101 and 102. Offered periodically.

Education (EDUC)

Education courses are taught by the faculty of the School of Education.

EDUC 100 History and Foundations of American Education (3) History of schooling in America and how the current structures, philosophies, and policies came to be. Covers how contemporary schools are structured, managed, funded, and staffed. Helps students identify and build the necessary skills (writing, communicating, using technology, knowing content, and building lifelong skills) to teach. Fall, spring.

EDUC 150 Foundations & Diversity in American Educ (3) This course is a combination of lecture/seminar/small group practicum. After about six weeks of classwork directed toward the historical and foundational aspects of American education, students are placed in local schools that are classified as highly diverse with respect to both ethnicity and economic circumstances (high levels of free and reduced lunch). The course will remain classified as a writing-intensive course, and all of the current writing assignments will be retained; these writing assignments are related to both the foundational and historical components of schooling as well as the various multicultural components that will help students become more culturally competent.

EDUC 200 Introduction to Diversity in Schools, Teachers, and Learners (3) Examines the complex realities of schools, teachers and learners in contemporary American society. Issues include cultural competency, models of effective teaching, diversity in learning, professional standards, and accountability. Includes significant time spent in local school placements. Prerequisite or corequisite: EDUC 100. Fall, spring.

EDUC 201 Introduction to Special Education (3) An overview of exceptionality and special education, including definitions, basic legal requirements, and the history and development of the field. Also examines etiology, characteristics, and educational interventions as they relate to following categories of special education: behavior disorders, communication disorders, health impairments, learning disabilities, intellectual disabilities, orthopedic disorders, and visual impairments. Finally, addresses current issues such as inclusion, early childhood programming, transition, assessment, and multiculturalism.

EDUC 204 Teaching Students W/ Mild/High Disability Retardation (3) Examines perspectives on mental retardation history, definition, assessment, causes, and prevention. Also focuses on characteristics of individuals who have different levels of retardation and topics related to educational services, family concerns, individual and legal rights, institutional and community learning, and current issues.

EDUC 205 Clinical Intern I - Mild Intervention Elementary Level (3) Emphasizes practical application of the content in Education 204 or 206. All clinical experiences involve assignments of approximately three hours a day, four days a week, for 14 weeks. Students are assigned to a special education class, resource room, itinerant teacher or community agency serving children with disabilities. Activities in the clinical placement are designed to enhance the instruction presented in the corequisite courses. Corequisite: EDUC 204.

EDUC 210 Introduction to Special Education and Mild Disabilities (3) Introduction to educational services for children who are included in the exceptional children categories of mild intellectual disability and learning disability. A brief overview of educational services for students in low incidence categories of physical and health impairment, visual impairment, hearing impairment and communication disorders, intellectual disability, and severe emotional disorders. Other areas covered are etiological, psychological, and sociological factors related to each disability category. Emphasis on elements of coordinated programming between special and regular education personnel that are required to effectively educate special needs learners.

EDUC 224 Introduction to Kindergarten Education (3) Introduces historical roots and current practices involving a holistic approach to educating a diverse population of young children. Areas of initial exploration include philosophy, scheduling, developmentally appropriate materials, and transitions to kindergarten from preschool environment concept of "readiness" for school situations. Laboratory experiences provided. Prerequisites: EDUC 100, 200. Fall.

EDUC 230 Experiences in the Arts for Young Children (3) Acquaints student with activities, materials, equipment, and methods appropri-

ate in music, creative play, and arts programming for young children.

EDUC 233 Child Development (3) Studies general behavior theory and child development techniques for helping the child deal with problems in the home and school, preventing and eliminating deviant and undesirable behaviors, and developing parental cooperation and educational programs. Identification, observation, and recording of maturation sequences emphasized. Laboratory experiences included. Prerequisite: PSYC 226 or permission of instructor.

EDUC 235 Mathematics for Primary School Children (2) Emphasizes the value of science and mathematics experiences for young children. Procedures and materials used to develop mathematical and scientific concepts through the inquiry method are studied.

EDUC 236 Classroom Techniques for Teacher of Preschool Children (3) Discussions cover motivational techniques, classroom activities, use of methods and materials, and construction of lesson plans to meet individual needs of young children. Emphasizes relationships between techniques and goals of early childhood education.

EDUC 264 Assessment, Evaluation, and Remediation of Students with Special Needs (3) Students learn the nature of educational assessment by studying the principles and practices of diagnostic procedures in special education. Examines formal and informal assessments, standardized tests, test administration, test interpretation, and summary writing in the primary academic areas of reading, mathematics, and written expression. Learn to utilize assessment as a means for formulating educational goals and instructional objectives along with measuring a student's progress. An instructional remediation practicum in reading, mathematics, and written expression assigned.

EDUC 265 Role and Application of Computers in Education (3) Introduction to the roles of computers in education with an emphasis on computer-assisted instruction and computer-managed instruction. Students learn to use software tools and write simple programs. Two hours lecture, two hours lab.

EDUC 306 Teaching Students with Emotional & Behavioral Disorders/Handicaps (3) Covers issues of definition, incidence, and prevalence in a historical context. Classification systems are identified along with the major conceptual models (e.g., biological/biogenic, behavioral, cognitive/behavioral, ecological/sociological, psychodynamic/ humanistic, and psycho-educational). Finally, educational planning techniques and strategies outlined for improving behaviors and teaching socialization.

EDUC 307 Clinical Intern III/Intervention ED/BD For Students With EH/BD (3) Emphasizes practical application of the content in Education 306. Corequisite: Education 306. Note: All clinical experiences involve assignments for three hours a day, four days a week, for 14 weeks. Students are assigned to a special education class, resource room, itinerant teacher, or community agency serving children with disabilities. Activities in the clinical placement are designed to enhance the instruction presented in the corequisite courses.

EDUC 308 Teaching Students with Severe and/or Multiple Disabilities (3) Introduces prevalence, etiology, and definitions of severe and/or multiple disabilities. Students learn to design education programs and develop community service programs to supplement family support. Additional issues include assistive technology, functional skills, and vocational skills. Finally, the idea of inclusion and the transition of students with severe disabilities from school to community life are discussed.

EDUC 309 Clinical Intern IV - Intense Intervention (3) Emphasizes practical application of the content in Education 308. All clinical experiences involve assignments for three hours a day, four days a week, for 14 weeks. Students are assigned to a special education class, resource room, itinerant teacher, or community agency serving chil-

dren with disabilities. Activities in the clinical placement are designed to enhance the instruction presented in the co-requisite course. Co-requisite: EDUC 308.

EDUC 320 Teaching Strategies in K-12 Schools (3) For prospective kindergarten-12 teachers. Addresses curricular and teaching issues from both the theoretical and practical perspectives. Emphasis on understanding the K-12 curriculum and preparing developmentally appropriate instructional strategies. Prerequisites: EDUC 100 and 200 or EDUC-150; or permission of instructor. Fall, spring.

EDUC 321 Teaching Social Studies (3) Examines methods of teaching the social sciences using current materials and basic concepts. Unit planning and inquiry methods of teaching, including the knowledge and use of learning resources, emphasized. Prerequisite: EDUC 320. Corequisites: EDUC 323, 324, 419; or permission of instructor. Spring.

EDUC 322 Strategies for Special Needs Students In K-12 Schools (3) Designed for K-12 teachers, includes development of skills, strategies, and knowledge needed to meet the educational needs of students with special needs. Special needs students, including those with learning disabilities, cultural or language differences, or other conditions that inhibit learning, have a right to access the regular education curriculum and are often included in regular classrooms. This course includes a practicum in local schools. Prerequisites: EDUC 100 and 200 or EDUC-150. EDUC-320. Or permission of instructor. Fall, spring.

EDUC 323 Teaching Science, Conservation, and Ecology (3) The discovery approach to teaching science emphasized. Prerequisites: Two general science courses; EDUC 320. Corequisites: EDUC 321, 324, 419; or permission of instructor. Spring.

EDUC 324 Principles and Practices in Mathematics Education (3) Provides experiences in methods, materials, and organization of elementary and middle school mathematics education. Emphasis on activity-based learning and meeting individual needs of students including mainstreamed students. Two hours lecture, two hours lab. Prerequisites: EDUC 320; MATH 101, 202. Corequisites: EDUC 321, 323, 419; or permission of instructor.

EDUC 327 Integrated and Innovative Approaches in ENL (3) Continuation of ENL techniques and methods covered in EDUC 326. Provides students more indepth knowledge and additional applications of ENL foundations, techniques, and learning variables. Students study the latest ENL approaches and then work on the application of these principles as they pertain to classroom management, learning styles, and classroom interaction/dynamics Participants also examine the acquisition of both first and second languages so they can compare and contrast the two processes for a better assessment of errors and approaches for learning.

EDUC 330 Literature for the Elementary and Adolescent Child (3) Literature, stories, essays, issues, and language materials for kindergarten through young adult reviewed. Prerequisite: EDUC-320. Spring.

EDUC 331 Communicating Values of Literature (2) Studies values of literature for middle school (grades five to nine) and junior and senior high school students, and develops techniques for helping the character. Teachers and community leaders are trained to lead small and large group discussions. Materials are selected to further the interests, tastes, and values of all available literature. Prerequisites: One general education literature course; EDUC 100, 200; or permission of instructor.

EDUC 345 Designing Developmentally Appropriate Curriculum for Kindergarten Education (3) Models of kindergarten education based on various child growth and development philosophies of how young

children grow and develop are utilized as the basis for designing age-appropriate effective instruction for meaningful school programs for young children. Topics include developmentally appropriate curriculum planning, classroom management (rules, procedures, discipline), environmental design, organization, and administration of model programs. Laboratory experiences are provided. Prerequisite/ Corequisite: EDUC-320. Fall.

EDUC 362 All-Grade Curriculum and Teaching Strategies (3) For prospective teachers in all-grade art, music, and physical education programs. Addresses curriculum and teaching issues at elementary, middle school, and senior high school levels. Practicum experiences included. Should be taken in the same semester that the teaching major special methods course is taken. Prerequisites: EDUC 100, 200; or permission of instructor.

EDUC 363 Principles and Strategies of Teaching in Secondary Schools (3) The application of learning principles, analysis of forces influencing the educational process, and the general methods and procedures used in teaching in secondary schools are studied. Intern teaching experiences required in addition to class time. Additional internship hours required. Junior-level course. Prerequisites: EDUC 150, 320; admission to teacher education. Corequisite: Appropriate methods course selected from EDUC 451, 453, 454, 456, 459, 461, ART 497, MUS 476, 372, 373. Fall, spring.

EDUC 385 Multicultural Understanding (3) Introduction to diverse lifestyles related to a variety of cultural groups. The worth of each individual emphasized, and the importance of this view for developing the understanding required for intercultural relationships stressed.

EDUC 401 Dev Educ Prog Indiv With Disabilities (3) This course evaluates various types of educational programs (IFSP, IEP, and ISP) developed across the life span (birth to adulthood) of individuals with disabilities. Effective strategies for collaboration between educational professionals and related service providers are examined.

EDUC 403 Classroom Management Techniques for the Elementary Teacher (1) Introduces basic classroom management techniques designed to promote teaching with individuals and groups. Areas of emphasis include avoiding behavior problems, solving behavior problems, and fostering personal growth. Utilizes research-based approach. Prerequisites: EDUC 100, 200. Fall.

EDUC 409 Internship in Kindergarten Education (4) Opportunities to integrate basic skills and knowledge in applied practice situations. Observations, assessment, lesson presentation, and curriculum planning in primary setting stressed. Laboratory experiences provided. Prerequisites: EDUC 224, 345. Fall.

EDUC 410 Program Preschool Children W/Disabilities (3) Explores a variety of methods, materials, and theories regarding the identification and integration of children with disabilities 0-5 years of age into preschool programs. Emphasizes identification, assessment, intervention, teaching techniques, child development, program administration, curriculum revision, physical facilities and adaptations, referral processes, and resources. Prerequisite: PSYC 226 or permission of instructor.

EDUC 411 Creative Learning and Play Experiences for Young Children (3) Stresses the roles of creative learning and play experiences in the child's intellectual, social, and emotional development. Studies the developmental and therapeutic aspects of play and appropriate methods and materials for structuring play.

EDUC 412 Home School Relationships/Preschool (3) Ways to build effective home-school relationships and provide parent effectiveness training emphasized; teaching parents how to teach their children stressed.

EDUC 416 Kindergarten Education (2) An overview of kindergarten programming. Topics include the social climate of the classroom, ways to provide for the child's well-being, available equipment and supplies, curricular and daily schedule plans, preparing records and reports, foundations of learning and readiness for first grade, and kindergarten organization and administration. Laboratory experiences included. Prerequisites: EDUC 100, 200. Offered alternate spring semesters.

EDUC 418 Intern Implementing the Lang Arts Curr Arts Curriculum (4) Integrates communicative skills with classroom experiences. Gives students opportunity to apply skills and methodology learned in language arts, reading, and children's literature courses in actual classroom situations in individualized, small group, and whole group teaching situations. Supervision by the classroom teacher and the college instructor blends theory, research, methodology, and practical experience in teaching the language arts in the classroom. Additional internship hours required. Prerequisites: Junior status; EDUC 100, 200, 320. Corequisites: Admission to teacher education; EDUC 403, 421, 422; or permission of instructor. Fall.

EDUC 419 Internship Implementing Soc Stud/Sci Cur And Science Curriculum (4) Coordinates the teaching of mathematics, science, and social studies in the elementary school. Students placed so they can apply the appropriate methodology for each of these subject areas. Provides practicum experiences that allow the Developing teacher to apply newly developed skills. Additional internship hours required. Prerequisite: Junior status; EDUC 100, 200, 320. Corequisites: Admission to teacher education; EDUC 321, 323, 324; or permission of instructor. Spring.

EDUC 420 Teaching Language Arts in the Elementary Schools (3) The processes, procedures, and problems encountered in teaching the language arts discussed. Consideration for developing and refining the Pupil's proficiency in the oral and written language domains included. Spelling, usage, handwriting, and linguistics for the classroom teacher also studied. Prerequisite: EDUC 320. Corequisites: EDUC 330, 418, 426; or permission of instructor.

EDUC 421 Preschool and Beginning Reading Skills (3) Explores developmental aspects of reading acquisition as they relate particularly to the early stages of learning to read. Provides background and techniques to promote reading acquisition. Evaluation, diagnosis, and remediation of those early skills stressed. Students learn to involve parents in the development of pre-reading skills. Prerequisites: EDUC 100 and 200. Fall.

EDUC 422 Teaching Reading and Language Arts in the Elementary School (4) Explores process, procedures, and problems in teaching reading and language arts. Reading content includes basic knowledge and competency required for planning and implementing developmental reading programs. Language arts content includes basic knowledge and skills for instruction designed to develop and refine students' proficiency in oral and written language. Prerequisites: EDUC 100, 200; or permission of instructor.

EDUC 426 Teaching Reading (3) Theory and methodology of teaching reading emphasized. Stresses basic knowledge and competency required for planning and implementing developmental reading programs in the elementary school. Basic instrumental emphasis on developing the diagnostic-prescriptive instructional design. Prerequisite: EDUC 320. Corequisites: EDUC 330, 418, 420; or permission of instructor. Fall.

EDUC 427 Corrective Reading (3) Diagnosis and treatment of reading difficulties for the classroom teacher are discussed. Emphasizes diagnostic strategies and treatment procedures for common kinds of reading problems. Clinical experiences integral to this course. Prerequisite: EDUC 422. Spring.

EDUC 428 Reading in the Content Areas (3) Provides Overview of basic reading skills and specific comprehension and vocabulary skills for the content areas. Study techniques, reading levels, and comprehension development are examined, and skills in teaching content area lessons developed. Field placement included. Prerequisites: EDUC 426, 427, 436, 443; or permission of instructor. Fall, spring.

EDUC 430 Supervised Teaching in Kindergarten Education (6) Students receiving kindergarten endorsements must complete teaching and other observational and Participatory activities under the supervision of a cooperating kindergarten teacher and a University supervisor. A grade of C or better must be earned in student teaching to be recommended for a teaching license. Prerequisites: Admitted to teacher education; grade C or better in all education courses; EDUC 224, 345, 411 with GPA of at least 2.75 in these courses; senior status with at least 2.70 overall GPA. Spring.

EDUC 432 Supervised Teaching in Elementary School (6) Teaching, observation, and participation activities under the supervision of a cooperating teacher and a University supervisor. A grade of C or better must be earned in student teaching to be recommended for a teaching license. Prerequisites: Admitted to teacher education; grade of C or better in all education courses; ART 102, EDUC 320, 321, 323, 324, 418, 419, 420, 426, MUS 270, with GPA of at least 2.75 in these courses; senior status with at least a 2.70 overall GPA. Fall, spring.

EDUC 434 Supervised Teaching in Middle School (6) Teaching and other observation and participation activities under the supervision of a cooperating teacher and a University supervisor. A grade of C or better must be earned in student teaching to be recommended for a teaching license. Prerequisites: Admitted to teacher education; grade of C or better in all education courses; EDUC 426, 427, 443, with at least a 2.75 GPA in those courses; at least 15 hours of course work in the teaching subject with at least a 2.80 GPA in those courses; senior status with at least a 2.70 overall GPA. Fall, spring.

EDUC 435 Supervised Teaching Seminar (1) Emphasis is on the discussion of professional expectations and student teaching experiences. Topics of importance and interest to teachers will be presented by authorities in those areas. Corequisite: Supervised teaching - EDUC 432, 433, 434, 436, 437, 439, 497, MUS 478 or 479.

EDUC 436 Supervised Teaching in Senior High or Middle School (6) Teaching and other observation and participation activities under the supervision of a cooperating teacher and a University supervisor. A grade of C or better must be earned in student teaching to be recommended for a teaching license. Prerequisites: Admitted to teacher education; grade of C or Better in all education courses; EDUC 363, 428, and special methods course (may be taken concurrently) with GPA of at least 2.75 in those courses; at least 30 hours of course work in the major teaching subject with a GPA of at least 2.80 in those courses; at least 18 hours of course work in the minor teaching subject with a GPA of at least 2.50 in those courses; senior status with at least a 2.70 overall GPA. Corequisites: EDUC 428, 443. Fall, spring.

EDUC 443 Curriculum and Learning in Junior High/Middle School (3) Designed for prospective teachers in junior high and middle schools. Addresses curricular issues and learning issues from the theoretical and practical vantage points for the middle school. A strong focus on developing an understanding of the curriculum in junior high and middle schools, how it is designed and taught, and the policies that have an impact on its continued development. Examines learning theories in relationships to student needs in junior high and middle schools. Field placement included. Additional internship required. Prerequisites: EDUC 320; admission to teacher education.

EDUC 447 Intellectual Disab & Assorted Severe Disabilities (3) Examines the psychological, sociological, and educational impli-

cations of intellectual disabilities and its causes, characteristics, diagnosis, and treatment. Special problems of individuals with low functioning, multiple disabilities are analyzed. Prerequisite: EDUC 201 or PSYC 121 or permission of instructor. Fall.

EDUC 451 Methods of Teaching Science in Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of science in middle, junior, and senior high levels. The course is specifically designed to connect the student's training in science to educational theories. The course will focus on issues surrounding science instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: EDUC 363.

EDUC 453 Methods of Teaching English in Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of English Language Arts in middle, junior, and senior high levels. The course is specifically designed to connect the student's training in English Language Arts to educational theories. The course will focus on issues surrounding English Language Arts instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: EDUC 363.

EDUC 454 Methods of Teaching Foreign Language In Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of foreign language in middle, junior, and senior high levels. The course is specifically designed to connect the students training in foreign language to educational theories. The course will focus on issues surrounding foreign language instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: EDUC 363.

EDUC 456 Methods of Teaching Mathematics in Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of mathematics in middle, junior, and senior high levels. The course is specifically designed to connect the students training in mathematics to educational theories. The course will focus on issues surrounding mathematics instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: EDUC 363.

EDUC 457 Methods of Teaching Physical Education In Elementary, Senior High, Junior High Middle Schools (2) Prerequisite: Admission to teacher education. Corequisite: Education 363.

EDUC 459 Methods of Teaching Theatre Arts in Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of theatre arts in middle, junior, and senior high levels. The course is specifically designed to connect the students training in theatre arts to educational theories. The course will focus on issues surrounding theatre arts instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: Education 363.

EDUC 460 Methods of Teaching Speech in Senior High, Junior High, Middle Schools (2) Prerequisite: Admission to teacher education. Corequisite: Education 363.

EDUC 461 Methods of Teaching Social Sciences in Senior High, Junior High, Middle Schools (2) This course is a one-semester introduction to methods and issues surrounding the teaching of Social Studies in middle, junior, and senior high levels. The course is specifically designed to connect the students training in social studies to educational theories. The course will focus on issues surrounding Social Studies instruction and teaching techniques. Prerequisite: Admission to teacher education. Corequisite: EDUC 363.

EDUC 463 Inclusion and Collaborative Teaching (3) Studies the integration of special education in the regular classroom. Service delivery models for students with special needs are identified and

analyzed. Emphasis on collaborative procedures, special services, and instructional adaptation that regular and special education teachers use to meet the learning needs of special needs students enrolled in general education classes.

EDUC 465 Advanced Application of Computers in Education (3) Teachers, counselors, and administrators introduced to the roles of computers in education in the areas of administration, computer-assisted instruction, computer-managed instruction, and computer-assisted guidance programs. Computer-assisted instruction and computer-managed instruction emphasized. Prerequisites: EDUC 100, 200, 265.

EDUC 472 Adolescent Development and Learning Patterns (3) A detailed study of the physical, intellectual, social, and emotional characteristics of early adolescence (from about 14 to 18 years). Instructional implications of developmental patterns investigated. Topics include the developmental characteristics of youth as they relate to and determine curriculum goals, relevance of content, instructional organization, independence and leadership development goals, career education goals, and other special needs of the early adolescent and middle student. Prerequisite: PSYC 226 or permission of instructor. Alternate years. Fall.

EDUC 475 Supervision and Organization of Clinical Experiences in Literacy (4) Experiences to engage in supervision and organization of diagnosis and remediation of literacy difficulties in a classroom setting. Under supervision of a University instructor. Prerequisites: EDUC 422, 427, or permission of instructor. Fall, spring.

EDUC 480 Orientation to Deafness (1) General overview of deafness. Many aspects of the deaf community and skills necessary for individuals who plan to work or associate with deaf persons emphasized. Anatomic and medical aspects of deafness, audiology, communication with the deaf, telecommunication devices, educational issues, vocational rehabilitation, sociological factors, psychological factors, and legal aspects of deafness.

EDUC 481 Basic Sign Language (3) Familiarity with the basic structures of sign language. Emphasizes acquisition of a core vocabulary of signs and finger spelling in American Sign Language or signed English. Develops skills and techniques of nonverbal communication necessary to communicate effectively with deaf persons.

EDUC 482 Intermediate Sign Language (3) Expands sign vocabulary and ability to utilize the manual alphabet. The use of conceptually appropriate signs in conversation emphasized; receptive skills developed further. Prerequisite: EDUC 481 or permission of instructor. Spring.

EDUC 483 Advanced Sign Language (3) Opportunities to communicate solely in sign language in a variety of activities and situations. Prerequisites: EDUC 481, 482; or permission of instructor.

EDUC 487 Education of Gifted and Talented Children (3) Examines definitions of the term "gifted," delineates characteristics unique to the gifted and talented, and reviews procedures used to identify these children. The nature of creativity and the direction of programs for youth of diverse abilities considered. Related research reviewed. Prerequisite: Junior level in teacher education or permission of instructor.

EDUC 488 Curriculum and Methodology in Gifted/Talented Education (3) Reviews curricular programs for gifted and talented children and youth. Introduces methods for developing creativity and problem-solving skills. Examines procedures for content augmentation are considered and program models. Prerequisite: Junior level in teacher education or permission of Instructor.

EDUC 490 Schools in a Changing Society (3) Capstone course in education. Focuses on the many ways education and other social insti-

tutions are influenced by societal and cultural changes. Historical and current social issues affecting education are analyzed and evaluated from historical, economic, political, multicultural, legal, moral, and ethical perspectives. Limited to seniors who have been fully admitted to teacher education and who meet all student teaching requirements or who have permission of instructor. Fall, spring.

EDUC 497 Supervised Teaching and Observation in Elementary, Middle School, Junior High, and Senior High (1) Teaching, observation, and participation activities under the supervision of a classroom teacher or community agency staff member and a University supervisor. Fall, spring.

EDUC 498 Seminar: Field Experience in English Schools (1) Study of the British education system. May include both classroom and field-based experiences to promote understanding of contrasts and comparisons of the American and British system.

EDUC 499 Seminar: Basic Issues in Education (1) Seminar, workshops, or independent research projects on issues and problems in modern education. Prerequisite: Instructor's approval. For graduate-level courses, please refer to the graduate course descriptions in this catalog.

EDUC 437ED Supv Tchg in Special Classes (for Disab) (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Passing grade in EDUC-400, Admission to Student Teaching. Students register for EDUC 437 MD, SD, EH according to the educational setting desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and in EDUC 439. Fall, spring.

EDUC 437MD Supervised Teaching in Special Classes - Mild Disabilities (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Admitted to teacher education; grade of C or better in all required courses; EDUC 210, 324, 420, 426, 427, with GPA of at least 2.75 in those courses; senior status with overall GPA of at least 2.70. Students register for EDUC 437 MD, SD, ED according to the certification area desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and/or in EDUC 439 in a second exceptionality area. Fall, spring.

EDUC 437SD Supv Tchg in Special Classes (for Disab) for Severe Disabilities (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Passing grade in EDUC-400, Admission to Student Teaching. Students register for EDUC 437 MD, SD, EH according to the educational setting desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and in EDUC 439. Fall, spring.

EDUC 439ED Supv Tchg in Special Classes (for Disab) for Emotionally Handicapped (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Passing grade in EDUC-400, Admission to Student Teaching. Students register for EDUC 437 MD, SD, EH according to the educational setting desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and in EDUC 439. Fall, spring.

EDUC 439EH Supervised Teaching in Special Classes for Emotionally Handicapped (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Admitted to teacher education; grade of C or better in all required courses; EDUC 210, 324, 420, 426, 427, with GPA of at least 2.75 in those courses; senior status with overall GPA of at least 2.70. Students register for EDUC 437 MD, SD, ED according to the certification area desired. Students in the Clinical Training

Program in special education enroll in EDUC 437 and/or in EDUC 439 in a second exceptionality area. Fall, spring.

EDUC 439MD Supv Tchg in Special Classes (for Disab) for Mild Disabilities (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Passing grade in EDUC-400, Admission to Student Teaching. Students register for EDUC 437 MD, SD, EH according to the educational setting desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and in EDUC 439. Fall, spring.

EDUC 439SD Supv Tchg in Special Classes (for Disab) for Severe Disabilities (6) Teaching and other activities under the supervision of a cooperating teacher and a University supervisor in special education. Prerequisites: Passing grade in EDUC-400, Admission to Student Teaching. Students register for EDUC 437 MD, SD, EH according to the educational setting desired. Students in the Clinical Training Program in special education enroll in EDUC 437 and in EDUC 439. Fall, spring.

EDUC H498 Seminar: Field Experience in English Schools (1) Study of the British education system. May include both classroom and field-based experiences to promote understanding of contrasts and comparisons of the American and British system.

Electrical Engineering (EE)

Electrical engineering courses are taught by the faculty of the Department of Electrical Engineering and Computer Science. Pre-engineering students and students not admitted to the College of Engineering and Computer Science may not enroll in any electrical engineering (EE) course numbered 200 or above without specific permission of the instructor, chair, or dean.

EE 210 Circuits (3) Integrated lab/lecture covers the fundamentals of electrical circuit analysis. Introduces foundational circuit theorems and analysis methods. These include: Ohm's law, Kirchhoff's laws, circuit reduction, node voltage analysis, mesh current analysis, superposition, and Thevenin and Norton equivalent circuits. The current-voltage characteristics for resistors, capacitors, inductors, diodes, and transistors are discussed. Additional topics include analysis of resistive DC circuits, operational amplifiers, the natural and step responses of first and second-order RLC circuits, the steady-state sinusoidal response of RLC circuits, and common diode and transistor applications. Theoretical principles verified by circuit construction and measurement and through the use of circuit simulation software. Students learn to use a variety of electrical test equipment including voltmeters, ammeters, ohmmeters, and digital and analog oscilloscopes. Prerequisite: MATH 222. Corequisite: MATH 323 or permission of instructor. Fall, spring.

EE 215 Circuits and Systems (3) An integrated lab/lecture covers linear system theory as applied in the analysis of electrical circuits. Topics include the sinusoidal steady-state response and phasors, the Laplace transform, Fourier series and the Fourier transform, passive and active frequency selective circuits (filters), and Bode diagrams. Theoretical principles verified by circuit construction and measurement and through the use of circuit simulation software. Prerequisites: EE 210. Corequisite: MATH 324 or permission of instructor. Spring, summer.

EE 224 Electrical Engineering Programming Lab (2) Provides advanced programming concepts for electrical engineering majors. The course is specifically aimed at programming microcontrollers and the use of programming tools in electrical engineering. Topics covered include bit manipulation, memory allocation concepts, architectural considerations, real time events, specialized microcontroller I/O, and

programming with MATLAB and other simulation tools. Prerequisites: EE 210 and either ENGR 123 or CS 210. Spring.

EE 254 Logic Design (3) Presents a thorough treatment of combinational and sequential logic design. Topics include number systems, Boolean algebra, minimization procedures, sequential circuit design, flipflops, counters, registers, and finite-state machines. Logic design is applied to computer architecture and microprogramming and hard-wired concepts are introduced. Programmable logic devices and computer aided design tools for digital circuits used for class projects. Spring.

EE 310 Linear Systems and DSP I (3) Provides a unified treatment of continuous-time and discrete-time linear signals and systems. Topics include introduction to the mathematical representation of signals, system characterization, convolution, and system analysis in the time and frequency domains using differential equations, statevector equations and transform techniques. Fourier, Laplace, Z, and discrete-Fourier transform techniques of signal and system analysis presented. Prerequisites: EE 215; MATH 324. Fall.

EE 311 Linear Systems and DSP II (3) Provides an application of discrete system analysis and design techniques to digital signal processing (DSP). Reviews difference equations, the Z transform and the discrete Fourier transform. Topics include analysis and design of recursive and non-recursive filter structures, analog filter approximations, the realization problem, the Fast Fourier Transform, and two-dimensional filtering. Projects include MatLab simulations and implementations on real-time DSP systems using C. Prerequisite: EE 310. Spring.

EE 320 Engineering Electromagnetics (3) Introduction to electromagnetic field theory. Topics include Maxwell's equations, divergence, Poisson's and Laplace's equations, conductance and capacitance, Stokes's theorem, retarded potentials, Poynting theorem, and skin effect. Prerequisites: EE 215, MATH 323 and PHYS 211. Recommended: MATH 324. Fall.

EE 330 Introduction to Power Systems (3) Introduces the principles and concepts that are the basis of electric power systems. Topics include single phase and three phase systems, the per-unit system, synchronous generators, single phase and three phase power transformers modeling and design, transmission line models for steady state operation, transmission system design, line load-ability and stability limits, power flow analysis, fault tolerance, and optimal dispatch of generation. Prerequisite: EE 215.

EE 342 Electronics I (3) Lecture/project covers analysis and design of diode and transistor circuits. Diode, metal-oxide-semiconductor field-effect transistor (MOSFET) and bipolar junction transistor (BJT) device characteristics are explored in detail. Major topics include diode applications, transistor amplifiers, and digital logic families. Specific topics include amplifier characteristics, circuit models for amplifiers, the pn junction, ideal diodes, modeling diode forward characteristics, reverse breakdown of diodes, MOSFET and BJT device structures, MOSFET and BJT amplifiers in DC, MOS small-signal operation and discrete-circuit amplifiers, complementary metal-oxide-semiconductor (CMOS) inverters, CMOS logic-gate circuits, pass-transistor logic (PTL) circuits, and emitter-coupled logic (ECL) circuits. Several small team projects are used to reinforce theory and to develop design skills. Prerequisites: EE 210. Corequisite: EE 254 or permission of the instructor. Fall.

EE 343 Electronics II (3) Lecture/project with continued coverage of material presented in Electrical Engineering 342. Major topics include BJT amplifiers, IC amplifiers, differential amplifiers, non-ideal operational amplifiers, and frequency effects. Specific topics include small-signal operation and models of BJTs, discrete-circuit BJT amplifiers, IC amplifiers, current-mirrors with improved per-

formance, BJT and MOS differential pair circuits, common-mode rejection ratio, DC imperfections of op amps, large signal operation of op amps, LM741 op amp circuit, high frequency BJT and MOS models, and the high and low frequency response of transistor amplifiers. Several small team projects are used to reinforce theory and to develop design skills. Prerequisites: EE 215, 342.

EE 354 Digital Systems (3) Takes up the logical design of computer systems with emphasis on the interaction between hardware and software. Topics include register design, memory systems, programmable I/O devices, interrupt driven I/O, controller design and microprogramming, bus systems, interface electronics, and assembly language programming. Computer aided design tools are used throughout course. Several different microcontrollers are used for projects to illustrate concepts. Assembly language and C used for class projects. Prerequisites: EE 254; working knowledge of C or C++. Fall.

EE 356 Small Computer Software (3) Introduction to the graphical user interface provided by the WindowsT operating system using C#.NET. Topics include the console applications, windows forms, elementary graphics, ASP.NET web forms, ADO.NET, TCP/IP connection between computers, and dynamic-link libraries (DLLs) and/or device drivers. Prerequisites: ENGR 123 or CS 210; EE 254 or CS 220. Same as CS 376. Fall.

EE 360 Linear Control Systems (3) Introduction to analysis and design of linear analog and digital feedback control systems. Topics include system modeling, time and frequency domain performance analysis, stability analysis, and controller design. Introduces both rootlocus and frequency domain techniques of system analysis and design. Presents emulation techniques for digital controller design. Prerequisite: EE 310. Spring.

EE 380 Intermediate Electrical Projects Lab (2) Provides for the design and construction of several openended projects chosen from 300 level electrical engineering courses. Project areas include digital and analog electronics, linear systems, logic design, microcomputers, electromagnetics, electro-optics, and circuits. Prerequisites: EE 310, 342, and 354. Spring.

EE 410 Analog Circuit Synthesis (3) Lecture/project covers analysis and design of active circuits. Major topics include feedback, instrumentation amplifiers, active filter design, non-linear circuits, signal generators, and voltage regulation circuits. Prerequisites: EE 310, 343.

EE 415 Digital Image Processing (3) A study of the computer methods used in processing digital images. Topics include: image acquisition, image enhancement and restoration, image representation, computer image file formats, and image compression. Processing of both monochrome and color images is discussed. Representation and processing of images in the spatial (pixel) and frequency domains is covered. Prerequisite: EE 310

EE 421 Photonics I (3) Introduction to basic optics, optical devices and lasers. Topics include geometrical and physical optics, ray matrices, optical fiber characteristics, losses, dispersion, transverse electromagnetic modes, and communications. Examples of current applications and laboratory demonstrations provided. Prerequisite: EE 215 Corequisite: EE 320. Spring.

EE 422 Photonics II (3) Introduction to lasers and laser systems. Topics include stable optical cavity design, atomic media characteristics, gain equations, rate equations, cavity modes, cavity devices mode control, and pulse forming networks. Prerequisite: EE 421.

EE 425 Lines Waves and Antennas (3) Examines transmission lines, waveguides, and antennas. Topics include transmission line equations, Smith charts, slotted lines, microwave impedance matching, plane wave propagation, radiation patterns, and antenna arrays. Prerequisite: EE 320. Taught by request.

EE 430 Energy Conversion Systems (3) Introduces theory of operation and analysis of energy conversion devices and systems. Topics include magnetic and electric forces, electromechanical energy conversion, motors, energy storage, solar electric, wind power, small hydro, fuel cells, biomass, and geothermal. Includes a project lab. Prerequisites: EE 210; MATH 222.

EE 432 Analysis of Power Systems (3) Covers operation, control, protection, and stability of power systems. Topics include power flow analysis, synchronous machine transient analysis, symmetrical components, balanced and unbalanced fault analysis, power system control, frequency control, automatic generation control, reactive power and voltage control, stability analysis, and protection of power systems. Prerequisite: EE 330 or 430.

EE 437 Power System Planning (3) Covers topics in distribution system planning, load characteristics, design of subtransmission lines, distribution substations, primary and secondary systems, application of capacitors, voltage regulation, distribution system protection, and reliability. Prerequisite: EE 330.

EE 438 Electric Power Quality (3) Focuses on such subjects as harmonics, noise, filtering, and communication interference in power systems. Modeling, analysis, and solutions are points of emphasis. Topics include measures and standards of power quality, measurements and errors, modeling and design of components, harmonics, loads which cause power quality problems, susceptibility of loads to unwanted signals, and power quality improvement.

EE 440 Communication Electronics (3) Lecture/project focuses on circuits used in modern wireless communication devices. Topics include high frequency passive component models, transmission line and microstrip theory and the Smith chart, multiport networks and scattering parameters, radio frequency filter design, high frequency active devices and models, matching networks, radio frequency amplifiers, oscillators, and mixers. Prerequisites: EE 320, 470. Fall.

EE 445 Industrial Electronics and Controls (3) Introduces power electronic systems and design of power electronic devices used for commercial and industrial instrumentation and control. Topics include magnetic materials and design, semiconductor switches, power diodes, rectifiers, inverters, ac voltage controllers, level triggered switching devices, power MOSFETS, IGBT, pulsed triggered devices, thyristors, GTO, MCT, thyristor circuits, power transistors, dc to dc converters, switch-mode power supplies, dc to controlled ac, UPS, ac to controlled ac, ac and dc motor drivers. Prerequisite: EE 342.

EE 454 Microcontroller Applications (3) Focuses on the use of microcontrollers in real-time applications. Organized around several open-ended projects. Each project requires the complete design of a working microcontroller system for a given application and programming in C. Prerequisite: EE 354. Spring.

EE 456 Small Computer System Design (3) Project-based course covers advanced design and development topics related to real-time microcomputer systems and networks. Topics include memory management, data structures, network architecture, communication protocols, power considerations, hardware design, and hardware/software trade-offs. Prerequisites: EE 354, 454. Taught by request.

EE 458 Embedded Systems and Real-Time Programming (3) Covers real-time programming techniques that are commonly used on embedded systems. Topics include real-time operating system concepts, concurrent programming and task scheduling algorithms, mutual exclusion and synchronization methods, and interprocess communication. Real-world experience writing applications for two popular embedded operating systems. Prerequisites: CS 215; EE 354 or CS 220; or permission of instructor. Same as CS 478. Spring.

EE 465 Digital Control Systems (3) Advanced analysis and design of linear systems. Analysis and design of digital control systems emphasized through classroom discussions, homework assignments and design projects. Both classical and modern control system design techniques studied. Prerequisite: EE 360.

EE 470 Analog and Digital Communications Theory (3) Communication theory for both digital and analog systems. Emphasis on digital systems. Topics include Fourier analysis, modulation and demodulation theory, digital signaling formats, communication systems design fundamentals, and applications. Probability and random processes introduced and applied to the study of narrow band noise in communication systems. Prerequisite: EE 310. Fall.

EE 471 Wireless Communication Theory (3) Provides a mathematical treatment of random processes as they apply to electrical systems. Topics include probability and random variables, functions of random variables, conditional statistics, correlation functions, power density spectrum, Gaussian white noise, and random signal processing. Prerequisites: EE 310; MATH 324; MATH 365 or ENGR 390; or permission of instructor. Spring.

EE 494 Senior Project Seminar (0) Provides guidance for the selection of a topic in the senior design project sequence. Projects, including industry-sponsored projects, presented for student selection. Prerequisite: 12 hours of 300-level electrical engineering courses. Spring.

EE 495 Senior Project Phase I (3) Plan the engineering project and formulate the preliminary design under the guidance of faculty and industrial advisors. Seminar sessions address professional ethics and the social and political contexts of engineering. The economic, environmental, health, and safety aspects of the project are addressed in a written engineering proposal, as are the issues of manufacturability and sustainability. An oral presentation of the proposal is required. Students submit written reaction to seminar topics. Prerequisites: EE 380, 494; GPA of at least 2.0. Fall, spring.

EE 497 Senior Project Phase II (3) Complete the design proposed in Electrical Engineering 495 and build a prototype. A formal design review conducted early in the semester. Written final report, oral report, and demonstration of the completed project required. Prerequisite: EE 495. Fall, spring.

EE 498 Independent Study in Electrical Engineering (1) (variable credit) Independent study of a topic of interest to the student. Requires faculty sponsor and approved detailed study plan.

EE 499 Special Topics in Electrical Engineering (1-3) Study of topics of special interest. Topics will be announced. May be repeated. Prerequisites announced when scheduled.

Engineering (ENGR)

Interdepartmental engineering courses are taught by the faculty of the College of Engineering and Computer Science. Pre-engineering students and students not admitted to the College of Engineering and Computer Science may not enroll in any engineering (ENGR) course numbered 200 or above without specific permission of the instructor, chair, or dean.

ENGR 071 Internship (0) Full-time employment for a period of 10-16 weeks in a professional or paraprofessional role associated with the student's major. Students register for Engineering 07X in the Xth term of employment. Requires prior approval of the job description by the co-op director or designee and submission of a written summary and evaluation of the work experience. May be repeated for a total of three experiences. Prerequisite: At least 18 hours of course work of which at least nine hours represent progress toward a degree in engineering or computer science must have been taken during the previous two academic terms.

ENGR 089 Concurrent Co-op (0) Part-time employment in a professional or paraprofessional role associated with the student's major. Students register for Engineering 08X in the Xth term of employment. Requires full-time student status, prior approval of the job description by the co-op director or designee and submission of a written summary and evaluation of the work experience. Students are expected to work no less than eight and no more than 15 hours per week. At least 10 weeks of work must be completed during the semester or summer session. May be repeated. Corequisite: Registration for at least 12 hours of course work, of which at least six represent progress toward a degree in engineering or computer science during fall and spring semesters; registration for six hours, of which three represent progress toward the degree during summer.

ENGR 100 Technical Learning Skills for International Students (3) Introduces technical concepts to students for whom English is a second language. Reviews basic material from mathematics, physics, chemistry, and computer application with emphasis on problem formulation, technical communication skills, and teamwork. Offered as needed.

ENGR 101 Introduction to Engineering (3) A hands-on introduction to civil, computer, electrical, and/or mechanical engineering. Topics include the use of the computer in engineering and an introduction to the design process. Student teams led by faculty (typically the students' academic advisor) complete design projects in a particular discipline. Prerequisite: Completion of all required English language courses or permission of instructor. Fall.

ENGR 102 Introduction to Engineering for International Students (3) Hands-on introduction to civil, computer, electrical and/or mechanical engineering. Includes the use of computers in engineering and an introduction to the design process. Completion of a project under the direction of a faculty member. Special attention given to proper use of the English language in engineering education and practice. Enrollment limited to students for whom English is a second language. Credit not given for both ENGR 101 and 102. Offered as needed.

ENGR 123 Programming for Engineers (3) Introduction to structured programming of computers in a modern high level language. Students complete programming projects which include loop and branch constructs, the use of subprograms, algorithm design, arrays, debugging software and techniques, file I/O and class constructs. Spring.

ENGR 189 Technical Skills (1) An independently studied laboratory course in which students carry out projects designed to teach basic technical skills in the student's field of interest. Repeatable course. Content changes each time course is offered. Repeatable up to three credit hours. Prerequisite: Permission of instructor.

ENGR 212 Statics (3) Includes resolution and composition of forces and moments using vector analysis, principles and application of equilibrium to trusses, beams, frames and machines, centroid calculations, second moments of areas, internal load determination, shear and moment diagrams, and friction. Prerequisite: MATH-221; C- or better, or permission of instructor. Fall, spring.

ENGR 213 Dynamics (3) Covers rectilinear and curvilinear motions, force, mass, acceleration, projectiles, pendulums, inertia forces in machines, work and energy, impulse and momentum, and impact. Prerequisite: ENGR 212 with a grade of C- or better. Fall, spring.

ENGR 230 Materials Science (3) Introduces properties of materials, discusses bonding, nature of metals, polymers, ceramics, crystals and crystal defects, and structure sensitive and insensitive properties. Prerequisite: CHEM 118 or permission of instructor. Spring.

ENGR 232 Mechanics of Materials (3) Covers general principles of stress and strain, including elastic and inelastic behavior stress and strain transformation, stress calculations for direct shear and torsion; analysis of beam behavior, including flexural stresses and deflections, combined stresses, applications involving statically indeterminate systems, and buckling of compression members. Prerequisite: ENGR-212 with a grade of C- or better. Fall, Spring.

ENGR 283 Technical Skills for Archaeologists I (2) Introduces archaeology students to skills and techniques useful in field work. Topics include introduction to surveying equipment, measurement of distance, horizontal angles, traverses, differential leveling, and mapping. Prerequisite: Sophomore standing. Fall.

ENGR 352 Numerical Methods for Engineers (3) Fundamental mathematical principles and techniques of numerical methods and how to apply them, using high level computer languages, to solve engineering problems. Develop skills in mathematical computer modeling and analysis of engineering problems. Prerequisites: ENGR-213 and MATH-324, both with a grade of C- or better, or permission of instructor.

ENGR 366 Fluid Mechanics (3) Introduces the physical properties of fluids and the mechanics of fluid flow. Covers general properties of fluids, fluid statics and dynamics, and dimensional analysis. Applications studied include pipe systems, aerodynamic drag, open channel flow, and compressible flow. Prerequisite: ENGR-213 with a grade of C- or better. Fall, Spring.

ENGR 390 Applied Engineering Mathematics (3) Develops understanding of practical mathematical analysis with applications in various engineering disciplines. Probability and statistical analysis. Practical numerical analysis. Linear algebra and matrices. Applications in civil, mechanical, and electrical engineering. Prerequisite: MATH 222. Fall, spring, summer.

ENGR 409 Engineering Economy and Decision Making (3) Introduction to engineering economy including cash-flow, time value of money, equivalence, annuities, present and future worth, rate of return, break-even analysis, replacement analysis, and benefit cost analysis. Includes industrial cost measurement techniques, risk analysis, and project scheduling and management techniques. Case studies and guests from industry offer realistic perspective.

ENGR 495 Interdisciplinary Design Project I (3) Preliminary planning and conceptual design for interdisciplinary project. Students form teams with members from several branches of engineering and/or other disciplines as appropriate to the project. Students participate in class discussions on professional ethics, scheduling and time management, technology and society, as developed in one of: Civil Engineering 495, Computer Science 495, Electrical Engineering 495, Mechanical Engineering 495. Prerequisites: Permission of the College of Engineering and Computer Science Interdisciplinary Project Committee plus all prerequisites listed for one of CE 495, CS 495, EE 495, ME 495. Fall.

ENGR 497 Interdisciplinary Design Project II (3) Final design and construction of interdisciplinary project. Completion of work begun in Engineering 495. Students form teams with members from several branches of engineering and/or other disciplines as appropriate to the project. Teams make oral and written presentations to faculty advisors and project sponsor(s). Performance standards developed in one of CE 497, CS 497, EE 497, ME 497. Prerequisites: Permission of the College of Engineering and Computer Science Interdisciplinary Project Committee; ENGR 495. Spring.

ENGR 498 Independent Study in Engineering Management (1) Independent research project in engineering management. Requires review of current literature, interviews with professional representa-

tives, and other forms of data collection appropriate for the research topic with results documented in a final research report. Prerequisite: ENGR 390 or 409 and permission of instructor.

English (ENGL)

English courses are taught by the faculty of the Department of English.

ENGL 120 Introduction to Literature (3) Provides an introduction to close reading in the three major genres-fiction, poetry, and drama. Students will learn technical vocabulary appropriate for literary analysis and write frequent papers based on reading and class discussion.

ENGL 122 Modern World Literatures (3) Covers poetry, short fiction, novel, and drama of the 20th and 21st centuries, primarily in translation.

ENGL 223 World Classics (3) Explores some of the world's finest imaginative literature from the age of Homer through the 19th century. Specific works vary from section to section.

ENGL 231 Masterpieces of British Literature I (3) Studies major works of British literature from 750 to 1780. Includes such authors as Chaucer, Spenser, Marlowe, Jonson, Milton, Defoe, and Swift.

ENGL 232 Masterpieces of British Literature II (3) Examines classics of British literature from 1780 to 1945. Considers such authors as Wordsworth, Byron, Shelley, Dickens, Wilde, Lawrence, and Woolf.

ENGL 233 Masterpieces of British Literature III (3) Studies major works of British literature from 1945 to the present. Includes such authors as Beckett, Pinter, Churchill, Hughes, Duffy, Murdoch, and Rhys.

ENGL 241 Major American Writers I (3) Focuses on significant American works before the U.S. Civil War; the emphasis is on the central figures of the American Renaissance, including Poe, Emerson, Douglass, Thoreau, Hawthorne, Melville, Whitman, and Dickinson.

ENGL 242 Major American Writers II (3) Covers major American works from the U.S. Civil War to World War II. The course emphasizes writers such as Frost, Eliot, Faulkner, Cather, Hughes, Hemingway, Fitzgerald, and Steinbeck.

ENGL 243 Major American Writers III (3) Covers important American works published since World War II. The course may include writers such as Toni Morrison, James Baldwin, Philip Roth, John Updike, Tim O'Brien, Allen Ginsberg, JD Salinger, Bob Dylan, and Sylvia Plath.

ENGL 300 Early English Writers (3) Studies Anglo-Saxon verse as well as major works of later medieval literature such as *The Canterbury Tales*, *Sir Gawain and the Green Knight*, *Pearl*, *Piers Plowman*, *Morte D'Arthur*, and lyric poetry. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 310 The Renaissance & 17th Century (3) Covers English literature from Wyatt and Surrey through Milton. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 330 Special Topics in Literature (3) Focuses on particular writers or a particular literary movement, subject or period. Past topics have included Fitzgerald and Hemingway, Modern Irish Literature, and JRR Tolkien. Repeatable up to three times with different subject. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 335 Children's Literature (3) Focuses on classic or "golden age" children's literature as it develops in the nineteenth and early twentieth centuries. Considers the lasting influence of such literature, and may also include study of contemporary picture books and "second golden age" texts. Includes such writers as Carroll, Barrie, Baum, Burnett, Stevenson, Sewell, Grahame, Wilde, and Milne. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 340 Contemporary World Literatures (3) Explores contemporary literature (fiction, poetry, drama) in English and English translation from around the world. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 343 Norse Myth, Saga, and Legend (3) Studies the Eddas and sagas of Norway and Iceland plus related works elsewhere in northern Europe. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 344 Masterpieces of Russian Literature (3) Explores the great works of 19th and 20th century Russian literature with focus on such writers as Pushkin, Gogol, Turgenev, Dostoyevsky, Tolstoy, and Chekhov. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 348 Women's Literature: Special Topics (3) Focuses on women writers in a variety of genres and contexts. Repeatable up to 3 times with title change. Topics have included: 20th Century American Women Novelists, Modernism in Women's Literature, and *The Works of Jane Austen*. Prerequisite: One ENGL course or permission of instructor.

ENGL 350 Shakespeare (3) Studies 8 of Shakespeare's greatest plays. This course engages with histories, the comedies and the tragedies. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 351 The British Novel (3) Explores the development of the British novel with focus on such major authors as Defoe, Goldsmith, Austen, Bronte, Dickens, Hardy, Joyce, and Woolf. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 352 Young Adult Novel (3) Explores the contemporary young adult novel in context of the developing novel. Emphasizes diversity of genre and cultural/social context, and may include such authors as Alexie, LeGuin, Dickens, L'Engle, Meyer, Rowling, and Yang. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 353 The American Novel (3) Surveys several landmark achievements in the American Novel. This course may include works by Melville, James, Cather, Fitzgerald, Hemingway, Faulkner, and others. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 361 African-American Literature (3) Focuses on significant texts and major aesthetic achievements of the African-American tradition, as well as their historical contexts. Includes politically and socially significant drama, poetry, short stories, novels, and essays. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 370 Age of Enlightenment (3) Studies eighteenth-century British figures such as Pope, Swift, Johnson, Boswell, Sheridan and Goldsmith. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 375 The Romantic Movement (3) Covers major English writers from 1789 to 1837. Emphasizes Wordsworth, Coleridge, Byron, Shelley and Keats. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 380 The Victorian Period (3) Explores British literature from 1837 to 1901, with emphasis on the Victorian writer as poet, sage, and novelist. Includes such authors as Barrett, Browning, Tennyson, Newman, Gaskell, and Dickens. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 385 The Twentieth Century (3) Focuses on various authors, genres, and literary movements in the twentieth century, depending on the emphasis chosen by the professor. Past topics have included American immigrant literature and European modernism. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 399 Independent Study in Literature (1-3) Provides the opportunity to do an independent study in English-language literature. This course might be one-on-one with a designated professor or in a small group. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 445 Seminar in Literary Criticism (3) Introduces the student to major literary critics, from Plato to the present, and covers critical approaches to drama, fiction and poetry. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 480 Literature & Its Relations (3) Relates a body of literature to theoretical and/or artistic works of kindred disciplines. Specific topics vary from semester to semester. Capstone course for English majors. Prerequisite: Complete one ENGL course or permission of instructor.

ENGL 495 Capstone Experience in Literature (1) A one credit hour course that must be taken in conjunction with an approved three credit hour English (literature) course, 300 or 400 level, in order to meet the general education capstone requirement.

English Language (EL)

English language courses are taught by the faculty of the Intensive English Center. Enrollment is limited to students whose native language is other than English. A nonnative speaker of English may use up to nine hours of English language courses as elective credit if the student's program of study permits free electives.

EL 102 Pronunciation and Listening Comprehension (2) Focus on pronunciation problems and aural comprehension skills. Listening dictation with emphasis on note-taking skills is a major part of course. Offered first half of each semester.

EL 103 Academic Conversation and Speaking (2) Focus on ability to participate effectively in open discussions and in giving speeches. Emphasis on listening to lectures and comprehending and discussing main ideas. Continued pronunciation practice included. Oral presentations may be required. Offered the second half of the semester.

EL 106 Reading Development (2) Emphasizes a number of reading skills including skimming, inference, and dictionary usage. Appropriate for the University student who has learned English as a foreign language. Reading selections may be both prose and non-prose. Vocabulary development and reading comprehension through context emphasized. Offered the first half of each semester.

EL 107 Advanced Reading (2) Expands upon skills learned in English Language 106 and enables students to improve comprehension of academic writing. Reading selections may be both prose and non-prose. Class activities include discussion, group work, projects, and written exercises. Offered the second half of each semester.

EL 110 Fund of Composition (3) For students whose primary language is not English. Provides instruction in writing English sentences, well-organized paragraphs, short compositions, and research paper format. Attention given to all aspects of composition - sentence structure, grammar, vocabulary, spelling, and punctuation.

EL 111 Advanced Composition (3) For students whose primary language is not English. Builds on writing skills studied in English Language 110 and applies these to compositions, reaction papers, and research papers. Emphasis centers on vocabulary choice, syntax, conciseness, and reader-interest techniques. Prerequisite: English Language 110 or demonstrated proficiency on a UE administered writing placement exam.

Environmental Studies (ES)

Environmental studies courses are taught by faculty members of various departments.

ES 103 Fundamentals of Environmental Science (3) Introduces interdisciplinary nature of problems relating to the human environment, including social, political, and economic aspects.

ES 240 Alternative Energy & Energy Efficiency (3) The student team in this course will study current and developing alternative energy technologies to learn about the feasibility of installing them in commercial and residential buildings in Evansville. They will gain hands-on experience by taking clients from the community and thoroughly evaluating their buildings' energy use, its available solar and wind resources, waste heat, and power and heating needs. They will do calculations to determine feasibility of using various alternative energy and energy efficiency technologies and make recommendations on their implementation.

ES 299 Special Topics in Environmental Studies (1-4 credits) Lecture, discussion, and/or lab devoted to a topic not covered in regular environmental studies courses. Topics vary depending on interests of faculty and students. May be repeated. Prerequisites announced when scheduled. Fall, spring.

ES 360 Science of Environmental Pollutants (3) Using discussion format and student presentations, course clarifies the sources of pollutants and their transport in the environment and discusses monitoring and remediation of pollution. Special attention given to pollution of the atmosphere, surface water, and groundwater. Presumes a familiarity with ecological concepts. Some discussion of important legislation related to pollution incorporated. Prerequisite: CHEM 118. Recommended: BIOL 118 or ES 103

ES 440 Environmental Law and the Regulatory Process (3) Analysis of political and organizational processes that influence the formulation, implementation, and evaluation of public policy. Focus placed on ecosystems, population, biodiversity, and global as well as domestic governance. Prerequisites: BIOL 118 or ES 103; PSCI 143.

ES 441 Alternative Energy & Energy Efficiency (3) The student team in this course will study current and developing alternative energy technologies to learn about the feasibility of installing them in commercial and residential buildings in Evansville. They will gain hands-on experience by taking clients from the community and thoroughly evaluating their buildings' energy use, its available solar and wind resources, waste heat, and power and heating needs. They will do calculations to determine the feasibility of using various alternative energy and energy efficiency technologies and make recommendations on their implementation. ES 441 is appropriate for students who want to earn 400-level credit for the alternative energy course and will assume a leadership/management role in the course. Students who do not want a leadership role are encouraged to enroll in ES 240.

ES 495 Environmental Studies Internship (1) (3-8 credits) Field experience for environmental studies majors under the supervision of a professional in an environmentally related area. Prerequisite: Written application for internship must be received by the environmental studies program director prior to beginning the internship. Fall, spring.

ES 499 Advanced Special Topics in Environmental Studies (1-4 credits) Lecture, discussion, and/or lab devoted to an advanced topic not covered in regular environmental studies courses. Topics vary depending on interests of faculty and students. May be repeated. Prerequisites announced when scheduled. Fall, spring.

Ethics and Social Change (ETH)

Ethics and Social Change courses are taught by faculty members of the Department of Philosophy and Religion.

ETH 121 Introduction to Ethics (3) Presents a systematic and historical discussion of moral and social values through classical and contemporary readings. Emphasis on applying moral theories to concrete moral problems.

ETH 200 Social Justice Movements (3) This course provides an introduction to the role of world religions in a wide range of liberation struggles and social justice movements from around the globe.

ETH 301 Selected Topics in Ethics and Social Change (3) Studies selected topics related to ethics. Specific topics may vary each time the course is taught. May be repeated for credit as the selection of topics changes. Prerequisite: One course in ethics, philosophy, or religion; or permission of instructor.

ETH 345 Complex Systems & Social Change (3) Studies dynamics of social change from a complex systems perspective. Focuses on basic concepts (e.g., resilience, robustness, phase change, self-organized criticality, etc.) insofar as they characterize collective human behavior in social situations. Specific topics may include bias contagion and prejudice reduction, civil unrest and protest behavior, human rights propagation, and the evolution of cooperation. Includes a computer modeling component, but no previous knowledge of mathematics or computer programming is necessary. Prerequisite: Major or minor in Ethics and Social Change, or permission of instructor.

ETH 375 Social Change Field Experience (3) Offers students the opportunity for supervised field experience in an area of work directly relevant to ethics and social change, under the direction of a member of the Ethics Committee. To be completed by the end of sophomore year. Prerequisite: ETH-121. Open only to students majoring or minoring in Ethics and Social Change.

ETH 475 Social Change Field Experience (3) Offers advanced students the opportunity for supervised field experience in an area of work directly relevant to ethics and social change, under the direction of a member of the Ethics Committee. Prerequisite: ETH-200. Junior or senior standing. Open only to students majoring or minoring in Ethics and Social Change.

ETH 491 Direct Study in Ethics Social and Change (1) Offers the opportunity for independent research in special problems under the direction of a member of the ethics faculty. Repeatable course. Content changes each time course is offered. Prerequisite: Permission of instructor.

ETH 499 Ethics and Social Change (3) Provides opportunity for integration of the academic study of ethics with a particular ethical problem. Prerequisite: Senior standing and ETH-121, ETH-200 and ETH-375, or permission of instructor.

Exercise and Sport Science (EXSS)

Exercise and sport science courses are taught by the faculty of the School of Public Health.

EXSS 112 Human Anatomy and Physiology 1 (4) First half of a two-semester course that provides a comprehensive study of the structure and function of the human body, from the cell to the entire organism. Uses a systems approach emphasizing how these systems work together to maintain homeostasis. Systems studied include: integumentary, skeletal, muscular, digestive, reproductive. Three hours lecture, two hours lab.

EXSS 113 Human Anatomy and Physiology 2 (4) Second half of a two-semester course continues study of the structure and function of the human body using a systems approach. Systems studied include:

nervous, endocrine, circulatory, immune, respiratory, urinary. Three hours lecture, two hours lab. Prerequisite: EXSS 112 with a grade of C- or better.

EXSS 150 Introduction to Health Sciences (2) Overview of the career opportunities available in exercise and sport science. Each student develops a personal profile which includes factors that influence an individual's career choice. Included in this profile is the development of both a personal and professional philosophy, assessment of one's lifestyle preferences, plus a professional research project in one's preferred career choice.

EXSS 201 Intro to Sport Management (3) This course introduces the student to the sport management profession. Primary focus is on the sport industry, including professional sport entertainment, amateur sport entertainment, for-profit sport participation, nonprofit sport participation, sporting goods, sports tourism and sport services. This class will provide the foundation for concepts related to the management, marketing, legal and social aspects of sport management.

EXSS 211 History of Sport (3) Using interacting influences of economics, environment, nationalism, norms and values, philosophy, politics, religion, and technology, the evolution of physical activity and sport is investigated. Concentration is placed on Western Civilization and American sports. Special attention devoted to modern Olympic Games.

EXSS 218 Social Aspects of Sport (3) Explores the social roots of sport in contemporary society. Student thinks critically about sports to identify and understand social problems and issues associated with sports in society. This class examines issues of physical performance and records to see sports as social constructions that influence how people feel, think, and live. Emphasis is placed on American sport and society.

EXSS 220 Essentials of Human Anatomy & Physiology (4) Provides the essential details of anatomy and physiology of the body systems. Topics and systems covered include cells, tissues and organs, gross anatomy, and physiology of the nervous, endocrine, cardiovascular, respiratory, urinary, digestive, reproductive, muscular, and skeletal systems.

EXSS 222 Youth Fitness & Health Awareness (2) Students apply professional skills working with young people of various ages from the Evansville community. Students participate in interactive educational workshops. The workshops increase knowledge and encourage healthy lifestyle choices in the youth of Evansville.

EXSS 244 Practicum (1) A directed experience for the student who demonstrates a career interest in one of the majors offered within the Department of Exercise and Sport Science. Prerequisite: EXSS 150 or consent of instructor.

EXSS 245 Practicum (1) A directed experience for the student who demonstrates a career interest in one of the majors offered within the Department of Exercise and Sport Science. Prerequisite: EXSS 150 or consent of instructor.

EXSS 250 Officiating (1) Covers rules and procedures for officiating and provides opportunities for IHSAA certification in specific sports. Also offers practical experience in officiating.

EXSS 255 Recreational Sports Programming (2) Examines the fundamental aspects of a recreational sports program in varied settings. These settings include educational, industrial, correctional, public/private, commercial, and municipal. Upon completion of this course, students understand tournament and facility scheduling, participant development, equipment concerns, legal and financial concerns, and other aspects of recreational sports programming.

EXSS 310 Sport Law & Ethics (3) Provides students with an overview of US law and how it applies to the sport industry. Topics include tort

law, contract law, anti-trust law, and constitutional law. It also helps students learn to question, reason, and think in a fashion that will aid them in ethical dilemmas they may face in their future careers. Prerequisite: EXSS 150 or permission of instructor.

EXSS 320 Nutrition for Performance & Health (3) Provides an overview of the important concepts of nutrition that are required for athletic performance and general health benefits. Current topics in nutrition, team nutrition, performance, ergogenic aids, and diets reviewed and critiqued. Prerequisite: Permission of instructor.

EXSS 350 Sport Facility and Event Mgt (3) The purpose of this course is to educate students with a broad knowledge in facility and event management. Students will learn fundamental skills that are necessary for sport managers to run a facility or host an event. Topics include management theory, planning, facility systems, site design, volunteer management, and social responsibility. Prerequisites: EXSS 150; or permission of instructor.

EXSS 352 Physiology of Exercise (3) Introduces the physiological changes associated with exercise and sport training. Concentrates on cardiorespiratory, muscular, and metabolic adaptations to training, and how these changes affect human performance. This course also examines the influence of environmental factors and ergogenic aids upon exercise and athletic performance. Prerequisites: EXSS 112, 113 or 220.

EXSS 355 Practicum Intramural-Recreational Sports (1) Because course focuses on practical application of running recreational sports programs, students are required to (1) plan, implement, and research new and existing events and sports offered within the existing UE intramural program; (2) are on-site during many of the events to gain supervisory experience in event management; and (3) receive individual instruction from the intramural director and staff. Prerequisite: EXSS 255.

EXSS 356 Biomechanics (3) Covers principles of anatomy, physiology, physics, and other related sciences applied to analysis of motion. Prerequisites: Junior or senior standing; PHYS 100 or 121.

EXSS 383 Cur Dev. Lifetime Fitness Act. (3) Provides an understanding of the concepts, movements, skills, and abilities needed to teach and participate in various health-related fitness and recreational activities throughout life. Also gives student an opportunity to teach various health-related fitness and recreational activities to diverse populations. Prerequisite: EXSS 112 and 113, or 220.

EXSS 384 Lifeguarding (2) Provides the knowledge and skills necessary for the student to recognize and eliminate or minimize potential dangers at various types of swimming and diving facilities. Course content includes American Red Cross CPR certification for the professional rescuer. Additionally, the American Red Cross certification is available to successful candidates. Prerequisite: Permission of instructor.

EXSS 388 Exercise Prescription (3) Introduces and examines the anatomic and physiologic principles for prescribing exercise. Emphasis on skills required to evaluate fitness levels and develop programs for various components of fitness, including cardiorespiratory, flexibility, body composition, and strength for a variety of populations. Prerequisites: Junior or senior standing; EXSS 352; or permission of instructor.

EXSS 400 Principles Theories Strength & Conditioning (3) Provides practical skills necessary to design strength and conditioning programs. Special emphasis placed on ability to evaluate exercise movements, prescribe appropriate exercise programs, administer tests, and support program prescription with a sound knowledge of anatomical and physiological adaptation to exercise. Includes laboratory experiences that teach skills such as how to organize speed, agility,

and quickness drills; how to select and administer appropriate tests for athletic performance; and how to evaluate Olympic lifting technique. Prerequisites: EXSS 112 and 113, 352 and 388.

EXSS 415 Exercise Physiology II (2) A continuation of Exercise and Sport Science 352. Focuses on cardiovascular, respiratory, and metabolic responses to exercise. Emphasis on proper laboratory techniques, data collection, and data interpretation. Prerequisite: EXSS 352.

EXSS 417 Advanced Exercise Science (3) Provides an in-depth study of selected topics not contained in the required course work. Topics chosen from the following areas: anatomy, biomechanics, statistical analysis, and exercise physiology. Prerequisites: EXSS 352; or permission of instructor.

EXSS 427 Exercise Testing & Leadership (2) The application of exercise physiology and prescription to examine the physiologic responses to exercise. Emphasis is placed on appropriate testing methodologies, formulation of exercise prescriptions, and safe exercise leadership in a diverse population of individuals. Prerequisites: EXSS 352, 388; current CPR; or permission of instructor.

EXSS 428 Cardiac Rehab (3) A study of pathophysiology of common heart diseases with concentration in the design implementation and administration of multidimensional therapeutic cardiac rehabilitation program.

EXSS 451 Exercise/Sport Psychology (3) Provides an overview of the rapidly developing fields of exercise and sport psychology, including psychological aspects of sport performance and psychometric characteristics of sport participants. Topics in this class include the relationship of exercise to mental health. Special emphasis on theoretical and research issues important in the field of sport psychology is given. Prerequisites: Junior or senior standing or permission of instructor; PSYC 121.

EXSS 452 Adapted Physical Ed for K-12 Grades (3) Provides instruction in appropriate teaching methods and strategies of incorporating appropriate games and activities for children with special needs. Students learn to develop and implement an adapted physical education curriculum for children in elementary through high school. Prerequisite: Junior or senior standing or permission of instructor.

EXSS 453 Motor Learning (2) Provides an overview of the factors that affect the acquisition and performance of motor skills. Topics include the neural basis of human movement, perception, psychomotor learning and theories of neuromuscular integration, information processing, and individual differences. Methods for structuring the learning environment for optimal learning also discussed. Prerequisites: EXSS 356 or permission of instructor.

EXSS 478 Clinical Laboratory Science Clinical (0) Credit granted upon successful completion of two semesters of clinical experience and a summer clinical. Prerequisite: Successful admission into clinical laboratory program.

EXSS 482 Curriculum Development in Individual and Team Sports (3) Provides a comprehensive understanding of the teaching of individual and team sports. Also offers students the opportunity to teach the movements and skills needed to participate in lifetime individual sports, as well as the ability to design and implement lesson plans. Focus of course on secondary physical education. Prerequisites: EXSS 112 and 113, or 220.

EXSS 488 Internship (2-12 credits) Provides the exercise and sport science major practical experience in a specialized career area. Fosters development of skills, competencies, and organizational and administrative techniques needed for successful entry into the work force, while working under direct supervision of selected professionals. Prerequisites: Exercise and Sport Science 150 for sport communication

and sport management majors; EXSS 352, 388, and current CPR for all exercise science majors.

EXSS 491 Planning/Implement Coaching (2) Provides an in-depth overview of the competencies to coach in a specific sport area. Covers advanced techniques for teaching, coaching, and performing. Prerequisite: Junior or senior standing.

EXSS 493 Current Issues Exercise & Sport Science (3) The capstone course for all majors in the department. Discussion topics include research methodology, the use of basic statistics and other selected areas of research design. Students learn to critically read and evaluate research papers. Additionally, discussion and writing focuses on the current and future status of the student's career choice in today's society. Prerequisite: Final year status for majors in the department.

EXSS 499 Special Topics Exer Sport Science (1-3 credits) Provides students the opportunity to study topics of special interest not covered in regular course offerings. Topics announced. Course may be repeated, but the topic must be different. Prerequisite: Permission of instructor.

EXSS 221L Applied Human Anat/Phy Lab (2) Utilizes an in-depth regional approach to the study of human anatomy through the use of previously dissected human cadavers. Prerequisites: EXSS 112, 221; or permission of instructor.

EXSS 321L Applied Human Anat/Phy Lab (2) Utilizes an in-depth regional approach to the study of human anatomy through the use of previously dissected human cadavers. Prerequisites: EXSS 112, 221; or permission of instructor.

Experiential Education (EXED)

EXED 071 Internship (0) Full-time or part-time employment for a period of 10-16 weeks in a professional or paraprofessional role associated with the student's major. Requires prior approval of the job description by the co-op director or designee and submission of a written summary and evaluation of the work experience. May be repeated for a total of three experiences. Prerequisite: At least 18 hours of course work of which at least nine hours represent progress toward degree completion and must have been taken during the previous two academic terms.

EXED 072 Internship (0) Full-time or part-time employment for a period of 10-16 weeks in a professional or paraprofessional role associated with the student's major. Requires prior approval of the job description by the co-op director or designee and submission of a written summary and evaluation of the work experience. May be repeated for a total of three experiences. Prerequisite: At least 18 hours of course work of which at least nine hours represent progress toward degree completion and must have been taken during the previous two academic terms.

EXED 073 Internship (0) Full-time or part-time employment for a period of 10-16 weeks in a professional or paraprofessional role associated with the student's major. Requires prior approval of the job description by the co-op director or designee and submission of a written summary and evaluation of the work experience. May be repeated for a total of three experiences. Prerequisite: At least 18 hours of course work of which at least nine hours represent progress toward degree completion and must have been taken during the previous two academic terms.

EXED 090 Bldg. a Professional Image (0) Seminar for second year students seeking an internship or considering entering the co-op program for the first time. Covers job interviewing, résumé preparation, currently available intern and co-op jobs, and details of program administration. Application for admission to the co-op program is part of this seminar. Fall, spring.

Finance (FIN)

Finance courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

FIN 280 Introduction to Personal Finance (3) Covers information that allows students to begin their working careers well informed of their financial responsibilities. Covers the fundamentals of personal finance and emphasizes the life cycle approach to personal financial planning. Primary goals of course are (a) make participants aware of need to plan their financial future and (b) increase their knowledge of the various aspects of personal finance in order to plan their financial future effectively. Major topics are managing assets, credit and insurance, investments, and retirement planning. Helps participants begin lifelong journey toward financial literacy. Offered periodically.

FIN 361 Fundamentals of Finance (3) Introduces core principles of time value of money, risk return analysis, financial forecasting, and security valuation. Analyzes foundations of capital budgeting techniques, cash flow estimation, taxation, and depreciation methods. Prerequisites: ACCT 210; ECON 102; or permission of instructor.

FIN 362 Corporate Financial Policy (3) Examines the capital budgeting, financing, dividend policy, and working capital decisions of value-maximizing firms with use of case studies. Prerequisite: Grade of C- or better in FIN 361. Spring.

FIN 380 Special Topics in Finance (3) Covers topics not included in other courses, provides in-depth understanding of selected areas in finance, and explores relevant current topics. Repeatable course. Content changes each time course is offered. Prerequisite: Grade of C- or better in FIN 361. Offered periodically.

FIN 383 Credit Analysis Lending Practicum I (3) This course sequence is an experiential learning program that engages students directly with a participating lending institution. Students will team with supervising faculty and commercial lending professionals in the process of assessing applications for commercial loans, formulation of lending decisions, and execution of the lending process. Additional emphasis is on the effects of lending outcomes on the bank's financial statements. A maximum of 3 credit hours of practicum from FIN 383, 384, 385, and 386 will apply as an upper level elective in the major area per degree for students pursuing the Bachelor of Science degree in Accounting; the Bachelor of Science degree in Business Administration; or the Bachelor of Science or Bachelor of Arts degree with a major in economics. Additional hours will count as free electives. Prerequisite: Grade of C- or better in FIN 361 or permission of instructor.

FIN 384 Credit Analysis Lending Practicum II (3) This course sequence is an experiential learning program that engages students directly with a participating lending institution. Students will team with supervising faculty and commercial lending professionals in the process of assessing applications for commercial loans, formulation of lending decisions, and execution of the lending process. Additional emphasis is on the effects of lending outcomes on the bank's financial statements. A maximum of 3 credit hours of practicum from FIN 383, 384, 385, and 386 will apply as an upper level elective in the major area per degree for students pursuing the Bachelor of Science degree in Accounting; the Bachelor of Science degree in Business Administration; or the Bachelor of Science or Bachelor of Arts degree with a major in economics. Additional hours will count as free electives. Prerequisite: Grade of B or better in FIN 383.

FIN 385 Wealth Management Practicum I (2) This course sequence is an experiential learning program that engages students directly

with individual clients in a participating wealth management firm. Students will team with supervising faculty and wealth management professionals in the process of client consultation, formation of clients' investment objectives, execution of portfolio strategies, and evaluation of investment outcomes. A maximum of 3 credit hours of practicum from FIN 383, 384, 385, and 386 will apply as an upper level elective in the major area per degree for students pursuing the Bachelor of Science degree in Accounting; the Bachelor of Science degree in Business Administration; or the Bachelor of Science or Bachelor of Arts degree with a major in economics. Additional hours will count as free electives. Prerequisite: Grade of C- or better in FIN 361 or permission of instructor.

FIN 386 Wealth Management Practicum II (2) This course sequence is an experiential learning program that engages students directly with individual clients in a participating wealth management firm. Students will team with supervising faculty and wealth management professionals in the process of client consultation, formation of clients' investment objectives, execution of portfolio strategies, and evaluation of investment outcomes. A maximum of 3 credit hours of practicum from FIN 383, 384, 385, and 386 will apply as an upper level elective in the major area per degree for students pursuing the Bachelor of Science degree in Accounting; the Bachelor of Science degree in Business Administration; or the Bachelor of Science or Bachelor of Arts degree with a major in economics. Additional hours will count as free electives. Prerequisite: Grade of B or better in FIN 385.

FIN 395 Independent Study (1-3) Independent research in finance conducted under faculty supervision. Prerequisites: Grade of C- or better in FIN 361, permission of instructor.

FIN 426 International Financial Management (3) Analyzes foreign exchange, currency futures, and options markets. Examines aspects of international banking, bond, and equity markets from the perspective of multinational corporations and institutions. Prerequisites: Grade of C- or better in ECON 101 and 102. Recommended: FIN 361.

FIN 427 Financial Derivatives & Alt Investments (3) The course introduces financial derivatives and their applications. Topics include features of primary financial derivatives (forwards, futures, swaps, and options), the basics of derivatives analysis, and the structure of their markets. The course also covers some advanced topics in investment strategies and risk management; includes discussion of alternative investments and investing in commodities. Prerequisite: Grade of C- or better in FIN 361 or MATH 330.

FIN 462 Investments (3) Develops the principles governing investment of personal funds based on modern capital market theory. Common stocks, bonds, options, and futures contracts analyzed. Prerequisite: Grade of C- or better in FIN 361.

FIN 470 Financial Institutions/Markets (3) The operation and management of financial institutions and the markets in which they operate discussed. Managerial and public policy issues toward financial institutions and markets also addressed. Prerequisite: Grade of C- or better in FIN 361. Offered alternate years. Same as ECON 470.

FIN 478 Risk Management (3) Examines the principles and terminologies of insurance. Analyzes variety of insurance contracts and risk management plans. Discusses the public policy issues related to the insurance industry. Prerequisite: Grade of C- or better in FIN 361. Offered periodically.

FIN 482 Financial Planning: Process/Environment (3) Financial planning principles, areas, application, process, effective communication, risk evaluations, ethics and practice standards, financial planning problem solving, regulations, financial institutions. Prerequisite: Grade of C- or better in FIN 361. Offered periodically.

First-Year Seminar (FYS)

The First-Year Seminar Sequence is the cornerstone of the Enduring Foundations General Education program. The courses are taught by faculty members from all of the University's colleges and schools.

FYS 111 First Year Seminar (3) Topic-based seminar developed by individual faculty members. Engages students in classroom activities that promote the acquisition of critical reading, writing, and thinking skills appropriate to college-level discourse. Toward that end, students will learn the basics of the expository essay: development of a central thesis, organization of material, and responsible use of supporting detail.

FYS 112 First Year Seminar (3) Topic-based seminar developed by individual faculty members. Engages students in classroom activities that promote the acquisition of critical reading, writing, and thinking skills appropriate to college-level discourse. Toward that end, students will complete a significant research paper. Prerequisites: Placement based on ACT/SAT scores, Grade of C or better in FYS 111 or FYS 111E.

FYS 312 Writing Across the Disciplines (3) First Year Seminar for transfer students. Engages students in classroom activities that promote the acquisition of critical reading, writing, and thinking skills appropriate to college-level discourse. Toward that end, students will learn the basics of the expository essay: development of a central thesis, organization of material, and responsible use of supporting detail. Additionally, they will explore a variety of genres as well as writing practices and conventions for disciplines across the university.

FYS 499 Teaching Internship (3) Offers students the opportunity for supervised field experience in teaching at the college level.

FYS 111E First Year Seminar for EL Students (4) All sections of FYS 111 and 111E engage students in activities that promote the acquisition of critical reading, writing, and thinking skills necessary in collegiate discourse as well as in professional and personal contexts. Toward that end, students will learn the basics of the expository essay: development of a central thesis, organization of material, and responsible use of supporting detail with emphasis on the writing process and rhetorical situation. First Year Seminar for EL Students provides additional structured support for ESL students in order to aid in the transition to college level courses that are reading and writing intensive.

Foreign Languages and Cultures (FLC)

Foreign Languages and Cultures courses are taught by the faculty of the Department of Foreign Languages and Cultures.

FLC 201 International Road Film (3) This course centers on the international road film. We will focus on the aesthetics as well as the content of the road film, in order to examine the genre as an art form and to explore different cultures. What can we learn about the literal, linguistic, political, national, historical, cultural, gendered, classed, etc. landscapes/geographies through which the characters travel? What causes them to travel? How do the films define travel? Film selections to be discussed come from the U.S., France, Germany, India, Latin America, Mongolia, Bhutan, Russia, Hungary, and Jordan.

FLC 230 Ethnic/Racial Representations (3) The course focuses on cross-cultural representations of the "other" in Hispanic/German/French/Francophone cultures. Topics vary. Can be repeated with content change. Representations of Native Americans, Asians, Africans, African Americans, Afro-Germans, Hispanics, Jews, Arabs, Islanders, etc. in world film and literature will be analyzed.

FLC 301 Topics in German, Austrian, Swiss Studies (3) This course is offered in English for non-German minors and majors. Topics vary. Repeatable course with content change. Topics range from aspects of German film, the Alps, crime novels, biographies, YA literature in translation, Berlin, Vienna, Bern, Kafka, Bachmann, Soccer and German identity, to other aspects of German, Austrian, and German-speaking Swiss culture and society.

FLC 333 Topics in Diaspora Studies (3) Course engages with issues of the diasporic experience as represented in literary, filmic, and other cultural products. This course is offered in English by Foreign Languages and Cultures faculty. Topics vary. Course may be repeated with content change.

FLC 401 Language/Literature/Culture (3) Capstone course for foreign language and international studies majors. Seminar examines how the concept of national identity is reflected cross-culturally in language and literature. Topics vary. Course taught in English.

FLC 420 Foreign Languages & Cultures Internship (1-3) Students must complete an internship application and contract with the Internship provider. These forms must be approved by the FLC advisor and the FLC department chair. To count as a 400-level language course, students must take 3 credits (even if it is divided into different internships). Prerequisite: FLC major or minor.

French (FREN)

French courses are taught by the faculty of the Department of Foreign Languages and Cultures. All courses are taught in the target language unless otherwise noted. Completion of 311 or permission of instructor required for all 300- and 400-level courses.

FREN 111 Elementary French I (3) Emphasizes practice in speaking, listening, writing, reading and cultural awareness. Fall (111), spring (112).

FREN 112 Elementary French II (3) Emphasizes practice in speaking, listening, writing, reading and cultural awareness. Fall (111), spring (112).

FREN 211 Intermediate French I (3) Continues practice in speaking, listening, writing, reading and cultural awareness. Fall (211), spring (212).

FREN 212 Intermediate French II (3) Continues practice in speaking, listening, writing, reading and cultural awareness. Fall (211), spring (212).

FREN 311 Conversation & Composition (3) Includes oral-aural practice, free and directed composition and review of syntax. A prerequisite for all 300- and 400-level courses.

FREN 312 French Conversation in Context (3) Advanced oral practice and analysis of non-literary texts. Focus on pronunciation and phonetics. Prerequisite: FREN 212.

FREN 313 French Phonetics (3) This course teaches students the theory and practice of French pronunciation, including changing sounds and syllable structure when words are combined into phrases and sentences. It will also allow students to compare French and English phonetics. Students will learn and identify geographic and social variation in the pronunciation of French speakers.

FREN 314 Business French (3) Emphasizes speaking, writing, reading, and listening skills in business contexts as well as cross-cultural communication and comparison of French and American business cultures.

FREN 315 Intro French Literature (3) Studies French culture in literary context. Introduces students to French literature, literary analysis and discourse.

FREN 316 Quebec & Francophone Studies (3) Introduces the literary, political, economic, and cultural traditions of Quebec and the Francophone world.

FREN 317 Intro French Theatre (3) Introduces students to major authors, periods and conventions of French theatre. Emphasizes conversation, composition, and reading skills and includes an introduction to literary analysis and discourse.

FREN 318 Translation (3) Introduces theory and practice of written translation in French cultural context. Includes translation of documents from the following fields: law, medicine, business, entertainment, industry and technology, literature. Prerequisites: Two 300-level courses or permission of instructor.

FREN 330 Independent Study (1) Course content and credit hours determined in consultation with instructor. May be repeated with content change. Prerequisite: French 311 or permission of instructor. Department chair approval required.

FREN 333 Intro French/Francophone Cultures (3) Introduces French and Francophone cultures, relating historical events and geographical settings to the evolution of the language. Offered alternate years.

FREN 335 Foreign Lang Study Abroad (1) Foreign Language Study Abroad. Repeatable with content change.

FREN 415 Topics in French Literature (3) In-depth examination of French literature by author, period, and/or genre. Emphasizes advanced application of literary analysis and discourse. Topics vary. Course may be repeated with content change. Prerequisites: Two 300-level courses or permission of instructor.

FREN 434 French Civilization (3) Study of French civilization, art and culture from origin to present. Taught in French.

FREN 435 Foreign Lang Study Abroad (1) Used for study abroad course credit.

FREN 438 Adv French Language Seminar (3) Topics vary. Generally covers outstanding French authors and literary works. Course may be repeated with content change. Prerequisites: Two 300-level courses or permission of instructor.

Gender and Women's Studies (GWS)

Core, cross-listed, and affiliated gender and women's studies courses are taught by faculty members of various departments.

GWS 101 Introduction to Gender & Women's Studies (3) Through readings, films, and class discussion, students engage in a critical examination of theories of gender and their social implications. By examining their own experiences as well as the ways in which they fit, or do not fit, into the patterns revealed through gender and women's studies scholars, students arrive at a better understanding of the relationship of women and men to the society at large.

GWS 492 Special Topics in Gender & Women's Studies (3) Special topics in gender and women's studies not included in regular course offerings. May consist of lectures and discussion with an emphasis on research. May be repeated for a maximum of six credit hours. Prerequisite: GWS 101 or permission of instructor.

GWS 493 Ind Studies Gender and Women's Studies (3) Research in areas of gender and women's studies on topics not covered in existing courses. Subject and credit earned must be approved by a faculty member, coordinator of gender and women's studies, and dean of the College of Arts and Sciences. May be repeated or a maximum of six credit hours. Prerequisite: Junior standing or permission of coordinator of Gender and Women's Studies.

Geography (GEOG)

Geography courses are taught by the faculty of the School of Education.

GEOG 120 World Regional Geography (3) Introduction to regions of the world such as Anglo-America, Western Europe, Eastern Europe and the former Soviet Union, Monsoon Asia, Africa, and others. Emphasizes themes which give each of these regions a distinctive character.

GEOG 230 Physical Geography (4) Studies and analyzes the distribution of major elements of the physical environment, including earth in space, earth motions, time zones, the earth's atmospheric envelope, topography, and mapping. Includes lab experience.

GEOG 240 Cultural Geography (3) Examines human technologies and cultural practices which give regions distinctive character. Emphasizes process of settlement and development and how the resulting cultural landscape varies through time and over space.

Geology (GEOL)

Geology courses are taught by faculty members of the Department of Mechanical and Civil Engineering.

GEOL 130 Environmental Geology (3) A study of the relationship between humans and earth processes, such as earthquakes and volcanoes, geologic structures, plate tectonics, mountains, ocean basins, streams, glaciers, deserts, coasts, rocks, minerals, and mineral resources.

German (GERM)

German courses are taught by the faculty of the Department of Foreign Languages and Cultures. All courses are taught in the target language unless otherwise noted. Completion of 311 or 312 is required for the major or minor. Students placing into 311 or above may automatically sign up for the upperlevel course offered their incoming semester.

GERM 111 Elementary German I (3) Emphasizes practice in speaking, listening, writing, reading, and cultural awareness. Fall (111), spring (112).

GERM 112 Elementary German II (3) Emphasizes practice in speaking, listening, writing, reading, and cultural awareness. Fall (111), spring (112).

GERM 211 Intermediate German I (3) Continues practice in speaking, listening, writing, reading, and cultural awareness. Fall (211), spring (212).

GERM 212 Intermediate German II (3) Continues practice in speaking, listening, writing, reading, and cultural awareness. Fall (211), spring (212).

GERM 311 Conversation and Composition (3) A systematic grammar review while focusing on the process and development of effective writing skills and expression in German. Pre-requisite: P C- or higher in 212 or proficiency in 212. Fall.

GERM 312 Topics in German Studies (3) Topics vary. Course may be repeated with content change. Topics range from aspects of German film and the Alps, to crime novels and biographies, to other aspects of German culture and society. Prerequisite: German 311 or permission of instructor.

GERM 314 Career German (3) Studies the specialized vocabulary and nature of career German.

GERM 321 Survey of German Literature to 1830 (3) Readings for broad overview of literary development in German-speaking Europe.

GERM 322 Survey of German Literature From 1830 to Present (3) Readings for broad overview of literary development in German-speaking Europe.

GERM 330 Independent Study (1) Content and credit hours determined in consultation with instructor. May be repeated with content change. Prerequisite: German 311 or permission of instructor. Department chair approval required.

GERM 333 Introduction to German Culture (3) Introduces the student to the impact of historical events on German art, music, cinema, and literature.

GERM 335 Foreign Lang Study Abroad (1) Used for study abroad credit.

GERM 410 Advanced German Grammar (3) Primarily for German majors and minors. Emphasizes aspects of grammar important for high school instruction in the language.

GERM 414 20th-21st Century Literature (3) In-depth examination of major German, Austrian, and Swiss writers of the 20th and 21st centuries.

GERM 433 German Civilization (3) Traces history and culture of German-speaking Europe from beginnings to the present. Taught in German.

GERM 435 Study Abroad (1) This is a 400-level course that is taught in the target language in a study abroad program and whose content does not match closely any of the 400-level courses offered in the department of foreign languages and cultures. Meets the 400-level major requirement. Must be approved by department chair for equivalency prior to study abroad experience. Repeatable course. Content changes each time course is offered. Prerequisite: GERM-311 or 312.

GERM 438 Seminar (3) Outstanding German authors and literary works. Topics vary. Course may be repeated with content change.

Gerontology (GT)

Gerontology courses are taught by the faculty of the Department of Law, Politics, and Society.

GT 401 Biology & Health & Aging (2) Covers basic biological and health factors related to aging. Topics include life course changes, normal aging, nutrition, aging related diseases, frailty, and incontinence. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 402 Social Aspects of Aging (2) Covers basic social factors related to aging. Topics include attitudes, communication, demographics, cross-cultural aging, education, politics, minority aging, and successful aging. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 403 Later Life Issues (2) Covers key issues faced by the elderly and their families in late life. Topics include ethical issues, end of life reviews, and health care issues. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 404 Personality Dimensions of Aging (2) Covers personality factors related to aging. Topics include cognition, anxiety and depression, dementia, and personality changes. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 405 Institutional Care (2) Covers institutional settings that serve the needs of the elderly. Topics include assisted living, residential care, home-based care, community-based long-term care, and designing physical environments for the elderly. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 406 Geriatric Assessment (2) Covers various issues related to geriatric assessment. Topics include comprehensive geriatric assessment, specific functional assessments, and an overview of geriatric assessment instruments. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 407 Economics of Aging (2) Covers various issues related to the economic welfare of the elderly. Topics include employment of older workers, retirement, social security, and pensions. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 408 Aging and the Spiritual Dimension (2) Covers key issues related to death and dying and the spiritual needs of the elderly. Topics include death and dying, bereavement, ethics, and the role of religion over the life cycle. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 409 Social Policies and Legal Issues of Aging (2) Covers key issues related to aging-based policies and specific legal considerations of relevance to aging. Topics include Medicare, Medicaid, managed care, financing age related programs, and personal legal issues. Prerequisite: Enrolled in Gerontology Certificate Program or permission of director of Gerontology Center.

GT 410 Research/Internship (2) Students may elect to do a short research study or complete a community-based internship in a setting serving the elderly. Prerequisite: Completion of at least six modules in the Gerontology Certificate Program or permission of director of Gerontology Center.

GT 496 Internship (1-6) Students may elect to complete a community-based internship in a setting serving the elderly. Prerequisite: Completion of at least six modules in the Gerontology Certificate Program or permission of director of Gerontology Center.

Greek (GRK)

Greek courses are taught by faculty members in the classical studies program.

GRK 111 Elementary Ancient Greek I (3) Presents the basic grammar, syntax and vocabulary of ancient Greek so that students can begin reading passages from ancient authors. Fall (111), spring (112) in alternate years.

GRK 112 Elementary Ancient Greek II (3) Presents the basic grammar, syntax and vocabulary of ancient Greek so that students can begin reading passages from ancient authors. Fall (111), spring (112) in alternate years.

GRK 211 Intermediate Ancient Greek (3) Continues to develop skills in the grammar, syntax and vocabulary of ancient Greek begun in Greek 111 and 112. Reading of extended passages from Herodotus, Plato, Thucydides, and the Gospel of John.

GRK 212 Introduction to Greek Prose (3) Reading of prose texts in both Attic and Hellenistic Greek. Emphasis on reading a variety of literary genres and prose styles. Students also review and enhance their knowledge of Greek grammar. Texts include the Tabula of Cebes, Lysias' On the Murder of Eratosthenes, Paul's letters, and the book of Acts.

GRK 351 Attic Prose (3) An advanced ancient Greek course dedicated to the reading, analysis, and discussion of Attic prose texts of the 4th century B.C. Authors read depend on student interest and may include Aristotle, Plato, Lysias, and Isocrates.

GRK 371 New Testament Greek Exegesis (3) An advanced Greek course devoted to the reading and exegesis of the New Testament in the original language. Emphasis on gaining competence in koine

Greek, skill in exegesis and literary analysis, and facility in the use of scholarly tools for New Testament study.

GRK 411 Ancient Greek Drama (3) Advanced ancient Greek course dedicated to the reading and analysis of Greek plays. Authors read depend on student interest; may include: Aeschylus, Sophocles, Euripides, and Aristophanes. Prerequisite: GRK-212.

GRK 421 Greek Poetry (3) An advanced ancient Greek course dedicated to reading Greek poetry. Students read a variety of Greek poets and poems, gain exposure to several different Greek dialects, and learn about poetic meter and scansion. Authors read depend on student interest and may include Homer, Hesiod, Sappho, and Solon.

GRK 430 Individual Readings in Greek Literature (1) Topics and credit hours must be prearranged with the instructor. Repeatable as texts and topics change.

Health Education (HE)

Health education courses are taught by the faculty of the School of Public Health.

HE 100 Concepts of Health and Wellness (1) Examines the role of physical activity and personal fitness for healthy daily living in our society. Lecture, discussion and self-evaluation laboratory sessions are used to assess personal fitness. This course satisfies the health and wellness graduation requirement.

HE 111 Medical Terminology (1) Utilizes guided independent student learning activities to teach the basic prefixes, suffixes, and roots of medical terms. Assists student in utilizing medical terminology appropriately in both written and verbal forms. Fall, spring.

HE 160 First Aid With CPR (2) Provides basic American Red Cross first aid and cardiopulmonary resuscitation certification for adult, child, and infant.

HE 360 The School Health Program (3) Examines issues related to school health services, the environment, education, and the teacher's potential role in each of these areas.

Health Sciences (HS)

Health sciences courses are taught by the faculty of the Dunigan Family School of Nursing. Courses are open to all University students.

HS 101 Adult Health and Wellness (1) Focuses on a holistic approach to a healthy lifestyle. Emphasizes assessment, management, and individual responsibility in promoting personal health. Meets the general education Health and Wellness requirement. Fall, spring.

HS 200 Humanity-Sanity and Insanity: Media Impact (3) This course will examine and evaluate mass media portrayal of mental health and mental illness. Class activities are coordinated to stimulate thought and discussion on a variety of viewpoints. Students will examine the historical impact mass media has on public opinions related to mental illness and influences on the treatment of mental illness. Variations in mass media portrayal across cultures will be examined through group discussions. Students will evaluate person opinions related to mental health and illness and changes in perceptions as the course progresses.

HS 205 Pharmacology (3) Survey course provides a foundation in the basic principles of pharmacology with emphasis on knowledge and interventions needed to maximize therapeutic effects and prevent or minimize adverse effects of drugs. Builds on the knowledge of physiology, chemistry, and psychology to understand the action of drugs in the human body. Prototype drugs used to teach basic principles of select drug classifications and drug action on biologic systems. Placement: Sophomore level. Prerequisites: CHEM 108 or equivalent; EXSS 112, 113.

Health Services Administration (HSA)

Health services administration courses are taught by the faculty of the School of Public Health.

HSA 405 Health Care Systems: Issues and Trends (3) Overview of the health care system. Reviews the history and current status of various segments of health care. Includes an analysis of the impact of socioeconomic, political, and current health care issues and trends.

HSA 406 Jurisprudence and Ethics in Health Care (3) Emphasizes the legal and ethical processes and their application to the health care organization, administrator, staff, employees, and patients. Includes ethical dimensions of the decision-making process and current ethical issues in health care.

HSA 414 Health Care Management Theory and Human Resources (3) Management theory and practice as applied by managers of health services. Emphasizes analysis of the manager's roles, interactions with people, the organization, and the environment. Special emphasis on human resource issues.

HSA 420 Health Care Planning and Marketing (3) Integrates long-range goal planning with dimensions of marketing for health care services. Concepts, techniques, and theories used in the planning and management of marketing in the health care industry.

HSA 467 Statistics Appraisal and Evaluation (3) Focuses on the analysis of data common to health care. Includes data description, elements of probability, distribution of random variables, estimation and confidence intervals, binomial and normal distributions, hypothesis testing, contingency tables, regression analysis, and ANOVA.

HSA 490 Decision Making in Health Care (3) Examines decision making in health services administration by extensive use of case studies. Integrates material from other HSA courses into the study of decisions facing all types of health care organizations.

HSA 495 Independent Study (1) Independent research in health care management conducted under faculty supervision. Prerequisite: Permission of the instructor.

HSA 498 Internship in Health Services Administration (1) A structured assignment which allows student to gain practical experience in a health care management position relating to an area of career interest. Student is directed by the internship director and supervised by a member of the cooperating organization. Prerequisite: Permission of health services administration program director.

HSA 499 Special Topics in Health Services Administration (1) Lectures and discussion of topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in health services administration.

History (HIST)

History courses are taught by the faculty of the Department of History.

HIST 111 World History to 1500 (3) Examines major political, religious, and cultural developments in Asia, Africa, the Mediterranean basin, Europe, and the Americas from ca. 3000 BCE to 1500 CE. Through a combination of lectures, class discussion, and close reading of primary sources, course focuses on how geography, climate, social structures, and cultural values combine to shape political systems, religion, and gender relations in diverse societies.

HIST 112 World History Since 1500 (3) Guides students through the key forces shaping the modern world, and adopts a broad global approach to the period, paying appropriate attention to Asia, Africa, and the Middle East as well as to Europe and the Americas. Includes the struggle for democracy, the emergence of capitalism and socialism,

the experience of imperialism and racism, and related developments in science, culture, and gender relations.

HIST 141 American History to 1865 (3) Surveys political, economic, social, and military developments in the United States from the time of exploration and the founding of the colonies to the end of the Civil War. Pays particular attention to slavery, the frontier, the rise of democracy, the roots of secession, and issues of class, ethnicity, and gender.

HIST 142 American History Since 1865 (3) Surveys political, social, economic, and cultural developments in the United States from the end of the Civil War to the present day. Special attention to the impact of industrialization, the crisis of the Great Depression, race relations, gender, and foreign policy.

HIST 290 Approaches to History (3) Examines the evolution of the field of history. Explores questions concerning the nature of the discipline and studies the principles of historical methodology. Focuses on questions of how historians gather and evaluate evidence and considers directions the discipline is currently taking. Intended for history freshmen and other beginning history majors.

HIST 311 The Greeks and the East (3) Examines the historical relationship between the Ancient Greeks and their contemporaries in the Near East. Prerequisite: Sophomore standing or HIST 111 or 312 or permission of instructor.

HIST 312 The Evolution of Rome (3) Examines the history of Rome from the early republic to the end of the imperial era. Focuses on internal sources of stability and Rome's success in integrating the empire. Prerequisite: Sophomore standing or HIST 111 or 311 or permission of instructor.

HIST 313 Medieval Europe 410-1350 (3) Introduces students to the history and culture of Western Europe and the Mediterranean between 410 and ca. 1350. Traces the collapse of the western Roman Empire in the mid 5th century, the evolution of civilizations of Byzantium, Islam and western Christendom, and the fusion of Roman, Christian, and Germanic elements that create medieval Europe. Prerequisite: Sophomore standing or HIST 111 or 312 or permission of instructor.

HIST 314 Renaissance and Reformations: Europe 1350-1648 (3) Examines underlying causes of new modes of artistic and intellectual expression, expansion into the New World, and the aggressive pursuit of scientific knowledge in Europe during this period. Also explores why the promise of the Renaissance and "liberty" of the Reformation co-existed with a Europe racked by vicious religious wars, peasant revolts, and "other" (e.g., witches, heretics, homosexuals, Jews). Prerequisite: Sophomore standing or HIST 111 or 313 or permission of instructor.

HIST 316 Europe in the 18th Century 1774-1850 (3) Examines the economic, social, political and cultural history of Europe in the eighteenth century, with particular emphasis on economic and social changes in both town and country. Considers the role such changes played in the origins, course and continent-wide impact of the French Revolution. Prerequisite: HIST 112, HIST 314 or permission of instructor.

HIST 317 Napoleon to Bismarck: Europe 1800-1890 (3) Explores the impact of the industrial revolution on urban and rural life in Europe, paying particular attention to changes in the distribution of wealth that occurred during this period and the political and cultural responses to those changes. Prerequisite: HIST 112 or permission of instructor.

HIST 318 The First World War (3) Examines the causes, course, and consequences of the First World War. Traces the roots of the war

to the European power politics of the 1870s, and follows the consequences up to the rise of fascism. In studying the war itself, focuses on the experience of individuals involved, women and men, combatants and non-combatants. Includes extensive discussion of painting, poetry, sculpture, photography, and the novel. Prerequisite: Sophomore standing or HIST 112 or 317 or 381 or permission of instructor.

HIST 319 The Second World War (3) Examines the origins, courses, and results of the Second World War, with focus on the experience of the individual caught up in one of the most horrific experiences of the 20th century. Studies the rise of Nazism and fascism throughout Europe as the key to understanding the origins of the war. Includes discussion of painting, poetry, sculpture, photography, and the novel. Prerequisite: Sophomore standing or HIST 112 or 318 or permission of instructor.

HIST 320 Women's Lives in the Pre-Modern World (3) Studies the histories of women in diverse societies prior to 1800 including parts of western Europe, Asia, the Americas, and the Middle East. Pays close attention to gender relations, the role of religion in determining the status and treatment of women, how the economic space (or its lack) for women shapes their experiences and how women are able to wield influence, power, or authority in public and private spheres. Prerequisite: Sophomore standing, GWS 101 or permission of instructor. This course counts toward the Gender and Women's Studies Minor.

HIST 321 Islam and the West in the Middle Ages (3) Examines relationships between Islamic and Christian civilizations from the 7th through the 14th centuries from the perspectives of the Islamic Empires. Explores the evolution of Islamic religion, political, cultural, and scientific exchanges and their long-term impact on both societies. Pays special attention to the rise and collapse of various Muslim empires and how the Crusades created not only conflict, but opportunities for trade and intellectual exchanges as well. Prerequisite: Sophomore standing or HIST 111 or 313 or permission of the instructor.

HIST 322 The French Revolution: Origins, Course, and Impact (3) Examines the economic, social, political, and cultural history of Europe in the 18th century, with particular emphasis on economic and social changes in both town and country. Considers the role such changes played in the origins, course, and continent-wide impact of the French Revolution. Prerequisite: HIST 112 or 314 or permission of instructor.

HIST 323 The United States and the Middle East, 1919-Present (3) Examines the legacy of Wilson's policy for the Middle East and how it shaped United States decolonization policy following World War II. Considers the emergence of independent states, including Israel, and the conflicts between nations and non-state actors since 1945. Studies the United States' role in the Middle East and considers how this has helped shape the current state of affairs in the area. Prerequisite: Sophomore standing.

HIST 324 The Emergence of Modern China and Japan Since 1600 (3) Examines the distinct historical developments and modernization of both China and Japan as well as the intersection of their cultures, economies, and political institutions. Outlines the development and eventual decline of the Qing dynasty and the Tokugawa shogunate in the face of western imperialism. Traces the divergent paths taken by the two countries in their efforts to challenge Western domination, assert national independence, and establish regional strength. Prerequisite: Sophomore standing.

HIST 340 Crime, Punishment, and the Law in Early America 1607-1861 (3) Introduces students to the legal history of early America from the colonial period until 1861. Analyzes crime and punishment, the unwritten law, intersections of the law and economics, and laws affecting marginalized peoples. Pays particular attention to court

cases as indicators of larger legal trends. Prerequisite: Sophomore standing or HIST 141 or 342 or permission of instructor.

HIST 343 The Civil War and Reconstruction (3) Studies the events leading to the Civil War. Examines the economic, political, social, and military aspects of the war and considers the post-war period of Reconstruction. Prerequisite: Sophomore standing or HIST 141 or 142 or 341 or permission of instructor.

HIST 344 The American Revolution (3) Examines the social, cultural, political, and military developments in America's revolutionary period from 1754 through the ratification of the Constitution in the late 1780s. Particular emphasis will be placed upon the causes and consequences of the American Revolution, including the ideological origins of the conflict. Prerequisite: Sophomore standing or HIST 141 or 340 or permission of instructor.

HIST 345 United States Foreign Policy Since 1776 (3) Broad understanding of the main developments in American diplomatic history. Students engage several major themes in United States foreign policy and learn how these interact by studying specific events throughout the history of America's involvement in the world. Discusses United States interaction with nations on every continent and throughout the centuries, looking for inconsistencies in these interactions and their impact on current global issues. Prerequisite: Sophomore standing or HIST 141 or 142.

HIST 348 The Great Crash and Great Depression: U.S., 1919-1941 (3) Examines the causes of the Great Depression, compares it to previous economic crises, compares the responses of Hoover and Roosevelt to the depression, and discusses the origins, development, and impact of the New Deal. Prerequisite: Sophomore standing or HIST 142 or 319 or permission of instructor.

HIST 349 Cold War America: 1945-1990 (3) The Cold War shaped American society, politics, foreign policy, economics, and culture in profound ways that must be reviewed in the context of the American struggle with the Soviet Union. Important international conflicts such as the Korean War and the Vietnam War will be examined. Significant events such as the civil rights and women's rights movements will be investigated along with cultural and political transformations that shaped the period. Prerequisite: Sophomore standing or HIST 142 or 348 or permission of instructor.

HIST 351 Atlantic World Since 1492 (3) Examines how the peoples of Europe, Africa, North America, and South America forged a unique Atlantic community between 1492 and 1800. Pays special attention to the exploration and colonization of the Americas, including the development of slave systems and imperial governance. Prerequisite: Sophomore standing or HIST 112 or 354 or permission of instructor.

HIST 354 History of the Caribbean to 1900 (3) Explores the development of Caribbean societies from the late eighteenth century to the late nineteenth century. Analyzes the gradual disintegration of the plantation system as a result of internal and external forces. Uses a comparative approach to study internal migrations, creolization, plantation economies, natural disasters, crime, and emancipation. Prerequisite: Sophomore standing or HIST 112 or 351 or permission of instructor.

HIST 380 Topics in History (3) Explores specialized topics in history in a lecture-discussion format. Repeatable course. Content changes each time course is offered. Prerequisite: Sophomore standing or permission of instructor.

HIST 381 Modern Britain: Challenge, Continuity, and Change, 1815 to Present (3) Studies British politics and society during a period of remarkable change, as Britain acquired the biggest empire in human history and then lost it, while progressing from being a country that fought wars with its European neighbors to one that was close to the

heart of the European Union. Covers religion, gender, politics, race, sport, art, and literature. Prerequisites: Sophomore standing or HIST 112 or 317 or permission of instructor.

HIST 383 Modern Scotland: Politics, Culture, and Identity, 1707 - Present (3) Studies the development of Scotland over 300 years from the political union with England, through the Enlightenment and the Industrial Revolution, to the two world wars and modern political devolution. Includes study of culture, religion, society, and literature. Prerequisite: Sophomore standing or HIST 112 or 381 or permission of instructor.

HIST 385 Ireland and the Irish Diaspora (3) Studies the history of Ireland and Irish emigrant communities from the Middle Ages to the present day. Focus primarily on the years since 1700 and pays particular attention to political and social history, including the struggle for independence, emigration and its causes, and the changing fortunes of Irish communities overseas, especially in North America. Prerequisite: HIST 112 or permission of instructor.

HIST 418 War, Politics, and Gender (3) Examines various aspects of warfare in the Middle Ages, including weapons and tactics, the circumstances precipitating or preventing war, the roles of the church in shaping the intellectual and ethical framework of warfare, and the involvement of women in war as both armed and unarmed participants. Prerequisite: HIST 313 or 321 or permission of instructor. This course also counts toward the Gender and Women's Studies Minor.

HIST 429 Voices from the Land: Rural Life Europe, and North America, 1780-1900 (3) Comparative study of select rural communities during the age of industrialization. Special attention to the themes of social class, folk culture, gender relations and rural politicization, especially in the context of struggles for land reform stimulated by the radical politics of the age. Incorporates original accounts of life on the land from European and American sources. Prerequisite: HIST 111 or 112 or 141 or 142 or 317 or 342; consent of instructor.

HIST 438 War, Death, and Memory 1914-1939 (3) Investigates the impact of the First World War's enormous death toll on European society, and in particular its impact on Christianity. Examines how societies responded to death both formally and informally. Studies the evolution, meaning, and impact of war memorials, as national, civic, and individual loci for grieving. Prerequisite: HIST 112 or 142 or 317 or 318.

HIST 450 The Decolonization of Africa, 1919-Present (3) Examines the various paths that African peoples have taken to attain independence from European colonial powers. Takes an in-depth look at the writings, political activities, and violent struggles of several African societies as they challenged their colonial masters. Assesses the relative success or failure of these independence movements. Prerequisite: Junior standing or HIST 112 or permission of instructor.

HIST 480 Topics in History (3) Explores specialized topics in history, using the seminar format. Repeatable course. Content changes each time course is offered. Prerequisite: Junior standing, completion of three history courses, and permission of department chair.

HIST 490 Senior Seminar in History (3) Enables history majors to apply the principles of historical methodology learned in History 290, in the preparation of a major research paper. Required for history majors. Prerequisite: Senior standing or permission of instructor.

HIST 491 Independent Study in History (1) Research and/or focused reading for history majors and minors on topics not sufficiently covered in the regular course offerings. May be repeated for a maximum of six hours. Prerequisites: Junior standing; permission of instructor.

HIST 492 History Internship (1) Supervised field experience in agencies such as archives, historic preservation agencies, historical

museums, or similar locations of direct relevance to a history major. Prerequisites: Sophomore standing; permission of department internship coordinator.

HIST H378 Britain and the Middle East to 1922 (3) Explores the role played by Britain in shaping the modern Middle East by focusing on British attempts to solve the "Eastern Question" - namely, deciding the fate of the Ottoman Empire. Examines the extent to which this effort provoked the rise of Arab nationalism and Islamic fundamentalism. Prerequisite: HIST 112 or permission of instructor.

HIST H379 Africa and British Imperialism, 1815-1919 (3) Explores the role Britain played in shaping modern Africa and the reactions of Africans to this foreign intervention. Prerequisite: HIST 112 or permission of instructor.

Honors (HON)

Honors courses are taught by faculty members from all the University's colleges and schools.

HON 110 Special Topics in Honors (1) Varied topics of special interest. May be repeated. Prerequisite: Must be enrolled in the University Honors Program. Junior or senior standing required for enrollment in HON 310, 410.

HON 210 Special Topics in Honors (1) Varied topics of special interest. May be repeated. Prerequisite: Must be enrolled in the University Honors Program. Junior or senior standing required for enrollment in HON 310, 410.

HON 211 Interdisciplinary Perspectives in Honors (1) Honors students will examine a single topic from various interdisciplinary perspectives. Instructors from various fields will deliver lectures on the central topic of the course, but within the framework of their specific field, thereby integrating interdisciplinary perspectives on a singular topic. Honors students enrolled in Honors 211 are required to simultaneously be enrolled in one of the various Honors Interdisciplinary Perspectives courses (HON 212-218). Honors students are encouraged to take this course during their sophomore year.

HON 212 Honors Interdisciplinary Perspectives in Imaginative Expressions (3) Honors students will engage with literary and imaginative expressions of the human condition within historical and cultural contexts. Students will be encouraged to critically evaluate and appreciate the value, meaning, and significance of literary works. This course will emphasize responding to works in writing that reflects clear and critical thinking. Although the central topic of the course might vary, the broad approach and goals of this course described herein will remain constant. Honors students enrolled in HON 212 are required to simultaneously be enrolled in HON 211. Honors students are encouraged to take this course during their sophomore year.

HON 214 Honors Interdisciplinary Perspectives in Fundamental Beliefs (3) Honors students will engage with material related to critically considering fundamental beliefs about human identity, core values, and humankind's place in the world. Although the central topic of the course might vary, the broad approach and goals of this course described herein will remain constant. Honors students enrolled in HON 214 are required to simultaneously be enrolled in HON 211. Honors students are encouraged to take this course during their sophomore year.

HON 218 Honors Interdisciplinary Perspectives in Scientific Literacy (3) Honors students will learn of the fundamental facts, laws, and theories of a scientific discipline and develop an ability to reason and solve problems using scientific concepts. Students will learn about various interdisciplinary connections of the scientific discipline to society (past, present, and future). Although the central topic of the course might vary, the broad approach and goals of this course

described herein will remain constant. Honors students enrolled in HON 218 are required to simultaneously be enrolled in HON 211. Honors students are encouraged to take this course during their sophomore year.

HON 310 Special Topics in Honors (1) Varied topics of special interest. May be repeated. Prerequisite: Must be enrolled in the University Honors Program. Junior or senior standing required for enrollment in HON 310, 410.

HON 410 Special Topics in Honors (0) Varied topics of special interest. May be repeated. Prerequisite: Must be enrolled in the University Honors Program. Junior or senior standing required for enrollment in HON 310, 410.

Interdisciplinary (ID)

Interdisciplinary courses provide instruction in topics requiring understanding from the perspectives of several disciplines.

ID 105 Science and Math in the Environment (2) This hands-on, interdisciplinary course is designed to introduce students to skills in biology, chemistry, physics, and math and their applications in the environment. Students will explore conservation issues, pollution problems, and how alternative energy works. Students will plan a project to make a real difference in the local environment and write a final paper based on in-depth research on an environmental science topic. In addition, there will be laboratory activities, discussions, and problem-solving exercises. The course offers a good introduction to study in any science or math-related major.

ID 106 Excelling in Science and Mathematics (1) ID 106 is designed to help students learn the study and test taking skills needed to excel in a college math or science major. Topics for this course will include: effective communication, active reading, note taking, learning styles, career services and research opportunities in math and science.

ID 111 Structures and Materials of World Cultures (3) An overview of structural behavior and material science as related to structural types and building materials of historical interest. Three hours lecture. Prerequisite: MATH 105 or higher. Spring.

ID 150 The American Corporation (3) Examines the constitution and functions of American corporations and how they interact in a global society. Studies the corporation as an instrument in the creative process of innovation throughout the world. Social and ethical responsibilities of business entities and responsibility of society toward corporations explored in relation to the role of the corporation as a source of national prosperity and wealth. Involves formal readings as well as an experiential component in which students interact with participating corporate executives.

ID 200 International Cinema (3) Overview of international (non-American) cinema from the 1890s to the present. Focuses on the masterpieces of the art form. Studies the major filmmakers and movements including German Expressionism, Soviet Realism, Parisian Avantgarde, Renoir, Italian Neo-realism, Bunuel, Kurosawa Bergman, Fellini, French New Wave and others.

ID 201 Interdisciplinary MCAT Prep (0) ID 201 includes student direction and involvement in preparation for MCAT exam. Involves participation in student-led discussion/learning sessions. Sophomore or junior standing. Repeatable course: a max of 5 credit hours may be earned for review or preparatory courses in any discipline. Content changes each time course is offered. Students receive a pass or fail grade based on their attendance and participation in at least 75% of the course. Fall and Spring.

ID 205 American Cinema (3) Overview of American cinema from the 1890s to the present. Focuses on the masterpieces of the art form. Studies the major filmmakers including Edison, Porter, Griffith,

Seastrom, von Sternberg, Flaherty, Ford, Hitchcock, Welles, Curtiz, Lean, Kazan, Ritt, Coppola, Scorsese, Spielberg, Beresford and others.

ID 220 The Holocaust Revisited (3) Explores various responses to the Holocaust. Examines historical insights and contemporary perspectives. Focus of discussion on works by Elie Wiesel, Phillip Hailie, Primo Levi, Ethy Hillesum, Richard Rubenstein and John Roth along with selected films.

ID 235 Sacred Architecture and Its Liturgy (3) Introduction to the major art forms which have developed in British Cathedrals: architecture, choral and organ literature, hymnody, liturgy, sculpture, and stained glass. Includes a two-week research trip to UE's Harlaxton College in England with visits to numerous cathedrals.

ID 250 Myths of the Greeks (3) Centers on the stories of the Greeks that have survived through the art, architecture, and literature of ancient times.

ID 255 Women Mystery Writers and the Rise of Feminism (3) Concerning women's mystery and detective fiction and the rise of feminism in the western world since 1920. Focuses on the writing of seven authors: Agatha Christie, Dorothy L. Sayers, Ngaio Marsh, P.D. James, Sue Grafton, Sara Paretsky, Patricia Cornwell. At least one mystery novel from each author included in the readings. Also follows the rise of the women's movement in the West during the past eighty years and specifically examines the changing image of western women as portrayed in popular media.

ID 325 Alexander the Great and the Hellenistic World (3) Interdisciplinary study of the rise of the Macedonian state in the fourth century BCE, focuses first on the careers of Philip II and Alexander the Great, then examines the Hellenistic kingdoms created by their successors in Greece, the Near East and Egypt. Besides historical events and material culture, surveys Hellenistic literature, philosophy and science. Prerequisite: HIST 111 or 311 or 312 or permission of instructor. Alternate years

ID 356 Functional Anatomy and Biomechanics (3) The study of human movement utilizing principles of anatomy, physiology, physics and other related sciences. Emphasizes basic biomechanics and musculoskeletal structure and function. Students learn to analyze human motion anatomically, kinematically and kinetically. Spring.

ID 380 Applied Product and Process Development (3) Provides an immersion into an actual product or process development competition in the context of a two week intensive course. Students from at least two disciplines will participate in two or more interdisciplinary teams that will pursue the development of a new product or process for a regional client. The teams will compete to develop the product or process that best meets the client's needs. The selected winning team of the competition may be eligible for a prize provided by the client.

ID 433 Human Growth and Development (3) Presents typical human development from conception to death including functional changes in posture and movement. Presents processes of growth, maturation, adaptation, motor control and motor learning. Discusses concepts of critical period, health risk, physiologic reserve and senescence. The relationship of physical, cognitive and social theories of human development and age-related system changes given. Views motor behavior across life span within a social and psychological context. Prerequisite: Sophomore standing. Fall.

ID 480 Orgins and Effects of Modern Technology (3) Studies the development, the current place in society and the observed and potential benefits and threats of several 20th century technological innovations. Involves individual presentations and seminar discussions. Open to all majors in the University. Satisfies senior seminar

requirement. Prerequisites: Completion of at least one science course; senior standing.

ID 350H Honors Seminar/Special Topics (3) A thoughtful exploration of an interdisciplinary topic with readings and student participation and presentations. May be repeated.

ID H280 Cultural Capitals of Britain and Europe (3) Britain is an island nation, yet also part of the continent of Europe. Its proximity to the European mainland has influenced its history, art, architecture, and literature from the Roman period to the present day. And yet British culture also remains separate and distinct. This course focuses on the points of contact, cultural, and political, between Britain and its European neighbors, as well as the differences which divide them. This course will offer an exploration of your new home, an 'island nation', and also allow you to follow in the footsteps of travelers to the Continent in the 18th and 19th centuries. Your travels to such historic and culturally important sites as London, Paris, Florence and Edinburgh will be informed by readings and discussions, which provide an intellectual context and explore critical questions about travel itself. You will express your responses to the buildings, literature, history, and art you encounter in the form of an assessed portfolio, informed by your own experience as a traveler to the cultural capitals of Britain and Europe.

ID H290 Britain and Europe: Special Topics (1) A research-based exploration of a topic in the development of British culture: e.g., The Age of Chivalry, Causes of World War I, From Byrd to the Beatles. Close working relationship with a British faculty mentor in a small class environment.

ID H365 Issues in Contemporary Britain (3) This course, taught at Harlaxton College, explores issues in contemporary Britain.

Latin (LATN)

Latin courses are taught by the faculty of the Department of Archaeology and Art History.

LATN 111 Elementary Latin I (3) Introduction to the basic elements of Latin grammar and syntax. Emphasis on reading and simple composition.

LATN 112 Elementary Latin II (3) Introduction to the basic elements of Latin grammar and syntax. Emphasis on reading and simple composition.

LATN 211 Intermediate Latin I (3) Develops the understanding of advanced Latin syntax and emphasizes reading of extended passages from selected Latin prose authors. Poetry is introduced in 212.

LATN 212 Intermediate Latin II (3) Develops understanding of advanced Latin syntax and emphasizes reading of extended passages from selected Latin prose authors. Poetry is introduced in 212.

LATN 315 Latin Prose Historians: Caesar and Sallust (3) Reading of selections from Caesar's Gallic War and Civil War and Sallust's War with Catiline or Jugurthine War. Develops students' command of Latin vocabulary and understanding of advanced Latin syntax and grammar. Students will consider common historical themes and approaches employed by the authors. Prerequisite: LATN 212 or permission of the instructor.

LATN 316 Cicero (3) Reading of unedited Latin selections from Cicero's Philippics and De Natura Deorum. Beyond continuing development of vocabulary skills, introduces the formal study of rhetoric using Cicero's orations and philosophical works. Prerequisite: LATN 212 or permission of the instructor.

LATN 321 Vergil (3) Reading of selections from Books 1, 2, 4, and 6 of Vergil's Aeneid. Develops understanding of Latin poetic form, teaches principles of scansion and reinforces knowledge of important

literary devices in Latin. Prerequisite: LATN 212 or permission of the instructor.

LATN 329 Medieval Latin (3) Reading of selected medieval Latin texts from the fourth century CE up to the Renaissance. Introduces students to the changes in Latin grammar and vocabulary occurring in Late Antiquity and the Middle Ages. Prerequisite: LATN 212 or permission of the instructor.

LATN 330 Individual Readings in Latin Literature (1) Topics and credit hours must be prearranged with instructor. Repeatable as texts and authors change.

Law (LAW)

Law courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

LAW 201 Legal Environment of Business (3) Introduces principles of law and mechanics of the legal system. Provides a broad introduction to legal concepts and statutes that affect businesses and managerial decision making.

LAW 302 Business Law (3) In-depth coverage of the concepts of partnership, agency, corporations, commercial paper, sales and secured transactions. Prerequisite: Grade of C- or better in LAW 201.

Legal Studies (LS)

Legal studies courses are taught by the faculty of the Department of Law, Politics, and Society.

LS 125 Law in Society (3) Overview of major principles and functioning of our legal system. Introduces students to jurisprudential analysis and to the role of professionals within the justice system. Legal aspects of current topics discussed to assist students in acquiring an appreciation for the dynamic role law plays in our changing society.

LS 300 Legal Research (3) Examines the law library, surveys the various reference sources available to lawyers in determining applicable law, and studies the processes of legal research and writing of memoranda presenting results of that legal research. Includes numerous practice problems requiring legal research and memoranda writing, utilizing statutes, case reports, encyclopedias, treatises, computerized legal research systems, and other legal research courses. Prerequisite: LS 125.

LS 301 Legal Drafting (3) Uses basic skills learned in Legal Studies 300, in which accent was on learning the law library and how to use the various finding tools in uncovering the law. Advanced legal research and writing deals primarily with what to do once one finds the law, the techniques of reading and analyzing case law, and the fundamentals of legal writing including the use of forms, memoranda and briefs. Prerequisite: LS 300.

LS 310 Real Estate (3) Covers basic laws relating to real property and common types of real estate transactions and conveyances. Studies various instruments such as deeds, contracts, leases and deeds of trust with emphasis on how these instruments are drafted. Study activities include research projects relating to the subject matter and practice in retrieving and recording information. Prerequisite: LS 125.

LS 320 Evidence, Litigation and Trial Practice (3) Includes analysis and discussion of common types of litigation, promises of litigation, sources of law, the court systems, attorneys, types of lawsuits, usual defenses. Examines Indiana civil procedures, discovery procedures, court procedures, trial, post-trial motion procedures, appeal, enforcement of judgment and various types of litigation. Particular

attention given to the role of the paralegal in assisting the attorney in these matters. Prerequisite: LS 125.

LS 340 Federal Taxation (3) Studies current federal income tax law concepts of income and deductions for all entities. Prerequisite: LS 125. Same as ACCT 329.

LS 343 Criminal Law (3) Studies both substantive and procedural criminal law including specific topics in each. prerequisite: LS 125. Same as CJ 342.

LS 345 Constitutional Law: the American Constitution (3) Reviews judicial decisions and interpretations which have contributed to the growth and development of the United States Constitution in such areas as the federal system, intergovernmental relations, presidential powers, government functions and civil rights. Prerequisite: LS 125. Same as PSCI 345.

LS 350 Business Organization (3) Studies the legal organization of business entities. Emphasis on the role of the lawyer and the legal assistant in the formation of various business organizations. Includes a survey of the fundamental principles of law applicable to each type of business organization and preparation of the related documents. Prerequisite: LS 125.

LS 370 Family Law (3) Acquaints the legal studies student with the legal problems involved in the area of domestic relations. Covers the legal problems involved in separation, divorce, child custody, adoption and nonsupport. Students draft pleadings in domestic relations cases as well as study the law regarding the particular area in which they are working. Prerequisite: LS 125.

LS 380 Administrative Law (3) Overview of the functions and procedures of federal administrative agencies, including analysis of their underlying statutory authority as embodied in the Administrative Procedure Act and the subsequent case law development of this authority. Topics include the rule-making function, administrative adjudication and due process, judicial review of administrative action, use and control of discretion in the administrative process and disclosure of information by administrative agencies. prerequisite: LS 125.

LS 420 Women and Law (3) Introduces students to legal issues that have had a profound impact on the legal standing and rights of women. Examines the historical context that created the present legal status of women in the United States. Prerequisite: LS 125 or permission of instructor.

LS 480 Special Topics in Law (3) Covers selected topics in more depth and explores current law-related issues. Prerequisite: LS 125 or permission of instructor.

LS 491 Internship I (3) The internship requirement for the legal studies program combines the student's academic training with practical experiences within a law firm, corporation, bank or governmental agency. Prerequisite: Senior standing.

LS 492 Internship II (3) The internship requirement for the legal studies program combines the student's academic training with practical experiences within a law firm, corporation, bank or governmental agency. Prerequisite: Senior standing.

LS 497 Contemporary Legal Issues (3) Considers contemporary legal issues and their impact on our culture. Research and writing about those issues required. Prerequisite: Senior standing, completion of legal studies core requirements or permission of the instructor. Senior seminar course for legal studies majors.

Logistics and Supply Chain Management (LSCM)

Logistics and supply chain management courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite

requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

LSCM 315 Introduction to Logistics and Supply Chain Management (3) An introduction to the analysis and design of domestic and international logistics systems and supply chain management. Topics include transportation, warehousing, inventory control, materials handling and packaging, plant and warehouse location decisions, sourcing, and supply chain performance and financial analysis. Additional emphasis is placed on concepts and practices that provide firms with a global competitive advantage. Prerequisite: Satisfaction of leveling policy. Same course as MGT 455.

LSCM 320 Advanced Logistics Management (3) Provides in-depth knowledge on the application of logistics services from original sourcing through delivery of finished products in the supply chain. Focuses on fundamental logistics functions such as purchasing, procurement, forecasting, inventory control, scheduling and distribution channels. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 330 Supply Chain Management Solutions with SAP (3) Provide knowledge and experiences working with the SAP ERP system. Special attention is afforded to interdependencies between logistical and back office software functions such as finance, controlling, and human resources. Students will learn the SAP ERP system, work through key tasks in all major modules, and most importantly, understand the underlying business processes impacting supply chain management. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 350 Humanitarian Logistics (3) This course provides an understanding of the key elements of humanitarian logistics. Students will learn key information on humanitarian aid, current implications of logistics and supply chain management, and how to employ future applications and innovation to humanitarian aid programs. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 360 Global Logistics and Supply Chain Management (3) Addresses logistics and supply chain management in the global environment which include: global procurement and sourcing, methods of entry, international contracts, terms of trade, terms of payout, international modes, international insurance, managing global transaction risks, and developing strategic advantages in the global supply chain. The course will also address environmental, sustainable, and cultural decisions that affect logistics and supply chain processes. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 370 E-Logistics (3) Describes the role of electronics, information technologies, and information systems in collaborative supply chain relationships. Emphasis is given on the tools and skills for understanding how to manage the electronic environment of logistics and supply chain management. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 380 Special Topics in Supply Chain Management (3) Covers topics not included in other courses, gives greater depth in certain areas and explores current supply chain management topics. Repeatable course. Content changes each time course is offered. Prerequisite: Grade of C- or better in LSCM 315.

LSCM 390 Contemporary Supply Chain Issues (3) Provides students with experiential learning opportunities in solving relevant logistics and supply chain management issues. Topics focus on recent logistics and supply chain management studies within various industry sectors. The course aims to develop skills and knowledge to manage contemporary issues in the supply chain management field. Prerequisite: Grade of C- or better in LSCM 315.

Management (MGT)

Management courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

MGT 280 Special Topics in Management (3) Covers topics not included in other courses, gives greater depth in certain areas and explores current management topics. Repeatable course. Content changes each time course is offered.

MGT 306 Human Resources (3) Covers the basic components of the human resource management (HRM) function in organizations, including hiring employees, assessing performance, and administering pay and benefits. All these activities must be performed in compliance with the law, so course also addresses Equal Employment Opportunity laws and other federal legislation and agencies that impact HRM. Prerequisite: Satisfaction of leveling policy. Fall.

MGT 310 Production/Operations Management (3) Survey of the management problems found in the manufacturing of goods and the delivery of services. Various issues considered with emphasis on quantitative models available for solving selected problems. Total quality management and other management concepts discussed. Prerequisite: MATH 222, QM 227 or equivalent statistics course.

MGT 311 Management Information Systems (3) A study of various types of computer-based information systems including their design, acquisition and operation from the perspective of the manager/endorser. Prerequisite: Satisfaction of leveling policy.

MGT 331 International Business Strategy (3) Examination of the challenges of conducting business outside the firm's country of origin. Explores the unique aspects of international business, the international environment, and foreign environmental forces from a strategic perspective. Prerequisite: ECON 101 or 102.

MGT 377 Organizational Behavior (3) Focuses on developing an understanding of the individual and group level factors that influence employee attitudes and behavior at work. Emphasis placed on learning organizational behavior theories, their empirical validity and their practical implications. Topics include personality and emotions, motivation, work teams and leadership. Prerequisite: Satisfaction of the School of Business Administration course level policy.

MGT 380 Special Topics in Management (3) Covers topics not included in other courses, gives greater depth in certain areas and explores current management topics. Repeatable course. Content changes each time course is offered. Prerequisite: Satisfaction of leveling policy and permission of instructor. Offered periodically.

MGT 392 Managing Global Relationships (3) Focuses on the impact of culture on business relationships. Emphasis is placed on the ways in which culture impacts managerial relationships with employees, with other businesses, and negotiations. Applications to the international management context, intercultural negotiations, and recommendations for improving expatriate success are highlighted. Prerequisite: Grade of C- or better in MGT 377.

MGT 395 Independent Study (1-3) Independent research in management conducted under faculty supervision. Prerequisites: Satisfaction of leveling policy and permission of instructor.

MGT 402 Compensation and Benefits (3) Examines human resources management practices that compensate employees and provide benefits. Covers job evaluation, pay structures, federal laws affecting compensation practices, incentive pay plans, and benefit plans. Prerequisite: Grade of C- or better in MGT 306. Spring.

MGT 412 Leadership (3) Surveys historical and contemporary perspectives on leadership. Includes a heavy experiential emphasis through skill-building modules related to leadership tasks, for example, making oral presentations, empowering and delegating, in motivating others. Provides a comprehensive understanding of the leadership subject from the management literature as well as a personalized, practical application experience. Prerequisite: Satisfaction of leveling policy.

MGT 430 Decision Making (3) Develops a theoretical and practical understanding of individual and multiparty decision-making processes. Emphasis placed on learning about the systematic ways in which people's judgments deviate from what a rational model would predict. Coverage of multiparty decision making includes an extensive treatment of negotiation strategies. Applications to the management context and recommendations for improving decision making are highlighted. Prerequisite: Satisfaction of leveling policy.

MGT 455 Introduction to Logistics and Supply Chain Management (3) An introduction to the analysis and design of domestic and international logistics systems and supply chain management. Topics include transportation, warehousing, inventory control, materials handling and packaging, plant and warehouse location decisions, sourcing, and supply chain performance and financial analysis. Additional emphasis is placed on concepts and practices that provide firms with a global competitive advantage. Prerequisite: satisfaction of leveling policy. Same course as LSCM 315.

MGT 475 Competitive Dynamics (3) Examines the interplay between functional areas of the firm as well as the importance of competitive analysis. Through the use of a simulation, the integration of principles and techniques learned in accounting, finance, marketing, and management are highlighted. Prerequisites: Grade of C- or better in ACCT 211, FIN 361, MGT 377 and MKT 325.

MGT 497 Global Strategic Management (3) Uses a strategic planning model to integrate principles and techniques learned in accounting, economics, finance, marketing, management and quantitative methods. Examines strategies used to attain and maintain a global competitive advantage. Prerequisites: Grade of C- or better in MGT 377, MKT 325, FIN 361 and senior standing. Senior seminar course. Must earn a grade of C- or better in this course to apply to Outcome 11.

MGT H250 Seminar in Contemporary Leadership (3) Explores various theories of leadership and ethical behavior through the use of cases based on classic and modern firms. Covers topics including conflict resolution, situational leadership, diversity, authority, power, and organizational culture. Harlaxton summer course only. Offered periodically.

Marketing (MKT)

Marketing courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the "Schroeder Family School of Business Administration" section of this catalog for the complete leveling policy.

MKT 325 Principles of Marketing (3) Introduction to basic marketing principles from the perspective of a marketing manager. Topics covered include the marketing concept, product analysis, consumer behavior, channels of distribution, pricing, promotion, international marketing and marketing's role in society. Prerequisite: Satisfaction of leveling policy.

MKT 330 Consumer Behavior (3) Consumer behavior studied from socio-economic, psychological and cultural perspectives as it relates to marketing management. Prerequisite: Grade of C- or better in MKT 325.

MKT 373 Personal Selling (3) Studies the responsibilities, activities and psychology of a sales representative with a focus on long-term relationship building. Successful selling practices are introduced including prospecting, establishing rapport, generating curiosity, being persuasive, creating desire, handling objections and closing. Prerequisite: Grade of C- or better in MKT 325.

MKT 374 Integrated Marketing Communication (3) Provides an examination of all elements of the marketing promotion mix - advertising, sales promotions, point-of-purchase communication, direct marketing communication, public relations and sponsorship marketing, and personal selling. Overview of market segmentation, appeals, budgets, evaluation and management of the promotion mix. Prerequisite: Grade of C- or better in MKT 325.

MKT 380 Special Topics in Marketing (3) Covers topics not included in other courses. Gives greater depth in certain areas and explores current marketing topics. Repeatable course. Content changes each time course is offered. Prerequisite: Grade of C- or better in MKT 325. Offered periodically.

MKT 385 Digital Marketing (3) This course examines timely concerns at the intersection of marketing and technology. Topics include internet technology for marketers, online privacy and security issues, buyer behavior online, and digital marketing techniques such as banner advertising, advertising and participating in social media, search engine optimization, and mobile and email marketing. Prerequisite: Grade of C- or better in MKT 325.

MKT 395 Independent Study (1-3) Independent research in marketing conducted under faculty supervision. Prerequisite: Grade of C- or better in MKT 325; permission of the instructor.

MKT 473 International Sales and Logistics (3) This hands-on course is designed to prepare students for international trade. By exporting and importing products to and from an international education partner, with the assistance of a business partner, students will obtain a working knowledge of the logistical and sales challenges associated with international trade. Prerequisite: Grade of C- or better in MKT 325.

MKT 477 International Marketing (3) Examines the impact of culture, economics and legal and regulatory influences on marketing strategy in more than one nation. Prerequisite: Grade of C- or better in MKT 325.

MKT 490 Marketing Research (3) Introduces applications, methods, techniques and functions of market research and information systems. Prerequisite: Grade of C- or better in MKT 325 and QM 227 or an equivalent statistics course.

MKT 492 Strategic Marketing Management (3) Provides an examination of marketing strategy selection and implementation with a focus on decision making and problem solving. Prerequisite: Grade of C- or better in MKT 325; senior standing.

Mathematics (MATH)

Mathematics courses are taught by the faculty of the Department of Mathematics.

MATH 101 Mathematical Ideas (3) Explores a variety of topics, including numeration systems, logic, geometry, probability, and statistics. Includes historical and cultural perspective and contemporary applications. Background should include two semesters of high school algebra. Fall, spring.

MATH 105 College Algebra (3) Treats properties of linear, quadratic, polynomial, exponential and logarithmic functions, inequalities, and systems of equations. Develops critical thinking and emphasizes real-world applications in the sciences and topical issues. Background

should include three semesters of high school algebra. Fall, spring, summer.

MATH 106 Precalculus Trigonometry (1) Provides trigonometric tools necessary for success in Math 221. Develops trigonometric functions using both right triangles and the unit circle approach. Covers graphing, verification of identities, and inverse trigonometric functions. Requires no prior knowledge of trigonometry. Prerequisite: Grade of C or better in MATH 105 or an acceptable score on a placement exam. Fall, spring.

MATH 134 Survey of Calculus (3) Treats polynomial, exponential, and logarithmic functions, their derivatives and integrals. An introduction to the calculus of several variables and applications to the natural and social sciences. Recommended for students who plan to take only one semester of calculus not requiring trigonometry. Not open to mathematics majors or minors. Background should include four semesters of high school algebra and two semesters of geometry. Prerequisite: Grade of C or better in MATH 105 or an acceptable score on a placement exam. Does not satisfy the prerequisite for MATH 222. Credit not given for both MATH 134 and 221. Fall, spring.

MATH 191 Special Topics in Finite Math (1) Study of topics of special interest in finite (non-calculus based) mathematics. Treats material not covered in other courses. Topics will be announced. May be repeated. Background should include two semesters of high school algebra.

MATH 202 Mathematics for Elementary Teachers (3) Treats problem solving, the real number system, elementary number theory, geometry, and other topics. For elementary education majors only. Prerequisite: MATH 101. Spring.

MATH 221 Calculus I (4) Covers parametric and polar equations; limits and continuity; differentiation and integration of algebraic, trigonometric, logarithmic, and exponential functions; and applications of differentiation. Background should include eight semesters of high school mathematics, including four semesters of algebra, two semesters of geometry, and at least 12 weeks of trigonometry. Prerequisite: Grade of C or better in Mathematics 105 and permission of Department of Mathematics, or an acceptable score on a placement exam. Credit not given for both MATH 134 and 221. Fall, Spring, Summer.

MATH 222 Calculus II (4) Covers integration techniques and applications of integration. Introduces vectors and matrices, functions of several variables and their derivatives, differential equations, and multiple integrals. Prerequisite: Grade of C- or better in MATH 221. Fall, spring, summer.

MATH 291 Special Topics in Calculus (1) Study of aspects or applications of calculus not covered in the standard calculus sequences. Topics will be announced. May be repeated. Prerequisite: MATH 221.

MATH 310 History of Mathematics (3) Surveys the development of mathematics from the Ishango Bone to Newton, and Leibniz. Emphasizes major mathematical concepts, the cultural contexts in which they were discovered, and the solving of related mathematical problems. Prerequisite: Grade of C- or better in MATH 222.

MATH 323 Calculus III (4) Covers infinite series, vector-valued functions, multiple integration, line and surface integrals, and analysis of vector fields. Prerequisite: Grade of C- or better in MATH 222. Fall, spring, summer.

MATH 324 Differential Equations (3) Includes standard first- and second-order methods, systems, difference equations, power series, Laplace transforms, and numerical and nonlinear methods, with applications for all of these. Prerequisite: Grade of C- or better in MATH 222. Fall, spring, summer.

MATH 330 Theory of Interest (3) Covers compound interest formulas, annuities, perpetuities, amortization schedules, bonds, and other securities. Provides preparation for the Society of Actuaries Exam FM. Prerequisite: Grade of C- or better in MATH 222. Fall 2019 (every other fall).

MATH 341 Linear Algebra (3) Covers systems of linear equations, matrices, determinants, vector spaces, linear transformations, and eigenvalues and eigenvectors. Prerequisite: Grade of C- or better in MATH 222. Spring.

MATH 355 Foundations of Geometry (3) Develops from axioms various notions, including point, line, incidence, betweenness, congruence, parallelism, perpendicularity, distance, similarity, and perspective. Geometries include finite, Euclidean and hyperbolic, with emphasis on Euclidean constructions, proofs, transformations, and dynamic geometry using computer software. Prerequisite: Grade of C- or better in MATH 222 or consent of instructor. Fall 2019 (every other fall).

MATH 365 Probability (3) Develops standard topics in calculus-based axiomatic probability theory and applications, including permutations, combinations, sample spaces, events, random variable, independence, conditional probability, distributions, density functions, expected value, and moment generating functions. Prerequisite: Grade of C- or better in MATH 222. Fall.

MATH 370 Discrete and Combinatorial Math (3) Covers such topics as enumeration, principles of logic, set theory, mathematical induction, generating functions, recurrence relations, and graph theory. Prerequisite: Grade of C- or better in MATH 222. Fall.

MATH 373 Numerical Methods (3) Covers numerical computer-based methods for solving transcendental equations, systems of linear equations, interpolation, approximation, numerical integration and differentiation, and numerical solutions of ordinary differential equations. Prerequisite: Computer Science 205 or 210 or equivalent; Grade of C- or better in Mathematics 222. MATH 341 is suggested but not required. Spring 2019 (every other spring).

MATH 391 Special Topics in Intermediate Math (1) Covers topics not included in other courses to give greater depth in certain areas and to explore current mathematics topics. Topics vary; may include foundations and set theory, graph theory, and number theory. May be repeated. Prerequisite: MATH 222; any additional prerequisites will be announced when scheduled.

MATH 420 Advanced Calculus (3) Provides more formal treatment of topics in elementary calculus, including limits, continuity, differentiability, integrability, and infinite series, with emphasis on precise definitions and proofs of theorems. Prerequisite: MATH 323. Fall.

MATH 425 Complex Variables (3) Introduction to complex numbers and the calculus of functions of a complex variable. Topics include the algebra and geometry of complex numbers, limits and derivatives of functions of a complex variable, contour integrals, Taylor and Laurent series, and residues. Prerequisite: MATH 323.

MATH 431 Theory of Life Contingencies (3) Covers the theory and application of contingency mathematics in the areas of life and health insurance, annuities and pensions, using both stochastic and deterministic approaches. Includes material covered on the Society of Actuaries Exam MLC. Prerequisite: MATH 330, 365. Spring 2020 (every other spring).

MATH 445 Abstract Algebra (3) Introduces algebraic structures and their applications. Covers set theory, number theory, modular arithmetic, groups, rings and fields. Prerequisite: MATH 341. Spring 2019 (every other spring).

MATH 466 Mathematical Statistics (3) Develops standard topics in mathematical statistics, including sampling distributions, estimation, hypothesis testing, analysis of variance, regression, and correlation. Prerequisite: Grade of C- or better in MATH 365. Spring.

MATH 490 Seminar, Workshop or Independent Study in Math (1) Seminar/workshop topics announced when scheduled. Independent study topics selected by students in consultation with the mathematics professor who supervises the work. Prerequisite: Permission of instructor.

MATH 491 Special Topics in Advanced Math (1) In-depth exploration of a topic not covered in other courses as preparation for graduate level mathematics. Topics vary, but may include algebraic topology, analytical number theory, coding theory, differential geometry, functional analysis, Lie theory, partial differential equations, real analysis, ring theory, and topology. May be repeated. Prerequisites: MATH 323; any additional prerequisites will be announced when scheduled.

MATH 495 Senior Seminar: Mathematical Modeling (3) Focuses on the formulation, analysis, and interpretation of mathematical models related to contemporary problems drawn from the natural sciences, social sciences, and management science. Involves team projects and a seminar format. Prerequisites: Senior standing; at least two courses chosen from MATH 323, 324, 365, 341, or 373; at least one computer programming class. Fall.

MATH 499 Internship in Mathematics (1) A structured assignment which allows the student to gain practical experience in a mathematics-related field relating to a career interest. The student is directed by a faculty member of the Department of Mathematics and supervised by a member of the cooperating organization. Prerequisite: Permission of Department of Mathematics.

Mechanical Engineering (ME)

Mechanical engineering courses are taught by the faculty of the Department of Mechanical and Civil Engineering. Pre-engineering students and students not admitted to the College of Engineering and Computer Science may not enroll in any mechanical engineering (ME) course numbered 200 or above without specific permission of the instructor, chair, or dean.

ME 101 Introduction to Mechanical Engineering (3) A hands-on introduction to mechanical engineering. Topics include the use of the computer in engineering, 3D modeling, applied physics, proposal preparation, teaming, and an introduction to mechanical engineering design process of design, build, & test. Student teams complete a design project. Prerequisite: Admission to Mechanical Engineering Lower Division. Credit not given for both ME 101 and ME 102. Fall.

ME 102 Introduction to Mechanical Engineering for International Students (3) A hands-on introduction to mechanical engineering. Topics include the use of the computer in engineering, 3D modeling, applied physics, proposal preparation, teaming, and an introduction to mechanical engineering design process of design, build, & test. Student teams complete a design project. Specific attention is given to proper use of the English language in engineering education and practice. Enrollment limited to students for whom English is a second language. Offered as needed. Prerequisite: Admission to Mechanical Engineering Lower Division. Credit not given for both ME 101 and ME 102.

ME 197 Integrated Design I (2) Introduces engineering design as a disciplined, creative, problem-solving process using requirements analysis, functional decomposition, system architecture, and test plans. Students work on team-based project. Students learn basic sketching and machine shop techniques in a team environment. Prerequisite: ME 101 or 102 with a grade of C- or better or permission of the instructor. May be repeated. Spring.

ME 224 Numerical Methods for Engineers (3) Fundamental mathematical principles and techniques of numerical methods and how to apply them, using high level computer languages, to solve engineering problems. Develop skills in mathematical computer modeling and analysis of engineering problems. Prerequisites: ENGR-213 and MATH-324 or permission of instructor.

ME 297 Integrated Design II (2) Introduces computer aided manufacturing. Students are provided the opportunity to work on a large scale project in a team environment. Prerequisite: ME 197 with a grade of C- or better or permission of instructor. May be repeated. Spring.

ME 318 Manufacturing Methods (3) Considers manufacturing processes for metals and non-metals. Included are casting, forming, machining, welding, and techniques for manufactured plastics. Includes tours of manufacturing facilities. Corequisites: ENGR 230, 232. Spring.

ME 330 Materials Lab (2) An integrated series of experiments on the physical and mechanical behavior of materials including the effects of various types of loads, time, temperature and environment. Materials studied include ferrous, plastics and other nonferrous materials. Prerequisites: ENGR 232 with a grade of C- or better. Corequisites: ENGR 230 or permission of instructor. Fall.

ME 342 Machine Analysis (3) Graphical, analytical and computer-aided methods of analyzing displacement, velocity, acceleration and dynamic forces and couples found in mechanisms. Synthesis/design of simple mechanisms. Prerequisite: ENGR 213 with a grade of C- or better. Fall.

ME 344 Design of Machine Elements (3) Theories of failure. Design using factor of safety and reliability. Steady and variable loading, straight and curved sections. Design of gears, shafts and bearings. Prerequisite: ENGR 232 with a grade of C- or better. Spring.

ME 345 Computer Aided Mechanical Design (3) Design of fasteners, springs, brakes, clutches, chains and belts. Computer optimization. Principles of concurrent engineering. Parametric modeling software for analysis and design. Prerequisite: ME 344.

ME 360 Thermo/Fluid Dynamics Lab (2) Fundamental principles and experiments in thermal and fluid systems. Flow measurement, calorimetry, psychrometrics and engine performance. Experimental projects in thermo/fluids engineering. Prerequisite: ME 362. Corequisite: ENGR 366. Spring.

ME 362 Thermodynamics (4) An introduction to thermodynamic principles and the fundamentals of energy analysis. Properties of pure substances. First and second laws of thermodynamics. Availability and irreversibility. Gas mixtures and psychrometrics. Simple gas and vapor cycles. Prerequisite: CHEM 118. Fall.

ME 368 Heat Transfer (3) One- and two-dimensional steady and transient conduction in isotropic solids. Numerical methods in conduction. Forced and free convection in single phase fluids. Thermal radiation and radiation heat transfer. Prerequisite: ME 362. Corequisite: ENGR 366. Fall.

ME 397 Integrated Design III (3) Includes the statistical analysis of experimental data, error analysis and uncertainty analysis. Basic electrical and mechanical sensing devices will be covered as part of the complete data acquisition and processing system. Included is measurement of displacement, velocity, acceleration, pressure, flow, temperature, force, torque, strain vibration and other physical phenomena. Corequisites: EE 215; ENGR 366 or permission of instructor. Spring.

ME 424 Engineering Biomechanics (3) This course is designed to give students the abilities to quantitatively analyze kinematics and kinetics of human movement and to evaluate data collection instru-

mentation options. Students will develop three-dimensional models of human body segments for purposes of evaluating human motion with respect to specific applications. Students will develop programs of their own to compute human kinetic and kinematic parameters from biomechanical data sets. Prerequisites: ENGR-213, BIOL-112, and MATH-323.

ME 428 Special Topics in Biomedical Engineering (3) An advanced course in biomedical engineering topics. Example topics include mechanics of biomaterials, dynamics of blood flow, cardiovascular physiology, orthopaedics, and variable current topics based on student interest. Prerequisites: ENGR-366 and ENGR-232.

ME 432 Advanced Mechanics of Materials (3) Relations between loads, deformations, stresses and strains; curved beams; beams on elastic supports; thick-walled cylinders; unsymmetrical bending; failure theories; energy methods for statically indeterminate members. Prerequisite: ENGR 232.

ME 434 Fracture Mechanics (3) Elements of dislocation theory; properties of mono-crystalline, poly-crystalline, amorphous and polymeric materials; relations between solid state defects and mechanical properties; fatigue, creep and fracture of materials. Prerequisite: ENGR 232.

ME 444 Computer Aided Mechanical Design (3) Design of fasteners, springs, brakes, clutches, chains and belts. Computer optimization. Principles of concurrent engineering. Parametric modeling software for analysis and design. Prerequisite: ME 344.

ME 446 Finite Elements (3) Introduces the finite element method for the solution of problems encountered in stress analysis, heat transfer and fluid mechanics. Theoretical concepts are covered as well as the application of popular computer software packages. Prerequisites: ME 344; ENGR 366.

ME 448 Mechanical Vibrations (3) Kinematics of vibratory motion, study of single and multi-degree of freedom systems. Dynamic forces in vibrating systems. Computer applications in vibration analysis. Prerequisite: MATH 324; ENGR 213.

ME 452 System Modeling and Control (3) Mathematical and computer modeling of dynamic lumped parameter mechanical, electrical, hydraulic and pneumatic systems. Response of first and second order systems. Introduction to feedback control of linear systems. Prerequisites: ENGR 213; MATH 324.

ME 453 Mechatronics (3) Hands-on use of actuators and sensors in the design of electro-mechanical systems. Systems may include electric motors, shape memory alloys, pneumatic and hydraulic actuators, solenoids, position and proximity sensors. Students learn a synergistic design approach incorporating mechanics, electronics, computer programming and controls. Prerequisites: Mechanical Engineering 397, 452.

ME 462 Advanced Thermodynamics (3) Real gases and gas mixtures, thermodynamics of state relationships. Combustion and thermochemistry. Concepts of statistical thermodynamics. Prerequisite: ME 362.

ME 463 Principles of Turbomachinery (3) Turbomachine classification. Performance characteristics of centrifugal pumps and compressors and radial and axial flow turbines. Basic fluid and thermodynamic analysis of turbomachine flow processes. Rudiments of design. Prerequisites: ME 362, ENGR 366 or permission of instructor.

ME 465 Internal Combustion Engines (3) Theoretical and actual cycles, production of torque and combustion modeling. Mechanical design of engines, fuel injection and emission systems. Prerequisites: ME 342, 362

ME 466 Introduction to Computational Fluid Dynamics (3) Development of the Navier-Stokes equations for laminar and turbulent flow. Methods for discretizing and solving the equations. Turbulent

flow and turbulence modeling. Applications using commercial CFD software. Prerequisites: ENGR-366; MATH-324.

ME 468 Advanced Heat Transfer (3) Multidimensional heat conduction. Boiling and condensation heat transfer. Computer-assisted analysis of conduction, convection and radiation. Analysis and design of heat exchangers and other heat transfer systems. Prerequisites: ME 368; MATH 324.

ME 470 Combustion (3) Covers fundamental concepts of non-reactive ideal gas mixtures, thermochemistry, chemical equilibrium, chemical kinetics and reactive gas dynamics (deflagrations and detonations). Prerequisite: ME 362.

ME 472 Energy Systems (3) Energy sources and energy conversion. Principles of heat pump systems, solar energy, wind power, fuel cells and introduction to nuclear engineering. Prerequisites: ME 362, 368.

ME 473 Heating, Ventilation and Air Conditioning (3) Methods of controlling temperature and humidity in buildings. Calculation of heating and cooling loads. Mechanical systems for heating and air conditioning. Prerequisites: ENGR 366, ME 362. Corequisite: ME 368.

ME 474 Environmental Engineering I (3) Introduction to environmental engineering topics, including water quality, water treatment processes, air quality, solid and hazardous waste management, and environmental sustainability. Includes a study of environmental laws. Prerequisite: CHEM 118 with lab. Spring.

ME 476 Power Plant Engineering (3) Modern central station power generating systems. Turbine cycles and performance. Fuels and combustion equipment. Steam generator design and performance. Rudiments of heat transfer equipment and turbomachinery design. Prerequisites: ENGR 366; ME 362.

ME 495 Professional Practice I (3) Students develop a proposal for an engineering project, complete the engineering design, and begin fabrication. Students are introduced to professional skills, such as project and time management, teaming, and ethics. Prerequisites: ENGR-366; ME-344; or permission of instructor. Corequisite: ME-368 or permission of instructor. Fall.

ME 497 Professional Practice II (3) Complete the semester-long project proposed in Mechanical Engineering 495. All design aspects and testing documented in a formal written report and defended through an oral presentation of the results to peers, faculty and industrial customers. Prerequisite: ME 495.

ME 498 Independent Study: Mechanical Engineering (1) Independent study of a topic of interest to the student. Requires faculty sponsor and approved detailed study plan.

ME 499 Special Topics: Mechanical Engineering (1) Formal lecture/laboratory study of topics of special interest. Topics announced. Repeatable course. Content changes each time course is offered. Prerequisites announced when scheduled.

Military Science Leadership (MSL)

MSL 101 Fundamental Military Concepts (1) The course introduces students to the basic officer competencies, establishes a firm foundation for continued study in higher ROTC courses, and instructs basic life skills pertaining to personal fitness and interpersonal communication skills. Students will be introduced to the U.S. Army values, national values, and expected ethical behavior. Students will be exposed to the unique duties and responsibilities of officers and the expectations of selfless service, dedication, and duty to the nation. Designed to introduce basic soldier skills and squad level tactical operations. Attention is devoted to development of leadership potential through practical exercises both in and out of the classroom. Fall.

MSL 102 Basic Leadership (1) Examines the leadership process as affected by individual differences and styles, group dynamics, and personality behavior of leaders. Will introduce a generic model of problem solving. Teaches the basic skills that underlie effective problem solving in different work environments. Instructs how to relate the problem-solving model and basic problem solving skills to the resolution of military problems. Students will experience an introduction of fundamental leadership concepts and examine factors that influence leader and group effectiveness. Designed to teach basic soldier skills and squad level tactical operations. Student involvement in briefings and hands on practical exercises. Attention is devoted to development of leadership potential through practical exercises both in and out of the classroom. Spring.

MSL 201 Advanced Leadership and Management (2) Develops basic leadership abilities and management skills through instruction and hands on practical exercises. Introduces principles and techniques of effective written and oral communication. Teaches practical leader skills and examines the principle of subordinate motivation and organizational change. Students will apply leadership and problem solving to a complex case study/simulation. Class is designed to develop individual team skills, decision-making abilities, and test basic tactical proficiency skills as well as improve planning and organizational skills both in and out of the classroom environment. Teaches hands-on soldier skills and squad level tactical operations. Attention is devoted to development of leadership potential through practical exercises both in and out of the classroom. Fall.

MSL 202 Leadership, Tactics and Officership (2) Develops leadership skills by focusing on conventional basic squad and small unit tactics and introduces students to the basic tactical principles of maneuver. Examines the roots of national and Army values and better citizenship. Allows students to apply principles of ethical decision-making and resolve ethical issues in case studies. Examines the legal and historical foundations and duties and function of the Army officer. Students will analyze the roles officers played in the transition of the Army from the Vietnam Conflict to the 21st Century. Teaches basic soldier skills and squad-level tactical operations. Special attention is devoted to development of leadership potential through practical exercises both in and out of the classroom. Spring.

MSL 204 Leader's Training (Basic Camp) (4) Conducted at Fort Knox, Kentucky, home of the United States Armor Branch, during the summer months, covering a training period of approximately 30 days of paid training and excitement. The Department of Military Science ROTC battalion provides travel to and from Fort Knox. While at camp you will meet students from all over the nation while earning approximately \$800 in pay and receive free room and board while at camp. While at camp, you may have opportunities to earn a two-year ROTC scholarships. The Basic Camp is a way to catch up on missed Military Science courses in order to qualify the student to contract into the Advanced ROTC Course at USI. Prerequisite: Departmental approval. Summer.

MSL 241 US Military History I (1740-1900) (3) The course will focus on U.S. military activity from the French and Indian War through the Spanish American War. Emphasis is on issues in command, impacts of technology, and the evolution of strategy and tactics in modern warfare. Students will conduct a battle analysis using a variety of techniques. Fall.

MSL 242 US Military History II (1900-Present) (3) The course will focus on U.S. military activity from before WWI through the Persian Gulf War as well as highlighted concepts in contemporary peacekeeping operations. Emphasis is on issues in command, impacts of technology, and the evolution of strategy and tactics in modern warfare. Students will conduct a battle analysis using a variety of techniques. Spring.

MSL 301 Small Unit Leadership (3) Course is designed for those students who contract with Army ROTC to continue their military studies in pursuit of a commission as an officer into the Army following graduation from college. Course focus is to build cadet leadership competencies in preparation for attendance and successful completion of ROTC Advanced Course, Ft. Knox, Kentucky. Provides an in-depth review of the features and execution of the Leadership Development Program, providing the cadet with periodic assessment of performance in leadership positions. Students will study squad and platoon-level tactics, troop-leading procedures, mission analysis, land navigation skills training, military operations plans and orders development, execution of squad battle drills, and basic briefing techniques. Prerequisite: Department approval. Fall.

MSL 302 Small Unit Operations (3) Course is a follow-on module to the MS 301 class, preparing cadets for attendance and successful completion of ROTC Leader Development and Assessment Course, Ft. Lewis, Washington. Focus will center on advanced self-development through the Leadership Development Program and an advanced-learning environment of doctrinal leadership and tactical operations at the small unit level. Cadets will plan and conduct individual and collective skill training for offensive operations and a Field Training Exercise during the spring semester. Cadets will be exposed to the developmental counseling program throughout the course period. Prerequisite: MSL 301 and departmental approval. Spring.

MSL 401 Leadership, Management, and Ethics (3) Course is designed to develop, train, and transition the advanced course graduate from cadet to lieutenant for service as an officer. Cadet will study Army staff organizations, how they function, and the processes of the army's hierarchy organizational structure. Students will learn in-depth counseling responsibilities/methods, officer and non-commissioned officer evaluation report development, officer evaluation report support form development, and training plan development. Course analyzes the legal aspects of decision-making and leadership in action. Course will expose cadets to the foundations of leadership, operational law, and the key aspects of the Uniformed Code of Military Justice. Cadets will receive training on basic leader responsibilities to foster an ethical command climate and how to meet moral obligations, as well as leader responsibilities to accommodate subordinate spiritual needs. Prerequisite: Departmental approval. Fall.

MSL 402 Transition to Lieutenant (3) Continued advanced development and transition of the advanced camp graduate from cadet to lieutenant for service as an officer. Course is a follow-on module to the MS 401 class. Course will expose cadets to the in-depth study of leadership, operational law, and the key aspects of the Uniformed Code of Military Justice with a hands-on approach with interactive scenarios being utilized in class. Students will undergo hands-on training and instruction in Joint Ethics regulations, joint strategic level operations, study of army administrative and logistics management, in depth counseling techniques, and duty at first military assignment. Course will cover the Army's training philosophy, METL development, equipment readiness, and rules of engagement during deployment operations. Students also will receive training in personal awareness financial planning. Prerequisite: MSL 401. Spring

Music (MUS)

Music courses are taught by the faculty of the Department of Music.

APM 101, 201, 301, 401 Baritone/Euphonium (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 102, 202, 302, 402 Bassoon (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 103, 203, 303, 403 Cello (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 104, 204, 304, 404 Clarinet (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 106, 206, 306, 406 Flute (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 107, 207, 307, 407 French Horn (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 108, 208, 308, 408 Guitar (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 109, 209, 309, 409 Harp (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 110, 210, 310, 410 Harpsichord (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 111, 211, 311, 411 Lute (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each

time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 112, 212, 312, 412 Oboe (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 113, 213, 313, 413 Organ (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 114, 214, 314, 414 Percussion (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 115, 215, 315, 415 Piano (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 116, 216, 316, 416 Saxophone (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 117, 217, 317, 417 String Bass (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 118, 218, 318, 418 Trombone (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 119, 219, 319, 419 Trumpet (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 120, 220, 320, 420 Tuba (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week.

Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 121, 221, 321, 421 Viola (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 122, 222, 322, 422 Violin (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 123, 223, 323, 423 Voice (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 124, 224, 324, 424 Voice (Musical Theatre) (1-2) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

APM 125, 225, 325, 425 Jazz Guitar (1-3) Applied music lesson offered in the indicated instrument. Students registering for one credit hour of applied music will receive one 30-minute private lesson per week. Students registering for two credit hours will receive one 60-minute private lesson per week. Repeatable courses. Content changes each time course is offered. Prerequisite: Music major or minor or permission of the instructor.

MUS 101 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through attendance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 102 Diction I (1) Presents the International Phonetic Alphabet and the diction rules for correct singing pronunciation of English, Italian, Latin, German, and French. Combines lecture, oral readings, and practice skills in use of IPA. Prerequisite: Music major or permission of instructor.

MUS 103 Diction II (1) Presents the International Phonetic Alphabet and the diction rules for correct singing pronunciation of English, Italian, Latin, German, and French. Combines lecture, oral readings, and practice skills in use of IPA. Prerequisite: Music major or permission of instructor.

MUS 104 Basic Piano I (1) Group instruction in piano with simple literature and the development of skills in techniques, sight-reading, harmonization, transposition, and improvisation. Designed to prepare for the Piano Proficiency I exam. Prerequisite: Music major or minor or permission of instructor.

MUS 105 Basic Piano II (1) Group instruction in piano with simple literature and the development of skills in techniques, sight-reading, harmonization, transposition, and improvisation. Designed to prepare for the Piano Proficiency I exam. Prerequisite: Music major or minor or permission of instructor.

MUS 110 University Bands (1) (Section 1) Includes the finest wind and percussion students within and outside the Department of Music. Presents several concerts each semester featuring advanced level music and serves as one of the touring ensembles. Students also participate in University Band and Aces Brass as part of this course. Audition required each semester for entrance and seating placement. (Section 2) Presents a concert each semester. Smaller groups from within University Band make up Aces Brass, which performs at home basketball games and MVC and NCAA tournaments. Open to music majors and non-majors. No audition required; seating at discretion of director.

MUS 113 Jazz Ensemble (1) (Section 1: Big Band) Full size band, performs on campus each semester. Other activities include performances with guest artists, jazz festivals, and regional tours. Audition required. (Section 2: Lab Band) Full size band, performs on campus each semester. Audition not required.

MUS 114 Saxophone Ensemble (1)

MUS 115 Clarinet Ensemble (1)

MUS 116 Woodwind Chamber Ensemble (1)

MUS 117 Flute Ensemble (1)

MUS 118 Small Jazz Ensemble (1)

MUS 119 Guitar Ensemble (1)

MUS 120 University Symphony Orchestra (1) Select 60 member ensemble that presents several concerts each semester featuring standard orchestral repertoire. Open to both music majors and non-majors from across the University community. Audition required.

MUS 122 String Chamber Ensemble (1)

MUS 125 Brass Ensemble (1)

MUS 127 Percussion Ensemble (1)

MUS 130 University Choir, Women Chorus, and Mixed Choir (1) (Section 1: University Choir) Composed of the finest vocal talent on campus, this choir has built a reputation for performances of major choral-orchestral masterworks, a cappella music, part songs, and spirituals. It has toured extensively. Audition required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 2: Women's Chorus) Presents a choral concert each semester and participates in the annual Holiday Pops concert. Some musical/choral background and a brief audition to assess pitch-matching ability is required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 3: Mixed Choir) A large choir for men and women from across campus, this choir focuses on a variety of choral music and choral styles in the traditional SATB format. Typically, Mixed Choir performs on programs alongside Women's Chorus, but also joins with University Choir for large works for soprano, alto, tenor, and bass voices. Brief audition required. Repeatable course. Content changes each time course is offered. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities.

MUS 132 Kantorei (1) Explores vocal chamber repertoire with specific emphasis on sixteenth and early seventeenth century madrigals and motets. Audition and concurrent enrollment in MUS-130-430 sec. 01 (University Choir) required.

MUS 138 Opera Main Stage (1) Emphasis on broadening knowledge and skills through studies and performances of extended opera

scenes, full-length opera productions, or other public performances of repertoire.

MUS 139 Keyboard Accompanying (1) Instruction in the technique and art of musical collaboration on the piano, organ and harpsichord.

MUS 140 Diatonic Harmony (5) Intensive instruction in basic musical notational and aural materials, followed by study and analysis of diatonic harmony (intervals, triad and seventh chords, harmonic progression and voice leading). Integrated approach includes aural skills and sight singing training. Credit not given for both MUS 140 and 141. Prerequisite: Theory Assessment Test or permission of instructor.

MUS 141 Diatonic Harmony (3) Study and analysis of diatonic harmony including intervals, triad and seventh chord structure, harmonic progression and voice leading. Integrated approach that includes aural skills and sight singing training. Prerequisite: Successful completion of theory assessment or permission of the instructor.

MUS 142 Chromatic Harmony (3) Continued study and analysis to include chromatic harmony (secondary dominants, Neapolitan chords, augmented sixth chords, mode mixture, and modulation) with integration of aural skills and sight singing training. Prerequisite: MUS 140 or 141.

MUS 154 Introduction to Music (3) Non-technical approach to the history of music as an art in Western society from its beginnings to the present day, with a focus on the music and composers of the last 300 years. Not open to music majors.

MUS 155 Music and Film (3) Survey of the union of music and film from its earliest inception to the present with a focus on the American motion picture industry and its musical traditions.

MUS 156 Music in America (3) Survey of music in the United States from colonial times to the present with a focus on the development of an American musical style and language in the art, folk, and popular realms.

MUS 158 Jazz History (3) Survey of the history of jazz, the development of major stylistic trends and principal contributors to the medium. Includes aural stylistic analysis.

MUS 171 Foundations of Music Education (3) This course is a survey of the music education profession in the United States. It includes an overview of professional qualifications and responsibilities, history of music education in the United States and its influences, philosophical and theoretical positions in music education, an introduction to developmental and psychological concepts of learning and cognition in the context of the music classroom, the importance of music in schools. Includes fundamentals of music education curriculum, state and national standards, standards-based lesson planning, and assessment. Includes development of essential professional skills such as writing, communication, and using appropriate technology. Some field experiences included.

MUS 184 Orientation to Music Therapy (3) Examines music therapy treatment principles and strategies with various populations, the history of the use of music in therapy, the role of the music therapist on the interdisciplinary team, music therapy literature. Students must earn a grade of C- or better.

MUS 188 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 200 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through atten-

dance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 201 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through attendance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 204 Basic Piano III (1) Advanced group instruction with more advanced solo and ensemble work and emphasis on technique, sight-reading, harmonization, improvisation, transposition, memorization, and accompanying. Designed to prepare for the Piano Proficiency II. Prerequisites: MUS 105; completion of Piano Proficiency I; permission of instructor.

MUS 205 Basic Piano IV (1) Advanced group instruction with more advanced solo and ensemble work and emphasis work and emphasis on technique, sight-reading, harmonization, improvisation, transposition and accompanying. Designed to prepare for the Piano Proficiency II. Prerequisites: MUS 105; completion of the Piano Proficiency I; permission of instructor.

MUS 210 Univ Bands (1) (Section 1) Includes the finest wind and percussion students within and outside the Department of Music. Presents several concerts each semester featuring advanced level music and serves as one of the touring ensembles. Students also participate in University Band and Aces Brass as part of this course. Audition required each semester for entrance and seating placement. (Section 2) Presents a concert each semester. Smaller groups from within University Band make up Aces Brass, which performs at home basketball games and MVC and NCAA tournaments. Open to music majors and non-majors. No audition required; seating at discretion of director.

MUS 213 Jazz Ensemble (1) (Section 1: Big Band) Full size band, performs on campus each semester. Other activities include performances with guest artists, jazz festivals, and regional tours. Audition required. (Section 2: Lab Band) Full size band, performs on campus each semester. Audition not required.

MUS 214 Saxophone Ensemble (1)

MUS 215 Clarinet Ensemble (1)

MUS 216 Woodwind Chamber Ensemble (1)

MUS 217 Flute Ensemble (1)

MUS 218 Small Jazz Ensemble (1)

MUS 219 Guitar Ensemble (1)

MUS 220 University Symphony Orchestra (1) Select 60 member ensemble that presents several concerts each semester featuring standard orchestral repertoire. Open to both music majors and non-majors from across the University community. Audition required.

MUS 222 String Chamber Ensemble (1)

MUS 225 Brass Ensemble (1)

MUS 227 Percussion Ensemble (1)

MUS 230 University Choir, Women Chorus, and Mixed Choir (1) (Section 1: University Choir) Composed of the finest vocal talent on campus, this choir has built a reputation for performances of major choral-orchestral masterworks, a cappella music, part songs, and spirituals. It has toured extensively. Audition required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 2: Women's Chorus) Presents a choral concert each semester and participates in the annual Holiday Pops concert. Some

musical/choral background and a brief audition to assess pitch-matching ability is required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 3: Mixed Choir) A large choir for men and women from across campus, this choir focuses on a variety of choral music and choral styles in the traditional SATB format. Typically, Mixed Choir performs on programs alongside Women's Chorus, but also joins with University Choir for large works for soprano, alto, tenor, and bass voices. Brief audition required. Repeatable course. Content changes each time course is offered. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities.

MUS 232 Kantorei (1) Explores vocal chamber repertoire with specific emphasis on sixteenth and early seventeenth century madrigals and motets. Audition and concurrent enrollment in MUS-130-430 sec. 01 (University Choir) required.

MUS 236 Guitar and Voice Techniques I (1) Develops proficiency for playing a variety of songs on guitar and explores techniques for teaching guitar. The course also develops vocal techniques and proficiency in properly using the speaking and singing voice. Students will learn to sing and accompany a basic repertoire of traditional, folk, and popular songs. Prerequisite: Music major or minor or permission of instructor. Students must earn a grade of C- or better.

MUS 237 Guitar and Voice Techniques II (1) Develops proficiency for playing on guitar and singing a variety of songs. Students will develop their singing voices and learn to sing and accompany a repertoire of folk and popular songs representing various eras and styles. Prerequisite: MUS-236 or permission of instructor. Students must earn a grade of C- or better.

MUS 238 Opera Main Stage (1) Emphasis on broadening knowledge and skills through studies and performances of extended opera scenes, full-length opera productions, or other public performances of repertoire.

MUS 239 Keyboard Accompanying (1) Instruction in the technique and art of musical collaboration on the piano, organ and harpsichord.

MUS 241 Introduction to Form (3) Introduces fundamental designs, processes, and structures of music of the eighteenth and nineteenth centuries. Continues aural skills and sight singing training. Prerequisite: MUS 142.

MUS 242 Post-Tonal Theory (3) Covers a wide range of analytical approaches to post-tonal music, with an emphasis on major works from the 20th and 21st centuries. Topics include scalar music, free atonality, serialism, neo-classicism, minimalism, and some recent compositional trends. Prerequisite: MUS 142.

MUS 243 Jazz Theory (2) Introduces specialized terminology of jazz theory and relates it to traditional harmony through the study and analysis of jazz music. Topics include chord construction and the II-V-I progression through scale theory, the blues, chord changes, slash chords, the bebop and pentatonic scales, how to read a lead sheet, basic tune memorization, and re-harmonization. Prerequisites: MUS 142 and MUS 105 or permission of instructor.

MUS 245 Jazz Improvisation (2) Introduction to jazz improvisation with concepts and usage of jazz harmony. Experience with use of scale-chord relationships, jazz notation, ear training, rhythmic concepts, jazz style, and articulation. Students required to improvise on their declared major instrument. Development of instructional strategies for use in teaching improvisation also addressed. Prerequisites: MUS 105, 142, and 243, or permission of instructor.

MUS 260 Suzuki Pedagogy I (2) In-depth study of the philosophy and pedagogy of the Suzuki Talent Education violin method founded by Shinichi Suzuki. Includes the repertoire contained in the founda-

tion units outlined in the Suzuki Association of the Americas' Teacher Development Document. Emphasis on both pedagogical understanding and performance skills of the repertoire. Must be taken in order unless special permission obtained from the instructor. Open to violinists and violists only. Prerequisite: Ability to meet Suzuki Association requirements for beginning level training and Permission of the instructor.

MUS 261 Suzuki Pedagogy II (2) In-depth study of the philosophy and pedagogy of the Suzuki Talent Education violin method founded by Shinichi Suzuki. Includes the repertoire contained in the foundation units outlined in the Suzuki Association of the Americas' Teacher Development Document. Emphasis on both pedagogical understanding and performance skills of the repertoire. Must be taken in order unless special permission obtained from the instructor. Open to violinists and violists only. Prerequisite: Ability to meet Suzuki Association requirements for beginning level training and Permission of the instructor.

MUS 262 Woodwind Techniques and Pedagogy I (1) Develops practical and pedagogical knowledge of flute, single reed, and double reed instruments with emphasis on performing skills. Covers understanding and application of various facets of woodwind playing. Prerequisite: Music major or minor or permission of instructor.

MUS 263 Brass Techniques and Pedagogy I (1) Develops practical knowledge of the four major brass instruments with emphasis on performing skills. Covers understanding and application of various facets of brass playing. Prerequisite: Music major or minor or permission of instructor.

MUS 264 Percussion Techniques (1) Develops practical and pedagogical concepts of the major orchestral and world percussion instruments through performance and listening activities. Prerequisite: Music major or minor or permission of instructor.

MUS 265 String Techniques and Pedagogy I (1) Develops proficiency in one string instrument each semester. Emphasis on heterogeneous classroom teaching techniques for beginning string students. Prerequisite: Music major or minor or permission of instructor.

MUS 270 Teaching Music in the Elementary School (3) Presents non-music educators with information and skills for integrating music fundamentals into the regular elementary classroom. Emphasizes pedagogical and musical performance within the study and practice of music education as well as the importance of music for developmental improvement in other academic areas. Prerequisite: Education 100.

MUS 271 Practicum in School Music Experiences (2)

MUS 272 Woodwind Techniques & Pedagogy II (1)

MUS 273 Brass Techniques and Pedagogy II (1)

MUS 275 String Techniques and Pedagogy II (1) Develops proficiency in one string instrument. Emphasis on heterogeneous classroom teaching techniques for beginning string students. Prerequisite: Music majors of minors or permission of instructor.

MUS 286 Approaches and Materials in Music Therapy Practice (3) Examines the American Music Therapy Association Standards of Practice and the implementation of various treatment strategies in music therapy. Develops ability to write treatment plans, implement structured music therapy sessions, and document progress. Prerequisite: MUS 184 or permission of instructor. Students must earn a grade of C- or better.

MUS 287 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-

time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 288 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 300 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through attendance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 301 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through attendance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 310 University Bands (1) (Section 1) Includes the finest wind and percussion students within and outside the Department of Music. Presents several concerts each semester featuring advanced level music and serves as one of the touring ensembles. Students also participate in University Band and Aces Brass as part of this course. Audition required each semester for entrance and seating placement. (Section 2) Presents a concert each semester. Smaller groups from within University Band make up Aces Brass, which performs at home basketball games and MVC and NCAA tournaments. Open to music majors and non-majors. No audition required; seating at discretion of director.

MUS 313 Jazz Ensemble (1) (Section 1: Big Band) Full size band, performs on campus each semester. Other activities include performances with guest artists, jazz festivals, and regional tours. Audition required. (Section 2: Lab Band) Full size band, performs on campus each semester. Audition not required.

MUS 314 Saxophone Ensemble (1)

MUS 315 Clarinet Ensemble (1)

MUS 316 Woodwind Chamber Ensemble (1)

MUS 317 Flute Ensemble (1)

MUS 318 Small Jazz Ensemble (1)

MUS 319 Guitar Ensemble (1)

MUS 320 University Symphony Orchestra (1) Select 60 member ensemble that presents several concerts each semester featuring standard orchestral repertoire. Open to both music majors and non-majors from across the University community. Audition required.

MUS 322 String Chamber Ensemble (1)

MUS 325 Brass Ensemble (1)

MUS 327 Percussion Ensemble (1)

MUS 330 University Choir, Women Chorus, and Mixed Choir (1) (Section 1: University Choir) Composed of the finest vocal talent on campus, this choir has built a reputation for performances of major choral-orchestral masterworks, a cappella music, part songs, and spirituals. It has toured extensively. Audition required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 2: Women's Chorus) Presents a choral concert each semester and participates in the annual Holiday Pops concert. Some

musical/choral background and a brief audition to assess pitch-matching ability is required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 3: Mixed Choir) A large choir for men and women from across campus, this choir focuses on a variety of choral music and choral styles in the traditional SATB format. Typically, Mixed Choir performs on programs alongside Women's Chorus, but also joins with University Choir for large works for soprano, alto, tenor, and bass voices. Brief audition required. Repeatable course. Content changes each time course is offered. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities.

MUS 332 Kantorei (1) Explores vocal chamber repertoire with specific emphasis on sixteenth and early seventeenth century madrigals and motets. Audition and concurrent enrollment in MUS 130-430 section 01 (University Choir) required.

MUS 336 Introduction to Improvisational Methods (2) Introduces students to proper playing technique on selected orchestral percussion instruments, hand-held percussion, and ethnic instruments. During the course of the semester students will develop proper playing skills and techniques. Facilitation abilities used in clinical music therapy improvisation will be explored and developed using percussion, keyboard, or other media improvisation exercises. Prerequisite: Music Therapy major, completion of MUS 286 and MUS 288, or permission of instructor. Students must earn a grade of C- or better.

MUS 338 Opera Main Stage (1) Emphasis on broadening knowledge and skills through studies and performances of extended opera scenes, full-length opera productions, or other public performances of repertoire.

MUS 339 Keyboard Accompanying (1) Instruction in the technique and art of musical collaboration on the piano, organ and harpsichord.

MUS 340 Counterpoint (3) Study of Baroque counterpoint, with an emphasis on model composition. Topics include figuration prelude, continuous variation, chorale prelude, invention, and fugue. Prerequisite: MUS 241 or permission of instructor.

MUS 341 Jazz Arranging (2) Covers rudimentary techniques associated with the art of arranging jazz music. Introduces two- and three-part writing techniques for the traditional jazz combo and fundamentals of range, transposition, low interval limits, and performance variants. Prerequisites: MUS 105, 142, and 243 or by permission of instructor.

MUS 343 Form and Analysis (3) A detailed analytical study of a wide variety of musical compositions and forms, ranging from Gregorian Chant to 21st century music. Prerequisite: MUS 242 or permission of instructor.

MUS 346 Orchestration (2) Covers the instruments of the symphony orchestra, their ranges and transpositions, and technical capabilities. Includes transcription from other media to orchestral combinations. Prerequisite: MUS 242 or permission of instructor.

MUS 350 Conducting I (3) fundamentals of conducting techniques, score reading, and score study. Students will conduct excerpts from traditional wind, choral, and orchestral repertoire. Prerequisite: MUS 241 or permission of the instructor.

MUS 351 Conducting II (2) fundamentals of conducting techniques, score reading, and score study. Students will conduct excerpts from traditional wind, choral, and orchestral repertoire. Prerequisite: MUS 241 or permission of the instructor.

MUS 355 History of Music I (3) A detailed study of the history of music in Western civilization. Focuses on development of musical style and language, resources and technology used by musicians, changing role that music and musicians played in Western culture,

and ways in which music and musical life reflected social and political developments during different historical eras. Prerequisite Music major or permission of instructor.

MUS 356 History of Music II (3) A detailed study of the history of music in Western civilization. Focuses on development of musical style and language, resources and technology used by musicians, changing role that music and musicians played in Western culture, and ways in which music and musical life reflected social and political developments during different historical eras. Prerequisite Music major or permission of instructor.

MUS 357 Topics Music History & Culture (3) These courses will explore various topics within music history. Whether the topic is the music of a certain composer, specific region, time period, or cultural practice, the class will take an interdisciplinary approach to the study of music history. The course will often include a hands-on component that will involve a project engaging with the public, working with organizations such as local museums, libraries, or concert venues. This will be a discussion-based course with daily reading and listening, along with several writing assignments and potential multi-media projects (presentations, websites, videos) throughout the semester. Content changes each time course is offered. Repeatable.

MUS 360 Suzuki Pedagogy III (2) Continuation of the study of the Suzuki Talent Education violin method units begun in MUS 260 and 261. Violinists only after volume four. Prerequisites: MUS 261, or permission of the instructor.

MUS 361 Suzuki Pedagogy IV (2) Continuation of the study of the Suzuki Talent Education violin method units begun in MUS 260 and 261. Violinists only after volume four. Prerequisite: MUS 261, or permission of the instructor.

MUS 366 Introduction to Music Therapy Improvisation (1) Introduces techniques and develops facilitation skills used in improvisation with emphasis on percussion, guitar, keyboard, or mixed media improvisation exercises. Prerequisites: MUS 184, or permission of instructor.

MUS 370 Elementary Methods and Materials in General Music (3) Focuses on procedures and instructional materials used in teaching general music in the elementary school. Develops pedagogical skills in singing, playing, movement and creative exploration. Applies the teaching methods of Dalcroze, Kodaly, Orff and other approaches. Prerequisite: MUS 142 or permission of instructor.

MUS 371 Secondary Methods and Materials in General Music (3) Examines theoretical, performance, pedagogical, technological and integrative skills applied in secondary music education. Introduces strategies for teaching and designing both performing and non-performing music courses. Investigates approaches to curriculum development, computer-assisted instruction, assessment of standards and lesson planning. Prerequisite: MUS 142 or permission of instructor.

MUS 372 Methods and Materials in Instrumental Music (3) Focuses on directing, organizing and maintaining a quality choral program at the secondary level. Addresses necessary principles, skills and issues conducive to successful teaching and administering. Provides opportunities to develop teaching and directing skills, to review and synthesize relevant literature and to further personal growth and professional preparation. Prerequisites: MUS 142, 350; Piano Proficiency II exam; or permission of instructor.

MUS 373 Methods and Materials in Instrumental Music (3) Focuses on directing, organizing, and maintaining a quality band and string program at the secondary level. Addresses necessary principles, skills, and issues conducive to successful teaching and administering. Provides opportunities to develop teaching and directing skills, to review and synthesize relevant literature, and to further personal growth and

professional preparation. Prerequisites: MUS 142, 350; or permission of instructor.

MUS 374 Piano Pedagogy (1) The study of teaching methods and survey of current materials.

MUS 375 Piano Pedagogy (1) The study of teaching methods and survey of current materials.

MUS 384 Receptive/Compositional Music Therapy Advanced Techniques (3) Introduces receptive and compositional methods used in music therapy clinical practice, including song discussion, song writing, movement to music, and music and imagery. Verbal facilitation skills and guidelines for ethical clinical practice will be included. Prerequisite: MUS 286, junior or senior standing, or permission from the instructor. Students must earn a grade of C- or better.

MUS 386 Psychology of Music (3) Examines the psychoacoustical parameters of music; the perception of melody, harmony, rhythm and form; the effect of music on physical, emotional, and spiritual dimensions of health; music preference and ability; neurophysiology and musical behavior; and measurement and evaluation of musical behavior. Prerequisite: MUS 286, junior or senior standing, or permission of the instructor. Students must earn a grade of C- or better.

MUS 387 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 388 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 390 Music Management Internship (1) Practical experience in music management internship position. Prerequisite: Junior standing, music management major or permission of the instructor.

MUS 391 Music Business Opportunities (2) Overview of professions in the music management business. Includes guest lectures from professionals in different fields of music management. Projects include research paper or presentation in an area of interest and mock job application. Prerequisites: Sophomore standing; music management major; ECON 101, 102; MUS 142; or permission of instructor.

MUS 392 Introduction to Music Business and Technology (3) Overview of current trends relating to music business and music technology. Requires hands-on training of computer software application programs including, but not limited to, sequencing, music notation, interactive applications and office applications. Prerequisites: MUS 142; QM 160; or permission of instructor.

MUS 398 Independent Study (1) Individual research and study in special areas. Project and amount of credit to be earned must have approval of Department of Music

MUS 400 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through attendance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 401 Recital Attendance (0) This course exposes students to a variety of musical styles and artistic interpretations through atten-

dance at concerts and recitals. Students will attend a minimum of 15 performances each semester according to the guidelines established in the Music Student Handbook and complete attendance verification for each. No prerequisite. Pass/fail.

MUS 410 University Bands (1) (Section 1) Includes the finest wind and percussion students within and outside the Department of Music. Presents several concerts each semester featuring advanced level music and serves as one of the touring ensembles. Students also participate in University Band and Aces Brass as part of this course. Audition required each semester for entrance and seating placement. (Section 2) Presents a concert each semester. Smaller groups from within University Band make up Aces Brass, which performs at home basketball games and MVC and NCAA tournaments. Open to music majors and non-majors. No audition required; seating at discretion of director.

MUS 413 Jazz Ensemble (1) (Section 1: Big Band) Full size band, performs on campus each semester. Other activities include performances with guest artists, jazz festivals, and regional tours. Audition required. (Section 2: Lab Band) Full size band, performs on campus each semester. Audition not required.

MUS 414 Saxophone Ensemble (1)

MUS 415 Clarinet Ensemble (1)

MUS 416 Woodwind Chamber Ensemble (1)

MUS 417 Flute Ensemble (1)

MUS 418 Small Jazz Ensemble (1)

MUS 419 Guitar Ensemble (1)

MUS 420 Symphony Orchestra (1) Select 60 member ensemble that presents several concerts each semester featuring standard orchestral repertoire. Open to both music majors and non-majors from across the University community. Audition required.

MUS 422 String Chamber Ensemble (1)

MUS 425 Brass Ensemble (1)

MUS 427 Percussion Ensemble (1)

MUS 430 University Choir, Women Chorus, and Mixed Choir (1) (Section 1: University Choir) Composed of the finest vocal talent on campus, this choir has built a reputation for performances of major choral-orchestral masterworks, a cappella music, part songs, and spirituals. It has toured extensively. Audition required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 2: Women's Chorus) Presents a choral concert each semester and participates in the annual Holiday Pops concert. Some musical/choral background and a brief audition to assess pitch-matching ability is required. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities. (Section 3: Mixed Choir) A large choir for men and women from across campus, this choir focuses on a variety of choral music and choral styles in the traditional SATB format. Typically, Mixed Choir performs on programs alongside Women's Chorus, but also joins with University Choir for large works for soprano, alto, tenor, and bass voices. Brief audition required. Repeatable course. Content changes each time course is offered. Section placement for MUS 130-430 is at the discretion of the Director of Choral Activities.

MUS 432 Kantorei (1) Explores vocal chamber repertoire with specific emphasis on sixteenth and early seventeenth century madrigals and motets. Audition and concurrent enrollment in MUS 130-430 section 01 (University Choir) required.

MUS 438 Opera Main Stage (1) Emphasis on broadening knowledge and skills through studies and performances of extended opera scenes, full-length opera productions, or other public performances of repertoire.

MUS 439 Keyboard Accompanying (1) Instruction in the technique and art of musical collaboration on the piano, organ and harpsichord.

MUS 451 Literature of the Applied Major (2) Survey of instrumental or vocal literature. Offered for piano, organ, harpsichord, harp, guitar, voice and all orchestral instruments. Prerequisite: Permission of the instructor.

MUS 460 Suzuki Pedagogy V (2) Study of advanced techniques and literature of Suzuki violin method and supervised teaching in the University of Evansville Suzuki Talent Education Violin Program. Prerequisites: MUS 361.

MUS 461 Suzuki Pedagogy VI (2) Study of advanced techniques and literature of Suzuki violin method and supervised teaching in the University of Evansville Suzuki Talent Education Violin Program. Prerequisites: MUS 361.

MUS 474 Pedagogy of the Applied Major (2) Survey of pedagogical literature and techniques. Offered for voice and all orchestral instruments. Prerequisite: permission of the instructor.

MUS 476 Marching Band Techniques (2) Examines characteristics, techniques and fundamentals of marching band. Emphasizes drill design via computer-assisted charting. Observation and participation activities required with local high school marching bands. Prerequisite: MUS 373 or permission of instructor.

MUS 478 Student Teaching in Music (5) Observing and teaching daily under supervision of the critic teacher and University supervisor for a period of eight weeks. This student teaching experience is to be in conjunction with MUS 479. It may be in a different area of music education

MUS 479 Student Teaching in Music (6) Observing and teaching daily under supervision of the critic teacher and the University supervisor for the length of semester.

MUS 486 Music Therapy Research (4) Presents an overview of quantitative and qualitative research methods used in music therapy. Includes methods to critically review music therapy research and incorporate research findings into clinical practice. Culminates with the creation of an individual research project proposal. Prerequisite: MUS 286 or permission of instructor. Students must earn a grade of C- or better.

MUS 487 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 488 Music Therapy Practicum (1) Clinical training at various treatment facilities throughout the city. All training conducted under the supervision of a music therapist or music specialist. Minimum of six hours must be accumulated before student is eligible to begin full-time internship, and a grade of B- or better must be earned in each. Not open to first-semester freshmen. Open to music therapy majors only. Each course can be repeated only once.

MUS 493 Concepts of Organ Design I (1) Survey of pipe organ design and history specifically as they relate to stylistically appropriate performance. Prerequisite: Permission of the instructor.

MUS 494 Concepts of Organ Design II (1) Survey of pipe organ design and history specifically as they relate to stylistically appropriate performance. Prerequisite: Permission of the instructor.

MUS 495 Servc Playing/Inprovisation I (1) Practical skills for the church organist: hymn playing, chant accompaniment, anthem

accompaniment, score reading, conducting from the console and improvisation. Prerequisite: Permission of the instructor.

MUS 496 Servc Playing/Inprovisation II (1) Practical skills for the church organist: hymn playing, chant accompaniment, anthem accompaniment, score reading, conducting from the console and improvisation. Prerequisite: Permission of the instructor.

MUS 498 Seminar in World Music (3) Senior capstone course. Concentrates on music beyond that of the Western art music tradition. Discussion centers on music and musical cultures of diverse regions of the world and each student focuses on one specific region for class presentation and a seminar paper. Prerequisite: FYS 112.

MUS 499 Music Workshop (1) Presents special topics workshops in various specific areas of music. Instruction by University faculty may be augmented by outstanding authorities in the field. Prerequisite: Permission of the instructor.

Neuroscience (NEUR)

Neuroscience courses are taught by faculty in the Departments of Biology, Chemistry, or Psychology that have advanced training and study in neuroscience.

NEUR 125 Introduction to Behavioral Neuroscience (3) Surveys development, organization, and function of the human brain and nervous system - how we sense, move, feel, and think. Introduces neural bases of mood, emotion, sleep, learning, memory, language, and attention. Assumes minimal prior knowledge of biology, physics, and chemistry.

NEUR 355 Sensation and Perception (3) Examines perceptual processing of sensory information in vision, hearing, touch, taste, and smell. Examines psychophysics and the influence of personality and environmental factors in human perception. Examines neuropsychology and perceptual abnormalities resulting from brain damage. Prerequisites: PSYC 121, 125 or 357, 245. Spring.

NEUR 357 Neuropsychology (3) Examines the function and organization of the nervous system and the role of the nervous system in controlling behavior. Topics include nervous system structure and functions as it relates to sensory processing, movement, sleep, reproductive behavior, emotional behavior, learning and memory, stress and health, neurological disorders, and select psychiatric disorders. Current research methodology and experimental findings emphasized. Prerequisites: BIOL 100 or higher; PSYC 121. Fall.

NEUR 358 Neuropsychology Lab (1) Laboratory course introduces techniques and paradigms of physiological psychology and behavioral neuroscience. Scientific report writing, problems of research design, and data analysis emphasized. Two-hour laboratory. Prerequisites: BIOL 100 or higher; PSYC 121. Corequisite or prerequisite: PSYC 357. Fall.

NEUR 457 Advanced Neuroscience (3) Detailed study of the human brain and nervous system. Topics cover cellular and molecular neuroscience, neural integration, pharmacology, neuroendocrinology, nervous system development, and plasticity of the central nervous system. Prerequisites: PSYC 121, 357, BIOL 119, and Grade of C- or better in CHEM 240. Spring, alternate years.

NEUR 479 Research in Neuroscience (1) Involves participation in the planning, designing, running, analyzing and presenting of a research project under the direct supervision of a faculty member. A written and oral report of the literature search and laboratory work is required. The project must be approved by the proper Ethics Committee (IRB for human studies, IACUC for animal studies) to receive credit. Content changes each time the course is offered. Course may be repeated up to 6 credit hours. Fall, spring.

NEUR 489 Internship in Neuroscience (1) Involves participation in an internship while under the direct supervision of professional personnel. Weekly class discussions focus on experiences and professional development issues. A written report including a summary of the field of Neuroscience in which the internship occurred, work accomplished during the semester and learning experiences gained during the semester is required. The internship must be approved by the Director of the Neuroscience Program to be able to enroll. Course may be repeated up to 6 credit hours. Fall, spring.

NEUR 499 Special Topics in Neuroscience (1) Lectures, seminars or discussions of topics not covered in regular course offerings. Provides an opportunity to engage in topics of special interests within the broad field of neuroscience. Course is repeatable up to 6 credit hours. Content changes each time the course is offered.

Nursing (NURS)

Nursing courses are taught by the faculty of the Dunigan Family School of Nursing.

NURS 160 Nursing Modalities: Therapeutic Relationships (3) Provides beginning knowledge of nursing modalities used to facilitate health. Specific modalities include supportive counseling, teaching, social support, and alternative care. Opportunities to use nursing modalities may include simulations and interviews with healthy people (3 clock hours).

NURS 165 Dynamic Integration: a Model for Nursing (3) Introduction to the role of the nurse within the framework of the Dungan nursing model of Dynamic Integration. Explores historical, social, legal, ethical, and research components of professional nursing practice (3 clock hours).

NURS 261 Dynamic Integration: Healthy and Vulnerable Adults (3) Focuses on the promotion of healthy physiological responses and the provision of a safe environment for healthy and vulnerable individuals (3 clock hours). Prerequisites: EXSS 112, 113; CHEM 108. Corequisite: NURS 262. Fall.

NURS 262 Nursing Modalities: Healthy and Vulnerable Adults (3) Clinical laboratory includes instruction and practice in modalities to provide a safe environment and promote healthy physiological responses for healthy and vulnerable adults. Focus is on the modality of direct care (6 clock hours). Prerequisites: EXSS 112, 113; CHEM 108. Corequisites: NURS 261. Fall.

NURS 264 Dynamic Integration: Physical Assessment (3) Class component for NURS 264 Dynamic Integration: Physical Assessment. Introduces the assessment of health within the Dungan Model of Dynamic Integration (developmental, cultural, physiological cognitive, psychological, behavioral, spiritual, and social support). Focus is on assessment of individuals and families across the life span. Practice component provided (3 lab hours, 5 clock hours). Prerequisites: EXSS 112, 113; CHEM 108 or 118 or admission to the RN to BSN program.

NURS 271 Dynamic Integration: the Healthy Family (3) Focuses on the life cycle of a healthy family beginning at conception. Addresses family development, maternity care, transitions, and common problems of healthy families (3 clock hours). Prerequisites: NURS 160 or 165, 261, 262, 264; BIOL 110; NUTR 304. Corequisite: NURS 272. Spring.

NURS 272 Nursing Modalities: Healthy Family Nursing Modalities and the Healthy Family (3) Clinical laboratory includes instruction and practice in the modalities of direct care, teaching, counseling, alternative care, and social support in healthy families. Focus on clients and families of all ages, especially childbearing, child rearing, and aging family (9 clock hours). Prerequisites: NURS 160 or 165,

261, 262, 264; BIOL 110; NUTR 304. Corequisite: NURS 271. Spring.

NURS 351 Transition to Professional Nursing (6) Provides overview of the philosophy of baccalaureate nursing education and role of the nurse within the framework of the Dungan Nursing Model of Dynamic Integration. Guides the RN student with unique life and work experiences to conceptualize changes in professional nursing roles. Topics include caring interaction in nursing, nursing process, health promotion and maintenance, health care delivery system, nursing theory, learning theories, and contemporary nursing. Provides forum for discussion of changing perceptions and dimensions of professional nursing (6 clock hours). Prerequisite: Admission to RN to BSN Program.

NURS 361 Dynamic Integration: Transition Related to Common Illness Phenomena (3) Focuses on vulnerable individuals and families across the life span with an emphasis on pediatric clients, who are in transition due to their responses to common illness-related phenomena such as pain, inflammation, infection, neoplasia, altered immunity, surgical intervention, or fluid/electrolyte imbalances, accidents and poisoning, gastrointestinal disorders, congenital and developmental disorders (3 clock hours). Prerequisites: All 100- and 200-level nursing courses; HS 205. Corequisite: NURS 362. Fall.

NURS 362 Nursing Modalities: Transition Related to Common Illness Phenomena (2) Clinical laboratory includes instruction and practice with the modalities of direct care, teaching, counseling, alternative care, social support in persons or families in transition related to their responses to common illness-related phenomena. Primary focus is on pediatric and surgical clients including their families (6 clock hours). Prerequisites: All 100- and 200-level nursing courses; HS 205. Corequisite: NURS 361. Fall.

NURS 363 Dynamic Integration: Mental Health (3) Focuses on individuals and their families who are vulnerable or in transition due to acute or chronic mental health problems such as mood and thought disorders, anxiety disorders, substance abuse, and manipulative or angry behavior (3 clock hours). Placement: Junior. Prerequisites: All 100- and 200-level nursing courses; HS 205. Corequisite: NURS 364. Fall.

NURS 364 Nursing Modalities in Mental Health (2) Clinical laboratory includes instruction and practice with the modalities of counseling, teaching, and social support with individuals and groups. Focuses on the client and family with acute or chronic problems in mental health (6 clock hours). Placement: Junior. Prerequisites: All 100- and 200-level nursing courses; HS 205. Corequisite: NURS 363. Fall.

NURS 371 Illness Response I: Disruption in Energy (3) Focuses on vulnerable individuals and families across the life span who are in transition related to common illnesses causing alterations in fluid and gas transport, metabolism, digestion, and elimination (3 clock hours). Prerequisites: NURS 361, 362, 363, 364. Corequisites: NURS 373, 374. Spring.

NURS 373 Illness Response II: Disruption in Protection (3) Focuses on vulnerable individuals and families across the life span who are in transition related to common illnesses causing alterations in reproduction and sexuality, cognition, sensation and motion, and immunity (3 clock hours). Prerequisites: NURS 361, 362, 363, 364. Corequisites: NURS 371, 374. Spring.

NURS 374 Nursing Modalities Related to Disruptions in Energy and Protection (4) Clinical laboratory includes instruction and practice with modalities of direct care, teaching, counseling, alternative care, social support in persons or families in transition related to disruptions of energy and protection (12 clock hours). Prerequisites: NURS 361, 362, 363, 364. Corequisites: NURS 371, 373. Spring.

NURS 385 Research in Nursing (3) Extends focus on evidence-based practice by examining the specific role of research in the development of the body of nursing knowledge. Primary emphasis on the nurse as a consumer of research findings (3 clock hours). Prerequisite: Statistics.

NURS 395 Special Topics in Health Care and Nursing (1) Specific health care and nursing topics. Classroom and experiential learning experiences appropriate.

NURS 463 Nursing Professional Leadership (3) Focuses on the principles of leadership and management as they are practiced in nursing. Concepts of organizational behavior and transformation and transactional leadership are emphasized along with client advocacy, change agency, power, and politics. Prerequisite: Completion of all junior level courses or admission to the RN to BSN option.

NURS 467 Dynamic Integration: Health Promotion within the Community (3) Focuses on individuals, families, and groups within the community. Emphasis on vulnerable populations, their health, and the provision of health care. Examines health of the community including communicable disease, environmental health hazards, mortality and morbidity, and epidemiology (3 clock hours). Placement: Senior. Prerequisites: All 300-level nursing courses or admission to the RN to BSN program. Corequisite: NURS 468.

NURS 468 Nursing Modalities for the Community (4) Clinical laboratory includes instruction and practice with the modalities of teaching, counseling, alternative care, and social support. Focuses on vulnerable groups within the community who require health promotion and/or suffer chronicity. Primary emphasis on teaching and social support (12 clock hours). Prerequisites: All 300-level nursing courses or admission to the RN to BSN program. Corequisite: NURS 467.

NURS 469 Strategies for Success in Professional Nursing (2) Prepares the student for the NCLEX Examination by reviewing test taking skills, test question formats, and essential knowledge for professional nursing practice. Corequisite: NURS 477, 478.

NURS 474 Nursing Modalities: Community and Public Health (2) This clinical laboratory course includes instruction and practice with modalities of teaching, counseling, alternative health, and social support. The focus is on vulnerable groups within the community who require health promotion and/or suffer chronicity. Primary emphasis is on teaching and social support in a community setting. Required of senior students who take NURS 477 and NURS 478 at Harlaxton.

NURS 477 Dynamic Integration: Transitions Associated With Complex Illness Problems (3) Focuses on individuals and families who are in transition due to complex acute or chronic illness problems which increase susceptibility to multi-system failure (3 clock hours). Prerequisites: All 300-level nursing courses or admission to the RN to BSN program. Corequisite: NURS 478.

NURS 478 Nursing Modalities: Health Promotion in Complex Problems (4) Clinical laboratory includes instruction and practice with modalities necessary to promote reintegration in individuals and families with complex acute or chronic illness problems. Clinical experiences include opportunities for practice in direct care and leadership roles (12 clock hours). Prerequisites: All 300-level nursing courses or admission to the RN to BSN program. Corequisite: NURS 477.

NURS 484 Dynamic Integration: Health Issues (3) Societal and global health issues critically examined with emphasis on the impact on individual consumers, health care providers, and society as a whole. Focuses on refining problem solving skills, using the student's liberal and professional education. Scholarly presentation required (3 clock hours). Prerequisites: All 300-level nursing courses or admission to the RN to BSN program.

Nutrition (NUTR)

Nutrition is taught by the faculty of the Dunigan Family School of Nursing.

NUTR 304 Nutrition Concepts and Controversies (3) Focuses on basic nutrient requirements and how they are used by the human body throughout the life cycle. A holistic approach with emphasis on physiological factors influencing eating habits (social, economic, cultural, etc.). Current controversies in the field of nutrition discussed and class activities are coordinated to stimulate thought and judgment on selected topics. Provides a basic understanding of nutrition for application to one's own lifestyle. Meets the general education health and wellness requirement.

Organizational Leadership (OL)

Organizational leadership courses are taught by instructors in affiliation with the Center for Adult Education staff. Course credits apply only to the organizational leadership degree program. Enrollment is limited to students admitted to the Organizational Leadership degree program.

OL 300 Adult Learner (3) Introduction of characteristics, theories, and practices of adult development and learning. Examines basic assumptions about producing competent, flexible adults able to apply knowledge in a changing environment.

OL 310 Applied Leadership (3) Introduction to fundamental concepts of leadership. Emphasizes supervisor's roles, fostering relationships, and motivating and empowering others.

OL 311 Quantitative Skills for Leadership (3) Emphasizes critical thinking about numerical data: percentages, ratios, solving equations, computing and interpreting means, medians, modes, and standard deviations.

OL 312 Human Behavior in Organizations (3) Study of social and psychological factors that influence the supervision of groups and individuals in work settings.

OL 320 Persuasive Written and Oral Communication (3) Emphasis on developing and refining practical written and oral presentation skills. Writing intensive course.

OL 321 Principles and Issues of Human Resources (3) Study of theories, principles, and practices involved in organizing, supervising, and leading others. Emphasis on communication, motivation, leadership, evaluation, and compensation of human capital.

OL 322 Leadership Ethics (3) Survey of controversial issues, dilemmas, and quandaries encountered in contemporary society. Emphasizes fundamental norms of conduct in organization and ethical issues that affect them, including employee-employer relations, consumer advertising, and the environment.

OL 330 Supervision (3) Development of essential supervisory skills by increasing the students' thinking and knowledge to application. Considers the unique challenges of the 21st century.

OL 350 Leadership Practicum (4) Emphasizes practical application of concepts, theories, and practices of leaders. Students design and implement a problem-solving research project through integration with prior and concurrent course work. Includes class presentations, simulations that combine knowledge and skill.

OL 360 Leadership Practicum (4) Emphasizes practical application of concepts, theories, and practices of leaders. Students design and implement a problem-solving research project through integration with prior and concurrent course work. Includes class presentations, simulations that combine knowledge and skill.

OL 370 Leadership Practicum (4) Emphasizes practical application of concepts, theories, and practices of leaders. Students design and implement a problem-solving research project through integration with prior and concurrent course work. Includes class presentations, simulations that combine knowledge and skill.

OL 410 Leadership: Conflicts and Change (3) Examines impact of conflict, stress, and change in organizations. Emphasizes ability of an organization to monitor itself to determine need for change in appropriate areas. Participants examine effective change strategies.

OL 411 Leadership: Strategic Decision Making (3) Study of best practices in decision-making. Approaches to leadership such as power-influence, situational factors, individual traits, and behaviors are explored as models of decision-making theory. Students required to apply decision-making strategies throughout course.

OL 412 Customer Development and Leadership (3) Fundamentals of developing a strong customer base. Emphasis on methods, tools, skills, and techniques required to develop, manage, and market to customers. Considers both external and internal customers.

OL 420 Global Issues Seminar (3) Studies issues involved in living and working in a global environment. Explores topics such as ethics, social responsibility, law, and technology in the international arena.

OL 421 Organizations: a Strategic Approach (3) Principles of planning, organizing, directing, and controlling the management process. Models, simulations, and case studies used to develop skills in setting goals.

OL 422 Leadership: Individual and Team Processes (3) Examines team process and leadership including team development, the importance and challenge of team member diversity, maximizing team creativity, problem-solving, handling team conflict, and revitalizing a passive or complacent team. Also emphasis on leading and managing virtual teams and the unique differences.

OL 450 Leadership Practicum (4) Emphasizes practical application of concepts, theories, and practices of leaders. Students design and implement a problem-solving research project through integration with prior and concurrent course work. Includes class presentations, simulations that combine knowledge and skill.

OL 460 Leadership Practicum (4) Emphasizes practical application of concepts, theories, and practices of leaders. Students design and implement a problem-solving research project through integration with prior and concurrent course work. Includes class presentations, simulations that combine knowledge and skill.

Philosophy (PHIL)

Philosophy courses are taught by the faculty of the Department of Philosophy and Religion.

PHIL 111 Introduction to Western Philosophy (3) Develops and enhances critical thinking skills through the analysis and discussion of perennial philosophical problems. Emphasis on developing critical reading and discussion skills, writing expository and evaluative analysis of extended argument prose, and constructing argumentative essays. Prerequisite: Freshman or sophomore standing (closed to junior and senior students).

PHIL 121 Introductory Ethics (3) Presents a systematic and historical discussion of moral and social values through classical and contemporary readings. Emphasis on applying moral theories to concrete moral problems.

PHIL 211 Ancient Greek Philosophy (3) Develops and analyzes philosophical theories from the Pre-Socrates through the Hellenistic periods. Emphasis primarily on the thought of Plato and Aristotle.

PHIL 221 Modern European Philosophy (3) Develops and analyzes philosophical theories from the 16th through the 18th centuries. Emphasis on the works of Descartes, Spinoza, Leibniz, Locke, Berkeley, Hobbes, Hume, and Kant.

PHIL 231 Symbolic Logic (3) Introduces fundamental principles and techniques of modern symbolic or mathematical logic including truth functional logic, quantification theory, and the logic of relations. Especially suited for students with interests in mathematics and computing science.

PHIL 240 Philosophy and Religion (3) Examines mutually intersecting themes and influences between Western philosophy and religion from antiquity to the present day. Sample topics include the nature of religious experience, claims to religious knowledge, the relationship between faith and reason, etc.

PHIL 241 Science, Technology and Society (3) Examines the current state of science and technology along with their effects on social change. Also explores the future prospects and perils of science and technology in light of global problems and the extent to which human beings can address them responsibly.

PHIL 301 Selected Topics in Philosophy (3) Studies selected topics of current interest. Specific topic may vary each time the course is taught. May be repeated for credit as the selection of topics changes. Prerequisite: One course in philosophy or religion, or permission of instructor.

PHIL 316 Environmental Ethics (3) Presents a systematic discussion of environmental ethics and key issues therein. Emphasis on applying moral theories to concrete moral problems.

PHIL 317 Bioethics (3) Considers selected problems in bioethics. Topics may include abortion, euthanasia, and genetic engineering. Prerequisite: Junior or senior standing, or permission of instructor.

PHIL 321 Social and Political Philosophy (3) Explores various social and political philosophies regarding how to ideally construct society.

PHIL 322 Kant and the Nineteenth Century (3) Develops and analyzes philosophical theories from Kant through Nietzsche. Primary focus will be on Kant and thinkers selected from among Hegel, Schopenhauer, Kierkegaard, Marx, and Nietzsche.

PHIL 412 Contemporary Philosophy (3) Examines philosophical movements in the 19th through the 21st centuries. Topics may vary from semester to semester and may emphasize major movements or schools of thought in this period, such as existentialism, phenomenology, logical positivism, linguistic philosophy, and/or pragmatism as well as individual philosophers.

PHIL 445 History and Philosophy of Science (3) Studies methodological problems of the natural and social sciences from a historical point of view. Also examines the logic of explanation and theory construction. Prerequisite: One course in philosophy, or junior or senior standing in natural or social science.

PHIL 447 Philosophy of Mind (3) Analyzes the relationship between mental and bodily phenomena and the nature of cognitive activity. Explores whether a strictly physicalist approach to mind is feasible. Prerequisite: One course in philosophy or permission of instructor.

PHIL 450 Gender, Power, and Oppression (3) Explores philosophical analysis of gender, power, and oppression, with special attention to how intersectional oppression overlaps in experience (e.g., due to race, class, etc.). Prerequisite: FYS 112 or FYS 312.

PHIL 451 Philosophy of Agency (3) Examines the concept of agency from philosophical, psychological, and biological perspectives. Topics include intentional action, free will, autonomy, selfhood, guidance, control, and the phenomenology of action. Prerequisite: One course in philosophy or permission of instructor.

PHIL 459 Philosophical Classics (1) In a seminar setting, studies selected philosophical classics or texts destined to become classics. May be repeated for credit as the selection of texts changes. Prerequisite: One course in philosophy or religion, or permission of instructor.

PHIL 491 Directed Study in Philosophy (1) Offers research in special problems or persons under the direction of a member of the philosophy faculty. May be repeated for up to nine hours. Prerequisite: Permission of instructor.

PHIL 492 Internship in Philosophy (1) Offers students the opportunity for supervised field experience in teaching or research either on campus or at some other facility appropriate to the student's field of study. Prerequisite: Completion of at least two courses in philosophy.

PHIL 499 Senior Seminar in Philosophy (1-3) Required of all senior philosophy majors. Affords the student the opportunity to work independently in the preparation of an extended paper and to present this paper in a seminar to other majors in philosophy, religion, and pretheology. Prerequisite: Senior standing.

Physical Therapy (PT)

Physical therapy courses are taught by the faculty of the Departments of Physical Therapy and the School of Public Health.

PT 101 Patient Care Skills and Interventions (3) This course introduces the foundational proficiencies necessary for practice in the profession of physical therapy to include aquatic pool therapy, chemical responses to inflammation, compression, cryotherapy, diathermy, electrical stimulation, electromagnetic biofeedback and relaxation, hydrotherapy, interferential current, effleurage and petrissage, neuromuscular electrical stimulation, pain management, Russian electrical stimulation, transcutaneous electrical nerve stimulation, thermal modalities, traction, and ultrasound.

PT 102 Musculoskeletal Rehabilitation (5) This course emphasizes the physical therapy management of persons with musculoskeletal impairments. Students learn treatment progressions for common orthopedic conditions and surgical procedures. The following topics are addressed: balance as it relates to the ankle / foot balance reaction, exercise concepts, exercise progression (breathing patterns, movement strategies, and relaxation techniques), inflammation and repair of tissues, orthopedic pharmacology, orthopedic rehabilitation, and soft tissue mobilization. Assignments will reinforcement communication between PTs and PTAs and documentation.

PT 103 Introduction to Clinical Practice (3) This course provides an introduction to the foundational proficiencies necessary for the practice of physical therapy. The following topics are addressed: adverse consequences of prolonged inactivity, aging, assistive devices, bloodborne pathogens and infection control, draping, education of supportive personnel to assist with transfers, Medicare / Medicaid, mobility training with assistive devices, normal human development, patient education, patient equipment, positioning and rolling, professional and therapeutic communication, sterile technique, tilt table, transfers, vital signs, wellness and health promotion, wheelchairs, and wound care.

PT 106 Functional Anatomy Lab (2) Introduces skills of goniometry and manual muscle testing. Includes gross assessment of posture and gait. Prerequisite: EXSS 112. Corequisites: EXSS 113 if not already taken; ID 356 if not already taken. Spring.

PT 110 Field Experience for PTA (1) Introduces physical therapy through observations at clinical facilities and by reading appropriate articles. Student accompanies a physical therapist or physical therapist assistant at a facility to develop an understanding of the various roles and duties of the personnel and an appreciation of the variety of patients and their interventions. Student may assist in simple pro-

cedures as selected by the clinical supervisor and has opportunity to improve communication skills. Provides introduction to other health care professionals and to the role of the administrator of physical therapy services. Prerequisite: Admission to the PTA program. Spring.

PT 111 Clinical I (4) Introduction to clinical facilities as an active participant in the health care team. Orientation to clinical setting and procedures provided by the clinical instructor. Students use basic physical therapy procedures, administer modalities, as well as carry out basic exercise programs and gait training. All treatment supervised by a physical therapist. Students will be in the facility full time, five days a week for six weeks. Prerequisites: EXSS 112, 113; ID 356; PT 101, 102, 106, 200. Summer.

PT 152 Clinical and Professional Issues I - Intro (1) This course is the first of two clinical and orientation to and strategies for success in the professional program and professional practice expectations. Students explore the history and practice of physical therapy, communication required for professional relationships, the value-based behaviors expected of physical therapist assistants, and professional ethics. Students are introduced to the American Physical Therapy Association and state and federal laws applicable to the practice of physical therapy.

PT 200 Pathophysiology (3) Covers basic pathologic conditions and principles. Emphasizes disorders of the musculoskeletal, nervous, cardiopulmonary, and immune systems. Students expected to explain the etiology, signs, symptoms, clinical course, and primary medical interventions of disorders presented. Students also expected to understand how different disease processes affect the patient's ability to participate in physical therapy and achieve an optimal functional outcome. Prerequisites: EXSS 112 and 113 or 221/221L; ID 356; PT 102. Summer.

PT 210 Multiple Systems Rehabilitations (4) Student expected to demonstrate manually and in written form treatment techniques for adult patients of all ages with amputations, burns, cardiopulmonary disorders, peripheral vascular disorders, traumatic brain injuries, and wounds. Units on proprioceptive neuromuscular trunk patterns and techniques and women's health issues are presented. Students will experience and demonstrate application of these techniques during simulated patient situations in the laboratory setting. Lecture/Lab. Prerequisites: PT 102, 111, 200. Fall.

PT 249 Clinical II (5) Student is placed in the clinical setting (40 hours per week for six weeks) to become an active participant in the health care team. Actively involved in the care of patients under the supervision of a PT. Experience develops therapeutic interventions and patient care skills. Prerequisites: PT 111, 210, 251. Spring.

PT 250 Clinical III (5) Final six-week clinical experience continues to develop interventions, techniques, and patient care skills. Upon completion of this affiliation, students are expected to be able to practice as entry-level physical therapist assistants. Prerequisite: PT 249. Spring.

PT 251 Neuromuscular Rehabilitation (4) Lecture-lab. Basic knowledge of physical therapy interventions is expanded to include the treatment of adults and children with neuromuscular conditions including stroke, spinal cord injuries, and developmental disabilities. Emphasizes student's development of psychomotor skills to facilitate functional patient movement. Students demonstrate various physical therapy interventions and discuss patient progression as outlined in patient's plan of care. Students expected to accurately assess patient status and document patient findings. Experiential opportunities, clinical simulations, role playing, and small group learning activities reinforce mastery of content. Prerequisites: PT 111, 200. Corequisite: PT 210. Fall.

PT 252 Clinical and Professional Issues II: Transition to Practice (2) Lecture-seminar course discusses current, professional issues that affect the practice of physical therapy and the role of the PTA. Students examine various ways in which a PTA functions as a member of the health care delivery team. Addresses the role of the assistant in department activities, specialized areas of practice and the American Physical Therapy Association. Prerequisites: PT 210, 251. Spring.

PT 370 Special Topics in Physical Therapy (1) Allows students to pursue areas of special interest within health care or physical therapy. Areas may include research, clinical education, administration, and classroom or community teaching. Students responsible for contacting the designated faculty member to discuss and plan the experience. Experience culminates in a formal written document, product, or reflection paper.

PT 410 Foundations of PT (2) This course introduces the foundational proficiencies necessary for practice in the profession of physical therapy. Topics include body mechanics, elements of documentation (initial encounter, daily note, re-examination, discharge summary), effects of inactivity, foundations of therapeutic exercise, infection control, mobility training, patient/client equipment, patient/client stress, positioning and turning, posture preparation for patient/client care, proprioceptive neuromuscular facilitation trunk and extremity patterns, range of motion exercise, stretching exercise, transfer training, vital signs, wheelchairs, and wound management. Principles from the Guide to Physical Therapist Practice are incorporated into the course and written documentation, as suggested by the guide, is utilized for specific lab activities. Students participate in initial field experiences in an acute care, inpatient rehabilitation, and pediatric facility. Prerequisite: PT 431.

PT 410L Foundations of Pt Lab () Lab that accompanies PT 410, Foundations of Physical Therapy.

PT 412 Physical Interventions (2) This lecture/lab course provides the student with an introduction to the therapeutic modality and other physical intervention skills commonly encountered in physical therapy practice. The course covers the healing process, pain mechanisms, indications/contraindication, and physiological effects of each intervention in a lab/lecture experience. The primary interventions covered include electrical stimulation, hydrotherapy, soft tissue massage, cryotherapy, thermal modalities, electromagnetic modalities, ultrasound, traction, and compression. Prerequisite: PT 431/531.

PT 412L Physical Interventions Lab () Lab that accompanies PT 412, Physical Interventions.

PT 414 Foundations of Therapeutic Exercise (2) This course provides the student with an introduction to commonly prescribed therapeutic exercise interventions. An emphasis will be placed on understanding therapeutic exercise from a motor control perspective and how pain affects motor control and patterns of movement. Progression of fundamental exercises through the neurodevelopmental postures as they relate to common impairments found in the outpatient physical therapy setting will be covered. Students will learn the purpose of each therapeutic exercise technique and demonstrate application and critical thinking skills through practical experiences in preparation for future patient management courses. Prerequisite: PT 431/531.

PT 414L Foundations of Therapeutic Exercise Lab () Lab that accompanies PT 414, Foundations of Therapeutic Exercise.

PT 417 Test and Measurements (2) Introduces the basic procedures for objective assessment of the musculoskeletal system through measurement of joint range of motion (ROM) and muscle strength. Laboratory sessions will allow practice in the techniques of goniometry and manual muscle testing (MMT). Inclometers, hand held dynamometers and isokinetic testing are introduced. Prerequisites:

BIOL 436/536; PT 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, 451/551. Spring.

PT 417L Test and Measurements Lab () Introduces the basic procedures for objective assessment of the musculo-skeletal system through measurement of joint range of motion (ROM) and muscle strength. Laboratory sessions will allow practice in the techniques of goniometry and manual muscle testing (MMT). Inclometers, hand held dynamometers and isokinetic testing are introduced. Prerequisites: BIOL 436/536; PT 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, 451/551. Spring.

PT 421 Patient Management I Musculoskeletal (8) Initiates patient management sequence. Expands upon the anatomical, kinesiological, and therapeutic exercise principles presented in previous courses. Emphasis on examination and assessment of the musculoskeletal system. Common conditions and impairments are presented and reinforced through use of case examples. Appropriate interventions are addressed conceptually and performed in the laboratory. Addresses concepts and techniques related to proprioceptive neuromuscular facilitation. Medical documentation integrated into laboratory activities and assignments. Experiential opportunities included. Prerequisites: BIOL 436; PT 410, 412, 414, 432, 434, 442, 451. Corequisite: PT 417. Spring.

PT 421L Patient Management I Musculoskeletal Lab () Initiates patient management sequence. Expands upon the anatomical, kinesiological, and therapeutic exercise principles presented in previous courses. Emphasis on examination and assessment of the musculoskeletal system. Common conditions and impairments are presented and reinforced through use of case examples. Appropriate interventions are addressed conceptually and performed in the laboratory. Addresses concepts and techniques related to proprioceptive neuromuscular facilitation. Medical documentation integrated into laboratory activities and assignments. Experiential opportunities included. Prerequisites: BIOL 436; PT 510, 512, 514, 532, 534, 542, and 551. Corequisite: PT 517. Spring.

PT 423 Wellness in Physical Therapy (2) This course address issues related to wellness and overall health and fitness promotion from a physical therapy perspective. Areas of learning will include introduction to common fitness and wellness programs, nutrition, balance and movement screening, and application of transition from rehabilitation to encouraging behavior change promoting lifelong wellness. This course, when completed in addition to PT 451/551 and PT 452/552, meets the criteria for the general education capstone outcome as well as one writing-intensive course. Prerequisites: BIOL 436/536, PT 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, and 451/551.

PT 431 Gross Anatomy (5) For students in the physical therapy program. Emphasis on gross anatomy of the human skeleton, muscular, vascular, and nervous systems. Knowledge of gross anatomy provides students with a sound foundation upon which other courses in the physical therapy curriculum can directly or indirectly be related. Content presented in a regional approach, and includes anatomical concepts such as proper terminology, surface anatomy, and joint function. Gross anatomy is best learned in the laboratory through dissection of the human body. Course is primarily a laboratory experience. Prerequisite: Admission to the DPT program. Summer.

PT 432 Kinesiology (3) Introduces the elements and principles basic to the study of human movement. It combines the disciplines of biomechanics, physiology, and anatomy to analyze functional movements, balance, and gait. Discusses concepts of kinetics, kinematics, length-tension relationships, and the functional significance of the structure of biological tissues. Emphasizes clinical application of mechanical concepts. Provides an introduction to surface anatomy.

Prerequisites: PT 441. Summer.

PT 433 Human Growth and Development (3) Explores consequences of disruption in normal physiological and developmental processes. Common diseases and disorders involving all major body systems addressed, as well as selected systemic diseases. Topics include diseases of infectious, immune system, traumatic, degenerative, and congenital origin. Focuses on pathogenesis, clinical presentation, laboratory findings, prognosis, medical intervention including pharmacological agents, and implications related to physical therapy practice. Prerequisites: Physical Therapy 431, 441. Fall.

PT 434 Medical Pathology I (2) Explores consequences of disruption in normal physiological and developmental processes. Common diseases and disorders involving all major body systems addressed, as well as selected systemic diseases. Topics include diseases of infectious, immune system, traumatic, degenerative, and congenital origin. Focuses on pathogenesis, clinical presentation, laboratory findings, prognosis, medical intervention including pharmacological agents, and implications related to physical therapy practice. Prerequisites: Physical Therapy 431, 441. Fall.

PT 436 Medical Pathology II (2) This course explores the consequences of disruption in normal physiological and developmental processes. Common diseases, disorders and syndromes involving the neurological body systems are addressed, as well as selected systemic diseases. Topics include diseases of an infectious nature, immune system deficiency and degenerative origin. The course focuses on the pathogenesis, clinical presentation, laboratory findings, prognosis, medical intervention including pharmacologic agents and implications related to physical therapy practice in regards to the neurological body system. Prerequisites: PT 434. Spring.

PT 441 Clinical and Professional Issues I Introduction (2) First in series of clinical and professional issues courses. Provides introduction to professional practice expectations of physical therapy. Provides orientation and strategies for success in the professional program. Introduction to American Physical Therapy Association. Students explore the practice of physical therapy utilizing the Guide to Physical Therapist Practice and the core values of the profession. Introduction to professional ethics and communication required in professional relationships. Prerequisite: Admission to the DPT program. Summer.

PT 442 Clinical and Professional Issues II Adult Learning Principals (1) Second in series of four clinical and professional issues courses. Focuses on physical therapist's role as an educator and developing one's own cultural competence. Provides introduction to federal programs, including Medicare and Medicaid. Prerequisites: Physical Therapy 431, 441. Fall.

PT 451 Scientific Inquiry I: Stats and Research (2) This is the first in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include fundamentals of clinical rehabilitation research including evidence-based practice, searching the literature, and research ethics. Fundamentals of clinical research approaches include variable recognition, research validity, measurement theory, reliability, responsiveness, and validity. Basic statistical procedures to assess mean differences as well as inference testing are covered. This course, when completed in addition to PT 452/552 and PT 423/523, meets the criteria for the general education capstone outcome as well as one writing-intensive course. Prerequisites: Admission to the DPT program or permission of the instructor. Fall.

PT 452 Scientific Inquiry II (2) This is the second in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include critical appraisal of research related the

diagnostic process and intervention trials. Student complete critical appraisals of published research in a written format and present their appraisals orally. This course, when completed in addition to Physical Therapy 451/551 and 423/523, meets the criteria for the General Education capstone outcome as well as one writing-intensive course. Prerequisites: Admission to the DPT program and Physical Therapy 451/551 or permission of the instructor. Spring.

Physics (PHYS)

Physics courses are taught by the faculty of the Department of Physics. See also Astronomy (ASTR).

PHYS 100 Conceptual Physics (3) Presents basic principles of physics through descriptive and demonstrative techniques. For non-science majors. (Credit may not be counted toward graduation for physics or engineering majors.) Prerequisite: One year of high school algebra.

PHYS 121 Algebra Physics I (4) Presents basic principles of mechanics, fluid statics, fluid dynamics, heat, and sound. Three hours lecture, two hours lab. Prerequisite: Mathematics 105 or two years high school algebra. Recommended: One year high school physics.

PHYS 122 Algebra Physics II (4) Continues Physics 121. Presents basic principles of electricity, magnetism, light, relativity, atomic, and nuclear physics. Three hours lecture, two hours lab. Prerequisite: Physics 121.

PHYS 150 Intro to Physics at UE (2) An introduction to physics and faculty research areas in physics for first-year physics majors. Topics may include special relativity, biophysics, particle physics, optics, and/or solid state physics, but are subject to change. Class is taught by multiple members of the physics faculty.

PHYS 190 Physics Today (1) Presents the nature of the work of a physicist and opportunities in the field of physics. An individualized course where topics of interest to each student are pursued through projects or selected readings. Recommended for all freshmen contemplating a major in physics.

PHYS 195 Special Topics: Physics or Technology (1) Introduction to special topics in physics or technology that are not included in regular course offerings. Offered depending on interest or demand. Prerequisite: One year high school algebra.

PHYS 201 Physics of Music (4) An examination of the physics of sound and music. It is in the Outcome 8: Scientific Literacy category of the General Education Program and is intended primarily for students of music. Physics 200 includes basic principles of acoustics, response of the ear to sound, musical tuning scales, auditorium acoustics, and the production and analysis of instrumental and vocal sounds.

PHYS 210 Calculus Physics I (4) Calculus-based treatment of mechanics, waves, and thermodynamics. Three hours lecture, two hours lab. Prerequisite: Mathematics 221. Recommended: One year high school physics.

PHYS 211 Calculus Physics II (4) Calculus-based treatment of electricity, magnetism, and light. Three hours lecture, two hours lab. Prerequisites: Mathematics 222; Physics 210.

PHYS 213 Introduction to Modern Physics (3) Introduction to the quantum nature of matter and radiation. Examines the developments in physics since the late 19th century, primarily in the areas of relativity, atomic, nuclear, and particle physics. Three hours lecture. Prerequisites: Mathematics 323; Physics 211.

PHYS 214 Modern Physics Lab (1) Complements Physics 213 by providing laboratory experience in relativity, atomic, nuclear, and particle physics. Two hours lab. Corequisite: Physics 213.

PHYS 220 Simulations for PHYS 210 (1) A 2-hour weekly computer lab designed to be taken concurrently with Physics 210. Students will use VPython to simulate the physical systems and concepts learned in PHYS 210, making visual representations of the related phenomena.

PHYS 221 Simulations for PHYS 211 (1) A 2-hour weekly computer lab designed to be taken concurrently with Physics 211. Students will use VPython to simulate the physical systems and concepts learned in PHYS 211, making visual representations of the related phenomena.

PHYS 305 Mathematical Physics (3) Examines a variety of mathematical methods and their application in the solution of physics problems. Topics include vector and function spaces, special functions such as Bessel functions and Legendre polynomials, curvilinear coordinates, Fourier transforms, ordinary and partial differential equations. Three hours lecture. Prerequisites: Mathematics 323; Physics 211.

PHYS 312 Classical Mechanics (4) Emphasizes Newton's Second Law in differential form. Covers driven damped harmonic motion, central fields, rigid bodies, Lagrange and Hamilton equations, and accelerated reference frames. Four hours lecture. Prerequisites: Physics 121 or 210, 305.

PHYS 320 Astrophysics (3) Detailed study of the physical processes that drive a variety of astrophysical phenomena. Topics include radiation production and interaction with matter, accreting systems, and observational techniques from radio to gamma-rays. Specific applications may include (depending on student interest) stellar structure and evolution, compact objects, galactic composition and dynamics, and the origin and structure of the universe. Three hours lecture. Prerequisites: Mathematics 323; Physics 213. Recommended: Astronomy 101. Same as Astronomy 320.

PHYS 322 Biological Physics (3) Introduces biophysical methods from a physics perspective and discusses the application of these methods toward research questions in biology. Topics include biomolecular structures, structure determination and simulation, and molecular motors. Three hours lecture. Prerequisites: Mathematics 221; Physics 210 or 121. Same as Biology 322.

PHYS 330 Nuclear Physics (2) Examines the following topics in nuclear physics: radioactivity, atomic masses, nuclear models, and nuclear fission and fusion. Two hours lecture. Prerequisites: Physics 213, 305.

PHYS 331 Condensed Matter (2) Examines the following topics in condensed matter physics: classical and quantum free electron models, crystal and reciprocal lattice vectors, lattice vibrations and phonons, energy bands in solids, metals, semiconductors and superconductors. Two hours lecture. Prerequisites: Physics 213, 305.

PHYS 340 Computational Physics (3) Provides physics majors with a functional understanding of how to apply modern programming languages to the solution of a wide variety of problems in physics. Topics include solutions to differential equations using a variety of techniques, cellular automata, Monte Carlo techniques, and high performance computing. Three hours lecture. Prerequisites: Mathematics 323; Physics 213.

PHYS 350 Electronics (4) Treats topics in both digital and analog electronics relevant to the study of physics. The study of analog electronics includes basic circuit analysis, filters, diodes, transistors, and operational amplifiers. Topics in digital electronics include logic systems and gates, analog to digital conversion, and digital to analog conversion. Three hours lecture, two hours lab. Prerequisites: Mathematics 221; Physics 122 or 211.

PHYS 395 Physics Journal Seminar (1) A research article reading/discussion seminar for physics majors. Each week, students will read and discuss current published articles of physics research in various

subfields of physics. Format will be discussion, and students will take turns leading the discussion with faculty. Repeatable course.

PHYS 401 Advanced Electromagnetics (4) Examines Maxwell's equations, electric and magnetic fields, vector and scalar potentials, gauge transformations, boundary value problems, electromagnetic radiation, and relativistic electrodynamics. Four hours lecture. Prerequisite: Physics 305.

PHYS 405 Advanced Mathematical Physics (2) Examines a variety of advanced mathematical methods and their application in the solution of physics problems. Topics include functions of complex variables, complex analysis, Laplace transforms, introduction to group theory and Green's functions. Two hours lecture. Prerequisite: Physics 305.

PHYS 414 Advanced Laboratory (3) Introduces advanced measurement techniques employed in experimental physics research. Emphasis on the entire experimental process, including literature search, experiment construction, data acquisition, data and error analysis, and technical writing for publication. Six hours of laboratory per week. Prerequisite: Physics 214.

PHYS 416 Statistical Thermodynamics (3) Develops thermodynamics from a microscopic point of view and then relates this microscopic view to macroscopic parameters through statistical methods. Three hours lecture. Prerequisites: Physics 213, 305.

PHYS 421 Atomic Physics (2) Examines the Bohr model and wave mechanical approach to the hydrogen atom, magnetic dipole moments, spin-orbit interaction, energy states and transitions in multi-electron atoms, X-rays, and the Zeeman effect. Two hours lecture. Prerequisites: Physics 213, 305.

PHYS 422 Cosmology (2) Explores history and evolution of the universe with emphasis on theoretical models that may be tested by modern experimental and observational techniques. Topics include the Big Bang, cosmic microwave background radiation, dark energy, dark matter, the origins of structure in the universe, general relativity, and specific topics of interest to researchers in the field. Two hours lecture. Prerequisite: Physics 305. Recommended: Astronomy 101, 320. Same as Astronomy 422.

PHYS 423 Particle Physics (3) Introduction to the physics of elementary particles. Topics include relativistic particle dynamics, scattering processes, and Feynman diagrams, with applications to quantum electrodynamics (QED). Two hours lecture. Prerequisites: Physics 213, 305.

PHYS 427 Optics (3) Investigation of the interaction of light with matter, physical optics, Fourier optics, and lasers. Two and one-half hours lecture, two hours lab every other week. Prerequisite: Physics 305.

PHYS 471 Quantum Mechanics (3) Systematic introduction of formal aspects of quantum mechanics. Includes Schrodinger (wave representation) and Heisenberg (matrix representation) approaches. In-depth examination of the simple harmonic oscillator and hydrogen atom in terms of quantum mechanics, followed by additional applications and methods. Three hours lecture. Prerequisites: Physics 213, 305.

PHYS 493 Physics GRE Preparation (1) Prepares students for the physics Graduate Record Examination through review of physics concepts, practice tests, and evaluation of test taking strategies.

PHYS 494 Physics Seminar (1) Seminar presentation and written paper on research projects by students. Senior physics majors are required to complete the Major Field Test in physics. Course may be repeated for additional credit.

PHYS 495 Special Topics: Physics or Technology (1) Advanced special topics in physics and/or technology that are not offered regu-

larly. Offered depending on interest or demand. Prerequisite: Junior standing.

PHYS 498 Physics Internship (1) Provides off-campus research experience for physics majors. Prerequisites: Junior standing, permission of instructor and department chair.

PHYS 499 Research/Independent Study in Physics (0) Allows individuals laboratory research or independent study on a problem or topic of special interest. Subject and credit to be arranged with instructor and department chair. Prerequisite: Permission of instructor.

Political Science (PSCI)

Political science courses are taught by the faculty of the Department of Law, Politics, and Society. Unless otherwise noted, there are no prerequisites for 100- or 200-level courses. All 300- or 400-level courses require a 100- or 200-level course or permission of the instructor. Political Science 493, 495, and 499 require permission of the department chair.

PSCI 100 World Politics (3) Introduction to theory and practice of comparative politics as well as political science. Focuses on political behavior, political system, political process, and world politics. Fall, spring.

PSCI 143 American National Government and Politics (3) Provides a broad overview of the institutional arrangement of the American political system, its constitutional and traditional underpinnings, and the ways in which various political actors operate within it. Encourages critical analysis of political information and active citizens participation in our democratic system. Fall, spring.

PSCI 160 Introduction to International Relations (3) Introduction to the theory and practice of sovereignty, conflict and cooperation, foreign policy, political economic relations, development, and international environmental issues. Fall, spring.

PSCI 190 Topics in Politics (3) Subjects offered because of unique relevance to events or developments in political science or in the world of politics. Specific topics announced in the annual schedule. May be repeated.

PSCI 290 Topics in Politics (3) Subjects offered because of unique relevance to events or developments in political science or in the world of politics. Specific topics announced in the annual schedule. May be repeated. Fall, spring.

PSCI 312 Political Parties and Elections (3) Study of institutional political parties, nominations, campaigns, elections, and their influence on policy making.

PSCI 313 Congress and Legislative Process (3) Examines the organization and function of the United States Congress and the legislative process. Special attention paid to presidential and congressional interaction and its effect on policy.

PSCI 318 Research Methods in Political Science (3) Introduction to research design and methods with some emphasis on statistical analysis. Sophomore or junior status required. Spring.

PSCI 320 Comparative Politics Seminar (3) Examines the historical development and trends of comparative politics and explores major theories involving the political system, state and society, political culture, rational choice, Institutionalism, political economy, development, democracy, and democratic transitions.

PSCI 326 Women and American Politics (3) Examines the expanding involvement and the distinctive contributions of women in contemporary American politics as voters, candidates, and officeholders. Includes an overview of the first and second waves of feminist activism in American political history, as well as an exploration of selected

public policy issues of particular concern to women.

PSCI 343 Politics and the Media (3) Analysis of the media's impact upon the political process, institutions, and the individual. Exploration of the role played by communication, principally through the mass media, in the conduct of government and the making of public policy.

PSCI 344 Political Opinion and Political Behavior (3) Examines the formation and measure of public attitudes and opinions and their effect on contemporary American politics.

PSCI 345 Constitutional Law: the American Constitution (3) Reviews judicial decisions and interpretations which have contributed to the growth and development of the United States Constitution in such areas as the federal system, intergovernmental relations, presidential powers, government functions, and civil rights.

PSCI 349 State and Local Government (3) Study of the institutions, organization, and politics of state and local governments. Attention given to intergovernmental relations.

PSCI 360 Politics of the Middle East (3) Examines specific historical trends and contemporary issues facing the people and governments of the Middle East spanning from Libya to Iran and from Turkey to the Southern Arabian Peninsula.

PSCI 361 U.S. Foreign Policy (3) Introduction to the U.S. foreign policy making process that surveys areas of foreign affairs. Makes comparisons between United States and other developed as well as developing nations. Emphasis on economic, environmental, and security and defense policy. Institutional factors considered include the interaction between the presidency, congress, bureaucracy, and public opinion.

PSCI 362 International Security (3) What are the key international security challenges in the world today, and how can they be resolved? This course surveys the major actors in international security, why they threaten one another, and the strategies they use to alleviate those threats; and it goes on to examine issues including war and peace, nuclear weapons, civil war, terrorism, and cyber warfare.

PSCI 363 International Law and Organization (3) Examination of international organizations on questions of military security, the environment, the global economy, economic development, and human rights. The United Nations, regional organizations, nongovernmental organizations, and multinational corporations will be addressed in the context of international law. Considers theoretical and political foundations of international law as well as contemporary application and enforcement.

PSCI 369 Terrorism and Counterterrorism (3) What is terrorism? Why do groups adopt terrorism? How can terrorism best be fought? This course examines in detail the causes and history of terrorism, counterterrorism strategies and challenges, and ethical questions involved in both terrorism and counterterrorism.

PSCI 376 Historical and Contemporary Political Thought (3) Examines historical and contemporary political thought in terms of thematic continuities and discontinuities from classical Greek thought to contemporary theoretical works. Particular attention given to earlier works in terms of their relevance to current political problems.

PSCI 380 Latin American Politics (3) Examines concepts and theoretical arguments concerning civilizations, history, cultures, religions, social classes, economic development, and democratization in Latin America.

PSCI 390 Topics in Politics (3) Subjects offered because of relevance to events or developments in political science or in the world of politics. Specific topics announced in the annual schedule. May be repeated.

PSCI 435 Human Rights Seminar (3) This course serves as a survey of the complexities of international human rights in an era of increasing globalization. Students will be exposed to theoretical foundations in various civilizations and cultures as well as the evolution of human rights, the legal instruments, and the global, regional, and national mechanisms that exist to promote and protect these rights.

PSCI 440 Environmental Law and Policy (3) Examines role of politics, economics, and culture in the formation of domestic and international environmental policies and laws. Focuses, in an era of increasing globalization, on ecosystems, population, energy, biodiversity, and the legal complexities of environmental regulatory and administrative systems.

PSCI 459 Asian Politics (3) Examines the impact of history, culture, government structures, and economic change on political processes in Asian countries. Primary attention paid to China, Japan, and Korea followed by other Asian countries.

PSCI 461 Politics of the Global Economy (3) Analysis of the political aspects of global economic relations. Areas of focus include globalization and interdependence, trade policy, international finance, development assistance, multinational corporations, energy and natural resources, and the role of international organizations.

PSCI 489 European Politics (3) Examines the historical patterns of social, economic, and religious conflict; structures of citizen representation in interest groups and political parties; electoral systems; constitutional relationships between executive, legislature, and judiciary; economic and foreign policies; and current problems of national identity in European countries.

PSCI 490 Topics in Politics (3) Subjects offered because of relevance to events or developments in political science or in the world of politics. Specific topics announced in the annual schedule. May be repeated. Fall, spring.

PSCI 493 Readings in Political Science (1) A planned program of reading and research under the direction of a member of the faculty. May be repeated for credit. Fall, spring.

PSCI 495 Senior Seminar in Political Science (3) Capstone educational experience in political science offers students an opportunity to use their substantive and methodological training in preparing a significant paper and sharing the intellectual experience with other members of the seminar. Fall.

PSCI 499 Public Policy Internship (1) Supervised field experience or internship in a political campaign, the state legislature, the United States Congress, the courts or an agency of the criminal justice system, or in an administrative setting. Candidates maintain a diary or log of experiences and prepare a paper either reporting on some aspect of their experiential education or reporting a particular research project. Fall, spring.

PSCI H385 Modern British Politics (3) Better understand the issues which matter to any society today. Course enhances ability to make balanced and informed views on apparently complex issues by considering the social, economic, ethical, and political aspects of many controversial issues in Britain, including education, health, Northern Ireland, Europe, housing, race relations, and prisons. Fall, spring.

Psychology (PSYC)

Psychology courses are taught by the faculty of the Department of Psychology.

PSYC 121 Introduction to Psychology (3) Surveys major areas of psychology, including methodology, learning, memory, development, personality, psychopathology, and additional areas. Focuses on historical development, research findings, and applications in con-

temporary life. Fall, spring, summer.

PSYC 125 Introduction to Behavioral Neuroscience (3) Surveys development, organization, and function of the human brain and nervous system - how we sense, move, feel, and think. Introduces neural bases of mood, emotion, sleep, learning, memory, language, and attention. Assumes minimal prior knowledge of biology, physics, and chemistry. Fall, spring.

PSYC 201 Psychology: Fields of Application (1) This course provides psychology majors with an overview of (a) the various subdisciplines within psychology, (b) the different types of graduate school programs in psychology, and (c) the many career opportunities open to students majoring in psychology. This course is taken pass/fail only. Fall.

PSYC 205 Special Topics in Psychology (3) Examines specific topics in psychology through a seminar or workshop format. Prerequisite: Psychology 121 or permission of instructor.

PSYC 225 Lifespan Development (3) This course will focus on the development of individuals across the lifespan. Beginning with prenatal and early infancy development, the course will progress through adolescence, adulthood, and topics in death and dying. Material will include aspects of physical, cognitive, social, personality, and emotional development. This class will place an emphasis on theoretical models and experimental findings. The course adopts a discussion format with textbook, primary readings, reaction papers, and a term paper. Prerequisites: PSYC 121.

PSYC 226 Child and Adolescent Psychology (3) Examines developmental stages from conception through adolescence, giving special emphasis to physical, cognitive, social, and emotional aspects related to maturational as well as learning processes. Prerequisite: Psychology 121. Fall, spring.

PSYC 229 Social Psychology (3) Considers broad range effects of a social context on individual and group behavior. Examines interpersonal relations and actions, attitude developments and change, group dynamics, how we justify individual actions, advertising and news, prejudice and stereotyping, love and sex, leadership, and work environments as they relate to and affect behavior. Prerequisite: Psychology 121. Fall, spring.

PSYC 245 Statistics for Psychologists (4) Introduces descriptive statistics, probability, decision theory, and testing of hypotheses by both parametric and nonparametric tests. Emphasizes basic concepts, SPSS computer analysis, and APA-format presentation of results. Three hours lecture, two hours lab. Prerequisites: Nine hours of psychology, including Psychology 121; general education mathematics requirement. Fall.

PSYC 246 Research Methods in Psychology (4) Emphasizes scientific basis of psychology. Explores research methods of modern psychology. Covers use of statistics in design of behavioral experiments. Example experiments are conducted to aid comprehension. Students gain skills necessary for management of simple research and interpretation of research reports. Three hours lecture, two hours lab. Prerequisites: Psychology 121, 245. Fall, spring.

PSYC 259 Abnormal Psychology (3) Examines abnormal behavior with emphasis on mood disorders, affective disorders, and schizophrenia. Examines the biological and psychological bases of psychopathology and those factors involved in diagnosis and treatment of mental disorder. Prerequisite: Psychology 121. Fall, spring.

PSYC 265 Applied Creativity and Design Thinking (3) This course will explore the concepts of design thinking and apply them to complex problems. Knowledge and skills are developed in empathy, problem-definition, ideation, rapid-prototyping, and experimentation

to foster innovation. Students will utilize collaborative, cross-disciplinary approaches and creative problem-solving strategies to tackle multi-faceted problems and develop innovative solutions.

PSYC 320 Psychology and the Law (3) Examines how psychological research contributes to understanding our legal system. Topics include the reliability of eyewitness testimony; factors that affect jury decision making; interrogation and confessions; psychological profiling; clinical determination of insanity, competence, and future dangerousness; sexual victimization; and race. Prerequisite: Psychology 121; Psychology 246 or Sociology 235. Spring.

PSYC 326 Language Development (3) Introduces the nature of language development in infancy and childhood. Examines cognitive, developmental, environmental, and physiological influences on language skills. Theories of language development and their influences on research and our understanding of children discussed. Topics include perception of sounds, acquisition of grammar, first and second language learning, and developmental language disorders. Relationship between language skills and overall development (social, cognitive, biological) also explored. Recommended Prerequisites: Psychology 121, 226. Spring, alternate years.

PSYC 333 Psychopathology in Children and Adolescents (3) Studies behavioral characteristics, causes, diagnosis, and treatment of the psychopathological problems of childhood and adolescence including anxiety states, developmental disorders, attention deficit disorder, conduct disorder, and autistic disorder. Discusses assessment and treatment from biological and psychological perspectives. Prerequisite: Psychology 121. Recommended: Psychology 226. Fall.

PSYC 355 Sensation and Perception (3) Examines perceptual processing of sensory information in vision, hearing, touch, taste, and smell. Examines psychophysics and the influence of personality and environmental factors in human perception. Examines neuropsychology and perceptual abnormalities resulting from brain damage. Prerequisites: Psychology 121, 125 or 357, 245. Spring.

PSYC 356 Industrial Psychology (3) Examines personnel psychology, organizational psychology, and human factors psychology. Topics include job analysis, recruiting, testing, performance appraisal, leadership, motivation, person-machine systems, workspace design, and stress in the workplace. Prerequisites: Psychology 121; 229. Spring alternate years.

PSYC 357 Neuropsychology (3) Examines the function and organization of the nervous system and the role of the nervous system in controlling behavior. Topics include nervous system structure and functions as it relates to sensory processing, movement, sleep, reproductive behavior, emotional behavior, learning and memory, stress and health, neurological disorders, and select psychiatric disorders. Current research methodology and experimental findings emphasized. Prerequisites: Biology 100 or higher; Psychology 121. Fall.

PSYC 358 Neuropsychology Lab (1) Laboratory course introduces techniques and paradigms of physiological psychology and behavioral neuroscience. Scientific report writing, problems of research design, and data analysis emphasized. Two-hour laboratory. Prerequisites: Biology 100 or higher; Psychology 121. Corequisite or prerequisite: Psychology 357. Fall.

PSYC 365 Applied Creativity and Design Thinking (3) This course will explore the concepts of design thinking and apply them to complex problems. Knowledge and skills are developed in empathy, problem-definition, ideation, rapid-prototyping, and experimentation to foster innovation. Students will utilize collaborative, cross-disciplinary approaches and creative problem-solving strategies to tackle multi-faceted problems and develop innovative solutions.

PSYC 366 Cognitive Psychology (3) The study of how we think. Examines the cognitive processes underlying attention, perception, memory, language, reasoning, and problem-solving. Emphasis on theoretical models and experimental findings. Explores areas of applied cognitive psychology. Prerequisites: Psychology 121, 125. Fall

PSYC 367 Theories of Personality and Psychotherapy Psychotherapy (3) Survey of major contemporary models of personality and individual psychotherapy. Includes biological, psychoanalytical, humanistic, behavioral, and cognitive models. Prerequisites: 12 hours of psychology, including Psychology 121, 259. Spring.

PSYC 370 Behavior Modification (3) Studies learning principles as a means for changing behavior in the home, school, mental health settings, and other social situations. Operant, respondent, and cognitive techniques reviewed in terms of doing therapy, increasing self-control, and improving productivity in industry. Focus on modifying both child and adult behavior. Prerequisites: Psychology 121, 259. Fall.

PSYC 379 Child and Family Psychotherapy (3) Survey of theories and techniques of the most popular approaches to psychotherapy with children, adolescents, and their families. Covers individual therapies such as play, cognitive, and behavior therapies, as well as group and family therapies. Particular attention given to interviewing skills. Prerequisites: Psychology 121 and either Psychology 225 or 226. Spring.

PSYC 401 Independent Study-Psychology (1) Provides opportunities for study of subject areas in greater depth. The study is conducted with the guidance and supervision of a department faculty member. Proposed independent studies should be presented to the department at least six weeks before the beginning of the term and must be approved before registration for the course. May be repeated given substantially different content. Students cannot enroll in Psychology 401 for research into a topic that is offered as a standard course within the department. Prerequisites: 15 hours of psychology and sponsorship by the supervising faculty member. Fall, spring, summer.

PSYC 402 Ungrad Research in Psychology (1) Provides opportunities for undergraduate research that involve data collection and formal reporting concerning a specific problem. This research is conducted with the guidance and supervision of a department faculty member. Proposed independent studies should be presented to the department chair at least six weeks before the beginning of the term, include a detailed prospectus of the problem and methodology, including documentation of IRB approval, and must be approved by the department before registration for course credit. May be repeated for a maximum of 9 hours. Prerequisite: Psychology 121, 245, 246, and sponsorship by the supervising faculty member. Fall, spring, summer.

PSYC 405 Special Topics in Psychology (3) Examines specific topics in psychology through a seminar or workshop format. Prerequisite: Psychology 121 or permission of instructor.

PSYC 416 Human Sexuality (3) Covers topics related to human sexuality. Includes sexuality research, anatomy, sexual development, sexual identity and orientation, sexual activity, contraception, sexually transmitted infections, love and relationship, sex and the law, and cross-cultural differences. Exposes students to knowledge and attitudes about human sexuality and challenges them to make informed, ethical choices. Prerequisites: Psychology 121, 229; at least junior standing. Summer, offered periodically.

PSYC 420 Children, Psychology and the Law (3) Introduces students to the major topics represented in the field of children, psychology, and law. Examines how psychological research (across sub-disciplines such as social, clinical, cognitive, and community psychology) can contribute to a better understanding of special issues that arise when children enter the legal system - a system designed for adults. Topics include the nature of and societal response to child maltreatment,

the reliability of children's eyewitness testimony, jurors' perceptions of children's testimony, and juvenile justice. This course reviews how psychological research can contribute to a better understanding of the issues, how the legal system can be informed by the results of research, and how to design future research to address remaining questions. Prerequisite: PSYC 229, 246, or SOC 235.

PSYC 426 Advanced Child and Adolescent Development (3) Examines developmental stages from conception through adolescence, giving special emphasis to physical, cognitive, social, and emotional aspects related to maturational as well as learning processes. This course builds upon Psychology 226 (Child and Adolescent Psychology) but delves further into each topic so that each student gains a greater appreciation for and understanding of the concepts and processes involved in the development of children. Prerequisites: Psychology 226 or admission into a master's program or permission of the instructor. Summer, offered periodically.

PSYC 431 Stereotyping, Racism, and Prejudice (3) Introduces the student to the psychological theory and research concerning stereotyping, prejudice, racism, and the effects of social stigma on self and society. Examines how stereotypes, prejudice, and racism are formed, maintained, and reduced. Analyzes prejudice toward different social groups, including those formed by racial and ethnic origins, gays and lesbians, women and men, and overweight and physically different individuals. Prerequisite: one of the following courses: PSYC 229, 245, 246, SOC 235 or 344.

PSYC 445 Psychological Tests and Measurements (3) Studies the theory, construction, administration, and interpretation of standardized psychological tests used in educational, clinical, and industrial settings. Examines achievement, intelligence, aptitude, interest, and personality tests. Prerequisite: Psychology 121, 245, or permission of instructor. Offered periodically.

PSYC 450 Learning (3) Examines neurological, environmental, and cognitive factors that influence acquisition and retention of new information or new behaviors. Emphasis on historical theories of classical and instrumental conditioning and how they relate to stimulus control of behavior and animal cognition, including memory. Explores areas of applied learning. Learning concepts reinforced with interaction with a virtual reality program. Prerequisites: Psychology 121, 246. Spring, alternate years.

PSYC 457 Advanced Neuroscience (3) Detailed study of the human brain and nervous system. Topics cover cellular and molecular neuroscience, neural integration, pharmacology, neuroendocrinology, nervous system development, and plasticity of the central nervous system. Prerequisites: Psychology 121, 357, Biology 119, and Chemistry 240 with a grade of C- or better. Spring, alternate years.

PSYC 464 Psycholinguistics (3) Introduction to psycholinguistics providing overview of language processes including speech perception, meaning representation, language processing, language production and comprehension, and language acquisition. Details theoretical linguistic concepts and their empirical support data. Examines language related to brain, thought, and reading. Prerequisite: Psychology 121. Recommended: Psychology 366. Summer, offered periodically.

PSYC 466 Cognitive Development (3) Examines development of cognitive skills from birth through adolescence with emphasis on memory, attention, perception, language, and problem solving skills. Discusses major theories of cognitive development with focus on experimental findings. The relationship between biological changes and cognitive abilities explored as is the influence of neurological and physiological impairments. Impact of cognitive skills on academic abilities and performance also discussed. Prerequisites: Psychology 121, 226. Recommended: Psychology 366. Spring, alternate years.

PSYC 489 Field Experience: Internship in Psychology (1) Provides work experience in a preferred field of psychology. Features work experience in area clinics, agencies, schools, and other institutions under guidance of professional personnel. Weekly class discussions focus on ongoing experiences and professional development issues. May be repeated for a maximum of nine hours. Prerequisites: Senior psychology or neuroscience majors; must meet with the instructor at least one month before semester begins to arrange placement. Fall, spring.

PSYC 490 Senior Review and Senior Thesis (3) Reviews contemporary psychology through readings, student presentations, and discussions. Preparation for the comprehensive examination in psychology. Provides supervision of the senior thesis, which must include a thorough literature review of a topic relevant to personal goals. Thesis may include but does not require original research. Prerequisite: Senior psychology or neuroscience major. Fall.

Public Health (PH)

Public Health courses are taught by the faculty of the School of Public Health.

PH 190 Intro to Public Health (3) Introduces students to the concepts, principles, and outcomes of public health. Students will explore theories of health, illness behavior, and health education considering community health data sources, classical health intervention approaches, and the planning and evaluation of community health interventions. Course provides basic knowledge and skills needed for conducting community needs assessment with diverse populations. Additional topics such as infectious diseases, environmental health, chronic diseases, maternal and child health and women's health are also covered.

PH 195 Global Health Issues (3) Provides an overview of important health problems of the world's populations, including improving health globally, reducing health disparities and examining key areas of disease burden. Particular attention will be paid to health status of women, children and the poor.

PH 340 Public Health Nutrition (3) This course focuses on food and nutrition problems in the setting of the general community. The course is designed to provide students with an understanding of theoretical and practical issues underpinning population-level assessment in nutrition and an appreciation of nutrition within the broader context of public health. Specific topics include the derivation and application of nutrient requirement estimates and nutrition recommendations, the measurement of food intake and food insecurity, current issues and controversies in food policy, and the development of individual vs. population-based intervention strategies. Prerequisite: Public Health 190.

PH 360 Community Health and Social Justice (3) Provides an overview of the major health issues influencing quality of human life. Topics include individual and social planning for optimal health. Prerequisite: PH-190 or permission of instructor.

PH 400 Food Science (3) Knowledge of basic groups of foods in the food supply and their nutrient profiles, their harvesting, processing and storage procedures and policies. This course will provide students a broad overview of certain aspects of the food supply both locally and worldwide and will examine issues affecting food safety including some of the mechanisms by which food-borne pathogens that cause disease in humans, as well as the human consequences of infection by major food-borne pathogens. Prerequisites: Public Health 190.

PH 401 Epidemiology (3) Introduces students to epidemiology and epidemiological methods. Students will explore study designs and measures of effect used to study disease in human populations, as well as concepts of causal inference and threats to study validity. This

course will prepare students to critically evaluate public health and medical literature based on the major criteria used to assess causality.

PH 409 Environmental Health (3) Environmental health is concerned with the biological, chemical, and physical influences on human health. The course will examine topics such as environmental health determinants, general mechanisms of toxicity, genetic, physiologic, and psychosocial factors related to environmental health, environmental risk assessment methods, federal and state regulatory guidelines and programs, environmental justice, risk communication, and prevention and management of environmental hazards. Fall.

PH 415 Health Behavior (3) Health Behavior Change is an overview of the health behaviors contributing most dramatically to increased morbidity and mortality in the United States. The course emphasizes public health interventions, theoretical models and strategies to promote healthy behaviors and discourage unhealthy behaviors. The course examines consequences, patterns, risk factors, and change/interventions for each behavior or problem. Behaviors are examined from multiple perspectives (e.g., individual, social, environmental) and with a systems perspective in mind, illuminating the interconnecting influences on behaviors. Health behaviors and behavior change interventions are presented in the context of current research and theory. The course also examines the role of health disparities, public health policy, current debate, health behavior theory and emerging research. Fall.

PH 425 Biostatistics (3) This course will cover biostatistical methods and applications related to public health. Topics will include descriptive statistics, probability theory, and a wide variety of inferential statistical techniques that can be used to make practical conclusions about empirical data. Learned statistical knowledge will be applied to understanding and designing research studies.

PH 467 Statistics Appraisal and Evaluation (3) Focuses on the analysis of data common to health care. Includes data description, elements of probability, distribution of random variables, estimation and confidence intervals, binomial and normal distributions, hypothesis testing, contingency tables, regression analysis, and ANOVA.

PH 480 Programs, Problems, and Policies in Public Health (3) This course examines the myriad of programs and policies in public health via a developmental approach to learning about health problems. The course will cover a variety of topics, including state programs and policies, maternal and infant health, program planning, research, monitoring, and advocacy.

PH 488 Internship (1) Offers the public health major practical experience in a specialized career area. Fosters development of skills, competencies, and organizational and administrative techniques needed for successful entry into the public health workforce or entry into a professional graduate program, while working under direct supervision of selected professionals.

PH 490 Integrative Experience (3) Examines decision making in health services administration by extensive use of case studies. Integrates material from other HSA courses into the study of decisions facing all types of health care organizations.

PH 499 Special Topics Public Health (1) Study of topics of special interest not covered in regular course offerings. Topics announced. Course may be repeated, but the topic must be different. Prerequisite: Permission of instructor.

Quantitative Methods (QM)

Quantitative methods courses are taught by the faculty of the Department of Accounting and Business Administration. All courses are subject to the leveling policy and prerequisite requirements of the Schroeder Family School of Business Administration. See the

“Schroeder Family School of Business Administration” section of this catalog for the complete leveling policy.

QM 160 Introduction to Data Analytics (3) This course is an introduction to data analysis and management. It includes comprehensive introduction to Microsoft Excel and a brief treatment of Microsoft Access. Excel topics include formatting workbook text and data; implementation of designed functions; analysis and charting of financial data; application of tables, pivot tables and table charts; managing multiple worksheets and workbooks; validation and development of macros; nested commands and other advanced functions; financial tools and functions; scenario analysis; retrieval and importation of external data; and descriptive statistical analysis. Access topics include a brief introduction to database techniques.

QM 227 Introduction to Statistics (3) General purpose introduction to principles of analysis and inference under conditions of uncertainty. Focuses on the logic of statistical inference. Topics include probability, probability distributions, random variables, sampling and sampling distributions, estimation, hypothesis testing, and linear regression and correlation. Prerequisite: Proficiency in algebra at introductory level. Credit not given for both QM 227 and either PSYC 245 or SOC 344.

QM 327 Statistical Methods (3) This is a second course in applied statistics. It uses basic principles of statistical inference to introduce students to categorical data analysis, analysis of variance and design of experiments, regression modeling and basic extensions of regression analysis. Possible additional topics include nonparametric statistics, methods for quality control, and introduction to multivariate methods. With emphasis on applications of statistical analysis, this course is appropriate for students in a variety of majors, ranging from business and economics to health and life sciences, social sciences, and exercise science. Offered in alternate years. Prerequisite: Grade of C- or better in QM 227.

QM 380 Special Topics in Quantitative Methods (3) Covers topics not included in other courses; gives greater depth in certain areas; explores current quantitative methods topics. Repeatable course. Content changes each time course is offered. Prerequisites: Grade of C- or better in QM 227. Offered periodically.

Race and Ethnicity Studies (RES)

Race and Ethnicity Studies courses are taught by faculty of several departments.

RES 492 Special Topics: Race and Ethnicity Studies (3) Special topics in race and ethnicity studies not included in regular course offerings. May consist of lectures and discussion with an emphasis on research. Content changes each time course is offered. Repeatable up to six credit hours.

RES 493 Independent Study in Race and Ethnicity Studies (3) Research in areas of race and ethnicity studies on topics not covered in existing courses. Subject and credit earned must be approved by a faculty member, coordinator of Race and Ethnicity Studies, and dean of the College of Arts and Sciences. Content changes each time course is offered. Repeatable up to six credit hours. Pre-requisite: junior standing or permission of coordinator of Race and Ethnicity Studies.

Religion (REL)

Religion courses are taught by the faculty of the Department of Philosophy and Religion.

REL 120 Religion in America (3) This course examines mutually intersecting themes and influences between religion and American culture. Topics vary and may include, for example, religious diversity in America, American religious history, the intersection of religion with American politics and cultural debates.

REL 130 Christian Thought (3) Introduces themes of Christian thought in historical and contemporary perspectives.

REL 140 Reading the Old Testament (3) Engages select passages from the Old Testament, examining their historical context, place in the Bible, textual features, and a wide variety of subsequent interpretations. Focus is on developing basic skills for reading the Old Testament.

REL 150 Introduction to the New Testament (3) Introduces the New Testament, its background, content, and major themes. Explores the ancient world and the life of the first Christian communities in order to illumine the New Testament texts. Emphasis on key topics of theology and interpretation and their contemporary relevance.

REL 201 Religious Ethics (3) Provides an introduction to religious moral thinking, paying attention to the basis, nature, content, and consequences of ethical thought and the religious traditions that address them. Includes a close study and discussion of various approaches to ethics as embedded in the world's most widespread religious traditions (particularly Christianity, Judaism, Islam, Buddhism, Hinduism, etc.) as well as an analysis of selected contemporary issues such as violence and war, euthanasia, abortion, sexuality, and racism.

REL 205 Everyday Islam in the West (3) This course examines some of the major theories in the study of the lived religion through the lens of everyday experiences and practices of Muslim in the "West".

REL 210 Ancient Christianity (3) Traces the history of Christianity from the Apostolic Fathers at the close of the first century until the early medieval period. Emphasis on the life, theology, spirituality, and expansion of the early Church, with special attention to Christianity in ancient Roman and Saxon Britain.

REL 212 Living World Religions (3) Comparative study of the origin, development, literature, organization, and controlling ideas of major world religions. Prerequisite: FYS 112.

REL 220 Reformers and Revolutionaries in Christian History (3) Examines key issues in the history of Christian thought through study of significant figures in late medieval and modern Christian history. Examples of theologians covered include Anselm, Thomas Aquinas, Julian of Norwich, Martin Luther, John Calvin, Teresa of Avila, Anne Hutchinson, and Jonathan Edwards

REL 240 Philosophy of Religion (3) Examines mutually intersecting themes and influences between Western philosophy and religion from antiquity to the present day. Sample topics include the nature of religious experience, claims to religious knowledge, the relationship between faith and reason, etc.

REL 275 Race and Religion (3) This course introduces students to the complex intersection of race and religion in America. We will examine the role of religion in constructing ideas about race and in supporting racialized power inequities. Furthermore, we will explore ways religion has been shaped by minority communities in response to racial realities in America.

REL 305 Bible and Justice (3) Explores the Bible's relationship to contemporary social justice issues. Topics include issues linked to social identity (race, class, gender, sexuality, etc.) as well as global diversity (poverty, globalization, human rights).

REL 310 Contemporary Theologies (3) Examines major Christian theologies of the 19th and 20th centuries, including neo-orthodoxy, liberalism, existentialism, process theology, global theology, and feminist, Latin American, African American, and Asian liberation theologies. Prerequisite: One course in religion or permission of instructor.

REL 314 Religions of East Asia (3) Studies the texts, thought, and practices of the religions of East Asia, specifically China and Japan,

including Confucianism, Daoism, Shinto, and Buddhism. Prerequisite: sophomore standing.

REL 315 Jews, Christians, Muslims (3) Examines the three religious traditions that trace their heritage to Abraham: Judaism, Christianity, and Islam. Prerequisite: sophomore standing.

REL 320 Jesus and the Gospels (3) Studies the Gospel texts, explores issues and options of interpretation, and engages the key issues of modern scholarly debate concerning the Gospels. Emphasis on the use of contemporary methods of Biblical exegesis to illumine the Gospel texts. Prerequisite: Junior or Senior standing, or permission of instructor.

REL 330 Paul and His Letters (3) Explores Paul's letters to illumine Paul's thoughts, the life of the ancient Christian communities which he founded and the place of Paul within the history of early Christianity. Prerequisite: Junior or Senior standing, or permission of instructor.

REL 335 Biblical Narratives (3) Examines theory and practice of biblical interpretation through in-depth study of select biblical narratives, including the Joseph Story, the Succession Narrative (King David), the books of Ruth, Jonah, Daniel, Esther, Tobit, and Judith. Special attention given to literary approaches and theological issues.

REL 340 Women and Religion (3) Examines women's religious thought in historical or contemporary settings. Explores how women's sense of self-identity and their social position shaped their unique theological perspectives.

REL 345 Religion and Story (3) This course explores the role of story as a means of communicating religious truth claims. Students will examine selected religious themes presented and/or challenged in novels and films representing diverse socio-religious perspectives. Topics include, for example, faith, human nature, good and evil, redemption, and what is ultimate. Prerequisite: One course in religion or permission of instructor.

REL 350 God, Suffering and Evil (3) Considers how women and men have thought about and lived in relation to evil and the experiences of suffering, especially with regard to the question of God's role in such situations. Focuses particularly on ways persons within religious traditions, mainly Christian and Jewish, have responded to evil and suffering, and how they have understood the relationship of God to such events. Prerequisite: One course in religion or permission of instructor.

REL 375 Religion, Gender, and Culture (3) This course uses gender as a category of analysis to study religion. Topics vary and may include such things as the connection between religious notions of gender and larger social, political, and economic issues; representative interpretive traditions of religious texts and figures in literature and art; or constructions of gender in major world religions.

REL 380 Topics in Religious Studies (3) Content changes each time course is offered. Repeatable course. Prerequisite: One course in religion or permission of instructor.

REL 431 Prophets (3) Examines Old Testament prophets in light of their historical, social, political, and religious backgrounds. Taught as a seminar. Prerequisite: One course in religion or permission of instructor.

REL 435 Biblical Languages Practicum (1) Provides opportunity to employ Greek or Hebrew skills and tools in biblical interpretation and exegetical research. Usually taken in conjunction with one of the following: Religion 320, 330, 335, or 431. Repeatable course. Content changes each time course is offered. Repeatable up to four credit hours. Prerequisite: Greek 211 or Hebrew 112.

REL 445 Religion, Peace and Justice (3) Provides in-depth engagement with religious approaches to ethical concerns in the social sphere, especially related to questions of war and peace, violence and nonviolence, and economic and social justice. Predominantly focused on the Christian tradition, the course will also include engagement with significant figures in selected other religious traditions. Prerequisite: One course in religion (preferably Religion 201) or permission of instructor.

REL 481 Directed Study in Religion (1) Offers research in special problems or persons under the direction of a member of the religion faculty. Content changes each time course is offered. May be repeated for up to nine hours. Prerequisite: Permission of instructor.

REL 492 Religion Internship (1) Supervised field experience in church or other house of worship, nonprofit organization, or similar area of direct relevance to a religion major.

REL 495 Capstone Experience in Religion (1) A one credit hour course that must be taken in conjunction with an approved 300 or 400 level religion course in order to meet the general education capstone requirement.

Russian (RUSS)

Russian courses are taught by the faculty of the Department of Foreign Languages and Cultures.

RUSS 111 Elementary Russian I (3) Emphasizes practice in grammar, speaking, listening, writing, reading, and cultural awareness.

RUSS 112 Elementary Russian II (3) Emphasizes practice in grammar, speaking, listening, writing, reading, and cultural awareness.

RUSS 211 Intermediate Russian I (3) Continues practice in grammar, speaking, listening, writing, reading, and cultural awareness.

RUSS 212 Intermediate Russian II (3) Continues practice in grammar, speaking, listening, writing, reading, and cultural awareness.

RUSS 311 Third Year Russian I (3) Continued study of Russian grammar with attention to participles and prefixed verbs of motion. Regular work on speaking, vocabulary, and reading comprehension.

RUSS 312 Third Year Russian II (3) Continued study of Russian grammar with attention to participles and prefixed verbs of motion. Regular work on speaking, vocabulary, and reading comprehension.

RUSS 330 Independent Study in Russian (1) Topics and credit hours must be prearranged with instructor. May be repeated with content change.

RUSS 333 Russian Culture (3) Broad survey of Russian culture. Includes geography, history, folk culture, literature, art, religion, music, cinema, and contemporary post-Soviet society. Taught in English. Alternate years.

RUSS 334 Soviet and Post-Soviet Russian Civilization (3) This course is a continuation of Russian 333. As with Russian 333, this course covers a wide range of topics relating to Russia from the Bolshevik Revolution to the present day: a basic overview of history, various social issues, and culture - from literature, art, music, cinema, and architecture to everyday life and popular culture. Taught in English; no knowledge of Russian language required. Prerequisite: Russian 333 or permission of instructor.

RUSS 335 Foreign Language Study Abroad (1) Foreign Language Study Abroad. Repeatable with content change.

Social Work (SW)

Social work courses are taught by the faculty of the Department of Law, Politics, and Society.

SW 120 Introduction to Social Work (3) Introduces profession of social work. Focuses on the historical evolution of the profession and its role in modern society.

Sociology (SOC)

Sociology courses are taught by the faculty of the Department of Law, Politics, and Society.

SOC 105 Introduction to Sociology (3) Introduces major concepts used by sociologists to understand and predict the behavior of individuals in group settings.

SOC 201 Professional Development in Sociology (1) This course is a professional orientation for various internship opportunities, career pathways, and graduate school options available in the discipline. In addition, the course serves as an introduction to academic writing, ethics, and research in sociology.

SOC 210 Deviance and Crime (3) Examines deviance and crime through a number of sociological, psychological, and criminological perspectives.

SOC 230 Social Problems in the Modern World (3) Focuses on major social, economic, political, and environmental issues confronting the modern world. Covers both global and U.S. issues.

SOC 327 Human Behavior in the Social Environment (3) A sociological social psychology course. Explores social interaction, selective perception, human symbolic behavior, language, social structure, emotions, perceptions and memory, sexuality, development of self, identity, aging, and deviance. Prerequisite: SOC 105 or permission of instructor.

SOC 330 Community Organization (3) Explores the basics of community organization and development, with special attention to urbanized areas. Prerequisite: Prerequisite: PSCI 143, PSYC 121, or SOC 105.

SOC 335 Marriage and Family (3) Designed to give an in-depth look at changing courtship, marital, and family patterns in America over the course of the last century. Studies the history and importance of the family as a social institution, and the different forms and configurations of the family found in modern America. Prerequisite: Junior or senior standing and SOC 105 or permission of instructor.

SOC 337 Social Aspects of Health and Health Care (3) Examines the nonbiological aspects of health and health care. Topics include social definitions of health, professionalization in the health industry, patient-practitioner relationships, and the organization of health care systems in the United States and other countries. Prerequisite: Junior or senior standing or permission of instructor.

SOC 343 Social Research Methods (4) Covers both quantitative and qualitative sociological research methods. Topics include the relationship between theory and research, conceptualization, operationalization, hypothesis, and model development and sampling. Specific data gathering techniques covered include survey designs, field studies, secondary analysis, unobtrusive measures, and experimental techniques. Discusses ethical issues and responsibilities in social science research and the limits of the scientific method in social science. Prerequisites: Sociology or criminal justice major or permission of instructor.

SOC 344 Introduction to Behavioral Statistics (4) Recommended for students desiring an introductory statistics course which emphasizes application and interpretation. Covers basic statistical techniques

used in behavioral research. Studies frequently used descriptive and inferential statistics with emphasis on the interpretation of quantitative data and statistical reasoning in behavioral research. Prerequisite: SOC 343 and criminal justice or sociology major or permission of instructor.

SOC 350 Popular Culture (3) Examines the sociological impact of popular culture by exploring race, class, gender, sexuality, and family through the cultural lens of film, television, and music. Topics include the changing portrayals of race, class, gender, sexuality, and family across the last century in reflecting cultural values and ideals, and their reciprocal influence on culture and American identity. Prerequisite: SOC 343, 344 and criminal justice or sociology major or permission of instructor.

SOC 370 Advanced Topics in Sociology (1) Intensive analysis of sociological topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores changing areas of sociological study. Repeatable course up to 3 credit hours; content changes each time course is offered. Prerequisites: SOC 105 and SOC 230; or permission of instructor.

SOC 371 Love and Attraction (1) Examines the theoretical frameworks and research findings on human social relationships, exploring the social norms, values, attitudes, and behaviors of love and attraction. Topics include: the social construction of love and attraction, cross-historical definitions of love, acceptable forms of love, problematic aspects of love and attraction, the development of interpersonal attraction, intimacy, and attachment styles. Prerequisites: SOC 105 and SOC 230; or permission of instructor.

SOC 372 Qualitative Interviewing Skills (1) Intensive methodological training in qualitative interviewing with a focus on skill development and experiential learning in interview techniques. Prerequisites: SOC 105, SOC 230 and junior or senior standing; or permission of instructor.

SOC 386 Death and Dying (3) Explores thanatology - the study of death - using a sociological lens. Examines how American society shapes attitudes and behaviors toward dying, death, and bereavement. Topics of study include: cultural traditions, rituals, practices, and attitudes toward death, self-awareness and value identification concerning death and dying, grief and bereavement, the impact of death and dying across the life span, and end-of-life planning. Prerequisites: Junior or senior standing and SOC 105; or permission of instructor.

SOC 390 Principles of Sociological Theory (3) Examines classical and contemporary sociological theories, as well as micro- and macro-sociological approaches. General theoretical frameworks include constructionism, functionalism, conflict theory, feminism, symbolic interactionism, postmodernism, network analysis, and integrated theories. Prerequisites: SOC 105; junior or senior standing; or permission of instructor.

SOC 415 Globalization and the Environment (3) Examines the changing demographics of our world and how they impact the social, economic, environmental, and political relationships between countries. Explores the transformation to a global society and the basic concepts of globalization, as well as how the relationships between human societies and the larger natural environment are affected by demographic pressures and global needs. Prerequisites: Junior or senior standing; or permission of instructor.

SOC 435 Sex, Gender, and Sexualities (3) This course explores the social norms, values, and expectations that influence - and are influenced by - attitudes, beliefs, and behaviors regarding gender and sexuality. The course examines the different and changing cultural understandings of gender roles and sexuality, and the social construction of both.

SOC 438 Race and Ethnic Relations (3) Studies the sociology of United States and global minority and ethnic relations. Examines class, ethnic, gender, and racial stratification, and power and inequality. Analyzes patterns of ethnic integration and multiculturalism. Details the social and psychological dimensions of discrimination and prejudice, as well as racial and ethnic conflict and accommodation. Prerequisite: SOC 105 or permission of instructor.

SOC 450 Senior Seminar in Sociology (3) Capstone educational experience in sociology, offering students the opportunity to use their substantive and methodological training to complete and present an original research project. Prerequisites: SOC 235, 344; senior standing; sociology or criminal justice major; or permission of instructor.

SOC 460 Aging and Society (3) Recommended for any student desiring a thorough introduction to gerontology. Examines the social response to aging in American society and in other countries. Emphasis on the roles of elders in the familial, religious, political, and economic institutions. Prerequisite: SOC 105, junior or senior standing; or permission of instructor.

SOC 480 Undergraduate Research in Sociology (1-2) Provides opportunities for undergraduate research that involve literature review, data collection, analysis, and formal reporting. This research is conducted with the guidance and supervision of a department faculty member. May be repeated for a maximum of 2 hours. Prerequisites: Junior or senior standing; or permission of instructor; sponsorship by the supervising faculty member.

SOC 494 Directed Study (3) Provides opportunity for specialized advanced study. Prerequisite: Permission of instructor.

SOC 496 Internship (1-2) Internships available to majors of junior or senior standing who have completed core courses. GPA requirements must be met and student must file an internship application with advisor.

SOC 497 Internship in Teaching Sociology (1-2) Provides majors of junior or senior standing with a comprehensive, supervised field experience in teaching and sociological pedagogy. Designed for students who are preparing for graduate study in the social sciences. GPA requirements must be met and students must file a teaching internship application with advisor. Prerequisites: Sociology major, sponsorship by the supervising faculty member, junior or senior standing, or permission of instructor. (1-2 credits).

Spanish (SPAN)

Spanish courses are taught by the faculty of the Department of Foreign Languages and Cultures. All courses are taught in the target language unless otherwise noted. Prerequisite: Completion of Spanish 312 for all 300-level courses or above.

SPAN 111 Elementary Spanish I (3) Emphasizes practice in speaking, listening, writing, reading, and cultural awareness.

SPAN 112 Elementary Spanish II (3) Emphasizes practice in speaking, listening, writing, reading, and cultural awareness.

SPAN 211 Intermediate Spanish I (3) Continues practice in speaking, listening, writing, reading and cultural awareness.

SPAN 212 Intermediate Spanish II (3) Continues practice in speaking, listening, writing, reading and cultural awareness.

SPAN 312 Conversation and Composition (3) Focuses on the process and development of effective writing skills and expression in Spanish. This course is a prerequisite for all 300/400-level Spanish courses. Prerequisite: SPAN-212.

SPAN 314 Business Spanish (3) This course provides specialized vocabulary, idiomatic expressions, communication patterns, and

common practices in Hispanic societies and settings in the world of business and commerce. This course is recommended for those who wish to apply their knowledge of Spanish in business careers. Taught in Spanish. Prerequisite: SPAN-312.

SPAN 317 Intro to Spanish-English Translation (3) This course will explore the basic principles of translation and interpretation, the theory, the methods, the challenges, the problems and the satisfaction involved in rendering both written texts and oral statements from Spanish into English and vice-versa without losing the basic ideas, the intent, the stylistic level, and the linguistic register. The emphasis is on general material taken from journals, newspapers, electronic media, government publications, pre-recorded audio and video speeches and dialogues, and live presentations with some consideration of specialized material from the fields of business, literature, medicine, agriculture, biodiversity and sustainability, political science, advertisement, law, information technology, and sports. Emphasis will be placed on translating from Spanish to English, with some consideration given to English-Spanish translation. Prerequisite: SPAN-312.

SPAN 320 Social Issues in Hispanic Society (3) Introduces specific social, ideological, and philosophical issues pertinent to the Hispanic world in Spain, Latin America, and United States. Prerequisite: SPAN-312.

SPAN 321 Introduction to Hispanic Literature (3) This course focuses on reading and analyzing texts by Hispanic (Spain and Spanish America) authors of various literary genres. Students study basic literary terms, concepts, methods, techniques, and movements to analyze and interpret literary texts. Students will develop aural, oral, reading, and writing skills, and deepen understanding of Hispanic culture and society. Taught in Spanish. Prerequisite: SPAN-312.

SPAN 325 Medical Spanish I (3) Focuses on medical terminology. The course introduces situational vocabulary, anatomical structures and their basic functions, and medical and clerical terms used in clinical settings. Especially recommended for students considering careers in healthcare, health services, public health, and teaching professions. Prerequisite: SPAN-312.

SPAN 330 Independent Study (1) Course content and credit hours determined in consultation with the instructor. Course may be repeated with content change. Prerequisite: Spanish 311 or permission of instructor. Department chair approval is required. Prerequisite: SPAN-312.

SPAN 333 Introduction to Hispanic Culture (3) Introduces the various Hispanic cultures found in Spain, Latin America, and United States. Prerequisite: SPAN-312.

SPAN 335 Foreign Lang Study Abroad (1) Foreign Language Study Abroad. Repeatable with content change. Prerequisite: SPAN-312.

SPAN 350 Medical Spanish II (3) This course covers medical terminology and focuses on concepts and practices to develop culturally responsive care by highlighting medical assessment and stressing aural/oral communication in clinical settings. This course includes Hispanic cultural elements and an introduction to medical interpretation to prepare students for potential careers in healthcare, health services, public health, and teaching professions. Taught in Spanish. Prerequisites: SPAN 312 and 325.

SPAN 410 Spanish Practical Phonetics: Pronunciation and Variation (3) Introduction to theory and practice of Spanish pronunciation, including dialectal and historical variation. Prerequisite: SPAN-312.

SPAN 411 Advanced Spanish Grammar (3) An advanced grammar course that will provide students with the background necessary for more advanced courses. The course will focus on continued mastery of the most difficult points of Spanish grammar. Prerequisite: SPAN 312 or permission of instructor.

SPAN 433 Hispanic Civilization (3) Studies history and culture of Spain and Latin America. Taught in Spanish. Prerequisite: SPAN-312.

SPAN 435 Foreign Lang Study Abroad (1) Foreign Language Study Abroad. Repeatable with content change. Prerequisite: SPAN-312.

SPAN 438 Spanish Seminar (3) Topics vary. Generally covers outstanding Hispanic authors and literary works. Course may be repeated with content change. Prerequisite: SPAN-312.

SPAN 450 Introduction to Spanish Linguistics (3) Studies the structure of the Spanish language as well as to the way in which language is used in different social situations by different speakers, and its dialectical, historical, social, and contact situations such as the situation of Spanish in the U.S. Prerequisite: SPAN-312.

SPAN 458 Introduction to Hispanic Pragmatics (3) Focuses on the way we convey meaning through communication. This meaning includes verbal and non-verbal elements and varies depending on the context, the relationship between people talking, and many other social factors. Explores the ways in which culture interrelates with and effects communication processes, and more specifically the dynamics that arise in social interactions in the Hispanic culture. Examines various elements related to pragmatics such as communicative acts, politeness, and the appropriate use of language in conducting speech acts such as apologizing, requesting, complimenting, refusing, and thanking in Spanish. Prerequisite: SPAN-312.

Statistics (STAT)

Statistics courses are taught by the faculty of the Department of Mathematics.

STAT 266 Introductory Statistics With R (3) This course serves as an introduction to the foundations and applications of statistics in the framework of the field of Data Science. Covering key aspects of data exploration, visualization, and traditional topics in statistical inference, this course is approached through a project-based curriculum using open data sources from various areas of application and the open-source statistical software program R. Prerequisite: MATH-221.

STAT 267 Experimental Design (3) The thoughtful design of an experiment provides the best chance of producing meaningful, defensible evidence to answer questions of interest. This course will cover the process of planning a well-designed experiment to collect appropriate data such that an analysis using standard statistical procedures results in valid and objective conclusions. Design methods will be applied and analyzed using a standard statistical software program, such as R. Prerequisite: STAT-266.

STAT 300 Data Analysis in the Real World (3) This course is designed to provide students an opportunity to apply data analytics in a real world context. Students will learn to conduct a complete data analytics project, including understanding the context; collecting, organizing, visualizing, and analyzing the data; and communicating the findings to the client. Analysis will be supported using statistical software, including R. Because its overarching goals align closely with the university's ChangeLab program, this course may be offered as a ChangeLab course. Because the topics (and thus the necessary statistical tools) will vary with each offering, this course may be repeated. Prerequisite: STAT-266.

STAT 361 Linear Models (3) Provides an in-depth look at linear regression models by considering both the theory of the linear model and the skills needed to conduct relevant analyses using the statistical software program R. Topics include estimation, inference, diagnostics, transformations, variable selection, ANOVA, and a brief introduction to Generalized Linear Models. Prerequisites: STAT-266, MATH-341.

STAT 362 Machine Learning (3) Introduces Machine Learning and its core models and algorithms by examining techniques in both supervised and unsupervised learning. Algorithms under consideration are regression, decision trees, neural networks, support vector machines, and clustering algorithms. Concepts and algorithms will be implemented using the statistical software program R. Prerequisite: STAT-266.

STAT 474 Techniques for Large Data Sets (3) This course treats methodologies and customized algorithms and tools for efficiently extracting, interpreting, and drawing inferences from very large datasets. It begins with an introduction of the Big Data problem and the limitations of applying standard statistical techniques to large datasets. It develops algorithms for Big Data analysis - including data compression, indexing, and summarization - and provides experience in using Big Data-specific tools such as Map-Reduce and Hadoop in conjunction with the general purpose statistical software program R. Corequisite: CS-440. Prerequisite: STAT-266.

STAT 493 Statistical Modeling (3) Encompasses the entire cycle of a data analysis project, including problem formulation, acquisition and cleaning of data, model selection, and fitting, parameter estimation, interpretation, and reporting. Draws on multiple data analytic techniques developed across an array of statistics courses to address real-world problems. Involves team projects and a seminar format. Corequisites: STAT-362, MATH-466. Prerequisite: STAT-361.

Teaching English as a Second Language (TESL)

TESL 200 Second Language Acquisition (3) TESL 200 introduces students to the field of second language acquisition (SLA), which is a discipline focused on how humans learn additional languages after they have learned their first; factors that contribute to the variability observed in rates and outcomes; and what it takes to attain advanced academic language and literary competencies in a language other than the mother language.

TESL 301 English Teaching Grammar ESL/EFL Student (2) TESL 301 will provide a thorough grounding in the grammar of English and a variety of approaches and techniques for teaching English grammar. It will present English as both a set of rules and as a communicative resources that should be explored critically and applied in a context-specific manner. This course is a critical study of aspects of Modern English grammar important for the teaching of English as a Second of Foreign Language. Students will gain an understanding of the major syntactic and semantic phenomena important for teaching ESL/EFL, become familiar with the practical and theoretical literature on teaching English grammar, participate in practical exercises of grammar correction in writing with actual ESL students, and develop and compile classroom activities for teaching points of grammar.

TESL 302 Assessment in ESL/EFL (2) Addresses linguistic, sociocultural, psychological, and educational factors that affect academic development of English as an additional language. Grounded in theoretical and practical aspects of teaching second language (L2) as an academic language to children, adolescents, and adults in diverse communities, students learn to implement effective instructional strategies for measuring attainment of L2 skills, students learn to design and conduct authentic assessments and to administer standardized assessments.

TESL 325 Developmental Linguistics (2) This course introduces students to the nature of language development in infancy and childhood. It also examines cognitive, developmental, environmental, and physiological influences on language skills. Theories of language development, and their influences on research and our understanding of children, will be discussed. Topics include perception of sounds, acquisition of grammar, first and second language learning, and developmental language disorders. The relationship between language skills

and overall development (social, cognitive, and biological) will also be explored.

TESL 326 Principles and Methods in TESL (2) This course provides a comprehensive overview of effective English-as-a-new-language techniques to the fundamentals of language acquisition. Designed for those who are either presently teaching or will be teaching English to international students, either in the United States or overseas. Prospective ENL teachers learn practical classroom applications and various teaching techniques. This course provides participants with guidelines for planning lessons involving specific techniques, activities for enhancing textbook exercises, and effective methods for correcting student errors.

TESL 328 Foundations of Dual Language Instruction History (2) This course provides a broad foundational basis for understanding the history and legal basis of bilingual education, dual language programs, and ESOL programs in the United States and in international contexts. Ethical, legal, historical, and linguistic aspects of second language education are explored.

TESL 417 Internship in English as a New Language (3) Opportunities to integrate basic skills and knowledge in selected applied practice situations. Includes a field experience with observations, assessments, lesson presentation and planning in an English-as-a-new-language setting. Prerequisites: TESL-200 or permission of instructor.

TESL 433 Supervised Teaching and Observation ESL (6) Teaching, observation, and participation activities under the supervision of a cooperating teacher and a University supervisor. A grade of C or better must be earned in student teaching to be recommended for a teaching license.

TESL 491 International Clinical Experience TESL (3) International internship placement provides opportunities to integrate basic skills and knowledge in selected applied practice situations. Includes an arranged international field experience with observations, assessments based on the CEFR standards, lesson presentation and planning in an English as a second language setting. Students will maintain a reflective journal, develop an evaluative portfolio of one student's work, use and evaluate multiple assessment instruments, and demonstrate application of the state professional and content standards. Prerequisites: TESL 325, 328, or permission of instructor.

Theatre (THTR)

Theatre courses are taught by the faculty of the Department of Theatre.

THTR 110 Introduction to Theatre (3) Acquaints students with the process of creating theatre and enhances their ability to enjoy and appreciate performances. Requires observations of some evening rehearsals and performances in addition to attendance at lectures. Fall, spring.

THTR 111 Fundamentals of Acting (3) Introduces fundamentals of acting through scene study and related exercises and explores the voice process during two consecutive semesters. Fall, spring.

THTR 112 Fundamentals of Acting (3) Introduces fundamentals of acting through scene study and related exercises and explores the voice process during two consecutive semesters. Fall, spring.

THTR 120 Production Techniques I (3) Introduces concepts and techniques in the areas of scenery construction, theatre space use and organization. Students become familiar with management and organization behind the scenes. Special emphasis on safety and health backstage. Fall.

THTR 125 Introduction to Makeup and Costumes (3) Introduces essential techniques for makeup application and costume construction and maintenance. Covers tools and principles of basic corrective

makeup and costume construction with practical application. Fall, spring.

THTR 130 Color and Design for Theatre (3) Acquaints students with the basic principles of design which govern all forms of visual expression. Provides students with the means to communicate in visual terms. Fall, spring.

THTR 135 Graphic Communication for the Theatre (3) (with lab) Prepares students for design courses by examining methods and procedures for developing effective communication and realization of visual concepts. Places equal emphasis on mechanical hand drafting, drawing, and sketching. Includes introduction to lighting graphics and model making. Spring.

THTR 160 Survey and Analysis of Dramatic Literature (3) Examines the forms and conventions of dramatic literature to help students improve their play reading and analysis skills. First half focuses on traditional Aristotelian forms of drama; second half concentrates on approaches to dramatic literature that deviate from that tradition. Fall.

THTR 171 Acting I: Process Awareness (3) Examines the fundamentals of the acting process through exercises and scene study. Students participate in exercises designed to strengthen such skills as trust, relaxation, imagination, concentration, ensemble, and observation. Prerequisite: Theatre majors only. Fall.

THTR 172 Acting II: Process Awareness (3) Explores the vocal and physical demands placed on an actor. Techniques are learned for finding physical neutrality and acquiring a basic knowledge of how the voice works. Addresses American Stage Standard and developing a personal vocal and physical regimen. Prerequisites: Theatre majors only; THTR 171. Spring.

THTR 190 Theatre Practicum (1) Introduces departmental procedures in all areas of theatre operation. Provides students with the knowledge of backstage safety, equipment, and methodology through formal presentation and hands-on experiences. Begins student involvement in practical participation in productions. May be repeated for a total of 2 credit hours. Fall, Spring.

THTR 220 Production Techniques II (3) Develops advanced theoretical and practical application of concepts begun in Theatre 120. Students investigate advance scenic construction techniques in carpentry, metalworking, and rigging. Spring (offered alternate even years).

THTR 221 Production Techniques III (3) Explores lighting and sound from a technical a traditional lighting and sound equipment and begins to explore how it is used in theatrical production. Prerequisite: THTR 120. Spring (offered alternate odd years).

THTR 225 Makeup (3) Refines the techniques of makeup introduced in Theatre 125. Provides a detailed study of the techniques for applying makeup emphasizing character and period research. Projects introduce prosthetics and the application of facial hair. Prerequisite: THTR 125. Spring.

THTR 226 Costume Construction (3) Investigates the fundamentals of costume construction introduced in Theatre 125. Topics include pattern drafting, draping, cutting, fitting, and advanced stitching. Practical projects introduce fabric identification. Prerequisite: THTR 125. Fall, spring.

THTR 245 Dance I (2) Develops the actor's physical movement and dance proficiency in a one-year studio. Fall, spring.

THTR 246 Dance I (2) Develops the actor's physical movement and dance proficiency in a one-year studio. Fall, spring.

THTR 271 Acting III: Character Study (3) Investigates the basics of character development through scene study, text analysis, vocal, and

physical exercises. Prerequisites: THTR 112 or 172; permission of instructor. Fall, spring.

THTR 272 Acting IV: Character Study (3) Investigates the basics of character development through scene study, text analysis, vocal, and physical exercises. Prerequisites: THTR 112 or 172; permission of instructor. Fall, spring.

THTR 290 Theatre Practicum (1) Through practical experiences, involves students in the areas of technical theatre, costume construction, and ticket office. May be repeated for a total of 2 credit hours. Prerequisite: THTR 120 or 190. Fall, spring.

THTR 291 Theatre Practicum for Stage Managers (1) Through practical experiences, involves students in the area of stage management. Prerequisite: THTR 190. Fall, spring.

THTR 331 CADD for Theatre I (3) Develops beginning-level techniques for using computer assisted drafting and design (CADD) for theatre. Emphasis on Vectorworks 2D drafting and theatre graphics. Prerequisites: THTR 120, 135. Spring (offered alternate even years).

THTR 332 CADD for Theatre II (3) Develops advanced level techniques using computer applications for a variety of purposes in the theatre. Emphasis on use of software such as Vectorworks 3D, Google Sketchup 3D, and Adobe Creative Suite to enhance skills for portfolios, presentations, and rendering. Prerequisite: THTR 130, 331. Spring (offered alternate odd years).

THTR 335 Scene Design (3) Examines the theory and practice of scenic design and manipulation of stage space. Special emphasis on the development of the "design concept" as related to all aspects of theatrical design. Prerequisites: THTR 120, 130, 135; or permission of instructor. Spring.

THTR 336 Lighting Design (3) Examines the theory and practice of lighting design. Emphasis on the role of the lighting designer as a creative member of a collaborative team. Students explore a variety of approaches to developing a successful lighting design. Prerequisites: THTR 120, 130, 135; or permission of instructor. Fall.

THTR 337 Costume Design (3) Examines theory and practice of costume design. Emphasis on development of design concepts and visualization and articulation of ideas. Investigates various approaches and techniques for creating the costume design. Prerequisites: THTR 125, 130, 135; or permission of instructor. Fall.

THTR 345 Dance II (2) Expands the actor's physical movement and dance proficiency in a one-year studio. Prerequisites: THTR 245, 246; or permission of instructor. Fall, spring.

THTR 346 Dance II (2) Expands the actor's physical movement and dance proficiency in a one-year studio. Prerequisites: THTR 245, 246; or permission of instructor. Fall, spring.

THTR 350 Stage Management (3) Examines current topics and trends in stage management and explores techniques in the field. Seminar-style class involves students in independent research projects with written and oral sharing of information. Prerequisites: THTR 120, 220 or 320. Spring (offered alternate odd years).

THTR 361 Theatre History I (3) Examines social, religious, political, and artistic forces that have contributed to the development of theatre in the West from its origin through the present. Culminates with a final project in which students choose a play or topic and research its social, religious, political, and artistic context. Should be taken in sequence. Prerequisites: THTR 110 or 160; junior or senior standing. Fall, spring.

THTR 362 Theatre History II (3) Examines social, religious, political, and artistic forces that have contributed to the development of theatre in the West from its origin through the present. Culminates

with a final project in which students choose a play or topic and research its social, religious, political, and artistic context. Should be taken in sequence. Prerequisites: THTR 110 or 160; junior or senior standing. Fall, spring.

THTR 363 Period Styles for the Theatre 1: Architecture and Decor (3) Connects cultural values with visual imagery representative of important historical periods through a survey of architecture, interior design, and decorative arts from the pre-historic to the modern eras. Emphasis on period research and its importance in the artistic process. Prerequisite: THTR 110 or 160. Fall (offered alternate odd years).

THTR 364 Period Styles for the Theatre 2: Costume History (3) Connects cultural values with visual imagery representative of important historical periods through a survey of fashion and clothing from the prehistoric to the modern eras. Emphasis on period research and its importance in the artistic process. Prerequisite: THTR 110 or 160. Spring (offered alternate even years).

THTR 365 Playwriting (3) Proceeds from basic scene and character development to the writing one-act plays. Prerequisite: THTR 110 or 160. Fall.

THTR 371 Acting V: Classical Texts (3) Prepares the student actor to perform scenes from classical dramatic literature, including Shakespeare, Sophocles, Ibsen, Chekhov, and others. Scenes specifically selected to develop physical, sensorial, vocal, and emotional skills. Prerequisites: THTR 271 or 272; permission of acting faculty. Fall, spring.

THTR 372 Acting VI: Classical Texts (3) Prepares the student actor to perform scenes from classical dramatic literature, including Shakespeare, Sophocles, Ibsen, Chekhov, and others. Scenes specifically selected to develop physical, sensorial, vocal, and emotional skills. Prerequisites: THTR 271 or 272; permission of acting faculty. Fall, spring.

THTR 375 Acting in Dialect (3) Presents an in-depth study of performing in dialect. Students gain the necessary knowledge and skill required to create appropriate and credible dialects needed for roles in the theatre. The course teaches students to develop a dialect through vowel and consonant changes, sound placement, and mastering the differences in inflection, rhythm, and tempo. Prerequisite: THTR 172 and junior or senior standing. Fall.

THTR 390 Theatre Practicum (1) Continues student involvement begun in Theatre 290 with practical experiences in various aspects of theatre production. May be repeated for a total of 2 credit hours. Prerequisites: THTR 120 or 190. Fall, spring.

THTR 391 Theatre Practicum for Stage Managers (1) Continues student involvement begun in Theatre 291 with practical experiences in stage management. May be repeated for a total of 2 credit hours. Prerequisite: THTR 291. Fall, spring.

THTR 395 Special Topics (1) (1-3 credits) Permits the study and/or practice of auxiliary topics not covered in the regular curriculum in a seminar format. Topics might include musical theatre, regional theatre, stage management, or advanced stagecraft. May be repeated for a maximum of six credits. Offered on demand.

THTR 400 Theatre Management (3) Examines the history, theory, and practice of theatre management and arts administration. Covers basic components of organization, operations, and general management practices. Prerequisite: Junior or senior standing. Spring (offered alternate odd years).

THTR 430 Advanced Design Projects (1) (1-3 credits) Provides design students an opportunity to explore concepts and skills on an advanced level through paper projects. Individualized course of

study is theoretical in nature and is developed in conjunction with a member of the faculty to satisfy each student's needs. Prerequisite: Permission of design faculty. May be repeated for a maximum of six hours. Fall, spring.

THTR 435 Senior Portfolios and Career Preparation (3) Prepares students to interview for opportunities in the professional theatre, graduate programs, and internships. Acquaints students with the nature of postgraduate training and career options. Prerequisites: Senior standing; permission of design faculty. Fall.

THTR 440 Director and Designer Collaboration Seminar (3) Explores the collaborative experience in design, through short-term and long-term projects. Focuses on the interaction of artistic teams and the creative process of conceptualizing a theatrical production. Prerequisite: Successful completion of one or more of the following: THTR 335, THTR 336, THTR 337, THTR 481. Fall (offered alternate even years).

THTR 450 Principles of Arts Management and Marketing (3) Overview of accounting procedures and budgeting for the theatre, in combination with an intensive study of audience development and marketing trends directly related to the efficient management and promotion of the arts. Prerequisite: Junior or senior standing. Spring (offered alternate even years).

THTR 465 Senior Seminar in Theatre (3) Encourages students to consider their own values and goals as they prepare to embark on a career in theatre. Emphasis on integration of independent research and creative practice through writing and presentations. Capstone general education requirement for theatre majors. To be taken in the senior year. Spring.

THTR 471 Acting VII: Audition Techniques (3) Prepares students to audition for opportunities in the professional theatre, graduate programs, and internships. Acquaints students with the nature of postgraduate training and career options. Prerequisite: THTR 372. Fall.

THTR 472 Acting VIII: Advanced Project (3) Provides students the opportunity to demonstrate research, analytical, artistic, and technical skills, culminating in a formal presentation. Prerequisite: THTR 372. Spring.

THTR 481 Directing I (3) Provides the beginning directing student with an initial experience in directorial analysis and the experience of mounting selected scenes in a proscenium, arena, and thrust environment. Focuses on principals of directing, interpretation, composition, the actor, and realization of a directorial concept. To be taken in the junior year. Fall, spring.

THTR 482 Directing II (3) Provides a limited number of advanced directing students with an opportunity to expand their directing skills with more complex scene choices. Intensive analysis is expected as well as production exercises which illustrate a student's ability to deal with the concept-to-realization process. To be taken in the senior year. Entrance by application. Fall, spring.

THTR 495 Independent Study (1-3 credits) Permits advanced creative and scholarly work in any area of the theatre arts. The specific plan of study for each individual is determined in consultation with the faculty. Areas of study may include directing, design, playwriting, dramaturgy, theatre history, and pedagogy. Prerequisite: Permission of instructor. May be repeated for a maximum of six hours. Fall, spring.

THTR 497 Production Problems (1-3 credits) Offers credit for significant technical projects undertaken. Individual student works with faculty supervision in conjunction with a specific production. Such areas as technical direction, stage management, costume construction, property construction, and dialect coaching may be included.

Prerequisite: Permission of instructor. May be repeated for a maximum of six hours. Fall, spring.

THTR 499 Internships in Theatre (3-12 credits) Provides advanced students with the opportunity to work or study in a commercial or regional theatre or with a professional training program while earning college credit. Program developed in conjunction with faculty. Prerequisites: Junior or senior standing; completion of core requirements in field of study; minimum GPA of 3.0; permission of department chair. Fall, spring, summer.

Writing (WRTG)

Writing courses are taught by the faculty of the Department of Creative Writing.

WRTG 104 Exposition (3) Focuses on writing skills, plus the larger elements of the expository essay: development of a central thesis, organization of material, and responsible use of supporting detail. Does not apply to Department of English major or minor requirements.

WRTG 204 Copy Editing (3) Introduces the profession of writing and publishing, focusing on craft fundamentals (grammar and mechanics), publishing and copy editing, resources for writers, literary analysis, and submission procedures.

WRTG 205 Introduction to Creative Writing (3) Introduces basic experience and techniques of description, characterization, poetry, and narration.

WRTG 206 Introduction to Poetry Writing (3) Teaches basic forms and structures of poetry. Concentrates on techniques as well as content. Prerequisite: WRTG 205 or permission of instructor.

WRTG 207 Introduction to Short Story Writing (3) Teaches elements of short story writing. Concentrates on plot construction with attention to character, dialogue, and setting. Prerequisite: WRTG 205 or permission of instructor.

WRTG 306 Short Story Writing (3) Teaches techniques for creating characters and turning experiences into short stories. Prerequisite: WRTG 207 or permission of instructor.

WRTG 307 Poetry Writing (3) Teaches techniques of great poets. Provides opportunity for students to write poems. Prerequisite: WRTG 206 or permission of instructor.

WRTG 308 Creative Nonfiction (3) Teaches the techniques of great essayists and creative nonfiction writers. Provides opportunity for students to write essays and creative nonfiction.

WRTG 309 Genre Fiction (3) Teaches tropes and techniques of selected genre fiction such as science fiction, fantasy, mystery, and horror. Provides opportunity for students to write short genre fiction.

WRTG 310 Editing and Publishing (1) Introduces students to the publication processes involved in producing a literary journal from start to finish.

WRTG 330 Special Topics in Writing (3) Topics vary and may include young-adult fiction, writing, advanced copy editing, literary translation, technical writing, form and theory of poetry, form and theory of fiction.

WRTG 390 Screenwriting (3) Teaches the techniques of screenwriting. Allows students to initiate their own screenplays. Prerequisite: WRTG 207 or permission of instructor.

WRTG 480 Senior Seminar in Creative Writing (3) Permits students to pursue an extended, independent writing project alongside close study of an element of craft or genre. To be taken senior year. Spring.

WRTG 490 Writing Workshop (3) Opportunity to write short stories, poems, essays, and plays with weekly discussion and criticism in

a small group. May be taken three times. Prerequisite: One course in creative writing at the 300 level or permission of instructor.

WRTG 494 Writing Internship (1-6 credits) Opportunity for on-site experience in various settings for writing experience.

WRTG 495 Creative Writing: Independent Study (1-9 credits) Opportunity for independent work on writing projects with criticism and assistance. May be taken three times.

Graduate Programs

The University of Evansville offers the following graduate programs: Master of Public Health (MPH), Master of Science in Athletic Training (MSAT), Master of Science (MS) in Leadership, Master of Science in Public Service Administration, Master of Science in Athletic Training (MSAT), Master of Science in Health Services Administration (MSHSA), Master of Physician Assistant Science (MPAS) and Doctor of Physical Therapy (DPT).

Admission

Applicants must have a bachelor's degree from a regionally accredited institution. Please refer to each graduate program for specific admission requirements. An application for admission must be filed before course registration is approved.

Special Students

Students holding baccalaureate or advanced degrees from regionally accredited institutions of higher education who do not intend to complete a program of study but who wish to take a graduate course for personal or professional enrichment must complete a special student application and receive special permission from the appropriate program director. A special student may earn no more than nine hours of graduate course credit. A special student application must be filed before course registration is approved.

International Students

The University of Evansville welcomes international students to its campus. International graduate students should submit an international student application, official transcripts of high school university degrees and diplomas, official English proficiency exams (IELTS or TOEFL), GRE/GMAT exams (where required), and proof of financial support. For English proficiency requirements or other international admission requirements by program, please contact: Office of International Admission, University of Evansville, 1800 Lincoln Avenue, Evansville, Indiana 47722 USA, 812-488-1392, international@evansville.edu or evansville.edu.

All students whose native language is not English must take the Michigan Test of English Language Proficiency in addition to the University's writing skills test as a part of registration for their first term. Placement in appropriate English language credit courses will be made to provide students with the skills necessary to demonstrate English proficiency.

Academic Regulations

Graduate Courses

Courses numbered at the 500 and 600 level may be taken for graduate credit.

Academic Load

A full-time load for a graduate student is nine hours. The normal load should not exceed 12 hours, unless otherwise required by the program.

Grades

Courses taken more than six years prior to the completion of the degree will be assessed by the appropriate program director to determine applicability to the student's degree requirements.

An overall grade point average of 3.0 on all graduate course work

must be attained before a graduate degree is awarded. All graduate work is counted and none of it may be omitted in computing the overall grade point average. No more than nine hours of C grades are permissible, unless otherwise specified in the degree program. Courses in which a grade of D is earned do not apply to the requirements for the degree (unless otherwise specified in the degree program) but do count in the calculation of the overall grade point average. A grade of incomplete (I) must be removed within one calendar year after the end of the semester in which the I is assigned. After one year, all remaining incompletes are changed to F.

Credit from Other Institutions

The University of Evansville evaluates and may accept credit earned at other regionally accredited educational institutions. A minimum grade of B is required for transfer credit. No more than nine semester hours of graduate credit may be transferred. Students must have written approval on a transfer credit request form signed by the program director and the registrar.

Graduation

Upon the recommendation of the faculty and the approval of the Board of Trustees, the University of Evansville confers its academic degrees. Only those candidates who have fulfilled all scholastic requirements for a degree and who have met their financial obligations to the University will be recommended for a degree.

Degree Application

A candidate for a degree must file an application for the degree in the Office of the Registrar two semesters prior to the intended date of graduation. It is the student's responsibility to ensure that all graduation requirements are met. The University is responsible for including on the list of graduates only those students who have submitted the application for degree and have met all academic requirements and all financial obligations.

Center for Adult Education
Master of Science in Leadership

Program Director: Lindsay Roberts

The two-year hybrid program will assist working professionals in their acquisition of the skillsets and mindsets necessary to lead in a variety of settings. Through a rich curriculum and set of program experiences, students will learn ways to provide innovative thinking and visionary leadership to take their organizations to the next level. Graduates of the program will emerge with the knowledge and confidence to thrive in today's dynamic environments and be prepared for tomorrow's opportunities and challenges.

The Master of Science in Leadership Degree is a 36-credit-hour program that integrates a core leadership curriculum with concentration areas focusing on higher education, non-profit leadership and public health.

The public health concentration will educate and train students to apply the leadership knowledge and skills acquired in the core of the program to the challenges facing public health and health care providers in the local community and society at large.

The non-profit concentration will give students the necessary skills to grow in leadership and management positions. From learning about management styles, new media platforms, fundraising techniques, and innovation strategies, students will be uniquely prepared for the complex challenges and opportunities facing non-profit organizations and the communities where they are located.

The higher education concentration will build upon the knowledge obtained in the core of the program to the issues and trends facing those in various roles in higher education. This will prepare those in administrative and leadership roles with the foundation necessary for professional growth in the educational setting.

Cohorts will meet on UE's campus twice per six week course on Saturday with the remainder of the program delivered in an online format.

Admission to the Program Requires the Following:

- Must have a Bachelor's degree from an accredited university
- Official transcripts, completed application, and resume.
- Three years of experience or substantial leadership experience.
- Undergraduate cumulative GPA of 3.0 or MAT or GRE scores
- Two letters of reference
- Essay

Masters of Science

Master of Science in Leadership

2018-2019 | 36 Hours Required

Major Requirements (36 hrs)

Leadership Core

LDR 505 - Leadership Theory

LDR 508 - Communicating across Organizations

LDR 512 - Organizational Behavior

LDR 590 - Decision Making

LDR 543 - Strategic Planning and Implementation

LDR 528 - Finance

LDR 525 - Design Thinking for Organizational Change

LDR 530 - Cultural Competence and Leadership

LDR 599 - Capstone

Complete One Concentration:

Higher Education

LDR 552 - Policy and Historical Trends in Higher Education

LDR 550 - Critical Issues in Higher Education

LDR 554 - Legal Aspects of Higher Education

Non-Profit

LDR 540 - Non-Profit Fundraising and Practice

LDR 541 - Managing Non-Profit Organizations

LDR 542 - Change & Innovation in Non-Profit Organizations

Public Health

PH 543 - Population-based Health

PH 542 - Health Systems and Policy

PH 580 - Programs, Problems and Policies in Public Health

Center for Adult Education

Master of Science, Public Service Administration

Program Director: Lindsay Roberts

The public service administration program is designed for anyone in a field where service to the public is a core value. The Master of Science (MS) degree is useful in various career areas found in private sector companies and nonprofit organizations.

Application Requirements

Applicants must have a bachelor's degree from a regionally accredited institution and at least three years of work experience. The following documents are required for admission:

- Official transcripts from all educational institutions attended
- Completed application
- Résumé showing a minimum of three to five years of work experience
- GRE or Miller Analogies Test scores for students with an overall undergraduate GPA of less than 3.0
- Two letters of recommendation

Send documentation to: Center for Adult Education, University of Evansville, 1800 Lincoln Avenue, Evansville, Indiana 47722. Call 812-488-2981 for program details or log on to www.evansville.edu/adult-education.

Curriculum and Academic Requirements

The curriculum is based on four core areas of study. Students are expected to develop a foundation in leadership, increase their understanding of market factors, apply appropriate management strategies, and increase professional skills through successful completion of the four blocks of study: foundation, market factors, management, and professional skills..

The student should expect to devote at least 24 hours each week to out-of-classroom preparation and study.

Block Semester Plan

Each required course is offered in a five-week format. Three courses are taken each semester consecutively for four semesters. All classes meet on Tuesday evenings. Each newly admitted student will be provided with a calendar for semester of classes at the beginning of the semester.

Masters of Science

PUBLIC SERVICE ADMINISTRATION

2018-2019 | 36 Hours Required

PSA 590 Decision Making (3 hrs)

College of Education and Health Sciences

Doctor of Physical Therapy

Faculty: Huebner, Keisel (Chair), Lockwich, Liang, Matsel, Pitt, Plisky, Schwartzkopf-Phifer, Whetstone

The University of Evansville offers a professional entry-level Doctor of Physical Therapy (DPT) degree, which is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The curriculum involves three or four years of prerequisite and undergraduate course work followed by three years (nine semesters including summers) of professional study. The physical therapy faculty has designed a curriculum that reflects contemporary professional education and clinical practice modeling professional excellence. A strong liberal arts and sciences background, a diverse undergraduate experience, and innovative professional classroom and clinical course work define the DPT program at UE. Through classroom and clinical experiences, students acquire the requisite critical thinking and problem solving skills necessary to deliver quality patient care based on current best evidence. Students interested in the Doctor of Physical Therapy program follow normal University admission procedures.

Fees and Assistance

In addition to regular University costs, certain additional expenses are incurred by physical therapy students. These include uniforms, laboratory fees, summer tuition, and costs associated with clinical courses (travel and housing, criminal background checks, CPR certification, etc.). Students should consult with the Office of Financial Aid for information about financial assistance. Additional scholarships may be available through health care facilities and professional organizations.

Course Work and Clinical Facilities

All of the physical therapy didactic course work is taught at the Stone Family Center for Health Sciences. Throughout the physical therapy professional curriculum, students are exposed to integrated clinical activities at local off-campus health care facilities. Students admitted to the Doctor of Physical Therapy program begin professional course work in the summer after their third year (3+3 track) or fourth year (4+3 track). Students on the 3+3 track complete all remaining undergraduate degree requirements during the fourth year and graduate with a bachelor's degree in May of their senior year. The students' fifth and sixth years are devoted to DPT courses. Students on the 4+3 track will enroll in professional DPT course work in years 5, 6, and 7. A bachelor's degree must be completed prior to enrolling in Physical Therapy 661, Clinical I.

Students complete full-time clinical courses during the summer sessions of the professional program. Two clinical courses are completed during the spring semester of the final year. Various clinical facilities are utilized in the educational preparation of students. The Department of Physical Therapy affiliates with local, regional, and national health care facilities to provide a diverse range of quality clinical education experiences. While the Evansville community provides a number of clinical opportunities, including initial observational and more advanced direct patient care experiences, students should anticipate the personal and financial impact associated with transportation and accommodation outside the Evansville area for the majority of their full-time clinical course work. International clinical course placements for final-level DPT students may be available.

Prerequisite courses must be successfully completed prior to beginning the professional program. All science courses must be designed for science majors. Other designs will not be accepted.

Prerequisite courses taken by University of Evansville students

Biology 107*[†]; Chemistry 118*[†], 240*; Exercise and Sport Science 112*, 113*; Mathematics 105*^{†‡} (or demonstrated proficiency); Physical Therapy 100; Physics 121*[†], 122*; Psychology 121[†]

Application Calendar, Application Materials, Admission Criteria

Enrollment in the University does not necessarily guarantee enrollment in the DPT program. Application calendar, application materials, and admission criteria are available on the web at pt.evansville.edu.

Admission criteria are subject to change. The Department of Physical Therapy reserves the right to make final decisions concerning all admission criteria.

Doctor of Physical Therapy Curriculum

Once accepted into the DPT program, students will be responsible for following programmatic guidelines and progression policies as outlined in the DPT student handbook, which is available at pt.evansville.edu.

Program Progression

The physical therapy faculty makes decisions regarding a student's progression through the professional program. It is the responsibility of the student to complete each course successfully and to demonstrate appropriate professional behavior in all situations in order to progress through the professional program. Successful completion is defined as the ability to demonstrate competence in course content. Criteria for successful completion of each course are conveyed to the student via the course syllabus. Failure to successfully complete a professional course will result in delayed progression or dismissal from the professional program.

Each course instructor determines the means for achieving competence in the professional course work he or she teaches. These criteria are articulated in the course syllabus that is provided to the student in written or electronic form. Every student is responsible for reviewing these criteria including the methods of evaluation and grading criteria.

Grading Scale and Minimum Passing Grades for Doctor of Physical Therapy Program

The minimum passing grade for each course in the curriculum is a C.

For the post-baccalaureate semesters 4-9, students may earn no more than 10 semester hours of course work with grades of C+ or lower. If an 11th semester hour with a grade of C+ is earned, progression through the program will be delayed and the student will be placed on an individual program of remediation that will allow repetition of up to 2 courses. If an additional grade of C+ (or lower) is earned, the student will be dismissed from the program. All graduate work is counted and none of it may be omitted in computing the overall grade point average. All graduate work is counted and none of it may be omitted in computing the overall grade point average.

College of Education and Health Sciences
Master of Science in Athletic Training

Program Director: Kathy Liu

The certified athletic trainer (ATC) is a highly educated and skilled allied health professional. In cooperation with physicians and other allied health personnel, the ATC functions as an integral member of the health care team for the physically active. Traditionally, secondary schools, colleges and universities, sports medicine clinics, orthopaedic surgeon offices, industrial settings, and professional sports teams have employed certified athletic trainers.

The Master of Science in Athletic Training major is designed for those individuals who seek certification as an athletic trainer for the Board of Certification (BOC) and have an undergraduate degree with the necessary prerequisites. The Commission on Accreditation of Athletic Training Education (CAATE) is the accrediting body for athletic training education programs. The University of Evansville's MSAT program is competitive, and a set number of students are allowed entry per year.

The master's degree program prepares the athletic training student for challenges that will be encountered as an allied health professional. Clinical experiences include NCAA DI and DII athletics, professional sports, high school athletics, non-athletic populations, and general medical rotations.

Admission:

Completed bachelor's degree and admission to UE with the following required course equivalents: Human Anatomy and Physiology with Lab (Exercise and Sport Science 112 and 113)

Recommended course equivalents:

- Introduction to Psychology Biomechanics
- Exercise Physiology Nutrition
- Medical Terminology

Other requirements:

- Grade of C or better in required pre-requisite courses (all pre-requisites must have been completed within the last 5 years prior to application).
- Scores for the Graduate Record Examination (GRE) if undergraduate cumulative GPA is below 3.0.
- Official transcripts showing completion of undergraduate degree or official transcripts showing ability to complete undergraduate degree at the University of Evansville prior to enrollment in AT 691 (second year of program).*
- Submission of Master of Science in Athletic Training Program Application.
- Interview (phone or in-person).
- Completed Technical Standards Form.
- Physical examination.
- Proof of immunizations required by UE and Hepatitis-B vaccination.
- Current Emergency Response & CPR for Professional Rescuer Certification. Background Screen.
- Two letters of recommendation.

Recommended:

- Observational experience documented by a Certified Athletic Trainer.

Master of Science in Health Services Administration

Program Director: Bill Stroube

The University of Evansville's Master of Science in Health Services Administration (MSHSA) is designed for those who want to assume management positions in public and private health service organizations. The multidisciplinary approach to the program is enhanced by adjunct faculty from the business community and health care organizations in addition to University of Evansville full-time faculty.

The student's area of undergraduate study, past work experience, and future career goals provide direction for the selection of elective courses and learning activities. Health agency field experience, supervised by faculty and agency preceptors, may be required or encouraged based upon learning needs and past experiences. A health services administration graduate-level study abroad experience is offered most summers at Harlaxton College in England or at other sites.

The health services administration graduate program is designed to suit the schedules of both students who hold full-time jobs and wish to further their education on a part-time basis and students interested in full-time study.

Application Requirement

- Bachelor's degree from a regionally accredited college or university; a degree in health-related profession or business is preferred but other undergraduate degrees will be considered
- Scores for the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT)
- Two references from the applicant's work environment or undergraduate faculty
- A personal interview with the health services administration program director
- Requirements (114 hours)

*Exact course requirements may vary depending upon the individual's background.

College of Education and Health Sciences
Master of Physician Assistant Science

Program Director: Michael Roscoe

Physician Assistants (PA) are nationally certified and state-licensed health care professionals who provide direct patient care and work as part of a physician-led team in delivering a broad range of diagnostic, therapeutic, preventive, and health maintenance services. They work in diverse medical and surgical specialties including family and internal medicine, emergency care, pediatrics, obstetrics and gynecology, general surgery and sub-surgical specialties, and mental and behavioral health care. PAs work in a wide variety of settings including hospitals, clinics, physicians' offices, and other health care facilities. For more information about the profession, visit www.aapa.org.

Entry into the PA Program is based on both quantitative and qualitative variables. There are two admission pathways into the PA Program. Students on both pathways must meet the same minimum entrance requirements. Students on the B/PA pathway (Pathway 1) must meet additional requirements throughout their undergraduate experience at UE to maintain their status.

Application calendar and prerequisite, application and acceptance requirements are available on the PA program's website: <https://www.evansville.edu/majors/physicianassistant/admission.cfm>

Admission criteria are subject to change. The PA program reserves the right to make final decisions regarding all admission criteria.

Upon entry into the PA program, students will be responsible for following programmatic guidelines and progression policies as outlined in the PA Student Handbook, which is available on the PA website <https://www.evansville.edu/majors/physicianassistant/handbook.cfm>

Master of Public Health

Program Director: Payal Patel-Dovlatbadi

The University of Evansville's Master of Public Health with an emphasis in health policy is a great opportunity for those who want further study in public health policy. Students may enroll on either a full-time or part-time basis, with a full-time student taking two years to complete the program.

The program provides a unified approach to policy. It is built on the recognition that issues of health policy cannot be divorced from principles of sound management, nor can health care management or policy be developed without a fundamental understanding of morbidity, mortality, and epidemiologic methods. Further, the program recognizes that leaders cannot make successful decisions about the delivery of health care nor solve the health problems affecting society over the next decades without extensive analytic and decision-making skills. Students need to be able to translate sound scientific evidence into effective health policy. The program emphasizes training in quantitative methods, economics, epidemiology, and evaluative methods for policy and management. Social and behavioral sciences are integral parts of many courses throughout the two-year curriculum.

Application Requirement

- Bachelor's degree from a regionally accredited college or university;
- Scores for the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT)
- Three references from the applicant's work environment or undergraduate faculty
- A statement of purpose

**Master of

Graduate Course Descriptions

Athletic Training (AT)

AT 521 Advanced Applied Human Anatomy (2) This course is designed for graduate students who need to study human anatomy in a more detailed format. Emphasis is placed on the gross anatomy of the human skeleton, muscular, nervous and circulatory systems using previously dissected cadavers. Students will explore, in greater detail, specific areas related to orthopedic clinical evaluation (ankle, knee, hip, wrist, elbow, shoulder). Additionally, students will complete a teaching component based on instructor assignment of a body area.

AT 551 Psych Interventns Athletic Health Care (3) This course will provide an overview of the rapidly developing field of sport psychology. A wide range of topics in sport and exercise psychology will be reviewed, including anxiety & performance, overtraining & staleness, psychometric characteristics of sport participants, and other psychological factors that may affect sport performance. Although the major interest of American sport psychology involves applications intended to enhance athletic performance, this course will also cover topics of exercise and mental health as well.

AT 575 Adv Nutritional Issues Athletic Training (3) In this course, students will gain knowledge about nutritional needs of athletes and nutrition-related issues which may arise in working with athletes. This study of the science of sport nutrition includes normal nutritional needs; needs for weight gain, loss, and maintenance; effect of diet on performance, training, and recovery; disordered eating, energy requirements and exercise metabolism

AT 580 Evidence-Based Inquiry (3) Theory and practice of evidence-based sports medicine for both clinical and research environments, with emphasis on understanding the results of health care interventions and practices for patients and research subjects. This course will introduce the student to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies for acute and chronic conditions. Intended for graduate athletic training majors.

AT 582 Foundational Skills in Athletic Training (3) This course addresses a variety of topics in order to develop the student's competence as an athletic trainer. Emphasis is placed upon skills such as construction and application of protective devices, taping and bandaging techniques, on-field assessment techniques, and emergency care. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 587 Advanced Therapeutic Modalities (3) This course addresses the principles, indications, contra-indications, physiological effects, safety procedures and application of therapeutic modalities for the treatment of athletic injuries, with particular emphasis on evidence-based practice and integration with modality selection. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 588 Evaluation of Lower Extremity (3) This course addresses the principles, techniques, and theories behind athletic injuries and their assessment from the waist down. The student will be able to assess an injury and determine which special tests to use in order to come to a conclusion about what has occurred to the athlete and what needs to be done in a timely manner. Also, a thorough knowledge of bony landmarks, dermatomes, and myotomes is covered which will aid the athletic training student in injury assessment. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 589 Evaluation of Upper Extremity (3) This course addresses the principles, techniques, and theories behind athletic injuries and their assessment from the head to waist. It also presents a thorough coverage of bony landmarks, dermatomes, and myotomes which will aid the student in injury assessment. Students will learn to assess an injury and determine which special tests to use in order to come to a conclusion about what has occurred to the athlete. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 591 Graduate Clinical Education I (2) This course is one of a series of four clinical education courses designed to provide proficiency instruction and clinical experience in the field of Athletic Training. The emphasis in this course is basic taping and bandaging techniques, emergency procedures and on field assessment. The field experience portion will include local high school football coverage and other field experience as assigned. The athletic training student will work toward completion of the proficiency check-off sheet. This class will meet formally at the discretion of the instructor outside of the clinical setting to ensure adequate progress is being made toward completion of the respective clinical proficiencies. Total clinical hours will be a result of 2 clinical rotations with an area high school to provide an adequate equipment intensive rotation as well as a general medical rotation at Deaconess Family Medicine Residency. Hour totals for AT 591 will be dependent upon successful completion of proficiencies designated for this class with a minimum of 90 clinical hours. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 592 Graduate Clinical Education II (2) This course is one of a series of four clinical education courses designed to provide proficiency instruction and clinical experience in the field of Athletic Training. The emphasis in the course is the clinical application of therapeutic modalities. The field experience will include sport rotations with emphasis on the application of modalities. The student will work towards completion of a proficiency check -off sheet. Class meets for 1 hour per week outside the clinical setting. Total clinical hours will be a result of 3 clinical rotations with the University of Evansville's athletic department. Hour totals for AT 592 will be dependent upon successful completion of proficiencies designated for this class with a minimum of 90 clinical hours total. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 650 Administration of Athletic Training (3) This course is designed to familiarize students with the administration and management responsibilities of athletic training. Topics of study include management of athletic training facilities, personnel, students, facility design, purchasing of supplies and equipment, and budgeting. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 688 Advanced Rehab Athletic Injuries (3) This course is designed to prepare the student athletic trainer to plan, implement, document and evaluate the efficacy of therapeutic exercise programs for the rehabilitation and reconditioning of the injuries and illness of athletes and others involved in physical activity. It will include mobilization and taping techniques commonly used to facilitate the rehabilitation process. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 690 Gen Medical & Pharmacology Athl Hlth Care (3) Offers insight on current trends in pharmacology use in an athletic training

environment. Also offers current evaluation of general medical conditions, treatment, and referral base for conditions found in athletics. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 691 Graduate Clinical Educ III (3) This course is one of a series of four clinical education courses designed to provide clinical experience in the field of Athletic Training. Each course has a specific area of emphasis to ensure a diverse experience and provide an opportunity to become proficient in required skills within Athletic Training. The emphasis in this course is rehabilitation. The field experience will be assigned per the clinical instruction plan. The student will work toward completion of the proficiency check-off sheet. This class will meet formally at the discretion of the instructor at least one hour per week, outside of the clinical setting, to ensure adequate progress toward completion of the respective clinical proficiencies. Total clinical hours will be a result of 1 clinical rotation with the University of Evansville's athletic department and with ProRehab PC. Hour totals for AT 691 will be dependent upon successful completion of proficiencies designated for this class with a minimum of 90 clinical hours total. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 692 Graduate Clinical Education IV (2) This course is one of a series of four clinical education courses designed to provide clinical experience in the field of Athletic Training. Each course has a specific area of emphasis to ensure a diverse experience and provide an opportunity to become proficient in required skills within Athletic Training. The emphasis in this course is the evaluation of athletic injuries and illness. Clinical time will be spent with a college athletic trainer working primarily in a traditional college athletic training room setting. The athletic training student will work toward completion of the proficiency check-off sheet. This class will meet formally at the discretion of the instructor outside of the clinical setting to ensure adequate progress is being made by the student toward completion of the respective clinical proficiencies. Field experience assignment will be made and student performance assessed by the clinical instructor. Total clinical hours will be a result of 2 clinical rotations with the University of Evansville's athletic department. Hour totals for AT 692 will be dependent upon successful completion of proficiencies designated for this class with a minimum of 90 clinical hours total. This course is designed to satisfy CAATE competences related to the above mentioned content areas and is intended for graduate athletic training majors.

AT 693 Professional Issues in Athletic Training (1) As a capstone class to the program, this course will place an emphasis on preparation for the BOC exam and professional development issues related to athletic training. These topics include incorporating evidence-based medicine into clinical practice, patient-oriented outcomes in athletic health care, creating a professional presence in athletic training (resume development, networking, and job search tactics), and professionalism/professional ethics.

AT 699 Directed Evidence-Based Inquiry (3) Students will develop a critically appraised clinical topic and evaluate evidence related to its clinical efficacy. A faculty mentor will be assigned to the student who will act in a supervisory role during the research project.

Health Services Administration (HSA)

Enrollment is limited to students admitted to the health services administration master's degree program.

HSA 505 Health Care Systems: Issues and Trends (3) Overview of the health care system. Reviews the history and current status of

various segments of health care. Includes analysis of the impact of socioeconomic and political factors, as well as current health care issues and trends.

HSA 506 Jurisprudence and Ethics in Health Care (3) Emphasizes legal and ethical processes and their application to the health care organization, administrator, staff, employees, and patients. Includes ethical dimensions of the decision-making process and current ethical issues in health care.

HSA 507 Health Care Research and Design (3) Examines research principles and methods as they contribute to health care organizations and the delivery system. Provides experience in developing a research proposal and formal critique of research literature.

HSA 512 Health Service Organizational Behavior (3) Uses various organizational, managerial, and behavioral theories, concepts, and principles to analyze, diagnose, predict, and guide human behavior within health care organizations. Emphasis on motivation, leadership, change, communication, personality, group dynamics, decision making, and organizational development. Stresses the importance of understanding professional roles within health care organizations.

HSA 514 Health Care Management Theory and Human Resources (3) Includes the study of management theory and practice as applied by managers of health services. Emphasizes analysis of the manager's role, interactions with people, the organization, and the environment. Special emphasis on human resource issues.

HSA 516 Health Care Information Systems (3) Provides an understanding of the concepts and applications of information systems used in the management of health care systems.

HSA 520 Health Care Planning and Marketing (3) Integrates long-range goal planning with dimensions of marketing for health care services. Concepts, techniques, and theories used in the planning and management of marketing in the health care industry.

HSA 524 Health Problems in Health Care (3) A study of health promotion, specific diseases, and health problems throughout the life cycle. Includes communicable and chronic diseases and conditions that affect the individual, the family, and the community. Explores role of health care system in dealing with these problems through prevention and treatment.

HSA 528 Financial Management of Health Care Organizations (3) Focuses on the acquisition, allocation, and management control of financial resources within health care organizations. Includes cost analysis, financial position analysis and strategies, reimbursement, pricing policies, budgeting, capital expenditure, analysis of financial reports, and informal and external controls.

HSA 529 Health Services Field Experience (1) Provides field experience within a selected health care organization with the supervision of an agency preceptor and faculty member. Design of course dependent upon the individual student's past and present work experiences in health care organizations as well as future goals. Prerequisite: Permission of the instructor.

HSA 532 Managed Health Care (3) Examines the changing role of managed care organizations in the health care system. Discusses the history, basic structure of managed care firms, the interrelationships among providers, and their evolving role. Their impact on health care economics discussed in detail.

HSA 567 Statistics for Appraisal and Evaluation (3) Focuses on the analysis of data common to health care. Includes data description, elements of probability, distribution of random variables, estimation and confidence intervals, binomial and normal distributions, hypothesis testing, contingency tables, regression analysis, and ANOVA.

HSA 590 Decision Making in Health Care (3) Examines decision making in health services administration by extensive use of case studies. Material from other HSA courses integrated into the study of decisions facing all types of health care organizations.

HSA 595 Independent Study (1) Independent research in health care management conducted under faculty supervision. Prerequisite: Permission of the instructor.

HSA 598 Internship in Health Care Management (1) Structured assignment which allows student to gain practical experience in a health care management position related to an area of career interest. Student is directed by the internship director and supervised by a member of the cooperating organization. Prerequisite: Permission of the health services administration program director.

HSA 599 Special Topics in Health Services Administration (1) Lectures and discussion of topics not covered in regular course offerings. Provides greater depth to topics of special interest or explores rapidly changing areas in health services administration.

Leadership (LDR)

LDR 505 Leadership Theory (3) This course examines leadership theory, concepts, and practice. Students will identify leaders and leadership styles and apply the knowledge to better understand and positively affect their organization, business, or institution. Self-reflection will be a focus of the class as students evaluate their leadership styles and practices to identify areas of growth and personal development.

LDR 506 Ethics and Jurisprudence (3) Emphasizes ethical processes and their application to leadership. Included are ethical dimensions of the decision-making process and current ethical issues. Examines the relationship between legal and ethical issues.

LDR 508 Communication Across Organizations (3) This course will examine and analyze communication theories in organizations. The student will study the principles of communication effectively used in high-functioning teams. The course will allow students to look at problems in communication and how it can effectively create change across an organization of any size.

LDR 512 Organizational Behavior (3) Uses various organizational, managerial, and behavioral theories, concepts, and principles in analyzing, diagnosing, predicting, and guiding human behavior within organizations committed to public service. Emphasizes motivation, leadership, change, communication, personality, group dynamics, and organization development.

LDR 525 Design Thinking for Organization Change (3) This course will explore the concepts of systems thinking and design thinking and apply them to complex problems facing organizations of all types. Knowledge and skills are developed in holistic systems analysis, empathy, problem-definition, ideation, rapid-prototyping, and experimentation to foster innovation. Students will utilize collaborative, cross-disciplinary approaches to tackle multi-faceted problems and develop innovative solutions.

LDR 528 Finance (3) Focuses on the acquisition, allocation, and management control of financial resources within organizations. Includes cost analysis, financial position analysis and strategies, reimbursement, pricing policies, budgeting, capital expenditure, analysis of financial reports, and informal and external controls. Emphasizes financial terminology and organization of financial statements. Requires analytical approach to ratio analysis and organization diagnostics.

LDR 530 Cultural Competence & Leadership (3) This course examines the competencies needed to thrive as a culturally responsive leader, while fostering growth within a diverse organization. Course participants will learn to recognize personal and institutional biases

associated with discrimination and acquire the knowledge and the skillset needed to lead cross-culturally.

LDR 540 Non-Profit Fundraising & Practice (3) This course is designed for current or aspirant managers, staff, and volunteers in the non-profit sector who want to become familiar with the fundamentals of fundraising. We will look at philanthropy on a global scale and within the United States. Key areas that will be covered are funding sources; motivations for giving; methods of giving; types of funding; and developing relationships.

LDR 541 Managing Non-Profit Organizations (3) This course will help students understand the important role non-profits play in the United States and the impact they have on communities. We will discuss the strengths, weaknesses, opportunities and threats for non-profits and their leaders. Key areas such as a mission statement, strategic planning, boards, volunteers, and careers in non-profit organizations will be covered.

LDR 542 Change & Innovation in Non-Profit Organizations (3) This course is designed for students who are interested in learning about innovation in a world that is steeped in history. While the non-profit world tends to change slowly, recent innovations are forcing change quickly. In this course we will discuss the major theories of change; the differences between personal change and organizational change; the impact of organizational change on leaders; and innovations in the world of non-profits.

LDR 543 Strategic Planning & Execution (3) This course examines the strategic dimensions of leadership. Topics include establishing a vision, strategic planning, and implementation of strategic initiatives. Students will examine strategic issues and apply their knowledge to positively affect their organization, business, or institution.

LDR 544 Non-Profit & Social Media (3) Social Media is an ever-changing field and non-profits are embracing the media platforms for various reasons. From telling your story through blogging, crowd funding, branding your non-profit, ensuring privacy, and creating apps; this class will maneuver the vast world of social media. We will use various platforms and speakers to discuss the tools of the trade and how non-profit organizations can best benefit from them.

LDR 550 Critical Issues in Higher Education (3) This course will explore the academic, political, legal, governmental, financial, and other influencers that higher education leaders are forced to consider as they lead their institutions into the future. This course will build upon the content from the Policy and Historical Trends in Higher Education course, as well as the core leadership courses.

LDR 551 Student Services Support (3) This course focuses on the theoretical basis and best practices in student services in higher education with particular emphasis on financial aid, retention, recruitment, student activities, support services and residence life. Students will develop an understanding of the changing demographics and characteristics of college students in relation to academic, social, and physical needs.

LDR 552 Policy & Historical Trends in Higher Ed (3) This course is designed to help you think about colleges and universities and the historical and social forces that have affected their development (including policy decision) in the United States. Formal education, including post-secondary education, has been integral to the social and economic development of the American free enterprise system. The aim of the course is to provide a sound framework for using historical analysis to interpret problems, shape policy, and develop sound decision making.

LDR 554 Legal Aspects of Higher Education (3) This course investigates the legislation and litigation which forms the basis of education at the national, state, and local levels. Students will examine historical

and current cases rendered by federal and state courts concerning procedural and substantive due process, civil rights, special populations, parent and student rights, and contractual legalities to help professionals have a sound knowledge of the pertinent legal landscape for leadership and decision making.

LDR 560 Health Systems & Policy (3) The aim of this course is to provide students with an overview of the U.S. health care system, its components, and the policy challenges created by its organization. The course will focus on the major health policy institutions and important issues that cut across institutions, including private insurers and the federal/state financing programs. Attention will also be given to disparities in access to care, the role of pharmaceuticals in health care and the pricing and regulation of the pharmaceutical industry, the quality of care, the challenges of long-term care, and the aging of the population, and the drivers of cost growth. Spring.

LDR 570 Population-Based Health (3) This course presents selected information, concepts, and methods from the field of public health. Topics concerning the history, organization, financing, and services of the public health system are discussed. All topics are presented from a population-based perspective. Summer.

LDR 580 Programs, Problems, & Policies (3) This course examines the myriad of programs and policies in public health via a developmental approach to learning about health problems. The course will cover a variety of topics, including state programs and policies, maternal and infant health, program planning, research, monitoring, and advocacy. Spring.

LDR 590 Decision Making (3) Examines decision making in leadership roles by extensive use of case studies. Material from other LDR courses is integrated into the study of decisions facing all types of organizations committed to leading and serving.

LDR 599 Capstone Project (3) This is an experiential learning course in which students complete real-world consulting projects for start-ups or existing organizations (business, non-for-profit, civic, or educational). All teams are guided by a coach. Competencies are developed and refined in leading consulting projects, project management, teamwork, professional interaction, and communication presentation skills. Students draw upon diverse team member strengths to deliver value on their projects. The Graduate Capstone course provides the student with the opportunity to apply the skillsets developed throughout the course of the program. The student will work in cross-disciplinary teams to develop recommendations for clients on real-world issues. This experience will allow the student to enhance his or her critical thinking, leadership, teamwork, and communication skills. The Capstone projects vary in focus and are based upon the specific needs of client and the professional development needs of the student. This experience is designed to excite, challenge, and exhilarate the student with a view of how to enhance his or her skills for professional effectiveness.

Physical Therapy (PT)

Enrollment is limited to students admitted to the Doctor of Physical Therapy program. All summer semester courses in the second and third years of the professional program are prerequisites for courses offered in the fall semester of that year. Fall courses are prerequisites for spring offerings.

PT 510 Foundations in PT (2) This course introduces the foundational proficiencies necessary for practice in the profession of physical therapy. Topics include body mechanics, elements of documentation (initial encounter, daily note, re-examination, discharge summary), effects of inactivity, foundations of therapeutic exercise, infection control, mobility training, patient/client equipment, patient/client stress, positioning and turning, posture preparation for patient/client

care, proprioceptive neuromuscular facilitation trunk and extremity patterns, range of motion exercise, stretching exercise, transfer training, vital signs, wheelchairs, and wound management. Principles from the Guide to Physical Therapist Practice are incorporated into the course and written documentation, as suggested by the guide, is utilized for specific lab activities. Students participate in initial field experiences in an acute care, inpatient rehabilitation, and pediatric facility. Prerequisite: Physical Therapy 431.

PT 510L Foundations in PT Lab () Lab that accompanies PT 510, Foundations of Physical Therapy.

PT 512 Physical Interventions (2) This lecture/lab course provides the student with an introduction to the therapeutic modality and other physical intervention skills commonly encountered in physical therapy practice. The course covers the healing process, pain mechanisms, indications/contraindication, and physiological effects of each intervention in a lab/lecture experience. The primary interventions covered include electrical stimulation, hydrotherapy, soft tissue massage, cryotherapy, thermal modalities, electromagnetic modalities, ultrasound, traction, and compression. Prerequisite: Physical Therapy 431/531.

PT 512L Physical Interventions Lab () Lab that accompanies PT 512, Physical Interventions.

PT 514 Foundations of Therapeutic Exercise (2) This course provides the student with an introduction to commonly prescribed therapeutic exercise interventions. An emphasis will be placed on understanding therapeutic exercise from a motor control perspective and how pain affects motor control and patterns of movement. Progression of fundamental exercises through the neurodevelopmental postures as they relate to common impairments found in the outpatient physical therapy setting will be covered. Students will learn the purpose of each therapeutic exercise technique and demonstrate application and critical thinking skills through practical experiences in preparation for future patient management courses. Prerequisite: Physical Therapy 431/531.

PT 514L Foundations of Therapeutic Exercise Lab () Lab that accompanies PT 514, Foundations of Therapeutic Exercise.

PT 517 Test & Measurements (2) Introduces the basic procedures for objective assessment of the musculo-skeletal system through measurement of joint range of motion (ROM) and muscle strength. Laboratory sessions will allow practice in the techniques of goniometry and manual muscle testing (MMT). Inclometers, hand held dynamometers and isokinetic testing are introduced. Prerequisites: Biology 436/536; Physical Therapy 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, 451/551. Spring.

PT 517L Tests & Measurements Lab () Introduces the basic procedures for objective assessment of the musculo-skeletal system through measurement of joint range of motion (ROM) and muscle strength. Laboratory sessions will allow practice in the techniques of goniometry and manual muscle testing (MMT). Inclometers, hand held dynamometers and isokinetic testing are introduced. Prerequisites: Biology 436/536; Physical Therapy 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, 451/551. Spring.

PT 521 Patient Management I Musculoskeletal (8) Initiates patient management sequence. Expands upon the anatomical, kinesiological, and therapeutic exercise principles presented in previous courses. Emphasis on examination and assessment of the musculoskeletal system. Common conditions and impairments are presented and reinforced through use of case examples. Appropriate interventions are addressed conceptually and performed in the laboratory. Addresses concepts and techniques related to proprioceptive neuromuscular facilitation. Medical documentation integrated into laboratory activ-

ities and assignments. Experiential opportunities included. Prerequisites: Biology 436; Physical Therapy 510, 512, 514, 532, 534, 542, and 551. Corequisite: Physical Therapy 517. Spring.

PT 521L Patient Management I Lab () Initiates patient management sequence. Expands upon the anatomical, kinesiological, and therapeutic exercise principles presented in previous courses. Emphasis on examination and assessment of the musculoskeletal system. Common conditions and impairments are presented and reinforced through use of case examples. Appropriate interventions are addressed conceptually and performed in the laboratory. Addresses concepts and techniques related to proprioceptive neuromuscular facilitation. Medical documentation integrated into laboratory activities and assignments. Experiential opportunities included. Prerequisites: Biology 436; Physical Therapy 510, 512, 514, 532, 534, 542, and 551. Corequisite: Physical Therapy 517. Spring.

PT 523 Wellness in Physical Therapy (2) This course address issues related to wellness and overall health and fitness promotion from a physical therapy perspective. Areas of learning will include introduction to common fitness and wellness programs, nutrition, balance and movement screening, and application of transition from rehabilitation to encouraging behavior change promoting lifelong wellness. This course, when completed in addition to PT 451/551 and PT 452/552, meets the criteria for the general education capstone outcome as well as one writing-intensive course. Prerequisites: Biology 436/536, Physical Therapy 410/510, 412/512, 414/514, 432/532, 434/534, 442/542, and 451/551.

PT 531 Gross Anatomy (5) For students in the physical therapy program. Emphasis on gross anatomy of the human skeleton, muscular, vascular, and nervous systems. Knowledge of gross anatomy provides students with a sound foundation upon which other courses in the physical therapy curriculum can directly or indirectly be related. Content presented in a regional approach, and includes anatomical concepts such as proper terminology, surface anatomy, and joint function. Gross anatomy is best learned in the laboratory through dissection of the human body. Course is primarily a laboratory experience. Prerequisite: Admission to the DPT program. Summer.

PT 531L Gross Anatomy Lab () For students in the physical therapy program. Emphasis on gross anatomy of the human skeleton, muscular, vascular, and nervous systems. Knowledge of gross anatomy provides students with a sound foundation upon which other courses in the physical therapy curriculum can directly or indirectly be related. Content presented in a regional approach, and includes anatomical concepts such as proper terminology, surface anatomy, and joint function. Gross anatomy is best learned in the laboratory through dissection of the human body. Course is primarily a laboratory experience. Prerequisite: Admission to the DPT program. Summer.

PT 532 Kinesiology (3) Introduces the elements and principles basic to the study of human movement. It combines the disciplines of biomechanics, physiology, and anatomy to analyze functional movements, balance, and gait. Discusses concepts of kinetics, kinematics, length-tension relationships, and the functional significance of the structure of biological tissues. Emphasizes clinical application of mechanical concepts. Prerequisites: Physical Therapy 431/531, and 435/535. Fall.

PT 532L Kinesiology Lab () Introduces elements and principles basic to the study of human movement. Includes principles of basic biomechanics as well as biomechanical behavior of biological tissues. Discusses concepts of kinetics, kinematics, length-tension relationships, and the functional significance of the structure of biological tissues. Emphasizes clinical application of mechanical concepts. Prerequisites: Physical Therapy 531, 541. Fall.

PT 533 Human Growth & Development (3) Presents typical human development from conception to death including functional changes in posture and movement. Presents processes of growth, maturation, adaptation, motor control, and motor learning. Discusses concepts of critical period, health risk, physiologic reserve, and senescence. The relationship of physical, cognitive, and social theories of human development and age-related system changes are given. Views motor behavior across life span within a social and psychological context. Prerequisite: Physical Therapy 561. Fall.

PT 534 Medical Pathology I (2) Explores consequences of disruption in normal physiological and developmental processes. Common diseases and disorders involving all major body systems addressed, as well as selected systemic diseases. Topics include diseases of infectious, immune system, traumatic, degenerative, and congenital origin. Focuses on pathogenesis, clinical presentation, laboratory findings, prognosis, medical intervention including pharmacological agents, and implications related to physical therapy practice. Prerequisites: Physical Therapy 531, 541. Fall.

PT 536 Medical Pathology II (2) This course explores the consequences of disruption in normal physiological and developmental processes. Common diseases, disorders and syndromes involving the neurological body systems are addressed, as well as selected systemic diseases. Topics include diseases of an infectious nature, immune system deficiency and degenerative origin. The course focuses on the pathogenesis, clinical presentation, laboratory findings, prognosis, medical intervention including pharmacologic agents and implications related to physical therapy practice in regards to the neurological body system. Prerequisites: PT 534. Spring.

PT 541 Clinical & Professional Issues I: Introduction (2) First in series of clinical and professional issues courses. Provides introduction to professional practice expectations of physical therapy. Provides orientation and strategies for success in the professional program. Introduction to American Physical Therapy Association. Students explore the practice of physical therapy utilizing the Guide to Physical Therapist Practice and the core values of the profession. Introduction to professional ethics and communication required in professional relationships. Prerequisite: Admission to the DPT program. Summer.

PT 542 Clinical & Professional Issues II: Adult Learning Principles (1) Second in series of four clinical and professional issues courses. Focuses on physical therapist's role as an educator and developing one's own cultural competence. Provides introduction to federal programs, including Medicare and Medicaid. Prerequisites: Physical Therapy 531, 541. Fall.

PT 551 Scientific Inquiry I: Stats & Research (2) This is the first in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include fundamentals of clinical rehabilitation research including evidence-based practice, searching the literature, and research ethics. Fundamentals of clinical research approaches include variable recognition, research validity, measurement theory, reliability, responsiveness, and validity. Basic statistical procedures to assess mean differences as well as inference testing are covered. This course, when completed in addition to PT 452/552 and PT 423/523, meets the criteria for the general education capstone outcome as well as one writing-intensive course. Prerequisites: Admission to the DPT program or permission of the instructor. Fall.

PT 552 Scientific Inquiry II: Critical Appraisal (2) This is the second in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include critical appraisal of research related the diagnostic process and intervention trials. Student complete critical appraisals of published research in a written format

and present their appraisals orally. This course, when completed in addition to Physical Therapy 451/551 and 423/523, meets the criteria for the General Education capstone outcome as well as one writing-intensive course. Prerequisites: Admission to the DPT program and Physical Therapy 451/551 or permission of the instructor. Spring.

PT 622 Patient Management II: Cardiovascular and Pulmonary (3) Applies principles of rehabilitation science to patients with disorders of the cardiovascular or pulmonary systems. Topics include pathophysiology, patient assessment, medical and surgical management of disease, and safety aspects. The course emphasizes the design, implementation, and administration of a team-based approach to cardiovascular and pulmonary rehabilitation and disease prevention. Prerequisites: Biology 536, Physical Therapy 511, 513, 532, 534, 542, and 551. Spring.

PT 622L Patient Management II: Cardiovascular and Pulmonary Lab () Applies principles of rehabilitation science to patients with disorders of the cardiovascular or pulmonary systems. Topics include pathophysiology, patient assessment, medical and surgical management of disease, and safety aspects. The course emphasizes the design, implementation, and administration of a team-based approach to cardiovascular and pulmonary rehabilitation and disease prevention. Prerequisites: All PT numbered courses prior to Spring of the first year of the professional program. Fall.

PT 623 Patient Management III: Multiple Systems (4) Studies physical therapy management of patients with amputations, integumentary and oncologic disorders, as well as acute and chronic disorders seen in the older adult. Student expected to discuss the medical, surgical, and pharmacological management of these conditions. Emphasis on problem solving with material presented in module format. Laboratory activities include balance assessment, wound assessment and management, lymphedema interventions including bandaging, geriatric screening, functional assessments, and exercise for the elderly. Concepts associated with limb amputations and prosthetic devices addressed in laboratory setting. Students participate in an observational experience in a prosthetic clinic, as well as at a health care facility specializing in wound care. Prerequisites: Physical Therapy 421/521, 422/522, 661. Fall.

PT 623L Patient Management III: Multiple Systems Lab () Studies physical therapy management of patients with amputations, integumentary and oncologic disorders, as well as acute and chronic disorders seen in the older adult. Student expected to discuss the medical, surgical, and pharmacological management of these conditions. Emphasis on problem solving with material presented in module format. Laboratory activities include balance assessment, wound assessment and management, lymphedema interventions including bandaging, geriatric screening, functional assessments, and exercise for the elderly. Concepts associated with limb amputations and prosthetic devices addressed in laboratory setting. Students participate in an observational experience in a prosthetic clinic, as well as at a health care facility specializing in wound care. Prerequisites: Physical Therapy 421/521, 422/522, 661. Fall.

PT 626 Patient Management V Neuromuscular (7) Studies physical therapy management of the patient with neurologic dysfunction, including stroke, traumatic brain injury, spinal cord injury, and multiple progressive neurologic conditions. Pathology, etiology, and natural history of these disorders are presented in tandem with their medical, surgical, and pharmacological management. Students are expected to be able to examine and evaluate patients with neurological dysfunction by selecting appropriate tests and measures, developing efficacious plans of care, implementing therapeutic interventions, and documenting using the best evidence. Students are also expected to provide a rationale for all decisions made as part of this patient man-

agement process, including selection of appropriate outcome measures. Experiential opportunities, clinical simulations, role playing, small group learning activities, and video demonstrations are used with problem-solving exercises to reinforce mastery of the material. Prerequisites: Physical Therapy 631, 661. Spring.

PT 626L Patient Management V Lab () Studies physical therapy management of the patient with neurologic dysfunction, including stroke, traumatic brain injury, spinal cord injury, and multiple progressive neurologic conditions. Pathology, etiology, and natural history of these disorders are presented in tandem with their medical, surgical, and pharmacological management. Students are expected to be able to examine and evaluate patients with neurological dysfunction by selecting appropriate tests and measures, developing efficacious plans of care, implementing therapeutic interventions, and documenting using the best evidence. Students are also expected to provide a rationale for all decisions made as part of this patient management process, including selection of appropriate outcome measures. Experiential opportunities, clinical simulations, role playing, small group learning activities, and video demonstrations are used with problem-solving exercises to reinforce mastery of the material. Prerequisites: Physical Therapy 631, 661. Spring.

PT 630 Rehabilitation Pharmacology (2) Presents basic aspects of the mechanism of action of drugs commonly employed in the practice of rehabilitation. Fundamental principles of drug action are followed by an in-depth discussion of specific drugs used. Topics include pharmacokinetics, pharmacodynamics, pharmacoeconomics, drug interactions, polypharmacy, and adverse drug reactions. Prerequisite: Physical Therapy 761.

PT 631 Neurobiology (3) Lecture-lab. Normal development of the brain and spinal cord and the gross anatomy of these structures examined. Laboratory provides opportunity to study human specimens and models to gain a three-dimensional understanding of the central nervous system during first part of course. Subsequently, pathways and associated structures that mediate general sensory, special sensory, autonomic, and somatic motor functions are described and the consequences of lesions of these pathways discussed. Prerequisite: Physical Therapy 661. Fall.

PT 631L Neurobiology Lab () Lecture-lab. Normal development of the brain and spinal cord and the gross anatomy of these structures examined. Laboratory provides opportunity to study human specimens and models to gain a three-dimensional understanding of the central nervous system during first part of course. Subsequently, pathways and associated structures that mediate general sensory, special sensory, autonomic, and somatic motor functions are described and the consequences of lesions of these pathways discussed. Prerequisite: Physical Therapy 661. Fall.

PT 632 Medical Imaging (2) Covers basic principles of diagnostic imaging pertinent to clinical practice. Familiarizes student with magnetic resonance imaging, computed tomography, ultrasonography, and plain film studies of the spine and extremities. Students view and interpret normal and abnormal images for these modalities. Student examines research related to diagnostic imaging with regard to sensitivity, specificity, and correlation with clinical findings. Prerequisite: Physical Therapy 661. Corequisite: Physical Therapy 626. Fall.

PT 641 Clinical & Professional Issues III: Ethics (1) Continuation of clinical and professional issues course sequence which encourages value clarification and ethical decision making and its relationship to health care. Various situations, dilemmas, and individuals utilized to represent topics discussed. Topics intended to develop and heighten awareness of dilemmas faced by health care providers and their patients. Lecture. Prerequisites: Physical Therapy 441/541, 442/542, 661. Fall.

PT 642 Clinical & Professional Issues IV: Advocacy and Cultural Competency (2) Designed to promote importance of political and social advocacy. Content related to professional education, outcomes assessment, and consultation addressed. Students explore profession's core value of social responsibility and provide evidence of their own involvement in the community and political arena. Prerequisite: Physical Therapy 641, 661. Spring.

PT 643 Leadership & Administration (3) Examines leadership and administration theories and practice that are specific to physical therapy and rehabilitation. Practical implementation of this information is emphasized with the students actively involved in the processes of strategic planning, marketing, supervising, budgeting, effective documentation, and balancing human and fiscal resources within health care environments. Additional leadership concepts of motivation, communication, group dynamics, managing change, and organizational development are explored in depth. Prerequisites: Physical Therapy 641, 661. Spring.

PT 644 Behavioral Psychology (3) Draws together theoretical constructs of psychology, neuropsychological, and behavioral medicine to help explain the etiology of expected behavioral and emotional responses to compromised motor function and neurologic impairment typically experienced by patients in physical therapy rehabilitation and to provide guidance in management of these patients. Prerequisite: Physical Therapy 631, 661. Spring.

PT 651 Scientific Inquiry III (2) This course is the third in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include experimental research design such as single-subject and group designs, sampling theories, descriptive and survey research, clinical case reports, qualitative research and outcomes research. Prerequisites: Physical Therapy 452/552 and Physical Therapy 661. Fall.

PT 652 Scientific Inquiry IV (2) This course is the fourth in a series of five courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. Topics include critical appraisal of research related injury risk, harm, prognosis studies and systematic reviews are emphasized. Student complete critical appraisals of published research in a written format and present their appraisals orally. Prerequisites: Physical Therapy 622, Physical Therapy 623, Physical Therapy 633, and Physical Therapy 651, or permission of instructor. Spring.

PT 661 Clinical I (5) Active participation in this fulltime clinical course emphasizes development of professional behavior, written and verbal communication skills, and evaluation, examination, and interventions previously addressed in didactic course work. Emphasizes physical therapy management of musculoskeletal conditions. Prerequisites: All 400 level physical therapy course work; completion of undergraduate degree. Summer.

PT 670 Special Topics in Physical Therapy (1) This course provides students who have a special interest in furthering their skills in the orthopedic physical therapy setting with advanced diagnostic and treatment interventions. An emphasis will be placed on identifying meaningful impairments hindering functional movement patterns and utilizing appropriate manual therapy and motor control exercise interventions to improve movement quality. Through lecture and laboratory experiences the students will be able to diagnosis movement pattern limitations and create appropriate treatment progressions as it relates to their physical therapy evaluation.

PT 724 Patient Management IV: Pediatrics (3) Studies the physical therapy management of children with developmental disabilities. Presents examination and evaluation of infants and children with spe-

cific congenital and acquired disorders. Topics covered include family centered care, service delivery models, and service delivery settings including but not limited to early intervention, schools, acute care and rehabilitation. Laboratory activities include movement analysis, handling and positioning, developmental activities, use of adaptive equipment, and use of orthoses. Actual patient and video demonstrations are used when possible along with experiential and service learning, case studies, and treatment planning activities. Prerequisites: Physical Therapy 434/534, 633, 661. Spring.

PT 724L Patient Management IV: Pediatrics Lab (0) Studies the physical therapy management of children with developmental disabilities. Presents examination and evaluation of infants and children with specific congenital and acquired disorders. Topics covered include family centered care, service delivery models, and service delivery settings including but not limited to early intervention, schools, acute care and rehabilitation. Laboratory activities include movement analysis, handling and positioning, developmental activities, use of adaptive equipment, and use of orthoses. Actual patient and video demonstrations are used when possible along with experiential and service learning, case studies, and treatment planning activities. Prerequisites: Physical Therapy 434/534, 633, 661. Spring.

PT 726 Patient Management VI: Integrated Musculoskeletal (5) Builds on previously acquired examination and intervention skills related to musculoskeletal patient management. Emphasis on examination and subsequent evaluation leading to the physical therapy diagnosis for the adult and athletic population. Covers, in detail, evidence-based interventions emphasizing manual therapy and therapeutic exercise in lecture and laboratory sessions. Includes examination and intervention models utilized in contemporary clinical practice such as functional movement training, and McKenzie. Specific techniques include muscle energy, neural mobilization, trigger points, joint mobilization/manipulation, and segmental stabilization for the spine. Therapeutic exercise and sport-specific progressions addressed in relation to commonly encountered physical impairments. Master clinicians and physicians share expertise through classroom and laboratory presentations related to each topic covered. Students learn to utilize these concepts and techniques to develop comprehensive patient management programs. Students may participate in an athletic event coverage observational experience. Prerequisites: Physical Therapy 626, 761. Fall.

PT 726L Patient Management VI: Integrated Musculoskeletal Lab (0) Builds on previously acquired examination and intervention skills related to musculoskeletal patient management. Emphasis on examination and subsequent evaluation leading to the physical therapy diagnosis for the adult and athletic population. Covers, in detail, evidence-based interventions emphasizing manual therapy and therapeutic exercise in lecture and laboratory sessions. Includes examination and intervention models utilized in contemporary clinical practice such as functional movement training, and McKenzie. Specific techniques include muscle energy, neural mobilization, trigger points, joint mobilization/manipulation, and segmental stabilization for the spine. Therapeutic exercise and sport-specific progressions addressed in relation to commonly encountered physical impairments. Master clinicians and physicians share expertise through classroom and laboratory presentations related to each topic covered. Students learn to utilize these concepts and techniques to develop comprehensive patient management programs. Students may participate in an athletic event coverage observational experience. Prerequisites: Physical Therapy 626, 761. Fall.

PT 727 Community Health (2) Expands the students' knowledge and experiences in the areas of health promotion, wellness, and autonomous care. Students will analyze and identify health needs and develop and implement a community-based health promotion,

prevention, or wellness program. Areas of learning include physical therapist's role in developing and marketing community wellness programs. Additionally, students examine health-related issues for individuals of varying races and ethnicities, national origin, and sexual orientation. Prerequisite: Physical Therapy 761. Fall

PT 728 Advanced Screening and Differential (3) Enables students to function as independent health care providers with the ability to identify signs and symptoms that fall outside the scope of physical therapy practice and to refer clients appropriately to additional medical care. Addresses strategies to identify source of various signs and symptoms. Tools used in course include questionnaires based on presenting symptoms. Questionnaires to be used as a guide in history-taking and inter-practitioner communication. Prerequisite: Physical Therapy 761. Fall.

PT 742 Clinical & Professional Issues V: Transition to Practice (2) This course is the culmination of the series of clinical and professional issues courses. The course is focused on the processes involved in the transition from student to new professional. Content includes career planning topics such as interviewing, résumé building, and professional licensure as well as opportunities and responsibilities of the new professional. The importance of becoming a high-performance, well-balanced professional will be emphasized. Prerequisite: Physical Therapy 761. Fall.

PT 751 Scientific Inquiry V (2) This is the last in a series of courses designed to prepare the graduate to practice in an evidence-based manner and to be an astute consumer and judge of scientific research. This course is completed concurrently with Physical Therapy 762, Clinical III and Physical Therapy 763, Clinical IV. Students pose answerable clinical questions germane to their current clinical environment related to diagnosis, prognosis, and intervention; search the literature for the current best evidence; and complete a critical appraisal of the evidence. Prerequisites: Successful completion of all previous courses in the DPT program or permission of the instructor. Corequisites: Physical Therapy 762, 763.

PT 761 Clinical II (5) Full-time clinical experience emphasizes examination, evaluation, and management of patients with neurologic, neuromuscular, cardiopulmonary, or integumentary disorders. Further development of professional interaction skills and written and verbal communication addressed. Prerequisites: All 600-level course work. Summer.

PT 762 Clinical III (5) Full-time clinical experience assists student in achieving clinical competence as an entry-level physical therapist. Student examines and evaluates patients, and designs, implements, and analyzes a physical therapy plan of care. Includes documentation of test results and patient progress. Can occur in an outpatient, acute care, or rehabilitation setting. Student can manage musculoskeletal, neuromuscular, neurologic, and geriatric pathologies, as well as developmental disabilities and cardiopulmonary dysfunction. Prerequisites: Physical Therapy 726, 727, 728, 731, 732, 742. Corequisites: Physical Therapy 751, 763. Spring.

PT 763 Clinical IV (5) Full-time clinical experience completes achievement of clinical competence as an entry-level physical therapist. Student examines and evaluates patients, and designs, implements, and analyzes a physical therapy plan of care as an entry-level practitioner. Professional communication and socialization further developed. Clinical experience can occur in an outpatient, acute care, rehabilitation, or specialized setting. Prerequisites: All 600 level physical therapy courses; Physical Therapy 761. Corequisites: Physical Therapy 751, 762. Spring.

Physician Assistant (PA)

Enrollment is limited to students admitted to the Physician Assistant program. All previous semester courses are prerequisites for courses offered in the following semester.

PA 510 Medical Literature and EBM (3) This course is designed to expose students to some of the most common study designs found in the medical literature (Review/meta-analysis, correlational, case series, cross-sectional, case-control, cohort, experimental, qualitative) and the associated statistical analysis within the clinical environment. A focus is to prepare students to develop and apply the principles of research design within populations to enable an independent critical appraisal of the medical literature. The second part of the class focuses on Evidence-Based Medicine and its application in clinical practice and with patients. Research skills developed in this course emphasize a systematic and scientific approach to problem solving.

PA 511 Human Physiology (4) This course focuses on the aspects of human physiology that are most important to build a basic science foundation for future clinical practice. The focus is that all disease and injury to the human body is a deviation from normal anatomy and physiology. Material will focus on normal physiology (and some anatomy) and clinically relevant pathophysiology to set a foundation for future clinical courses. Instruction will introduce how clinicians use "breaks" in homeostasis to diagnosis and treat disease. This course material is linked to PA 530 Diagnostic tests and PA 531 Medical Imaging.

PA 520 Pharmacology (4) The goal of pharmacology is to appreciate the principles of drug absorption, distribution, metabolism, excretion and the mechanisms of drugs to enable the rational use of effective agents in the diagnosis and treatment of disease. Major emphasis is placed on mechanism of action, indications, adverse effects, drug interactions.

PA 521 Behavioral Health (3) This course examines the various social and behavioral sciences domains. A focus is on diagnosis, treatment and prevention of psychiatric/behavioral conditions using the DSM-V as a guide. Additionally, normal and abnormal development across the life span is covered. This includes detection and treatment of substance abuse, human sexuality, issues in death, dying and loss; response to illness, injury and stress; principles of violence identification and prevention.

PA 530 Diagnostic Tests (3) This course focuses on common medical diagnostic tests used to help diagnose a variety of medical conditions. Students will learn normal values and abnormal values to interpret basic primary care diagnostic tests. Students will begin foundational work on using laboratory findings to build differential diagnosis, and monitoring of disorders commonly found in clinical practice. The course sequence is paired with PA 510 (Human Physiology).

PA 531 Medical Imaging (3) This course focuses on common medical imaging tests used to help diagnose a variety of medical conditions. Students will learn what normal images are and abnormal images to interpret basic primary care diagnostic pathology. Students will begin foundational work on using imaging findings to build differential diagnosis, and monitoring of disorders commonly found in clinical practice.

PA 532 12-Lead EKG (1) This course will provide the physician assistant student with the basic understanding of electrocardiography and how it is measured. Students will learn how to interpret a 12-lead electrocardiogram (EKG) for heart rates, rhythms, blocks, injury, ischemia and infarction. Students will also learn how to identify effects of drugs, electrolytes disorders, pacemakers or other systemic disease processes.

PA 540 The PA Profession (2) This course will provide the physician assistant student with instruction in the PA profession. Instruction will cover the historical development of the profession and current trends/events. Topics will include the physician-PA team relationship, political issues that affect PA Practice, documentation, professional conduct, PA certification and licensure; certification maintenance; malpractice insurance; coding and billing. The role of the PA Organizations will also be discussed.

PA 541 Medical Ethics (1) This course covers the instruction in principles and practice of medical ethics. It will provide a method and examples for identifying, analyzing, and resolving ethical issues in clinical medicine. Additionally, in-depth discussions will examine a wide variety of ethical dilemmas encountered in health and medicine. These will be used to help students apply a structured approach.

PA 542 Health Systems and Policy (3) This course discusses health care delivery systems and Health policies. The course will focus on the settings for health care delivery and people who provide health care. The course will cover key management and policy issues in contemporary health systems and the process of public policy development and its impact on health system improvement. Students will learn how to evaluate the performance of health systems. Special attention will be on the US Healthcare system. Finally, healthcare reform will be covered from a historical perspective to modern day events.

PA 544 Cultural Competence and IPE (2) This course covers the core cultural competencies for physician assistant students within the domains of knowledge, professional attitude and skills. Culture competence in health care combines the tenets of patient/family-centered care with an understanding of the social and cultural influences that affect the quality of medical services and treatment provided. This course also focuses on interprofessional education (IPE). It provides the knowledge and skills that foster professional development and team participation in the interdisciplinary healthcare environment.

PA 545 Introduction to Clinical Practice (1) This course will provide early exposures to the healthcare system, patients and professional communication. The primary tenet of this course is to prepare students for future transition into clinical thinking and clinical exposures. Students will shadow PAs and other healthcare providers to understand the various roles and responsibilities of PAs and the healthcare team. A second course objective is the introduction of lifelong learning/continuing education. Students will attend and participate in several grand round lectures provided at both Deaconess Hospitals and St. Vincent's Evansville.

PA 612 Human Structure (gross Anat) (6) This course is a cadaver dissection gross anatomy course that will be taught in conjunction / partnership with the Indiana University School of Medicine Evansville. This course will focus on normal anatomy but will emphasize those aspects of human anatomy that are most important to an understanding of patho-anatomy, physical diagnosis of disease, and an interpretation of patient clinical assessment.

PA 622 Clinical Medicine I (6) This course is the first of a two part series covering clinical medical care across the life span from prenatal through elderly to include preventive, emergent, acute, chronic, rehabilitative, palliative and end-of-life care. The course focuses on the general findings, disease etiology, clinical findings (signs and symptoms, tests, etc.), differential diagnosis and non-pharmacologic management of specific disease states. The course topics will be paired with PA 624 (Therapeutics 1), for pharmacologic interventions.

PA 623 Therapeutics I (3) This course is the first of a two part series covering therapeutic interventions on the clinical disease topics covered in the Clinical Medicine Course Series. This course is specifically paired with the disease topics covered in PA 622 (Clinical

Medicine 1). These interventions will cover therapeutic care across the life span from prenatal through elderly to include preventive, emergent, acute, chronic, rehabilitative, palliative and end-of-life care. Focus will be on drug class, indication, contraindications, dosing, adverse reactions, drug interactions, safety/monitoring, pharmacology, cost, compliance, and alternatives.

PA 624 Clinical Medicine II (6) This course is the second of a two part series covering clinical medical care across the life span from prenatal through elderly to include preventive, emergent, acute, chronic, rehabilitative, palliative and end-of-life care. The course focuses on the general findings, disease etiology, clinical findings (signs and symptoms, tests, etc.), differential diagnosis and non-pharmacologic management of specific disease states. This course topics will be paired with PA 625 (Therapeutics 2), for pharmacologic interventions.

PA 625 Therapeutics II (3) This course is the second of a two part series covering therapeutic interventions on the clinical disease topics covered in the Clinical Medicine Course Series. This course is specifically paired with the disease topics covered in PA 624 (Clinical Medicine 2). These interventions will cover therapeutic care across the life span from prenatal through elderly to include preventive, emergent, acute, chronic, rehabilitative, palliative and end-of-life care. Focus will be on drug class, indication, contraindications, dosing, adverse reactions, drug interactions, safety/monitoring, pharmacology, cost, compliance, and alternatives.

PA 632 History and Physical Exam I (3) This course is the first of a two part series teaching physician assistant students how to perform an accurate and thorough history and physical exam to be able to make diagnostic and therapeutic decisions. Students will learn medical documentation for a full H&P and incorporate this knowledge to develop diagnosis, differential diagnosis and treatment plans. Interpersonal communication skills and professionalism will be emphasized in the instruction of all patient encounters. Students will also learn about patient instruction, education and treatment plans.

PA 633 History and Physical Exam II (3) This course is the second of a two part series teaching physician assistant students how to perform an accurate and thorough history and physical exam to be able to make diagnostic and therapeutic decisions. This course focused on focused and specialty exams. Students will learn medical documentation for a full H&P and incorporate this knowledge to develop diagnosis, differential diagnosis and treatment plans. Interpersonal communication skills and professionalism will be emphasized in the instruction of all patient encounters. Students will also learn about patient instruction, education and treatment plans

PA 634 Clinical Skills (5) This course is designed to provide instruction and practice in a wide range of medical and surgical procedures. A focus is placed on primary care outpatient procedures with demonstration of proficiency. Students will also be introduced to other procedures that could be expected of by PAs in specialty settings. Students will also be exposed to curriculums of basic life support and Advanced Cardiac Life Support Courses.

PA 645 Inter Comm & Case-Based Learn (1) This course is designed to provide students with a course to integrate material "horizontally" from previous courses. Students will work on communication skills by developing a clinical case and presenting the case to their fellow classmates. Students will obtain history and physical exam information and develop a differential diagnosis through a treatment plan. Faculty functions as a guide through the process to develop both integration of clinical knowledge, but also interpersonal communications skills.

PA 750 Family Medicine (4) This course is designed to provide students with an exposure and experiences in a primary care outpatient

setting. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of family medicine/primary care as they relate to the clinical care of patients. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 751 Internal Medicine (4) This course is designed to provide students with an exposure and experiences in an internal medicine setting. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of internal medicine/primary care as they relate to the clinical care of patients. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 752 Mental Health (4) This course is designed to provide students with an exposure and experiences in the field of Mental Health. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of Mental Health as they relate to the clinical care of patients. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 753 Pediatric Medicine (2) This course is designed to provide students with an exposure and experiences in a pediatric medicine setting. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of pediatric medicine as they relate to the clinical care of patients. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 755 General Medicine (4) This course is designed to provide students with an interest in primary care an additional exposure and experiences in the field of primary care. This experience is an elective focusing on family or internal medicine for those students wanting a general medicine focus of studies. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 760 General Surgery (4) This course is designed to provide students with an exposure and experiences in a surgery setting. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of general surgery as they relate to the clinical care of patients. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans.

Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 761 Emergency Medicine (4) This course is designed to provide students with an exposure and experiences in an emergency medicine setting. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of emergency medicine as they relate to the clinical care of patients. Students will be exposed to emergency medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 762 Orthopedics (4) This course is designed to provide students with an exposure and experiences in the field of orthopedics. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of orthopedics as they relate to the clinical care of patients. Students will be exposed to orthopedic care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 763 Cardiology (2) This course is designed to provide students with an exposure and experiences in the field of Cardiology. The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of Cardiology as they relate to the clinical care of patients. Students will be exposed to cardiology medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 764 Women's Health (2) This course is designed to provide students with an exposure and experiences in the field of obstetrics and gynecology (OB/GYN). The goal is for students to gain exposure to the approach to patients in this specialty and identify the fundamental principles of Women's Health as they relate to the clinical care of women. Students will be exposed to medical care across the life-span. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 765 Elective Clinical Experience (2) This course is designed to provide students with an exposure and experiences in the medical field of their choice. The goal is for students to gain exposure to the approach to patients in a specialty that is not required and identify the fundamental principles of this specialty as they relate to the clinical care of patients. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 766 Specialty Elective Clin Exp I (2) This course is an elective course for those students wanting additional exposure to specialty

medicine of their choice. Students will choose either PA 755 or PA 766, PA 767. The goal is for students to gain exposure to the approach to patients in a specialty that is not required and identify the fundamental principles of this specialty as they relate to the clinical care of patients. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 767 Specialty Elective Clin Exp II (2) This course is an elective course for those students wanting additional exposure to specialty medicine of their choice. Students will choose either PA 755 or PA 766, PA 767. The goal is for students to gain exposure to the approach to patients in a specialty that is not required and identify the fundamental principles of this specialty as they relate to the clinical care of patients. With the guidance of the clinical preceptor, students will perform history and physical exams, obtain diagnostic testing and develop differential diagnosis/treatment plans. Students will learn to communicate effectively with medical providers, preceptor, patients and family members. Student may perform procedures at the discretion of the preceptor.

PA 770 Core Content I (1) This course is a three part course series designed to provide students with broad based clinical knowledge that may not be found within the supervised clinical practice encounters (SCPEs), but is needed for successful clinical practice. It also serves to review material previously taught within the curriculum that is required for physician assistant practice. Finally, this course series serves to evaluate students on the PA Program competencies and prepare students for the Physician Assistant National Certifying Exam (PANCE).

PA 771 Core Content II (1) This course is a three part course series designed to provide students with broad based clinical knowledge that may not be found within the supervised clinical practice encounters (SCPEs), but is needed for successful clinical practice. It also serves to review material previously taught within the curriculum that is required for physician assistant practice. Finally, this course series serves to evaluate students on the PA Program competencies and prepare students for the Physician Assistant National Certifying Exam (PANCE).

PA 772 Core Content III (1) This course is a three part course series designed to provide students with broad based clinical knowledge that may not be found within the supervised clinical practice encounters (SCPEs), but is needed for successful clinical practice. It also serves to review material previously taught within the curriculum that is required for physician assistant practice. Finally, this course series serves to evaluate students on the PA Program competencies and prepare students for the Physician Assistant National Certifying Exam (PANCE).

PA 773 Interprofessional Educ Exp (2) This course is designed to provide students with an exposure and experiences in a profession other than their own to gain exposures to another member of the medical team. The goal is for students to experience the approach to patients from a different health team perspective and how care received from this health care team member complements the traditional care a PA would provide.

PA 774 Summative Experience (2) This course is designed to assess the student's integration of the PA Program's curriculum, competencies and preparedness to sit for the National Boards and enter clinical practice. Students must show a minimum entry level competency in primary care medicine knowledge, primary medicine clinical skills, and professionalism to pass this course. This course is an accredita-

tion requirement for program endorsement of students, and must be passed to be eligible to sit for the PANCE exam.

Psychology (PSYC)

PSYC 526 Adv Child & Adolescent Development (3) Examines developmental stages from conception through adolescence, giving special emphasis to physical, cognitive, social, and emotional aspects related to maturational as well as learning processes. This course builds upon Psychology 226 (Child and Adolescent Psychology) but delves further into each topic so that each student gains a greater appreciation for and understanding of the concepts and processes involved in the development of children. Prerequisites: Psychology 226 or admission into a master's program or permission of the instructor. Summer, offered periodically.

Public Health (PH)

PH 501 Epidemiology (3) This course covers applications of epidemiologic methods and procedures and the study of the distribution and determinants of health and diseases, morbidity, injuries, and mortality in populations. Epidemiologic methods for the control of conditions such as infectious and chronic diseases, mental disorders, community and environmental health hazards, and unintentional injuries are discussed. Other topics include quantitative aspects of epidemiology, for example, data sources, measures of morbidity and mortality, evaluation of association and causality, and study design. Spring.

PH 509 Environmental Health (3) Environmental health is concerned with the biological, chemical, and physical influences on human health. The course will examine topics such as environmental health determinants, general mechanisms of toxicity, genetic, physiologic, and psychosocial factors related to environmental health, environmental risk assessment methods, federal and state regulatory guidelines and programs, environmental justice, risk communication, and prevention and management of environmental hazards. Fall.

PH 515 Health Behavior (3) Health Behavior is an overview of the health behaviors contributing most dramatically to increased morbidity and mortality in the United States. The course emphasizes public health interventions, theoretical models, and strategies to promote health behaviors and discourage unhealthy behaviors. The course examines consequences, patterns, risk factors, and change/interventions for each behavior or problem. Behaviors are examined from multiple perspectives (e.g. individual, social, environmental) and with a systems perspective in mind, illuminating the interconnecting influences on behaviors. Health behavior and behavior change interventions are presented in the context of current research and theory. The course also examines the role of health disparities, public health policy, current debate, health behavior theory, and emerging research. Fall.

PH 525 Biostatistics (3) This course will cover biostatistical methods and applications related to public health. Topics will include descriptive statistics, probability theory, and a wide variety of inferential statistical techniques that can be used to make practical conclusions about empirical data. Learned statistical knowledge will be applied to understanding and designing research studies. Fall and Spring.

PH 530 Health Economics (3) The course is designed to introduce students to the field of Health Economics. The provision and production of health care have different characteristics and incentives from other consumer goods making health related markets a unique topic for study. Topics that will be examined include economic concepts, why health is different from other goods, aspects of the U.S. health care market, health care in other countries, health care reform, and economic evaluation techniques. Fall.

PH 535 Public Health Law & Ethics (3) The course is focused on the use of law and policy tools to promote access to healthy living conditions as an important determinant of population health and community well-being. Priorities and opportunities will be identified for public health law and policy interventions that seek to characterize, prevent, and ameliorate risks to population health. Legal powers and duties of the state will be discussed. We will also discuss individual rights as limitations on the power of the state to act in furtherance of the common good. Through case studies and simulations on topics such as sexually transmitted infections, tobacco control, obesity, exposure to environmental hazards, and public health emergencies, students will engage in an experiential and problem-based study of law as a tool for promotion of population health, well-being, and equity. Fall.

PH 540 Strategic Mngt in Health Prog (3) The course is designed to provide students with the tools they need to take their place as leaders of public health or healthcare organizations. The course introduces concepts of governance, strategic thinking, systems thinking, and implementation science. Students will learn the principle tenets of governance, strategy, and financial leadership. Spring.

PH 542 Health Systems & Policy (3) The aim of this course is to provide students with an overview of the U.S. health care system, its components, and the policy challenges created by its organization. The course will focus on the major health policy institutions and important issues that cut across institutions, including private insurers and the federal/state financing programs. Attention will also be given to disparities in access to care, the role of pharmaceuticals in health care and the pricing and regulation of the pharmaceutical industry, the quality of care, the challenges of long-term care, and the aging of the population, and the drivers of cost growth. Spring.

PH 543 Population-Based Health (3) This course presents selected information, concepts, and methods from the field of public health. Topics concerning the history, organization, financing, and services of the public health system are discussed. All topics are presented from a population-based perspective. Summer.

PH 547 Survey Research Methods (3) The course provides an introduction to population surveys typical in descriptive and analytic epidemiologic research. The course has a strong emphasis on telephone questionnaire methods, but also includes other data collection modes and their relative advantages and disadvantages. Survey sampling, survey planning and data collection, computer interviewing and data management techniques for research surveys are emphasized. The course includes generalized methods and didactic materials as well as case studies. Spring.

PH 580 Programs, Problems, & Policies in Public Health (3) This course examines the myriad of programs and policies in public health via a developmental approach to learning about health problems. The course will cover a variety of topics, including state programs and policies, maternal and infant health, program planning, research, monitoring, and advocacy. Spring.

PH 590 Integrative Experience (3) This class serves as the capstone course for public health students. It provides an opportunity for students to work on public health practice projects that are of particular interest to them. The goal is for students to synthesize, integrate, and apply the skills and competencies they have acquired to a public health problem that approximates a professional practice experience. Spring.

PH 598 Public Health Internship (3) A comprehensive and integrated application of the curriculum required by the MPH program which allows students to demonstrate professional competency in public health within a practice setting. The internship is an integral part of

the MPH curriculum. It is intended to broaden the student's public health perspectives and provide experience in applying the theory and content learned in didactic courses in public health practice. It is therefore expected that through the internship experience the student will have the opportunity to interact with public health professionals and participate in activities that constitute public health. It is further expected that the student will be exposed to various paradigms and ways to solve public health problems, with experiences that reinforce communication principles, use of relevant information technology, sensitivity to diversity and cultural issues, and enhance a student's leadership, program planning, and systems thinking skills. Fall, Spring and Summer.

Public Service Administration (PSA)

Course credits apply only to the PSA program.

Enrollment is limited to students admitted to the public service administration master's degree program.

PSA 505 Public Service Leadership (3) Leadership that grows from shared vision, teamwork, and communication is essential for success in public service. Focuses on the requisite knowledge, skills, and dispositions for effective leadership. Students learn leadership theories and principles and assess their own leadership styles for a practical understanding of application of concepts.

PSA 506 Ethics & Jurisprudence (3) Emphasizes legal and ethical processes and their application to public service organizations, administrators, staff, and employees. Includes ethical dimensions of the decision making process and current ethical issues in public service.

PSA 507 Applied Research and Program Evaluation (3) Examines research principles and methods as they contribute to organizations committed to public service. Provides experience in developing a research proposal and formal critique of research literature.

PSA 508 Social Justice and Diversity (3) Diversity dynamics will be considered from the individual group, and organization viewpoints. Focuses on attitudes regarding diversity as well as skills for promoting and increasing diversity and working with diverse populations.

PSA 512 Organizational Behavior (3) Uses various organizational, managerial, and behavioral theories, concepts, and principles in analyzing, diagnosing, predicting, and guiding human behavior within organizations committed to public service. Emphasizes motivation, leadership, change, communication, personality, group dynamics, and organization development.

PSA 514 Management Theory and Human Resources (3) The study of management theory and practice as applied by managers of public service based organizations. Emphasizes analysis of the manager's role, interactions with people, the organization, and the environment. Special emphasis on human resources issues.

PSA 516 Information Systems (3) Provides an understanding of the concepts and applications of information systems used in the management of organizations committed to public service.

PSA 520 Public Service Marketing (3) Integrates longrange goal planning with dimensions of marketing for organizations committed to public service. Concepts, techniques, and theories used in the planning and management of marketing in the public service organizations.

PSA 528 Public Service Finance (3) Focuses on the acquisition, allocation, and management control of financial resources within organizations. Includes cost analysis, financial position analysis and strategies, reimbursement, pricing policies, budgeting, capital expenditure, analysis of financial reports, and informal and external controls.

PSA 543 Grant Writing (3) Provides information targeted to increase administrator effectiveness in identifying external funding sources, developing needs into coherent proposal ideas, and writing successful proposals. Combines instruction and practical exercises to take participants through grant proposal preparation.

PSA 567 Measurement and Statistics (3) Focuses on the analysis of data common to development of business plans or grant proposals. Includes data description, elements of probability, distribution of random variables, estimation and confidence intervals, binomial and normal distributions, hypothesis testing, contingency tables, regression analysis, and use of SPSS program to analyze data.

PSA 590 Decision Making (3) Examines decision making in public service administration by extensive use of case studies. Material from other PSA courses is integrated into the study of decisions facing all types of organizations committed to public service.

Sociology (SOC)

SOC 586 Death, Dying, Bereavement (3) This graduate course explores thanatology - the study of death - using a sociological lens. Examines attitudes and behaviors toward dying, death, and bereavement from a variety of theoretical and comparative perspectives. Topics of study include: cultural traditions, rituals, practices, and attitudes toward death; self-awareness and value identification concerning death and dying; grief and bereavement; the impact of death and dying across the life span; and end-of-life planning.

Faculty, Senior Administrators, Trustees

Faculty

- Randy L. Abbott (1988) *Research Librarian/Professor*, MA, University of Southern Florida
- Manahari Adhikari (2016) *Clinical Assistant Professor of First Year Seminar*, PhD, Northern Illinois University
- Katie Aldred (2016) *Assistant Professor of Biology*, PhD, Vanderbilt University
- Yasser Alhenawi (2010) *Associate Professor of Finance*, PhD, University of New Orleans
- James H. Allen (2006) *Associate Professor of Civil Engineering*, PhD, University of Cincinnati
- Patricia Andueza (2011) *Associate Professor of Spanish*, PhD, Ohio State University
- Atefeh Yazdanparast Ardestani (2012) *Professor of Marketing*, PhD, University of North Texas
- Joe Atkinson (2015) *Digital Media Specialist in Residence*, MA, University of Evansville
- Margaret E. Atwater-Singer (1997) *Access Service Librarian and Professor*, MLS, Rutgers University
- Mohammad K. Azarian (1985) *Professor of Mathematics*, PhD, St. Louis University
- Robert Baines (2014) *Assistant Professor of English*, PhD, Trinity College, Dublin
- Severine Bates (2016) *Assistant Professor of French*, PhD, University of Minnesota
- Omer Bayar (2010) *Associate Professor of Economics*, PhD, University of Tennessee
- Anthony F. Beavers (1991) *Professor of Philosophy*, PhD, Marquette University
- Lora A. Becker (1999) *Professor of Psychology*, PhD, State University of New York
- Davies E. Bellamy (1991) *Associate Professor of Education*, PhD, Indiana State University
- James J. Berry (1978) *Associate Professor of Anthropology*, PhD, Indiana University
- Dick K. Blandford (1975) *Associate Professor of Electrical Engineering*, PhD, University of Illinois
- Paul B. Bone (2004) *Associate Professor of Creative Writing*, MFA, University of Arkansas
- Stephen Boulmetis (2010) *Associate Professor of Theatre (Lighting Design)*, MFA, Boston University – School for the Arts
- Jeffrey J. Braun (1984) *Professor of Physics*, PhD, Oklahoma State University
